MINISTRY OF LABOUR AND

NATIONAL SERVICE

8 St. James's Square, S.W.1

[Whitehall: 6200]

The office of Minister of Labour was created by the *New Ministries and Secretaries Act, 1926*, which

provided for the transfer to the Ministry of Labour of certain of the duties of the Board of Trade. Under the *Minister of National Service Order, 1939*, the title of the Ministry was changed to the Ministry of Labour and National Service and the offices of Minister of Labour and National Service are held by the same Minister. The principal functions of the Ministry of Labour and National Service are: (1) Administration of the *Employment and Training Act, 1948*, and provision of facilities and services for the purposes of assisting persons to select, fit themselves for, obtain and retain employment suitable to their age and capacity, of assisting employers to obtain suitable employees, and generally for the purpose of promoting employment in accordance with the requirements of the community, including the operation of, (a) a national system of Employment Exchanges; (b) the Technical and Scientific Register, the Professional and Executive Register and Nursing Appointments Offices; and (c) Government schemes for vocational training. (2) Central administration through the Central Youth Employment Executive of a comprehensive Youth Employment Service, which may be provided locally either by the local education authority under a scheme approved by the Minister or the Ministry's local office. (3) Collection and publication of labour statistics including statistics of manpower, employment and unemployment, wage rates, earnings, hours of labour, retail prices (including compilation of the index of retail prices), household expenditure, industrial disputes, employers' and employees' organizations and industrial accidents and diseases, publication of *Ministry of Labour Gazette*. (4) General employment policy and co-operation with other Government Departments on such matters as the distribution of industry and the maintenance of a high and stable level of employment. (5) Registration, medical examination and calling-up of men under the *National Service Acts*; deferment and postponement of call-up; reinstatement in civil employment. (6) Re-settlement in civil employment of men called up under the *National Service Acts* or released from service in the Regular Forces. (7) Administration of the *Disabled Persons (Employment) Acts, 1944 and 1958*, to enable disabled persons to secure employment, including provision where necessary of courses of industrial rehabilitation and vocational training. (8) Administration and enforcement of the *Factories Acts 1937 to 1959*, and the *Employment of Women and Young Persons Act, 1936*, and dealing generally with questions concerning the safety, health and welfare of workpeople in factories and certain other premises. (9) Administration of the *Anthrax Prevention Act, 1919*, and of the Government Wool Disinfecting Station at Liverpool. (10) Dealing with industrial relations, i.e. questions affecting relations between employers and employed, in particular with: (a) assistance in the prevention or settlement of industrial disputes, including the administration of the *Conciliation Act, 1896*, the *Industrial Courts Act, 1919*, and the *Terms and Conditions of Employment Act, 1959*; (b) administration of the *Wages Councils Acts, 1945 to 1959*; (c) administration of the *Baking Industry (Hours of Work) Act, 1954*, and (d) encouragement of good personnel management and of arrangements for joint consultation in industry. (11) Employment of foreign workers in Great Britain. (12) Dealing with labour policy in the international field, including relations with the International Labour Organization, and with overseas questions concerning labour and employment. (13) Agency work for other Government Departments in connexion with National Insurance, National Assistance, repayment of income tax to unemployed persons and the issue of passports.

The gross amount for the services administered by the Ministry (Parliamentary Vote, Class VI. 9) was estimated at £27,295,900 for the year ending March 31, 1960, reduced by Appropriations in Aid

to a net sum of £21,535,000. The gross estimate is made up as follows: Salaries, £17,768,700 for headquarters departments and outstations; £383,000 for travelling, etc.; expenses: £320,000 for telegraph and telephone services and £96,300 for incidental administrative expenses; £57,200 for adjudication, advisory services, etc.; £7,370,000 for employment, training and rehabilitation, including £3,837,000 for special facilities for seriously disabled persons; £336,000 for expenses in connexion with National Service; £570,000 for repayment of loan charges in respect of employment schemes; £279,500 in connexion with the International Labour Organization, including a subscription to the Organization of £268,500; and £15,200 for other services. The appropriations in aid amounting to £5,660,900 include estimated repayments of some £5,038,900 for agency services.

H.M. LAND REGISTRY

Lincoln's Inn Fields, W.C.2

[Holborn: 3488]

H.M. Land Registry was established in pursuance of a recommendation of a Royal Commission by the Land Registry Act 1862. The aim of the Act was to render dealings with land more simple and economical by establishing a State register of land-owners who voluntarily submitted the titles to their land for examination and approval by the Registrar on behalf of the State. The Registry was reformed by the Land Transfer Act, 1875, which, while making many changes in the system, continued its voluntary basis. In 1897 the Land Transfer Act introduced the principle of compulsory registration, and four Orders in Council under that Act between 1898 and 1902 made the system compulsory on sale in the administrative county of London. By further Orders registration was made compulsory on sale in 1925 in Eastbourne; in 1928 in Hastings; in 1936 in the administrative county of Middlesex; in 1938 in the County Borough of Croydon; in 1952 in the administrative County of Surrey; in 1954 in the City of Oxford; in 1956 in the County Borough of Oldham; in 1957 in the Medway area of Kent and in the County Borough of Leicester; and in 1958 in further areas of Kent and the City of Canterbury. The Land Registration Act, 1925, consolidated the previous Acts, and made such changes in the system as the experience of a generation had shown to be necessary. The keynote of the system is that the machinery for the purchase and sale of land is assimilated to that for stocks and shares. Absolute titles granted by the Land Registry are guaranteed by the State. Simple forms, analogous to those used on transfers of stocks and shares, are provided. The cost of buying, selling or mortgaging registered land is much less than the cost in the case of unregistered land. It is open to any County Council or Council of a County Borough to apply to the Privy Council for an order making registration of title compulsory in its area. The Land Registry is administered under the Lord Chancellor by the Chief Land Registrar, who also controls the Land Charges Department under the Land Charges Act, 1925, and the Agricultural Credits Act, 1928 (Sec. 9).

NATIONAL CENTRAL LIBRARY

Malet Place, W.C.1

[Euston: 6262]

Incorporated by Royal Charter and maintained by annual grants from the Treasury, Municipal and County Authorities, University and special libraries, Adult Education bodies, and public Trusts.

The Library is the national centre for the loan of books (other than fiction and students' text-books) and periodicals to readers in all parts of the British Isles, through their public, university, or other library; and also to and from foreign libraries through their national centres. It is able to draw on over 21,000,000 books in nearly all the principal British libraries. Other work undertaken by the Library includes loans to organized classes of adult students; and the recording of duplicates and discarded books and periodicals and their distribution to appropriate libraries at home and abroad (for which work a special department, the British National Book Centre, is responsible).

Applications to borrow books must be made through the reader's library and not directly to the National Central Library.

Librarian and Secretary to the Trustees, S. P. L. Filon.

Deputy Librarian, I. P. Gibb.

SCOTTISH CENTRAL LIBRARY

THE BRITISH MUSEUM

Bloomsbury, W.C.1

[Museum: 1555]

Exhibitions.—Manuscripts, Printed Books, Egyptian, Assyrian, Greek and Roman Sculptures, Romano-British, Prehistoric and Oriental Antiquities and Ethnography (Main Entrance, Great Russell Street, W.C.1). Select Exhibition of works of art and antiquities in the King Edward VII Gallery. Prints and Drawings, Oriental Paintings, Egyptian and Babylonian antiquities (North Entrance, Montague Place, W.C.1). Open weekdays 10 to 5 and Sundays 2.30 to 6. Closed on Good Friday and Christmas Day. Admission free.

Reading-room open daily to readers, from 9 to 5, and Newspaper Room (at Colindale), from 10 to 5 throughout the year, except Good Friday, Christmas and Boxing Day and Sundays. Closed for cleaning the week beginning with first Monday in May. Long-period tickets of admission for purposes of research and reference which cannot be carried on elsewhere, are granted on written application beforehand to the Director. The applicant should state abode, business or profession and full particulars of purpose, and should send a recommendation from a person of recognized position.

The British Museum may be said to date from 1753, when Parliament granted funds to purchase the collections of Sir Hans Sloane and the Harleyan manuscripts, and for their proper housing and maintenance. The building (Montague House) was opened in 1759. The present buildings were erected between 1823 and the present day, and the original collection has increased to its present dimensions by gifts and purchases, and by the operation of the Copyright Acts. The administrative expenses were estimated at £666,843 in 1959-60, and were met by a vote under "Education and Broadcasting," Class IV of the Civil Estimates.

THE BRITISH MUSEUM (NATURAL HISTORY)

Cromwell Road S.W.7
 [Kensington: 6323]

Open free on week-days (except Good Friday and Christmas Day) 10 to 6, and on Sundays from 2.30 to 6.

Official Guide-lecturers conduct visitors round some portion of the collections at 3 p.m. daily on weekdays free of charge, and their services are available at other times for special parties (also free of charge) by arrangement with the Director. Students are admitted daily for the special study of the collections, and to make drawings and take photographs of specimens, under special regulations to be obtained from the Director. The Museum issues a large variety of publications, comprising scientific monographs and catalogues, popular guide-books and manuals, instructions for collectors, economic pamphlets, and picture post-cards, both monochrome and in colour.

The Natural History Collections were removed from the British Museum (Bloomsbury) to South Kensington in 1881-85, the new Museum being opened to the public in 1881. The collections comprise all branches of natural history. During the war the Museum was badly damaged and nearly all the exhibition galleries were devastated but apart from the botanical gallery, they have now been re-opened to the public. The Zoological Museum, Tring [Tring: 2255], bequeathed by the second Lord Rothschild, has formed part of the British Museum (Natural History) since 1938.

The administrative expenses were estimated at £464,016 in 1959-60.

THE LONDON MUSEUM

Kensington Palace, W.8

[Western: 6325]

The Museum illustrates the history of London from the earliest times to the present. It has good collections of archaeological remains, topographical pictures and models, costumes and royal relics. Originally at Kensington Palace, the collections were transferred to Lancaster House in 1914. After the second world war, when most of Lancaster House was converted for use solely as a centre for government hospitality, the Museum was granted temporary accommodation for its exhibition and offices at Kensington Palace by King George VI. In 1956 the State Apartments at Kensington Palace were reopened to the public under the administrative control of the London Museum. The Apartments contain pictures from the royal collections, royal costumes and furniture formerly belonging to Queen Mary.

Director and Accounting Officer, D. B. Harden, O.B.E., F.S.A. £2,500
Asst. Keepers, M. R. Holmes, F.S.A.; B. W. Spencer, F.S.A.; J. T. Hayes.

THE SCIENCE MUSEUM

South Kensington, S.W.7

[Kensington: 6371]

Open free on weekdays 10 to 6; Sundays 2.30 to 6. Closed on Good Friday and Christmas Day.

For Science Museum Library, see below.

The Science Museum, which is the National Museum of Science and Industry, was instituted in 1853 under the Science and Art Department as a part of the South Kensington Museum, and opened in 1857; to it was added in 1883 the Collections of the Patent Museum. In 1909 the administration of the Science Collections was separated from that of the Art Collections, which were transferred to the Victoria and Albert Museum. The Collections in the Science Museum illustrate the development of science and engineering and related industries.

The seven departments into which the exhibits are grouped are shown below.

The administrative expenses of the Museum and Library were estimated at £262,594 in 1959-60 to be met by a vote under Education.

THE VICTORIA AND ALBERT MUSEUM

South Kensington, S.W.7

[Kensington: 6371]

Hours 10 to 6 (weekdays and Bank Holidays); Sundays, 2.30 to 6. Admission Free. Art Library (10 to 6) and Print Room (10 to 5) open free (closed Sunday). Is a museum of all branches of fine and applied art, under the Ministry of Education.

The Museum descends direct from the Museum of Manufactures (later called Museum of Ornamental Art) opened in Marlborough House in 1852. The nucleus was a selection of objects bought for £5,000 from the Great Exhibition of 1851 which, with objects illustrating historic styles, was to be devoted to the "application of fine art to the objects of utility" and "the improvement of the public taste in design." The Museum was moved in 1857 to become part of the collective South Kensington Museum. Most of the older buildings date from 1860-82; the new parts from 1899-1909. The South Kensington Museum was re-named the Victoria and Albert Museum in 1899, and only became an exclusively art museum in 1909. Besides comprising the departments named below, the Museum contains the national collections of post-classical sculpture (excluding modern), of British miniatures and of water-colours, the National Art Library, and of art lantern slides. The branch museum at Bethnal Green (composed of a building formerly at South Kensington) was opened in 1872. The Victoria and Albert Museum also administers the Wellington Museum (Apsley House); Ham House, Richmond and Osterley Park, Middlesex.

THE COMMONWEALTH INSTITUTE

South Kensington, S.W.7

[Kensington: 3264]

The Institute was founded in 1887 as a memorial of Queen Victoria's Golden Jubilee. Its primary purposes were firstly, to give scientific and technical advice in the interests of the economic development of the natural resources of the Empire, and secondly educational, to promote wider public knowledge of the life, scenery and industries of the Commonwealth.

Since April 1, 1949, as a direct result of recommendations adopted by the Commonwealth Scientific Conference of 1946, the scientific and technical activities of the Institute have been transferred to the control of the Secretary of State for the Colonies; the Institute retaining its educational functions. From the same date the Minister responsible to Parliament for the administration and finance of the Institute is the Minister of Education, who includes in the Estimate for his Department an annual grant-in-aid from Parliament to supplement the annual grants to the Institute from Overseas Empire Governments and the annual income from its invested endowment funds. The name was changed from Imperial Institute to Commonwealth Institute by the *Commonwealth Institute Act, 1958*.

The management of the Institute is vested in a Board of Governors of which the Earl of Dundee is the Chairman and Sir Griffith Williams, K.B.E., C.B., Vice-Chairman. Membership of the Board consists of the High Commissioners in London of the Commonwealth Governments and of representatives of Colonial, educational, cultural and commercial interests as appointed by the Minister. United Kingdom Government Departments are represented by Assessors.

IMPERIAL WAR MUSEUM

Lambeth Road, S.E.1

[Reliance: 2636]

Open free daily (except Good Friday and Christmas Day), 10 a.m.; Sundays, 2 p.m. Closes at 6 p.m.

The Museum was founded by the War Cabinet in March, 1917, and established by Act of Parliament in 1920 as a memorial of the effort and sacrifice made by the men and women of the Empire during the Great War of 1914-1918 and to provide a record and a place for the study of that period. On the outbreak of the Second World War in 1939, the Trustees were authorized to collect exhibits and records of the War of 1939-1945 on similar lines. In 1953 it was decided that the Museum should concern itself with all operations in which British Forces have been, or shall be, engaged since August 1914. The exhibition galleries contain relics, models, weapons, uniforms, badges, and medals and record the achievements of the three fighting services and the war effort and experiences of the home front. There are also picture galleries containing works by prominent British artists who recorded the wars in paintings, drawings, or sculpture. The reference library contains more than 70,000 printed and manuscript works in many languages, dealing with all aspects of the military, social, political and economic history of the wars, and files of the many service journals and other periodicals published during those periods. The Photographic Department contains all the official and many unofficial war photographs, to a total of over 3,000,000 prints. Prints may be purchased and reproductions authorized. The official cinematograph war films are also in the Trustees' custody.

NATIONAL PARKS COMMISSION

3 Chester Gate, Regent's Park, N.W.1

[Welbeck: 0366]

The National Parks Commission, a body corporate, was established under the National Parks and Access to the Countryside Act, 1949. Members are appointed by the Minister of Housing and Local Government, to whom the Commission reports annually. This report is laid before each House of Parliament.

The Commission is entrusted with the task of designating National Parks and areas of outstanding natural beauty in England and Wales. The former are extensive tracts of country affording facilities for open-air recreation. The Parks, when approved by the Minister of Housing and Local Government, are administered by Local Planning Authorities, subject to a general supervision by the Parks Commission. Ten have been established—the Peak District, Lake District, Snowdonia, Dartmoor, Pembrokeshire Coast, North York Moors, Yorkshire Dales, Exmoor, Northumberland and the Brecon Beacons, covering in all some 5,246 square miles. Areas in the Gower Peninsula, Lleyn, the Quantock Hills, the Northumberland coast, the Surrey hills, Shropshire hills, Cannock Chase and Dorset have been established as areas of outstanding natural beauty.

The Commission is also required to report to the Minister of Housing and Local Government on long-distance routes, along which there will be continuous right of way for walkers and riders, e.g. the Pennine Way; to make representations to Ministers or Local Planning Authorities on any proposed development likely to be prejudicial to the natural beauty of any area; and to provide information services for the public.

THE NATURE CONSERVANCY

19, Belgrave Square, S.W.1
[Belgravia: 3441]

The Nature Conservancy was set up by Royal Charter in March, 1949, and is directly responsible to the Lord President of the Council as Chairman of the Privy Council Committee for Nature Conservation. The National Parks and Access to the Countryside Act, 1949, provided the necessary powers for the proper discharge of the responsibilities laid on the Conservancy.

The duties laid upon the Conservancy by the Royal Charter and the 1949 Act are—the provision of advice; the practice of conservation; and the stimulation and conduct of research. All three functions are intimately connected: advice and practice seek to apply the results of research in a field that is still largely unexplored; research aims at a better understanding of the general behaviour of natural and semi-natural communities of plants and animals; and this entails the acquisition and full control of a representative series of Reserves, as well as the establishment of laboratories.

In Great Britain seventy-six Nature Reserves, covering some 135,000 acres, had been declared up to July 10, 1959. The Conservancy has powers under Part III of the National Parks and Access to the Countryside Act, 1949, to make bylaws for the protection of National Nature Reserves.

Research Stations have been set up at Merlewood, Grange-over-Sands, and Furzebrook, Wareham, and Field Stations at Moor House, Westmorland, and Anancaun, Ross-shire, where long-term ecological research is undertaken into such problems as the relation of vegetation to soils and climates, peat growth, effects of grazing and of moor burning, the spread of myxomatosis, coastal erosion and roadside spraying. Grants are made for research and the Conservancy awards a number of post-graduate studentships annually.

Reports and publications are issued through H.M. Stationery Office and are obtainable from any bookseller or from the above address.

Chairman, Arthur Bryce Duncan.

ROYAL OBSERVATORIES

Royal Greenwich Observatory

[Herstmonceux: 3171]

The Royal Observatory, Greenwich, was established by Charles II in 1675. When international agreement on the selection of a zero or prime meridian from which the longitudes of all places should be measured was sought in 1884, the choice of the meridian through the transit circle of the Royal Observatory was a recognition of the importance of the contributions of the Observatory to astronomical and nautical science. With the growth of London, there has been a progressive deterioration in the conditions for astronomical observations at Greenwich, and the installation of brighter street lighting has made the skies at night too bright for long exposure photography. The removal of the Observatory from Greenwich to Herstmonceux Castle, Sussex, is now complete. The Castle, built in 1440 and carefully restored and modernized in recent years, is one of the finest early brick buildings in England. It was built by Sir Roger de Flennes, Treasurer to the Household of Henry VI. The removal entails no change in the prime meridian.

PAYMASTER GENERAL'S OFFICE

Russell Square House, Russell Square, W.C.1

[Museum: 8646]

The Paymaster General's Office was formed by the consolidation in 1835 of various separate pay departments then existing, some of which dated back at least to the Restoration of 1660. Other offices were incorporated in 1848. Its function is that of paying agent for the different Government Departments, other than the Revenue Departments. The majority of its payments are made through banks, to whose accounts the necessary transfers are made at the Bank of England. The payment of pensions is an important feature of its work. The Establishment expenses were estimated at £474,820 in 1959-60.

NATIONAL INSURANCE ADVISORY COMMITTEE

10 John Adam Street, W.C.2

[Whitehall: 9066]

The National Insurance Advisory Committee was appointed on Oct. 28, 1947, under the National Insurance Act, 1946, to give advice and assistance to the Minister in connection with the discharge of his functions under the Act, and to perform any other duties allotted to it under the Act. These other duties include the consideration of preliminary drafts of regulations to be made under the National Insurance Acts, and of representations received thereon. When the regulations are laid before Parliament, the Committee's Report on the preliminary draft is laid with them, together with a statement by the Minister showing what amendments to the preliminary draft have been made, what effect has been given to the Committee's recommendations, and, if effect has not been given to any recommendation, the reasons for not adopting it. The Minister of Pensions and National Insurance may also refer to the Committee for consideration and advice any questions relating to the operation of the Acts (including questions as to the advisability of amending the Acts).

Chairman, Sir Ifor Evans.

WORKMEN'S COMPENSATION SUPPLEMENTATION BOARD

PNEUMOCONIOSIS AND BYSSINOSIS BENEFIT BOARD

Thames House South, Millbank, S.W.1
[Abbey: 1200]

The Workmen's Compensation Supplementation Board was appointed on July 11, 1951, under the Workmen's Compensation (Supplementation) Scheme, 1951, to consider and determine all claims arising and any other questions assigned to it under the scheme. The scheme deals solely with persons who have rights under the Workmen's Compensation Acts on account of an accident which happened (or industrial disease contracted) before January 1, 1924. It gives them allowances out of the Industrial Injuries Fund to bring their compensation up to about the level it would have stood at if the later Workmen's Compensation Acts had applied to them.

The Pneumoconiosis and Byssinosis Benefit Board was appointed on March 10, 1952, under the Pneumoconiosis and Byssinosis Benefit Scheme, 1952, to consider and determine all claims arising and all questions assigned to it under the scheme. The scheme provides for payments out of the Industrial Injuries Fund for disablement or death from pneumoconiosis or byssinosis in certain cases which are not covered by either the Workmen's Compensation Acts or the Industrial Injuries Act. The Board also deals with claims arising under the Industrial Diseases (Miscellaneous) Benefit Scheme, 1954, which makes corresponding provision for uncompensated cases of certain other industrial diseases of a malignant nature.

Chairman, R. F. Levy, Q.C.

Deputy Chairman, D. M. Campbell, Q.C.

Members, E. Hall; H. Hewitt, O.B.E.; J. C. Hobbs; R. Pilkington; W. C. Stansfield; Miss D. A. Wade.

THE POST OFFICE

St. Martin's-le-Grand, E.C.2

[Headquarters: 1234]

Crown services for the conveyance of Government letters and despatches by posts or stages were set up under a Master of the Posts about 1516. Public correspondence was officially accepted for the first time for conveyance by these services at fixed postage rates in 1635, but they were still under direct Crown control. In 1657 a Post Office was created under a Postmaster-General by Oliver Cromwell, and responsibility for the carrying of all letters was thus transferred to Parliament. Charles the Second ratified this arrangement by statute in 1660, since when the Post Office has been one of the great revenue collecting Departments.

The Money Order Office was inaugurated in 1792, uniform Penny Post in 1840, the Book Post in 1848, the Post Office Savings Bank in 1861, the Post Office Telegraphs in 1870, Postal Orders and the Post Office Telephone Service in 1881 and the Parcel Post in 1883.

The Post Office also acts as agent for many other Government Departments in the collection of revenue and the disbursement of pensions and allowances.

The expenses of the Post Office (salaries, wages, etc., only) were estimated at £253,678,000 in 1959-60. Post Office transactions with the public during 1957-58 exceeded £5,099,000,000.

There are in Great Britain and Northern Ireland nearly 25,000 Post Offices, nearly 6,000 Telephone Exchanges, over 72,000 Telephone Call Offices and over 7,360,000 Telephones.

PUBLIC TRUSTEE OFFICE

Sardinia Street, Kingsway, W.C.2

[Holborn: 4300]

This is a Government Office (opened in 1908) by means of which the State acts as executor and trustee under a will, or as trustee under a settlement, and in other capacities of a like nature. The value of the trusts accepted up to March 31, 1959, was £632,349,476.

The facts of any trust, new or old, in which it is desired that the Public Trustee should act may be brought to his notice by letter or by personal interview. The appointment is effected in the same way as a private trustee, or by an Order of the Court. He can act solely or jointly with others.

In the case of a will, all that the testator need say is, "I appoint the Public Trustee executor and trustee of this my Will"; or the appointment may be a joint one with others. Executors who have obtained probate can transfer their duties to him under an Order of the Court. He can also act as administrator with, or without, the will annexed.

Strict secrecy is observed in all matters dealt with in the Department. Accounts in simple form are furnished to the beneficiaries as required. An interview with the Public Trustee or with any of his senior officers can be arranged at any time. A pamphlet giving particulars and details of the fees can be obtained free of cost from the Office of the Public Trustee, Kingsway, W.C.2.

PUBLIC WORKS LOAN BOARD

19 Old Jewry, E.C.2

[Monarch: 6234]

The Board is an independent statutory body, consisting of 12 unpaid Commissioners appointed

by the Crown to hold office for 4 years; 3 Commissioners retire each year and may be re-appointed.

The functions of the Commissioners, derived chiefly from the Public Works Loans Act, 1875, and the Local Authorities Loans Act, 1945, are to consider applications for loans by Local Authorities and other prescribed bodies, and, when loans are approved, to collect the repayments.

Funds for loans are provided from time to time by Acts of Parliament and are drawn from the Local Loans Fund through the National Debt Commissioners. Rates of interest on the Board's loans and fees to cover management expenses are fixed by the Treasury.

During the year ended March 31, 1959, 4,095 applications for loans totalling £41,923,105 were approved and advances totalling £43,859,370 were made.

HOUSE OF LORDS RECORD OFFICE

House of Lords, S.W.1

[Whitehall: 6240]

Until 1497 the records of Parliament were normally transmitted at the end of a session to Chancery, and are now therefore preserved in the Public Record Office. Since 1497 the records of Parliament as a whole, and also of the House of Lords, have been kept within the Palace of Westminster. They are in the custody of the Clerk of the Parliaments, who in 1046 established a record department to supervise their preservation and production to students. The Search Room of this office is open to the public throughout the year, Mondays to Fridays inclusive, from 10 to 5. The records preserved number some 1,500,000 documents, and include Acts of Parliament from 1497, Journals of the House from 1520, Minutes and Committee proceedings from 1621, and Papers laid before Parliament, from 1531. Amongst the records are the Petition of Right, the Death Warrant of Charles I., the Declaration of Breda and the Bill of Rights. The House of Lords Record Office can also arrange access for students to the Journals of the House of Commons (from 1547), and to the other surviving records of the Commons (from 1835). The records of both Houses are preserved in the Victoria Tower at the Houses of Parliament.

Clerk of the Records, M. F. Bond, O.B.E., F.S.A. £1,910 to £2,200
Assistant Clerks of the Records, Miss E. R. Poyser; H. S. Cobb £1,217 to £1,915

DEPARTMENT OF SCIENTIFIC AND INDUSTRIAL RESEARCH

Charles House, 5-11 Regent Street, S.W.1 (Whitehall: 9788). 20 Chester Terrace, N.W.1 (Hunter: 8361) (*Lending Library Unit*). Scottish Branch Office: 20 Walker Street, Edinburgh 3 (Caledonian: 2383). Welsh Branch Office:

Block 2, Room 104, Government Buildings, Gabalfa, Cardiff (Cardiff: 21044).

A Committee of the Privy Council was appointed by Order in Council dated July 28, 1915 (amended February 6, 1928), to direct the application of any sums of money provided by Parliament for the organization and development of Scientific and Industrial Research. On December 15, 1916, a separate Department was created for the service of the Committee. The Department of Scientific and Industrial Research Act, 1956, placed the Department under a Research Council, and re-defined the Department's functions and the purposes for which it may make grants.

The aggregate net estimate for the Department in 1959-60 amounts to £10,821,097, a net increase of £1,334,685 on the same estimate for 1958-59. The gross estimate amounts to £12,435,692. Headquarters administration, £749,000; Grants for Research, £3,793,000; Research Work and Research Establishments, £6,526,000; American Aid, £11,000; European Nuclear Research, £1,259,000; contributions to N.A.T.O. scientific schemes, £93,000; and other international bodies, £4,500.

President of the Committee of the Privy Council, The Lord President of the Council.

Research Council, Sir Harry Jephcott, D.Sc. (*Chairman*); Sir Eric Ashby, D.Sc., sc.D., I.L.D.; Prof. C. E. H. Bawn, C.B.E., Ph.D., F.R.S.; Prof. P. M. S. H.M. Stationery Office was established in 1786 and is the British Government's central organization for the supply of printing, binding, office supplies and office machinery of all kinds, and published books and periodicals, for the Public Service at home and abroad; it also undertakes duplicating and distributing services for government departments. The Stationery Office is the publisher for the government, and has bookshops for the sale of government publications in London, Edinburgh, Cardiff, Manchester, Bristol, Birmingham and Belfast; leading booksellers in the larger towns act as agents; and there are wholesale departments in London, Edinburgh and Belfast from which booksellers may obtain supplies. It is also the agent for the sale of publications of the United Nations and its specialized agencies and for certain other international organizations. The Controller of the Stationery Office is under Letters Patent the Queen's Printer of Acts of Parliament and in him is vested the Copyright in all British Government documents.

Government publications are of a wide and varied range and about 5,700 titles are published each year. They include the *London Gazette*, which has been issued twice weekly since 1665, and *Hansard*, the verbatim report of the proceedings in both Houses of Parliament, available on the morning following the debate. The Stationery Office has in stock some 300,000 titles and its subscription lists contain 65,000 names. The annual sales total about 17,000,000 copies.

The aggregate net estimate for the department in 1959-60 was £15,096,100 (an increase of £205,100 on the same estimate for 1958-59). The gross estimate amounts to £21,021,100 and includes £2,762,000 for salaries and wages of office and warehouse staffs, £6,380,000 for printing and binding (inclusive of salaries and wages of printing works staff), £6,350,000 for paper, £3,985,000 for office supplies and office machinery and £935,000 for published books, periodicals and maps. The receipts side includes £1,577,500 from the sale of government publications and £100,000 from the sale of waste paper recovered from all departments.

Generally the department obtains its supplies from commercial sources by competitive tender. For printing and binding, however, the Stationery Office has its own printing works and binderies which produce about one-third of the total requirement, including telephone directories, pension

allowance books, national savings certificates and stamps, postal orders, premium bonds and National Insurance stamps. The annual face value of these certificates and stamps is nearly £1,109,000,000.

The staff employed on April 1, 1959, was 6,635, including 1,797 in warehouses and 2,264 at printing works; the total space occupied was two million square feet, including 1,250,000 sq. ft. for warehouse space and 448,000 sq. ft. for the printing works.

SUGAR BOARD

52, Mark Lane, E.C.3

[Royal 6221]

The Sugar Board was constituted under the Sugar Act, 1956, on October 15, 1956. The Board buys the sugar which the United Kingdom has contracted to buy under the Commonwealth

Sugar Agreement at prices negotiated annually by the Government and resells the sugar commercially at world prices. The Board also provides temporary finance for the British Sugar Corporation and receives from or pays to the Corporation any surplus or deficit arising on the production and refining of home grown beet sugar. The Board, in turn, balances its accounts, taking one year with another, by receiving a surcharge or making a distribution payment, on all imported and home produced sugar and molasses.

THE TREASURY

Great George Street, S.W.2

[Whitehall: 1234]

The office of the Lord High Treasurer has been continuously in commission for well over 200 years. The Lords Commissioners of H.M. Treasury consist of the First Lord of the Treasury (who is also the Prime Minister), the Chancellor of the Exchequer and five Junior Lords. This Board of Commissioners is assisted at present by a Parliamentary Secretary, a Financial Secretary and an Economic Secretary who are also Ministers, and joint Permanent Secretaries. The Prime Minister and First Lord is not primarily concerned in the day-to-day aspects of Treasury business, and the Junior Lords and the Parliamentary Secretary are Government Whips in the House of Commons. The higher departmental direction of Treasury business, therefore, devolves on the Chancellor of the Exchequer, assisted at Ministerial level by the Financial Secretary and the Economic Secretary, who advise the Chancellor on general financial and economic policy. The Financial Secretary devotes himself in particular to the Treasury's long-standing responsibilities for financial administration, including questions relating to the Civil Service.

COUNCIL ON TRIBUNALS

6 Spring Gardens, Cockspur Street, S.W.1

The Council on Tribunals, with its Scottish Committee, was constituted in 1958 under the provisions of the Tribunals and Inquiries Act of that year to act as an advisory body in the field of administrative tribunals and statutory inquiries.

Its principal functions under the Tribunals and Inquiries Act are (a) to keep under review the constitution and working of the various tribunals which have been placed under its general supervision by the Act; (b) to report on particular matters relating to any tribunal which may be referred to it by the Lord Chancellor and the Secretary of State for Scotland; and (c) to report on matters relating to statutory inquiries which may be similarly referred to it or which the Council may determine to be of special importance. In addition, the Council must be consulted before procedural rules are made for any of the tribunals under its general supervision, and it may make general recommendations about appointments to membership of such tribunals. The numerous tribunals which have been placed under the Council's supervision are concerned with a wide variety of matters varying from agriculture and road traffic to independent schools and pensions. They include the National Assistance appeal tribunals, and the main National Health Service, National Insurance and National Service Tribunals, together with such tribunals as the Lands Tribunal, the Performing Right Tribunal and the Transport Tribunal.

The Scottish Committee of the Council considers Scottish tribunals and matters relating only to Scotland.

The Members of the Council are appointed by the Lord Chancellor and the Secretary of State for Scotland. The Scottish Committee is composed partly of members of the Council designated by the Secretary of State for Scotland and partly of other persons appointed by him.

The Council submits an annual report on its proceedings and those of the Scottish Committee to the Lord Chancellor and the Secretary of State for Scotland, which must be laid before Parliament.

TRINITY HOUSE

Tower Hill, E.C.3

[Royal: 6601]

Trinity House, the first General Lighthouse and Pilotage Authority in the Kingdom, was a body of importance when Henry VIII. granted the Institution its first charter in 1514, *inter alia* "for the relief, increase and augmentation of the Shipping of this Realm of England." Since that period the duty of erecting and maintaining lighthouses and other marks and signs of the sea has by Royal Charter and

Acts of Parliament been entrusted to the Corporation of Trinity House, and until 1874 Masters of the Navy were examined by the Elder Brethren of the Corporation. In the present day, the principal duty of the Corporation of Trinity House, as a Public Department, is the administration of the Lighthouse, &c., Service of England and Wales with certain statutory jurisdiction in regard to lighthouses and other seamarks in Scotland, Ireland, the Channel Islands and Gibraltar, while the Corporation is also the chief Pilotage Authority in the United Kingdom, and in its capacity as a private corporation or guild it administers certain Charitable Trusts specifically dedicated to the relief of aged and distressed master mariners, their widows and spinster daughters. The Corporation controls some 60 lighthouses and 40 lightships, and maintains a fleet of 9 steam and motor vessels. The Active Elder Brethren of the Corporation also sit with the Judges of the Admiralty Division of the High Court of Justice to act as Nautical Assessors in Marine Causes tried in that Court. The Lighthouse Service of the Trinity House is maintained out of the General Lighthouse Fund, this fund being provided by means of special dues called Light Dues levied on shipping using the ports of the United Kingdom. The accounts are submitted annually to Parliament.

WAR DAMAGE COMMISSION

6 Carlton House Terrace, S.W.1

[Whitehall: 4341]

The War Damage Commission was appointed on March 27, 1941, to administer Part I of the *War Damage Act, 1941*, 4 & 5 Geo. 6, ch. 12. The 1941 Act, and two subsequent amending Acts, were consolidated in the *War Damage Act, 1943*, 6 & 7 Geo. 6, ch. 21. Its operations are related only to war damage to land and buildings, those parts of the Act which are concerned with goods and chattels being administered through the Board of Trade. In addition to Headquarters the Commission has two other offices in London. There are technical centres in Hull, Sheffield, Liverpool, Manchester, Birmingham, Bristol, Plymouth, Exeter, Southampton, Norwich, Cardiff, Swansea, Glasgow and Belfast.

MINISTRY OF WORKS

Head Office, Lambeth Bridge House, Albert Embankment, S.E.1

[Reliance: 7611]

The Ministry of Works was constituted in 1940. It took over the functions of the Commissioners of H.M. Works and Public Buildings who had been incorporated by the Commissioners of Works Act, 1852. The principal functions of the Commissioners were to provide, furnish and maintain buildings required for the public service, including buildings overseas, manage the Royal Parks, maintain the Royal Palaces and certain historic buildings and to administer the Ancient Monuments Acts.

The Ministry is now also responsible for co-ordinating the work of the building and civil engineering industries and of the building materials industries. It encourages efficiency and increased production by supplying technical information and making known the results of research.

Foreign Compensation Commission

1 Princes Gate, S.W.7

The Commission was set up by the Foreign Compensation Act, 1950, to distribute funds paid by foreign governments as compensation for expropriated British interests. The Commission has completed the final distribution of the funds contributed by Yugoslavia. Distributions are being made as sufficient funds become available from Czechoslovakia. Agreements with Hungary, Bulgaria, Poland and Egypt to create similar funds have been made, and the Commission has registered British claims in Roumania. Distribution orders in respect of Polish debts and nationalization claims came into operation on April 30, 1956, and a distribution is being made on Polish guaranteed debts. Distribution orders for various types of Bulgarian claims came into operation on March 1, 1958, and for Hungarian claims on April 14, 1958. A distribution and registration order for Egyptian claims was made on April 6, 1959.

THE NATIONAL TRUST

40-42 Queen Anne's Gate, Westminster, S.W.1

The National Trust was founded in 1895 by Miss Octavia Hill, Sir Robert Hunter and Canon Rawnsley, their object being to preserve as much as possible of the history and beauty of their country for its people. It has since become an organization incorporated by Act of Parliament to ensure the preservation of lands and buildings of historic interest or natural beauty for public access and benefit. It is independent of the State and relies mainly on the voluntary support of private individuals for working funds. The State, however, allows it certain tax exemptions. A further, and only recently instituted, branch of the Trust's work is the acquisition and preservation, with the co-operation of the Royal Horticultural Society, of gardens of national importance. It also has under its care bird sanctuaries and nature reserves, together with several hundred farms.

The National Trust now administers more than 290,000 acres of land in England, Wales and Northern Ireland; and in this area are over 1,000 properties. These properties have come into its hands mainly by gift or bequest; but since 1946 certain land and buildings accepted by the Treasury in lieu of death duties have been handed over to the Trust, the Treasury recompensing itself from the National Land Fund. The properties acquired by the National Trust before last year include the Ashridge Estate (Bucks. and Herts.); Cliveden (Bucks.); West Wycombe Park and village (Bucks.); Wicken Fen (Cambs.); Lyme Park (Cheshire); Cotehele House (Cornwall); Pentire Head (Cornwall); St. Michael's Mount (Cornwall); Trerice (Cornwall); Dovedale (Derbs. & Staffs.); Arlington Court Estate (Devon); Hatfield Forest (Essex); Chedworth Roman Villa (Glos.); Hidcote Manor Gdn. (Glos.); Knole (Kent); over 30,000 acres in the Lake District including the Buttermere Valley, Monk Coniston Estate, Scafell Pike and Troutbeck Park Farm; Tattershall Castle (Lincs.); Osterley Park (Middx.); Blickling Hall Estate (Norfolk); Farne Islands (Northumberland); Clumber Park (Notts.); Holnicote Estate (Somerset); Montacute House (Somerset); Flatford Mill (Suffolk); Box Hill

(Surrey); Ham House (Surrey); Bodiam Castle (Sussex); Petworth House (Sussex); Charlecote Park (Warwicks.); Lacock Abbey and village (Wilts.); Stourhead Estate (Wilts.); Derwent Estate (Yorks. and Derbs.); Penrhyn Estates (N. Wales); Bodnant Gardens (N. Wales); Powis Castle (Mont.); Castlecoole (N. Ireland); Hanbury Hall (Warwicks.); Lanhydrock (Cornwall); Tintinhull House (Somerset); Nymans Gardens (Sussex); Shelfield Park Gardens (Sussex); Uppark (Sussex); Nostell Priory (Yorks.); Staunton Harold Church (Leics.); Penard Cliff (Glam.); Blundell's Old School (Devon); Castleward (N. Ireland).

Acquisitions last year include Waddesdon Manor (Bucks.); Lantic Bay (Cornwall); Hardwick Hall (Derbyshire); Clent Hills (Worcs.); and Benningbrough Hall (Yorks.).

THE PILGRIM TRUST

Millbank House, 2 Great Peter Street, S.W.1

Trustees, The Right Hon. Sir Alan Lascelles, G.C.B., G.C.V.O., C.M.G., M.C. (*Chairman*); The Right Hon. Sir Oliver Franks, G.C.M.G., K.C.B., C.B.E.; Richard Fleming, M.C.; The Earl of Crawford and Balcarres, K.T. G.B.E.; W. F. Oakeshott; The Lord Evershed, Master of the Rolls; The Lord Bridges, P.C., G.C.B., G.C.V.O., M.C.

Secretary, The Lord Kilmaine, C.B.E.

The Pilgrim Trust was founded in 1930 by the late Edward S. Harkness of New York, who placed in the hands of British trustees £2,000,000 for the benefit of Great Britain. Since then the Trust has been able to make substantial grants for the repair of ancient buildings, the preservation of historical records, the support of learned societies, the purchase of works of art and the assistance of social welfare schemes.

Since its foundation the Trust has made grants amounting to £3,326,150, and retains investments with a market value of £4,080,279. In 1958 the Trustees voted grants totalling £190,320. The grants were made under the three heads: Preservation (£85,761), Art and Learning (£88,509) and Social Welfare (£20,550).

York Minster received a further grant of £4,500 towards the cost of re-instating and re-arranging the

ancient glass in the windows of the Minster. Other grants for the preservation of ecclesiastical buildings included Eton College Chapel (£15,000); St. Monan's Church, Fife (£2,500); Arbutnott Church, Kincardineshire (£500); the Giffard Chapel in Boyton Church, Wiltshire (£675); Gwydir Chapel, Llanrwst, Denbighshire (£1,000); Lord Leicester's Hospital Chapel, Warwick (£800).

Among secular buildings which the Trust helped to preserve were the following: Brodick Castle, Isle of Arran (£10,000); Fyde Hall House, Boston, Lincolnshire (£1,000); the ancient Barbican area of Plymouth (£2,000); Danny House, Hurstpierpoint (£2,000); the House of St. Barnabas in Soho (£1,000). Three ancient almshouses received a grant of £1,000 each, viz.: Partis College, Bath; the Hospital of the Holy Trinity, Aylesford, Kent; and the Duchess of Somerset's Hospital, Froxfield, Wiltshire.

Under the head of Art and Learning the Trustees made a grant of £10,000 each to Churchill College, Cambridge, St. Catherine's College, Oxford, and to the new Law Library, Oxford. They assisted the British Museum to acquire books from the Chatsworth Library (£15,000) and to purchase 8 MSS from the Dyson Perrins Collection (£5,000). Grants were also voted to Slon College, London (£2,000); Bishop Cosin's Library, Durham (£1,000); Abbot Hall Museum and Art Gallery, Kendal (£2,500); and with the Trust's aid the Royal Scottish Museum acquired the J. A. Holms Cup (£1,000) and the Victoria and Albert Museum the "Luck of Edenhall" (£2,000).

Other grants included: The Royal Ballet School (£5,000); the Byam Shaw School of Drawing and Painting (£1,500); Rotherhithe Church Organ (£800); Searchlight Cripples Workshops (£1,000); and the Royal Association for the Deaf and Dumb (£2,000).

THE BRITISH COUNCIL

65 Davies Street, W.1

The British Council was established in 1934 to promote abroad a wider knowledge of the United Kingdom and of the English language, and to develop closer cultural relations between the United Kingdom and other countries. Almost the whole of the Council's funds are derived from grants voted by Parliament. Grants for 1959-60 amounted to £5,308,150.

The Council's activities include the formation of new, and the encouragement of existing, British cultural centres, Anglophile societies and British schools abroad; the encouragement of English language teaching and British studies in schools, universities and other institutions abroad. Scholarships and bursaries for study in this country of British institutions, methods and achievements are granted to overseas graduates and others.

In June, 1959, the Council had staffs at work in most European countries, in many Latin-American Republics, in most countries of the Middle East, in Burma, Indonesia, Japan and Thailand, in Australia, India, Pakistan, Ceylon, Ghana, Malaya and in most British colonies. At the request of H.M. Government it set up in 1955 the Soviet Relations Committee to promote cultural relations with the Soviet Union, primarily by sponsoring visits in both directions by professional and other groups.

The Council maintains centres in the United Kingdom, mainly in university cities, to provide services for students, professional visitors, holders of U.N. and Colombo Plan awards and others from overseas. It is responsible for accommodation

and welfare services for the main body of colonial students in the U.K., funds for this work being provided from the Colonial Development and Welfare Fund.

President, General Sir Ronald Adam, Bt., G.C.B., D.S.O., O.B.E.

Chairman, The Lord Bridges, P.C., G.C.B., G.C.V.O., M.C., F.R.S.

Director-General, Sir Paul Sinker, K.C.M.G., C.B.

THE ARTS COUNCIL OF GREAT BRITAIN

4 St James's Square, S.W.1

The Arts Council of Great Britain was incorporated under Royal Charter on August 9, 1946, "for the purpose of developing greater knowledge, understanding and practice of the fine arts exclusively and in particular to increase the accessibility of the fine arts to the public . . . to improve the standard of execution of the fine arts and to advise and co-operate with . . . Government Departments, Local Authorities and other bodies on any matters concerned directly or indirectly with those objects. . . ."

The Members of the Council, who may not exceed 16 in number, are appointed by the Chancellor of the Exchequer after consultation with the Minister of Education and the Secretary of State for Scotland. They normally serve for a period of five years.

In addition to the Headquarters Office there are separate offices in Edinburgh and Cardiff.

The Council receives an annual grant from the Treasury. For the year 1959-60 the amount was £1,218,000.

Chairman, Sir Kenneth Clark, C.H., K.C.B.

Secretary-General, Sir William Emrys Williams, C.B.E.

BRITISH STANDARDS INSTITUTION

British Standards House, 2 Park Street, W.1

The British Standards Institution is recognized as the organization responsible for preparing and publishing voluntary national standards for industrial and consumer products.

The Institution dates from 1901 when the Institutions of Civil, Mechanical and Electrical Engineers together with the Iron and Steel Institute and the Institution of Naval Architects formed a Joint Engineering Standards Committee, which eventually became the British Engineering Standards Association. Between 1923 and 1929 the building, chemical and textile industries joined in the work. In 1929 the organization was incorporated by Royal Charter under the title of "British Standards Institution."

British Standards are arrived at by common consent among authorized representatives of the industries which make and use the materials and goods concerned (mainly the engineering, chemical, building and textile industries). The 300 new and revised British Standards published each year specify agreed manufacturing processes, dimensions, methods of test and analysis, standards of safety and performance, and glossaries of terms.

The Institution has more than 10,000 subscribing members, consisting of public authorities, trade and technical institutions, distributors, manufacturers, engineers and other users.

Director, H. A. R. Binney, C.B.

THE BANK OF ENGLAND

Threadneedle Street, E.C.4

The Bank of England was incorporated in 1694 under Royal Charter. It is the banker of the Government on whose behalf it manages the Note Issue, the profits on which are paid to H.M. Treasury. It also manages the National Debt and administers the Exchange Control regulations. As central reserve bank of the country, the Bank keeps the accounts of British banks, who maintain with it a proportion of their cash resources, and of most overseas central banks; but it has gradually withdrawn from new commercial business.

As from March 1, 1940, the paid-up stock, amounting to £14,553,000, was transferred to a nominee of the Treasury (the Treasury Solicitor), under the provisions of the Bank of England Act, 1946, holders receiving in exchange 3 per cent. Treasury Stock, to such an amount as provided them with annual interest equal to the annual gross dividend of the previous 20 years, namely, 12 per cent.

STERLING BALANCES

In the middle of 1939 United Kingdom net external liabilities amounted to rather more than £500 million. During the war years overseas sterling holdings rose extremely fast, reaching nearly £3,600 million at the end of 1945. Of this total a large proportion represented obligations to other countries arising from the exigencies of war rather than their working balances or normal reserves voluntarily held in London. The trends in the sterling holdings of different regions since the war are shown in the following table.

31st December	1945	1948	1951	1954	1958
United Kingdom Colonies*	411	529	919	1,221	881

Colonial Sterling Holdings.—Distribution of colonial funds at the end of 1945, 1951 and 1957 was as follows:—

	1945	1951	1957
Currency funds	148	312	441
Special purpose funds, sinking funds, savings bank funds, etc. with Crown Agents	74	112	154
General revenue balances, general purpose reserve funds, etc., with Crown Agents	41	148	321
Miscellaneous official funds (price assistance funds, marketing boards, etc.)	—	131	107
Other funds (with United Kingdom banks)	148	216	246
TOTAL	411	919	1,269

The existence of currency and many other funds in sterling is due to the fact that the colonies do not possess developed local capital markets and therefore hold in London the very large funds which governments require for many and diverse purposes. Colonial currencies are very largely backed by sterling securities. The steadily increasing circulations which have accompanied rising populations, the increased use of money and increasing external incomes have thus produced an almost automatic increase in the Currency Boards' investments in United Kingdom and other government securities. Special funds, particularly those of savings banks, have also risen steadily, as have general government funds for planned development expenditures and for current working balances. The other funds, which are held with United Kingdom banks, represent the general banking assets of commercial banks operating in the colonies and the known liquid funds of companies and individuals resident there, held in London.

The underlying reason for the growth of the total holdings was the expansion of colonial economies at a time of rising prices and, in particular, the unprecedentedly high level of export earnings in the years following the outbreak of the Korean War. More recently, the colonial territories have been in deficit on current account but as there has also been a large capital inflow there has been little change in the general level of sterling holdings.

Independent sterling area holdings.—It is the normal practice of central banks in independent sterling

area countries to hold the bulk of their foreign exchange reserves in sterling. Moreover, they are often required by statute to hold certain minimum reserves in foreign exchange (which may include sterling) against local currency issues. A large proportion of these statutory reserves is in practice held in sterling.

Much of the fall in the holdings of independent sterling area countries took place in the first few years after the war and represented the reduction of surplus balances built up during the war years. During the last few years trends in individual countries have been diverse. India's holding has recently been run down further to finance the second five-year development plan, and the holdings of Australia and New Zealand have fluctuated widely, largely under the influence of changes in the prices of their exports of primary products and their import policies. On the other hand, the balances of the middle east sterling area countries have increased considerably.

Non-sterling countries.—After allowance is made for special holdings by the German authorities, the holdings of the O.E.E.C. countries nowadays represent sterling held by residents of these countries for commercial and financial reasons. Their size varies with the scale of the holders' business in sterling and the attractions of London as a financial centre in which to hold funds. The same generalization applies to the small net balances of sterling held by the dollar area countries. The very large fall in the holdings of other non-sterling countries since the war was due to the fact that several of these countries had accumulated large surpluses of sterling well beyond their normal commercial requirements during the war period. Egypt was an outstanding example, and in this and some other cases the funds were transferred to special or "blocked" accounts and provisions made for regular annual releases. Apart from these special accumulations, which have now been mainly used up, most of the countries in this group (including countries in the far east, middle east, western hemispheres and Soviet bloc) only hold sterling funds for financing foreign trade, particularly with sterling area countries.

Non-territorial organizations.—The two main holders are the International Monetary Fund and the International Bank for Reconstruction and Development. At the end of 1958, the I.M.F. held £574 million and the I.B.R.D. £39 million.

NOTE.—The legal weight of a penny is one-third, of the halfpenny one-fifth, and of the farthing one-tenth of an ounce avoirdupois; the farthing is one inch in diameter.

The "Remedy" is the amount of variation from standard permitted in fineness and in weight of coins when first issued from the Mint.

Bank of England Notes are issued for sums of 10s., £1 and £5. As from April 22, 1943, the Bank of England ceased to issue bank notes of denominations of £10 and upwards, and commenced to withdraw those already issued; notes of these denominations ceased to be legal tender on May 1, 1945.

Silver.—No silver coins have been struck since 1946, except Maundy money.

Nickel Brass is an alloy of copper 79 parts, nickel 1 part and zinc 20 parts.

Bronze is an alloy of copper 95½ parts, tin 3 parts and zinc 1½ parts. These proportions are subject to slight variation.

Cupro-nickel is an alloy of nickel 25 parts and copper 75 parts.

Currency Notes.—Under the provisions of the *Currency and Bank Notes Act, 1928*, Currency Notes (popularly known as Treasury notes) of the value of £1 and 10s. were replaced by Bank of England Notes and the profits of the whole Note issue were paid over by the Bank to H.M. Treasury.

Legal Tender of Money.—Bank of England Notes of £1 and 10s. are legal tender in Great Britain and Northern Ireland for the payment of any amount; those of £5 are legal tender in England and Wales only. Notes of £5 dated before Sept. 2, 1944, are not now legal tender but, like notes of £10 to £1,000, are payable when presented at the Bank of England. Change cannot be de-

manded except from the Bank of England. Gold (dated 1838 onwards), if of or above the least current weight, is legal tender to any amount. Silver (dated 1816 onwards), and cupro-nickel are legal tender for sums up to £2, nickel brass 3d. up to 2 shillings, and bronze (introduced 1860, to replace copper) up to 12d.

Work of the Royal Mint in 1958.—In 1958 the Royal Mint struck 593,201,554 coins, weighing 2,940 tons. This output was 85½ million higher than in 1957 and has been exceeded only twice in the history of the Mint—in 1943 and 1948 when the figures were 682,067,510 and 599,867,539 respectively.

Of the 1958 total, 299,535,313 were United Kingdom coins and 293,666,241 were for Commonwealth and foreign governments.

The outstanding feature of the 1958 output was the very high proportion of sixpences and halfpennies. The mintings of these two coins, 123,518,527 and 66,283,200 respectively, were much higher than in 1957 and amounted to almost two-thirds of the total United Kingdom coins struck. The striking of all other coins declined. Florins at 9,564,580 were less than one-third of the 1957 total and half-crowns at 15,745,668 were rather less than half. Shillings at 55,214,862 showed a moderate fall. 8,700,000 sovereigns were struck, not for issue at home but for sale abroad for dollars or gold. No pennies or farthings were struck during the year but 16 million pennies were withdrawn as surplus.

Of the 293,666,241 coins struck for nineteen overseas governments some 200 million—over two-thirds of the Mint's output for the year—were for Ghana. Coins were struck for Iceland, Iraq, and Jordan. A silver five-shilling piece was struck for Bermuda to commemorate the 350th anniversary of the first settlement on that island in 1609.

1959 operations.—During the first half of 1959 the demand for United Kingdom coin for home circulation was small. Once again no farthings or pennies were minted but there was a brisk demand for halfpennies. The minting of sixpences increased but that of 3d. bits declined; there were indications that the sixpence is to some extent replacing the 3d. bit in circulation.

During 1957 coin in circulation increased by some £6 million and in 1958 the increase was about £1½ millions. Estimates for 1959-60 provide for an increase of £1½ millions but it remains to be seen whether this will be required. During 1959 the Mint continued its silver recovery programme—withdrawing pre-1947 silver coin and replacing it with cupro-nickel.

NOTE ON CIVIL COURTS.—Smaller civil actions

are heard locally in County Courts which, with

some exceptions, deal with all common law cases

where the sum involved is less than £400. Jurisdic-

tion given by special statutes is of the widest range and cases under such statutes are dealt with irrespective of the amount involved. County Courts are presided over by a paid Judge sitting alone. The county court for the City of London is the Mayor's and City of London Court, which deals with small cases and has also jurisdiction unlimited in amount. Bankruptcy cases arising in London are dealt with in the London Bankruptcy Court, Carey Street, W.C.2; those arising out of London are dealt with in the county courts.

Actions in the High Court are distributed among the several Divisions of the High Court according to their nature. Certain classes of actions, e.g., those dealing with the administration of estates of deceased persons, partnerships, trusts and mortgages, specific performance of contracts between vendors and purchasers of real estates, including contracts for leases, partition or sale of real estates, wardship of infants and the care of infants, estates, and company and bankruptcy cases are usually commenced in the Chancery Division. The Queen's Bench Division deals with most ordinary civil cases. Actions may be tried in London or the Assizes. The Probate, Divorce and Admiralty Division has jurisdiction in matters concerning wills, divorces, and Admiralty, prize and shipping cases.

COUNTY COURTS

In 1958 the total number of proceedings in County Courts of England and Wales (including the Mayor's and City of London Court) was 2,348,034 (as against 1,090,929 for the year 1957). The number of debtors imprisoned under the *Debtors Act*, 1869, was 2,539 (1957) and 4,160 (1958) and of the last number 2,899 served the full terms of imprisonment for "Contempt to Court" in failing to comply with the order for payment.

CROWN COURTS

The Criminal Justice Administration Act, 1956, authorized the setting up of two new courts, known as the Crown Court of Liverpool and the Crown Court of Manchester. These Courts took over the jurisdiction of the former Courts of Quarter Session for Liverpool and Manchester and the criminal jurisdiction of the Assize Courts for the West Derby and Salford Divisions of Lancashire. The Courts are normally presided over by the Recorders of Liverpool and Manchester who have power to refer assize cases for trial by a judge of the High Court.

CONSTITUTION OF THE BRITISH ARMY

The Regular Forces include the following Arms, Branches and Corps. Soldiers' Records Offices are shown at the end of each group; the records of officers are maintained at the War Office.

Details of the re-organization of the Army, published in July, 1957 (Cmd. 230), showed a reduction in the number of units, effected in the case of regiments of the Royal Armoured Corps and Infantry of the Line by permanent amalgamation of units. Composition of the re-organized infantry brigades appears below, units amalgamated being shown in *italics*. Most of the amalgamations were expected to be completed in Phase I (1957-59) and those so marked in Phase II (1959-62). Titles of regiments to be created by amalgamation (approved by H.M. the Queen in June, 1958) are included below, marked *.

Household Cavalry.—The Life Guards and Royal Horse Guards. *Records*, Horse Guards, London, S.W.1.

Royal Armoured Corps.—Cavalry Regiments and the Royal Tank Regiment. Amalgamations in Phase I: *1st The Queen's Dragoon Guards (1st K.D.G.—*The Queen's Bays (and Dragoon Guards)*); *The Queen's Own Hussars (3rd King's Own Hussars—*7th Queen's Own Hussars*); *The Queen's Royal Irish Hussars (4th Queen's Own Hussars—*8th King's Royal Irish Hussars*); *3rd Royal Tank Regiment (3rd and 6th R.T.R.); *4th Royal Tank Regiment (4th and 7th R.T.R.); *5th Royal Tank Regiment (5th and 8th R.T.R.). *Records*, Chase Side Camp, Enfield, Middlesex.

Artillery.—The Royal Regiment of Artillery (to be reduced in Phase I by 18 regiments and minor units equivalent to another regiment, and in Phase II by a further two regiments) and the Royal Malta Artillery. *Records*, Fooks Cray, Sidcup, Kent; Record Office, Malta.

Engineers.—The Corps of Royal Engineers (to be reduced by the equivalent of 4 engineer regiments in Phase I and one regiment in Phase II, with a consequent reduction in engineer supporting units). *Records*, Ditchling Road, Brighton.

Signals.—The Royal Corps of Signals (number of regiments to be reduced when the Command structure of the Army at home and abroad has

been reorganized). *Records*, Balmore House, Caversham, Reading.

Infantry.—The Brigade of Guards: Grenadier, Coldstream, Scots, Irish and Welsh Guards. (Reduced by one battalion of Coldstream Guards (Phase I) and Grenadier Guards (Phase II).) *Records*, Birdcage Walk, London, S.W.1.

The Lowland Brigade: The Royal Scots; *The Royal Highland Fusiliers (Princess Margaret's Own Glasgow and Ayrshire Regiment) (*The Royal Scots Fusiliers—The Highland Light Infantry*); The King's Own Scottish Borderers; The Cameronians. *Dépot*, Glencorse Barracks, Melton Bridge, Midlothian. *Records*, P.O. Box 31, S. Methven Street, Perth.

The Home Counties Brigade: *The Queen's Royal Surrey Regiment (*The Queen's Royal Regiment—The East Surrey Regiment*); The Buffs (Royal East Kent Regiment)—*The Queen's Own Royal West Kent Regiment* (Phase II); The Royal Sussex Regiment; The Middlesex Regiment. *Dépot*, Wemys Barracks, Canterbury. *Records*, Higher Barracks, Exeter.

The Lancastrian Brigade: *The King's Own Royal Border Regiment (*The King's Own Royal Regiment—The Border Regiment*); The King's Regiment (Manchester and Liverpool) (*The King's Regiment—The Manchester Regiment*); The East Lancashire Regiment—*The South Lancashire Regiment*; The Royal Regiment. *Dépot*, Harington Barracks, Formby, Lancs. *Records*, York Aerodrome, York.

The Fusilier Brigade: The Royal Northumberland Fusiliers; The Royal Fusiliers; The Lancashire Fusiliers. *Dépot*, Tower of London, E.C.3. *Records*, Higher Barracks, Exeter.

The Forester Brigade: The Royal Warwickshire Regiment; The Royal Leicestershire Regiment; The Sherwood Foresters. *Dépot*, Glen Parva Barracks, Leicester. *Records*, York Aerodrome, York.

The East Anglian Brigade: *1st East Anglian Regiment (Royal Norfolk and Suffolk) (*Royal Norfolk Regiment—Suffolk Regiment*); *2nd East Anglian Regiment (Duchess of Gloucester's Own Royal Lincolnshire and Northamptonshire) (*Royal Lincolnshire Regiment—Northamptonshire Regiment*); 3rd East Anglian Regiment (16/44th Foot).

Depôt, Blenheim Camp, Bury St. Edmunds. *Records*, Higher Barracks, Exeter.

The Wessex Brigade: The Devonshire and Dorset Regiment; The Gloucestershire Regiment; The Royal Hampshire Regiment; *The Duke of Edinburgh's Royal Regiment (Berkshire and Wiltshire) (*Royal Berkshire Regiment—The Wiltshire Regiment*). *Depôt*, Topsham Barracks, Exeter. *Records*, Higher Barracks, Exeter.

THE TERRITORIAL ARMY

The Territorial Army has now reverted to its traditional all volunteer status and consists of both men and women. National Service men on completion of their two years with the Regular Army continue to have their 3½ years' reserve liability with the Territorial Army, but compulsory part-time training for them has been suspended.

The rôle of the Territorial Army is to form a reserve of trained and disciplined manpower in the country, trained to fight in any emergency.

The Territorial Army has retained the organization of divisions, but in the event of war would operate in independent brigades like the Regular Army. It has centres in towns and villages all over the country. Each unit carries out 14 days training in camp annually. During the remainder of the year units train in the evenings and at week-ends.

THE ARMY EMERGENCY RESERVE

Like the Territorial Army the Army Emergency Reserve consists of volunteers (men and women) and National Service men who are allotted to units but do no part-time training. This Reserve is not organized on a territorial but on a national basis, units drawing men from all over the United Kingdom. Its rôle is to provide units and individuals required overseas in peace-time emergencies, and to provide units and individuals to complete the mobilization order of battle of the Army on the outbreak of war. The majority of units are of a specialist nature. A.E.R. training is 14 days annually.

NAVY, ARMY AND AIR FORCE RESERVES ACT, 1959

From June 30, 1959, men who served between September 1939 and December 31, 1948, and were generally known as "Z" Reservists (from 1954, R.N. and R.M. Emergency Reservists or Army General Reservists Group "P") and R.A.F. "G" Reservists, ceased to have any further liability for service. The number of men affected by the Act is nearly 3,000,000 and the Minister of Defence hoped that many of them would volunteer for the Civil Defence Service or for the Royal Naval Reserve, the Royal Marine Forces Volunteer Reserve, R.N. Minewatching Service, The Territorial Army, Army Emergency Reserve, Royal Auxiliary Air

Force or the Royal Observer Corps, where they would be welcomed.

National Servicemen and volunteers joining the Forces after 1948, on completion of the normal period of whole or part-time service become Royal Naval Special Reservists, Army General Reservists Group "N" or R.A.F. Reservists Class "G", with liability to recall in a grave national emergency until June 30, 1964. The Act does not affect the position of men in the other reserves.

Officers whose service is similar in date to the groups above are similarly affected.

THE METEOROLOGICAL OFFICE

Air Ministry, Kingsway, W.C.2

[Temple Bar: 1215]

The Meteorological Office is the State Meteorological Service. It forms part of the Air Ministry, the Director-General being responsible to the Secretary of State for Air through the Permanent Under-Secretary of State. The general functions of the Meteorological Office are:—Provision of meteorological services to the Army, Royal Air Force, Civil Aviation, Ministry of Supply, the Merchant Navy and Fishing Fleets; Liaison with the Naval Weather Service of the Admiralty and provision of basic meteorological information for use by that Service; Meteorological services to other Government Departments, public corporations, local authorities, the Press and the general public;

Organization of meteorological observations in Great Britain and Northern Ireland, and in certain colonies; Collection, distribution and publication of meteorological information from all parts of the world; Maintenance of certain British observatories and publication and distribution of magnetic and seismological information obtained from them; Research in meteorology and geophysics.

Except for the common services provided by other Government Departments as part of their normal function, the cost of the Meteorological Office is born by Air Votes.

The gross annual expenditure by the Exchequer, including that on the common services, is of the order of £5,000,000. Of the expenditure chargeable to Air Votes, about £3,250,000 represents expenditure associated with staff and £1,500,000 expenditure on stores, communications and miscellaneous services. Of the total expenditure, over £1,000,000 is recovered from other Government Departments and outside bodies in respect of special services rendered, sales of meteorological equipment, etc.

Director-General of Meteorological Office, Sir Graham Sutton, C.B.E., D.S.C., F.R.S.

Royal Air Force Reserve

The Royal Air Force Reserve (including W.R.A.F. Reserve of Officers) consists of officers and men who have served in the regular air force; officers employed on air force duties under special conditions of service; and officers commissioned in ground branches during National Service and transferred to the R.A.F. Reserve of Officers (N.S. List); airmen liable to recall under the Navy, Army and Air Force Reserves Act, 1959 (Class G.); airmen transferred to Class H. of the Reserve for part-time service under the National Service Acts. The Royal Air Force Reserve also includes the Royal Air Force Volunteer Reserve, a pool

of officers, airmen and airwomen who train voluntarily on a part-time basis.

Royal Observer Corps

Bentley Priory, Stanmore, Middlesex.

Raised during the First World War and officially established in 1925, the Royal Observer Corps is a voluntary civilian organization. A part of Fighter Command, it has the task in war of identifying and plotting the movements of aircraft, and since 1955 has had the additional rôle of reporting and tracking radioactive "fall-out" for the Services and for the National Warning System.

Air Commodore-in-Chief, H.M. THE QUEEN.

Commandant, Air Commodore J. M. Warfield, C.B.E.

NAVY, ARMY AND AIR FORCE INSTITUTES

Imperial Court, Kennington Lane, S.E.11.

[Reliance: 1200]

Navy, Army and Air Force Institutes, known to the Services as NAAFI, is the official canteen organization for H.M. Forces in peace and war. In addition to the provision of canteens for H.M. Forces at home and overseas and in H.M. Ships, NAAFI is responsible for the provision of a large part of the items required for the messing of H.M. Forces at home. Registered under the Companies Act as an Association not for profit, NAAFI exists for the exclusive benefit of the serving element of H.M. Forces.

For the year ended Nov. 1, 1958, the whole of the profits were distributed to the Services. Rebate and discount amounting to £2,260.015 were paid to the Services. Extra rebate totalling £160,430 was also placed at the disposal of the Service Ministries for the welfare of the Forces.

THE UNION JACK CLUB

Waterloo Road, S.E.1. Tel.: Waterloo 6401.

This is one of our great National Institutions where Sailors, Soldiers and Airmen can go when on leave or passing through London: a place where they may obtain at moderate charges good meals and comfortable bedrooms and where they find the usual amenities of a club, including Library and Writing Room, Billiards Room, Television, Baths, Barber's Shop, and also a Club Shop in which articles of everyday use and almost everything that Service men require may be purchased. It is open throughout the day and night and has a total accommodation of 940 beds.

The Union Jack Club was erected by public subscription as a National Memorial to those who had fallen in the South African War, and other campaigns, and was opened in 1907. Membership is open to those below the rank of Officer

CIVIL DEFENCE

Under the *Civil Defence Act, 1948*, all necessary steps, short of actual combat, may be taken to afford protection against enemy attack and to mitigate the effects of any such attack. Ministers are by Order in Council made responsible for different functions in the organization and the general responsibility over the whole field of civil defence is that of the Secretary of State for the Home Department whose duty it is to co-ordinate all the Government's civil defence preparations. The Secretary of State for Scotland is similarly responsible for the co-ordination of all civil defence matters in Scotland. Examples of civil defence functions of individual Government Departments are:—

Ministry of Health (in Scotland, the *Department of Health for Scotland*). Measures to deal with casualties and disease; welfare in shelters.

Ministry of Housing and Local Government (in Scotland, the *Department of Health for Scotland*). Evacuation of civil population; accommodation of the homeless and refugees; demolition or repair of damaged property; disposal of the dead; maintenance of water supplies and sewerage; public information centres.

Ministry of Agriculture, Fisheries and Food. Provision, storage and distribution of food, animal feeding stuffs and soap; emergency feeding services. (In Scotland emergency feeding centres are the responsibility of the Dept. of Health for Scotland.)

Ministry of Transport and Civil Aviation. Maintenance of the road system; operation of railways, road transport, canals, docks and merchant shipping. (In Scotland maintenance of the road system is the responsibility of the Scottish Home Dept.)

Ministry of Power. Maintenance of supplies of fuel and power. (In Scotland the Scottish Home Dept. is responsible for the maintenance of electricity supplies.)

The Home Secretary is responsible for the national warning and monitoring system which is intended to provide warnings to the public of hostile attack and radioactive fall-out.

As was the case during the Second World War, local authorities have a large responsibility for civil defence, including the following functions:— Recruitment, organization and training of local divisions of the Civil Defence Corps; Collection of information and the control of civil defence operations; Protection of the public against gas and other toxic agents; Rescue work; Issue of instructions and advice to the public; Arrangements for the reception and billeting of official evacuees; Care of the homeless; Information centres for the public; Removal of casualties to hospital; Disposal of the dead; Emergency water supplies and sewerage; War damage repairs.

CIVIL DEFENCE ORGANIZATIONS

Civil Defence Corps

The Civil Defence Corps is a voluntary force whose duty it is to assist local and other authorities in Great Britain to discharge their civil defence functions. It is organized in Local Divisions and by local authorities.

LOCAL DIVISIONS.—Composed in peace-time of men and women who have volunteered to undergo civil defence training in their spare time. In England and Wales each Division has five sections

- (1) *Headquarters*: Organized in Sub-Sections for (a) Intelligence and Operations; (b) Scientific and Reconnaissance; and (c) Signals.
- (2) *Warden Section*: Organized in most areas by the Chief Constable, its main duties are: Assistance and advice to the public; re-

connaisance and reporting damage and radiological fall-out; public control under fall-out conditions; control of operations within warden post areas.

- (3) *Rescue Section*: Composed of a number of Rescue Parties, each of eight men trained in rescue work and first aid.
- (4) *Ambulance and Casualty Collecting Section*: Built up on the normal peace-time ambulance service provided by county and county borough councils, its duties in war-time include maintenance of the normal ambulance service and removal of war casualties to hospitals and other centres for treatment. Members of the Casualty Collecting Service are specially trained in first aid and in the organization of stretcher-bearing parties.
- (5) *Welfare Section*: To assist the local authority in matters such as evacuation, reception, billeting, care of homeless, welfare in shelters, emergency feeding and information services for the public.

Scotland.—Local Divisions are composed of four sections, i.e. excluding the Ambulance Casualty Collection Section. The duties of casualty collection fall to the Warden Section and the additional manpower for the civil defence requirements of the Scottish Ambulance Service come from the National Hospital Service Reserve, not the Civil Defence Corps.

London.—Divisions organized by Metropolitan boroughs consist of three sections, (1) Headquarters Section, (2) Warden Section, (3) Welfare Section. Divisions organized by London County Council are (1) Rescue Section, (2) Ambulance Section, (3) Welfare Section. Allocation of duties to the respective Welfare Sections follows broadly the separate peace-time functions of the L.C.C. and the London boroughs.

INDUSTRIAL CIVIL DEFENCE SERVICE.—To supplement the Civil Defence Corps the larger employers of labour in the country have been invited to form units of the Industrial Civil Defence Service in their premises. These units comprise Headquarters, Warden, Rescue and First Aid Sections having much the same responsibilities as the corresponding sections of the Corps and also a Fire Guard Section for fire-fighting duties. It is intended that the Industrial Civil Defence Service should operate in the closest association with the Civil Defence Corps and the other public civil defence services.

TRAINING.—Members of the Civil Defence Corps are required to undertake the training necessary to enable them to carry out the duties of an ordinary member of one of the five sections of the Corps. This training is known as "standard training." When a volunteer has completed this stage, he may, if he wishes, take additional training in order to increase his knowledge of civil defence and his usefulness as a member of the Corps. Thereafter "advanced" training is available if he wishes to attain a higher degree of proficiency and/or technical skill. Proficiency badges are awarded to mark the satisfactory completion of each of these three stages of training. All members of the Corps who have completed standard, or any additional or advanced training for which they volunteered, are required to attend for a few hours refresher training each year and to take part in exercises. Similar arrangements apply to the Industrial Civil Defence Service.

Civil defence instructors are trained either at one of three central training schools or locally,

under arrangements made by local authorities in accordance with directions given by the Home Office or Scottish Home Department. Courses and studies for senior officials concerned with civil defence (see page 390) are held at the Civil Defence Staff College.

Police

In war, police forces, with the support of the special constabulary, will continue to be responsible for the maintenance of law and order and traffic control. They will also be responsible for giving assistance in certain additional tasks, such as the evacuation of the civil population and the care and control of the homeless, in support of the civil defence organization.

By virtue of regulations made under the *Special Constables Acts, 1914 and 1923*, special constables may be appointed at any time for the preservation of the public peace and for the protection of the inhabitants and the security of property in a police district. The assistance thus afforded to the regular force is of particular value in times of war. Strengths of the Special Constabulary appear on p. 628.

Fire Service

The Auxiliary Fire Service was re-established under the provisions of the *Civil Defence Act, 1948*, and is organized by the local fire brigades on a voluntary basis. In the event of war the Fire Service would be brought under central control and formed into a N.F.S., which would be greatly expanded by the mobilization of certain R.A.F. reservists who have been trained in firefighting and by the mobilization of those members of the A.F.S. who were available for whole-time service. A proportion of the personnel and firefighting appliances of this service would remain in existing fire stations and would be available to deal with fires arising from normal causes, but the greater part of its resources would be organized in mobile columns, each of about 700 men and 100 pumping and other appliances. These columns would be stationed outside the main built-up areas but would be immediately available to operate wherever required.

National Health Service

Regional Hospital Boards are responsible for provision of hospital treatment of air raid casualties, first aid services and forward medical aid units based on selected hospitals.

National Hospital Service Reserve.—Provides a reserve of trained nurses and nursing auxiliaries to reinforce the nursing staffs of hospitals and to provide the requisite staff for forward medical aid units in war-time. Trained nurses are recruited by the

hospital authorities and admitted to membership without any requirement to undertake refresher courses or other commitments. Nursing members of the St. John Ambulance Brigade and V.A.D. members of the British Red Cross Society sponsored by their respective organizations are admitted to membership without any requirement to undertake hospital or refresher training. Nursing auxiliaries are trained by the St. John Ambulance Brigade or the British Red Cross Society. Those who are not members of the voluntary aid societies are required to take courses in first aid and home nursing totalling about 24 hours, and a short introductory hospital course totalling 6 hours. Optional training for all members of the Reserve is encouraged by the provision of hospital training, talks, lectures and exercises designed to provide suitable experience.

THE CHURCH OF SCOTLAND

THE CHURCH OF SCOTLAND is Presbyterian in constitution, and is governed by Kirk Sessions, Presbyteries, Synods, and the General Assembly, which consists of both clerical and lay representatives from each of the Presbyteries. It is presided over by a Moderator (chosen annually by the Assembly), to whom Her Majesty the Queen has granted precedence in Scotland, during his term of office, next after the Lord Chancellor of Great Britain. The Sovereign is represented by a Lord High Commissioner (appointed each year by the Crown), who receives the sum of £4,000 towards his expenses. The country, for Church purposes, was, before the union of the Church of Scotland with the United Free Church of Scotland, which was effected at a joint meeting of the General Assemblies of both Churches on October 2, 1849, divided into 16 Synods and 66 Presbyteries, and there were about 2,600 ministers and licentiates engaged in ministerial and other work. There have since been added: (1) The Presbytery of England and (2) The Presbyteries of (a) Northern Europe, (b) Southern Europe, (c) Spain and Portugal, (d) a number of Indian and Colonial Presbyteries, making 82 in all. The figures at Dec. 31, 1958, applicable to the Church of Scotland as now re-united after a century of separation are:—

Congregations, 2,257; total membership 1,315,466; Sunday Schools, 2,842, with 307,218 scholars and 41,193 teachers. In 18 Foreign Mission fields, there are 282 European missionaries (and in addition 151 missionaries' wives, many of whom are doing mission work in the various fields) and over 15,000 evangelists and teachers, including in both cases those of the Women's Foreign Mission.

In 1560 the Scots Parliament abolished the jurisdiction of the Pope, proscribed the Mass, and ratified a Confession of Faith drawn up by John Knox and others. In all essentials the articles of the ancient creeds of the Church were adhered to. Ceremonies were declared to be temporary in their nature, and should be altered when they began to foster superstition. Presbytery was settled in 1590. The restoration of the rights of the Bishops, civil and ecclesiastical, was, however, sanctioned by the General Assembly of 1610, and three Scottish Bishops were in that year consecrated in London. Further innovations by King James VI. alarmed the people, and the attempt of Charles I. to impose on the Church a Book of Canons and a Liturgy was met by the

National Covenant and the restoration of Presbyterian forms, which culminated in the *Westminster Confession of Faith* in 1646. At the Restoration the Church again became Episcopal, but in 1690 the Scottish Parliament re-established Presbyterianism. By the Treaty of Union between England and Scotland (ratified by the English Parliament 6 Anne c. 12.) the Church of Scotland was secured in its Presbyterian form of government, and the very first official act of a sovereign of the British Empire on his or her accession is to take an oath to maintain inviolably this settlement. In 1921 Parliament passed the *Church of Scotland Act, 1921*, to declare the lawfulness of certain Articles declaratory of the constitution of the Church of Scotland. These Articles were framed with a view to facilitating the union of other Churches with the Church of Scotland. A committee, appointed by the Secretary for Scotland, enquired into the question of endowments, following upon which the Church of Scotland (Property and Endowments) Bill was introduced and was passed into law (15 and 16 Geo. V. c. 33) in 1925. The primary purpose of this legislative measure was to transfer to and vest in the Church of Scotland General Trustees, incorporated under the Church of Scotland (General Trustees) Order Confirmation Act, 1921, the whole properties and endowments belonging to the Church as it then existed, for behoof the latter. Further legislation with reference to these was embodied in The Church of Scotland Trust Order Confirmation Act, 1932, and The Church of Scotland (Property and Endowments) Amendment Act, 1933.

The total amount of Christian Liberty received by Parishes and Charges in 1958 was £4,340,873.

GENERAL SYNOD

Consisting of House of Bishops (14) and House of Representatives (viz., 216 clerical and 432 lay).

Honorary Secretaries, Very Rev. H. W. Rennison, M.A.; Rev. Canon R. G. F. Jenkins, B.D.;

J. D. Smyth; M. F. E. Dobbin.

Chief Officer and Secretary to the REPRESENTATIVE CHURCH BODY (INCORPORATED 1870), D. W. Pratt.

52 St. Stephen's Green E., Dublin; Deputy Chief Officer and Accountant, D. M. Hudson.

Asst. Sec., E. Taylor.

By the Act of Union, 1800, the Church of Ireland was united with the Church of England, the Sovereign, as one of its members, being supreme governor on earth. By the Act of 1869 this union was severed, and on Jan. 1, 1871, the Church of Ireland resumed her independent position. The Act of 1869 not only disestablished the Irish Church, but also took away her endowments, nothing being left but the right to the life services of the annuitant Bishops and Clergy (the annuities provided were commuted for a capital sum), the right to claim churches in use for divine service, the right to buy the See and Glebe Houses (with garden and curtilage), and £500,000 in lieu of private endowments.

The supreme governing body of the Church of Ireland is the GENERAL SYNOD, which meets annually.

Subject to the GENERAL SYNOD are 21 Diocesan Synods, which are assisted by smaller elected bodies called Diocesan Councils.

The Bishop of the Diocese was formerly chosen by the clerical and lay members of the Diocesan Synod, but from Dec. 1, 1959, will be chosen from an Electoral College. The Primate is chosen by the House of Bishops from amongst their own number.

The incumbent of the Parish is appointed by a Board of Nomination, consisting of 7 persons, viz.:—The Bishop, 3 diocesan nominators (2 clerical and 1 lay) appointed by the Diocesan Synod, and 3 parochial nominators (lay) appointed by the registered vestrymen of the parish.

The financial trustees of the Church are the REPRESENTATIVE BODY, composed of the Archbishops and Bishops, 14 clergymen and 28 laymen, chosen by the Diocesan Synods, with 14 co-opted members (clerical or lay). This body holds the property of the Church, and administers its funds, subject to the General Synod.

The first property it held was the capital sum £7,581,075, representing the life annuities of the Bishops and Clergy paid over as commutation money by the Church Commissioners, and also £500,000 compensation for private endowments. The funds, however, in the custody of the Representative Body amount in all to £14,145,588, made up of Parochial Sustentation £10,216,523, General Synod Funds £876,210, Miscellaneous purposes £3,052,885.

Since 1869 members of the Church have paid in to the Representative Body a total sum of £16,121,343. The interest of the Diocesan and Parochial Sustentation and other Funds is approximately £480,990.

THE METHODIST CHURCH

UNDER the general designation of **METHODISTS** are included all those religious bodies which owe their existence, directly or indirectly, to the efforts of the Revd. John Wesley (born June 17, 1703; died March 2, 1791) and his brother, Revd. Charles Wesley (born Dec. 18, 1707; died March 29, 1788).

THE METHODIST CHURCH

On September 20, 1932, the Wesleyan Methodist Church, the Primitive Methodist Church and the United Methodist Church, were united and became "The Methodist Church."

The Methodist Church is governed primarily by the Conference, secondarily by the Synods (held in September and May), consisting of all the ministers and of selected laymen in each district, over which a chairman is appointed by the Conference; and thirdly by quarterly meetings of the ministers and lay officers of each circuit. The authority of both Synods and Quarterly Meetings is subordinate to the Conference, which has the supreme legislative and judicial power in Methodism.

President of the Conference (July, 1959-60), Rev. E. W. Baker, M.A., D.D., Ph.D.

Vice-President of the Conference (July, 1959-60), Prof. C. A. Coulson, D.Sc., Ph.D., F.R.S. (Oxford).

Secretary of the Conference, Rev. E. W. Baker, M.A., D.D., Ph.D., 2 Central Buildings, Westminster, S.W.1.

President Designate (1960-61), Rev. E. Rogers, M.A., B.D.

Vice-President Designate (1960-61), T. G. Thomas, M.P.

Statistics.—In 1958 in association with the Conference in Great Britain (at home and abroad) there were 5,003 Ministers, 37,223 Local Preachers, 1,086,426 Members and Probationers, 17,526 Churches, 13,488 Sunday Schools, 157,847 Sunday School Officers and Teachers, and 876,974 Sunday Scholars.

The World Methodist Council, founded 1881, re-organized 1951, associates Methodism throughout the world in 82 countries. *President*, Rev. Dr. Harold Roberts, England. *Secretaries*, Rev. Dr. E. Benson Perkins, 38 Belle Walk, Birmingham, 13; Rev. Dr. Elmer Clark, Lake Junaluska, N.C., U.S.A. The statistics of world Methodism are: members and probationers, 18,456,500; churches and preaching places, 99,500; ministers, 60,500; local preachers, 83,000; Sunday schools, 76,400; officers and teachers, 825,000; scholars, 8,200,000.

The Methodist Church was founded in 1739 by the two brothers Wesley and rapidly spread throughout the British Isles and to America before

1770. The Methodist Church in Great Britain was united in 1932 by the fusion of the Wesleyan Methodist Church which was the original section, the Primitive Methodist Church, which arose through the evangelists Hugh Bourne and William Clowes in 1810, and the United Methodist Church, itself a fusion in 1907 of the Methodist New Connexion which dated from 1797, the Bible Christian Methodist Church, which dates from 1815 and the United Methodist Free Churches which originated in controversies in 1828 and 1849. The Methodist Church of America was formed by a union of three great Methodist denominations in 1939. Australasia, New Zealand and South Africa are separate autonomous Methodist Churches, and other branches throughout the world have originated from the Methodist Church either in Great Britain or in America.

METHODIST CHURCH IN IRELAND

The Methodist Church in Ireland has 249 Ministers, 393 Lay Preachers, 31,864 Adult and 17,060 Junior Members, 2,041 Sunday School Teachers and 15,725 Scholars.

President (1959-60), Rev. R. E. Ker, M.A., Edgehill College, Lennoxvale, Belfast.

Secretary, Rev. R. D. E. Gallagher, M.A., B.D., The Grosvenor Hall, Belfast.

THE UNITED CHURCH OF CANADA

The United Church of Canada is the result of the union (1925) of Methodist, Presbyterian and Congregational Churches in Canada. *Sec. of General Council*, Rev. Ernest E. Long, B.A., D.D., The United Church House, 85 St. Clair E., Toronto.

INDEPENDENT METHODISTS

Independent Methodists.—This body is Congregational in its organization, with an unpaid Ministry. Its first Conference was held in 1805. In 1959 there were in Great Britain 310 Ministers, 8,415 Members, 152 Chapels and 11,305 Sunday School Scholars. *Secretary*, W. Drummond Brown, 21 Ashley Drive, Swinton, Lancs.

WESLEYAN REFORM UNION

This Union is Methodist in doctrine, Congregational in government, with, if any church desires it, a paid ministry. It is the remnant of the original Reformers expelled from Wesleyan Methodism in 1849. The adherents are mainly in the Midland and Northern counties. In 1959 there were in Great Britain 25 Ministers, 280 Lay Preachers, 6,078 Members, 168 Chapels and 9,634 Sunday Scholars. —*President* (1959-60), C. W. Hodson. *General Secretary and Connexional Editor*, Rev. A. Halladay, Wesleyan Reform Church House, 87-89 West Bar, Sheffield, 3.

THE CALVINISTIC METHODIST CHURCH OF WALES

The **CALVINISTIC METHODIST OR PRESBYTERIAN CHURCH OF WALES** is the only Church of purely Welsh origin, and embraces a very large section of the Welsh-speaking population. Its form of government being Presbyterian, it is a constituent of the Pan-Presbyterian Council or Alliance. It is also a member of the British Council of Churches and the World Council of Churches. It has foreign missions in Assam and India.

In 1956 the body numbered—churches, 1,435; chapels and other buildings for Sunday-school branches, 1,610; ministers and preachers, 816; elders, 7,351; communicants, 147,132; Sunday-school teachers and officers, 12,633; Sunday-school scholars, 87,823; adherents (including communicants), 201,068. Contributions for various religious purposes (including the ministry), £816,517.

One of the features of the Welsh churches is the

Sunday-school, which is attended by adults as well as children.

The *Eastern Association*, which now includes nine of the English Presbyteries, was formed in 1947 and has 356 chapels and 28,459 communicants.

On 18 July, 1933, the Calvinistic Methodist or Presbyterian Church of Wales Act, 1933, received the Royal Assent. By this measure the autonomy of the Church in matters spiritual and the establishment of a Properties Board have been secured.

Moderators of Associations (1959)—*South Wales*, Rev. E. Howells, Bridgend; *North Wales*, Rev. H. Jones, B.A., Gellifor, Ruthin; *The East*, Rev. P. F. Payne, M.C., B.A., Hoylelake.

Moderator of General Assembly (1959), Rev. G. Wynne Griffith, B.A., B.D., Llanfair P.G., Anglesey. *Chief Secretary*, Rev. R. B. Owen, B.A., The Manse, Plas Avenue, Prestatyn, Flint.

THE INDEPENDENTS AND THE BAPTISTS

The INDEPENDENTS, or CONGREGATIONALISTS, are the most ancient community of Dissenters. In 1831 the majority of their churches united to form the Congregational Union of England and Wales, incorporated in 1902, and in 1920 nine provinces were formed, each with a Moderator. There are 51 county and other Associations in the British Isles, with 3,023 churches and preaching stations with 1,886 ministers and 214,081 members in England and Wales. *Chairman of the Congregational Union of England and Wales (1959-60)*, B. J. Hartwell, O.B.E., LL.M. *Secretary*, Rev. H. S. Stanley, M.A. *Office and Publication Department*, Memorial Hall, Farrington Street, E.C.4.

The *Countess of Huntingdon's Connexion*, with 37 chapels and mission stations, is governed by nine trustees assisted by an annual conference of ministers and delegates. Most of the churches are affiliated with the Congregational Union.

Secretary, B. Touch. *Offices*, 27 Dorking Road, Great Bookham, Surrey.

Other Religious Denominations.

The General Assembly of Unitarian and Free Christian Churches has about 243 ministers, 330 chapels and other places of worship in Great Britain and Ireland. *Gen. Sec.*, Rev. John Kieley, Essex Hall, Essex Street, W.C.2.

The Salvation Army, first known as the Christian Mission, was founded by William Booth, in the East End of London in 1865. In 1878 it took its present name and adopted a quasi-military method of government. Since then it has become established in all parts of the world. The head of the denomination, known as the General, is elected by a High Council consisting of all the Commissioners of the Army. In 1959 there were, in Great Britain, 1,014 Corps (Churches), 2,836 Officers engaged in evangelistic work and 53,650 Local Officers (lay workers). The latest statistics for the world (1959) are 16,966 Corps and 26,887 Officers. *General*, Wilfred Kitching (elected May 11, 1954).

International Headquarters:—113 Queen Victoria Street, E.C.4.

The Brethren number about 80,000, of whom five-eighths belong to the "Open" body. The Society of Friends (Quakers) consists of 21,643 members in Great Britain, and has 438 places of worship (*Recording Clerk*, Stephen J. Thorne). The total number in the world is about 160,000 (110,000

in U.S.A. and Canada). *Central Offices (Great Britain)*, Friends House, Euston Road, N.W.1, (Ireland), 6 Eustace Street, Dublin. The Oxford Group ("Moral Re-Armament") (*Dr. F. N. D. Buchman*), *Hdqs.*, 4 Hays Mews, Berkeley Square, W.1. The First Church of Christ, Scientist, in Boston, Massachusetts, U.S.A. (*District Manager*, Committees on Publication for Great Britain and Ireland, 30 Norfolk Street, Strand, W.C.2), has 335 branch churches and societies in Great Britain and Ireland. The Moravian Church, 5 Muswell Hill, N.10, has in the U.K. 40 congregations and preaching stations, with 2,842 communicants. The New Church (Swedenborgian), 75 societies, with about 6,700 registered members; the Latter-Day Saints (Mormons) have 65 churches. The Churches of Christ have 163 churches in Gt. Britain and Northern Ireland. The Free Church of England (otherwise called The Reformed Episcopal Church) has 50 churches in England, *Gen. Sec.*, Rev. W. Rodgers, 3 Langdale Road, Wallasey, Cheshire. The Seventh Day Adventists (*Hdqs.*, Stanborough Park, Watford, Herts.) have 109 organized churches, 49 companies and 8,681 members in the British Isles. At Woking, Surrey, is the Shah Jehan Mosque for Muslims, built in 1889. There are also Mosques at Southfields, S.W.18, Commercial Road, E.1, Birmingham, Manchester, Cardiff and Glasgow.

The BAPTISTS have over 21,000,000 members in all countries. Like the Congregationalists, they are for the most part grouped in associations of churches, and the majority of these belong to the Baptist Union, which was formed in 1813. In the British Isles there were, in 1958, 2,100 pastors and deaconesses. The members numbered 324,181, Sunday-school teachers 43,178, and Sunday scholars 289,239. *President of the Baptist Union (1959-60)*, Rev. J. B. Middlebrook, M.A. *Secretary*, Rev. E. A. Payne, M.A., D.D. *Office*, 4 Southampton Row, W.C.1.

THE JEWS

It is estimated that about 400,000 Jews are resident in the British Isles, a little more than half being domiciled in London. Of the total number in Great Britain about 90 per cent. are described as adhering to orthodox views.

The *Board of Deputies of British Jews*, established in 1760, is the representative body of British Jewry and is recognized by H.M. Government. The basis of representation is primarily synagogal, but secular organizations are now also represented. It is a deliberative body and its objects are to watch over the interests of British Jewry, to protect Jews against any disability which they may suffer by reason of their creed and to take such action as may be conducive to their welfare. *President of the Board of Deputies* (Woburn House, Upper Woburn Place, W.C.1), Barnett Janner, M.P. *Secretary*, A. G. Brotman.

CHIEF RABBI—The Very Rev. Israel Brodie, born 1895, appointed 1948.

Secretary, Michael Wallach, *Office*, 85 Hamilton Terrace, N.W.8.

The *Beth Din* (Court of Judgment) is a rabbinic body consisting of *Dayanim* (Assessors) and the Chief Rabbi, who is President of the Court. The Court arbitrates when requested in cases between Jew and Jew and gives decisions on religious questions. The decisions are based on Jewish Law and practice and do not conflict with the law of the land. *Dayanim*, L. Grossman; A. Rapoport; Dr. M. Lew; M. Steinberg; M. Swift. *Clerk to the Court*, Marcus Carr, Adler House, Tavistock Square, W.C.1.

Chief Rabbi of the Community of Spanish and Portuguese Jews in London (Established 1657), Dr. Solomon Gaon.

THE ROMAN CATHOLIC CHURCH

HIS HOLINESS POPE JOHN XXIII (Angelo Giuseppe Roncalli), Roman Pontiff, born in Sotto il Monte, Italy, November 25, 1881; ordained priest August 10, 1904; Archbishop of Acreopolis March 3, 1925; Cardinal January 12, 1953; Patriarch of Venice January 15, 1953; elected Pope October 28, 1958; crowned November 4, 1958.

THE SACRED COLLEGE OF CARDINALS, when complete, consists of six Cardinal Bishops, fifty Cardinal Priests and fourteen Cardinal Deacons. This number was fixed by Pope Sixtus V in 1586. Pope John XXIII created 23 new Cardinals on December 15, 1958, making 74 with those previously created. In August, 1959, there were 72 cardinals. The Cardinals are the advisers and assistants of the Sovereign Pontiff and form the supreme council or Senate of the Church. On the death of the Pope they elect his successor. The assembly of the Cardinals at the Vatican for the election of a new Pope is known as the Conclave in which, in complete seclusion, the Cardinals elect by secret ballot; a two-thirds majority is necessary before the vote can be accepted as final. When a Cardinal receives the necessary votes the Dean of the Sacred College formally asks him if he will accept election and the name by which he wishes to be known. On his acceptance of the office the Conclave is dissolved and the First Cardinal Deacon announces the election to the assembled crowd in St. Peter's Square. On the first Sunday or Holyday following the election the new Pope is crowned with the tiara, the triple crown, the symbol of his supreme spiritual authority. A new pontificate is dated from the coronation.

The Catholic Directory estimates the Roman Catholic population of England and Wales at 3,401,276, Scotland (1959) 780,050, Republic of Ireland (1955) 2,786,033, Northern Ireland (1959) 484,151. The figures for Canada (1956) are 6,260,546, Australian Commonwealth (1958) 2,010,165, New Zealand (1958) 268,235, Union of South Africa (1959) 835,234, India (1959) 5,392,272, Pakistan (1959) 302,427, Ceylon (1956) 651,586, Malta (1958) 290,600, Malaya and Singapore (1959) 153,374, Trinidad (1958) 250,000, Jamaica (1959) 106,162, Tanganyika (1957) 1,089,841, Uganda (1957) 1,524,870, Nigeria (1958) 825,515, Ghana (1957) 473,893; world total (estimated) 423,000,000.

London Cathedrals, Churches, etc.

ST. PAUL'S CATHEDRAL, City of London, E.C.4 (1675-1710), cost £747,660. The cross on the dome is 365 ft. above the ground level, the inner cupola 218 ft. above the floor. "Great Paul," in S.W. tower, weighs 17 tons. Organ by Father Smith (enlarged by Willis) in case carved by Grinling Gibbons (who also carved the choir stalls). The choir and high altar were restored in 1958 after war damage and an American War Memorial Chapel was consecrated in November, 1958. Nave and transepts free; Fees to the following parts (on weekdays only, 11 a.m. to 3.30 p.m. and—during Summer Time only—4.45 p.m. to 5.30 p.m.): Crypt, 6d. Library, whispering gallery, and stone gallery, 1s.; golden gallery 1s.; ball, 1s.; total, 3s. 6d. Service on Sundays at 8, *10.30, *3.15, and *6.30. Weekdays at 8, *10, *4. Also Wednesdays, *12.30 p.m., Litany; Fridays, *12.30 p.m. short mid-day service. (*Services are choral.) To the S. are remains of the Chapter House and Cloisters of "Old St. Paul's," destroyed by the Fire of London in 1666.

WESTMINSTER ABBEY, S.W.1 (built A.D. 1050-1760).—Open on weekdays at 8 a.m. Admission to Royal Chapels by fee of 1s., except on Mondays (open free). Transepts and Nave open on Sundays only between services. Holy Communion at 8; matins at 10.30; Holy Communion at 11.30. Evensong at 3. Evening service with Sermon at 6.30; Daily—Holy Communion at 8 a.m.; School Service at 9 a.m.; matins, 10 a.m.; evensong (choral), 5.0 p.m. (Saturday, 3 p.m.). Chapel of Henry VII, Chapter House and Cloisters; King Edward the Confessor's shrine, A.D. 1269, tombs of kings (Edward I, Edward III, Henry V, Mary, Queen of Scots, Queen Elizabeth), and many other monuments and objects of interest, including the grave of "An Unknown Warrior" and St. George's Chapel at the W. end of Nave (1920), and Poets' Corner. The Coronation Chair encloses the "Stone of Scone," brought from Scotland by Edward I in 1297.

SOUTHWARK CATHEDRAL, south side of the Thames, near London Bridge, S.E.1.—Mainly 13th century, but the nave is largely rebuilt. Known as St. Mary Overie before 1540. Open 7.30 a.m. to 6.45 p.m., free. Sunday services, Holy Communion, 8.30 and 11 a.m.; Morning Prayer, 10.15 a.m.; Evening Prayer, 3 p.m.; Nave Service, 6.30 p.m. Weekdays: 7.30, 8 and 5.30 p.m. (choral except Wednesdays) (5 p.m. on Saturdays). The tomb of John Gower (1330-1408) is between the Bunyan and Chaucer memorial windows, in the N. aisle; Shakespeare effigy backed by view of Southwark and Globe Theatre in S. aisle; the altar screen (erected 1520) has been restored; the tomb of Bishop Andrewes (died 1626) is near screen. The Early English Lady Chapel (behind the choir), restored 1930, is the scene of the Consistory Courts of the reign of Mary (Gardiner and Bonner); and is still used for this purpose. John Harvard, founder of Harvard University, was baptised here in 1607.

ALL SAINTS, Margaret Street, W.1.—Built by Butterfield in 1859. Anglo-Catholic and noted for its music.

ST. ANDREW UNDERSHAFT, St. Mary Axe, Leadenhall Street, E.C.3.—An early 16th-century church, contains a monument of Stow, the London antiquary (a new quill-pen being placed in his hand at an annual Commemoration Service), and a memorial of Holbein. The organ is by Renatus Harris the rival of Father Smith.

ST. BARTHOLOMEW'S Priory Church, Smithfield, E.C.1, the oldest parish church in London (A.D. 1223).—Rector, Rev. N. E. Wallbank, Mus.D. Fine old Norman building, with tomb of the first prior Rahere. N. transept restored and re-opened in June, 1893. Crypt, Lady Chapel and Cloisters

opened 1905-1928. Open daily. Sunday services 9 a.m., 11 a.m. and 6.30 p.m.

ST. BRIDE, Fleet Street, E.C.4.—Rebuilt by Wren. Restored after being gutted during Second World War and rededicated, Dec. 1957. Recent excavations have revealed remains of earlier churches on site.

ST. CLEMENT DANES, Strand, W.C.2.—Gutted in Second World War, rebuilt as Royal Air Force Church, and consecrated, 1958.

ST. EDMUND, KING AND MARTYR, Lombard Street, E.C.3.—Rebuilt by Wren, with altar at north end; organ by Renatus Harris.

ST. ETHELBURGA, Bishopsgate, E.C.2 (14th and 15th century) with two "Hudson" windows.—On April 19, 1607, Henry Hudson (the navigator who gave his name to Hudson's Bay and to the Hudson River), his son John, and his ten sailors took communion in St. Ethelburga's, "purposing to goe to sea four days after."

ST. GEORGE, Hanover Square, W.1 (18th century; famous for fashionable marriages).

ST. GEORGE, Borough High Street, Southwark, S.E.—(Rebuilt 1736) contains the tombs of Bishop Bonner (1497-1569) and Edward Cocker (1631-1675), the author of Cocker's "Arithmetik." (The expression "according to Cocker" refers to this book.)

ST. HELEN, Bishopsgate, E.C.2.—The "Westminster Abbey of the City" from its numerous monuments; building dates from 13th century. Contains a Shakespeare memorial window presented by Mr. William Prentice, an American. In St. Helen's Place the foundations of an earlier church were uncovered during rebuilding operations in 1922.

ST. KATHERINE CREE, Leadenhall Street, E.C.3.—Rebuilt in early 17th century and ascribed to Inigo Jones. Contains a Catherine wheel E. window, an organ by Father Smith, Archbishop Laud's Prayer Book and Bible, and a monument of Sir Nicholas Throgmorton.

ST. MAGNUS THE MARTYR, Lower Thames Street, E.C.3.—Rebuilt by Wren, with steeple (185 feet) and lantern of great beauty, contains the tomb of Miles Coverdale (1488-1568), translator of the Bible, who was rector of St. Magnus (1564-1566) and Bishop of Exeter (1551-1557).

ST. MARGARET, Lothbury, E.C.2.—Rebuilt by Wren, contains Grinling Gibbons carvings (font, chancel screen, and pulpit).

ST. MARGARET PATTERNS, Rood Lane, Eastcheap, E.C.3.—Rebuilt by Wren, with a leaden spire, contains two canopied pews and other curious survivals and relics.

ST. MARGARET, WESTMINSTER, S.W.1.—Founded 11th or 12th century; buildings date from 15th century, with frequent "restorations." Since 1614 the parish church of the House of Commons.

ST. MARTIN-IN-THE-FIELDS, Trafalgar Square, S.W.1.—Built by James Gibbs (1721-6) in place of earlier church on same site. In register of burials are the names of Nell Gwynne (1687), Farquhar the dramatist (1707), and Roubiliac the sculptor (1672). A bust of James Gibbs by Rysbrack is in the church. Famous for its broadcast services.

ST. MARY WOOLNETH (above the Bank Tube Station), King William Street and Lombard Street, E.C.3.—Built by Hawksmoor early 18th century, organ by Father Smith.

ST. MICHAEL, PATERNOSTER ROYAL, College Hill, Upper Thames Street, E.C.4.—Rebuilt after the Fire by Strong (a pupil of Wren's), the former

church contained the tomb of "Dick Whittington" and a Grinling Gibbons altarpiece.

ST. PAUL, Covent Garden, W.C.2.—Built by Inigo Jones. The tombstones round the exterior of the church record the burial places of Samuel Butler (Hudibras), Sir Peter Lely (painter), Wycherley (dramatist), Grinling Gibbons (wood-carver), Dr. Arne ("Rule, Britannia"), and Macklin (actor); Ellen Terry memorial.

ST. PETER, Cornhill, E.C.3.—Rebuilt by Wren, contains a carved choir screen also ascribed to him. The organ is by Father Smith.

ST. SEPULCHRE, Holborn, E.C.1.—Part of this church escaped the Fire. The organ is by Renatus Harris, in a case attributed to Grinling Gibbons. Memorials in the church to Roger Ascham (Queen Elizabeth's tutor) and Capt. John Smith, "sometime Governour of Virginia and Admirall of New England."

ST. STEPHEN, Walbrook, E.C.4.—Rebuilt by Wren, contains the tomb of Sir John Vanbrugh (architect and dramatist). Although it was much damaged by bombs, 1940-1, repairs have been carried out and it remains open.

SAVOY CHAPEL, Savoy Street, Strand, W.C.2 (rebuilt about 1505, on site of 13th-century Savoy Palace, restored after disastrous fire in 1864).—Graves of Gavin Douglas and George Withers, and memorials of D'Oyly Carte, Laurence Irving.

TEMPLE CHURCH, The Temple, E.C.4.—The nave formed one of five remaining round churches in England, the others being at Cambridge, Northampton, Little Maplestead (Essex), and Ludlow Castle. Rebuilding of the church was completed in 1958. Sunday morning services, open to the public, 11.15 a.m., except in August and September.

Education

ENGLAND AND WALES

Education in England and Wales is organized under the *Education Act, 1944* (Butler Act). Minor amending Acts were passed in 1946, 1948 and 1953. The main features of the system are (a) that the State school system is highly decentralized, education being the responsibility of 146 local education authorities (61 administrative counties, 83 county boroughs, 1 joint board and London). The County Authorities exercise their powers in many instances through Divisional Executive Committees and the Education Committees of Excepted Districts; (b) that voluntary agencies play an important part in educational provision often in co-operation with the State. The Ministry of Education controls the system mainly through the scheme of inspection and with power derived from statute. The expenditure of local education authorities is met partly from rates and partly from central government grants. The latter are paid mainly in the form of a general grant from the Ministry of Housing and Local Government covering local health and other services as well as education. Detailed suggestions to L.E.A.'s. are issued in Ministry of Education circulars and administrative memoranda. There are central advisory councils dealing with education in England and in Wales respectively.

A statutory report with full statistical tables is published yearly by the Ministry.

The State System

The State system is in transition as the 1944 Act is being implemented. The administrative system has been reorganized and the school-leaving age raised (April 1, 1947) to 15. Attention has been given to the development of special schools and the school meals service, but the major problem at present is the provision of teachers and accommodation for the increased number of children at school between 1952 and 1962. A five-year school building plan costing £300,000,000 will begin in 1960 and the provision for the training of teachers is also to be greatly expanded. Special attention is also being paid to the development of technical education and new building to the value of £70,000,000 has been authorized for the 5 years ending in 1961. In 1958 the first students obtained the new award of Diploma in Technology and the National Council for Technological Awards has now instituted a higher award—Member of the College of Technologists—obtainable after 3 years' work in industry and a technical college.

Local Authorities were required by the Act to prepare development plans for education in their areas (including school reorganization and necessary building), and this work is nearing completion. Plans approved become binding upon L.E.A.'s. A total of nearly £127,700,000 of building work was under construction at the end of 1958. 590 new schools were occupied in 1958, providing 98,080 places for primary pupils and 196,830 for secondary.

Education is envisaged in the 1944 Act in three stages:—

Primary Stage (for children up to 11 years). *Nursery Schools* to age 5 (must be provided by Local Education Authority for all parents who desire them); *Infant Schools*—from age 5 (*compulsory School age*); *Junior Schools*—from age 8 to 11.

About the age of 11 all children are to go to a secondary school. The suitability of the school may be reviewed at age 13.

Secondary Stage (11 years to 15 years, later to be raised to 16)—*Secondary Grammar Schools* (giving

an academic education); *Secondary Technical Schools* (for those whose abilities are of a more practical character); *Secondary Modern Schools* (giving a general and practical education).

These Secondary Schools are intended to be of equal status and can be combined into a single multi-lateral or "comprehensive" school. The prevailing tendency is to foster wide experiment and flexibility in the organization of secondary schools. Education in Primary and Secondary Schools is free.

In 1956 Leicestershire began an important, limited experiment, transferring all children at 11 to non-selective "high schools" and transferring at 14 all children whose parents wish it and will keep them at school till 16 to grammar schools, thus doing away with the "11 plus" examination. Nottingham has established twelve secondary modern schools providing a 5 years' course to G.C.E. standard in either grammar or technical subjects.

Pupils in Secondary Schools may sit for the examinations leading to the award of the General Certificate of Education. The nine examining bodies set papers at three levels, ordinary, advanced and scholarship. Entrance to the Universities and to many courses of professional training depends on the results in these examinations. The total number of candidates at the 1958 summer examination was 349,367. In January 1958 some 40,900 boys and 25,100 girls in maintained and assisted schools were preparing for, or had passed, at least two subjects at advanced level. In the summer about 10,600 candidates from nearly 800 secondary modern schools sat for ordinary level.

Further Stage. [Includes all types of provision for education after 15 (later 16).] *County Colleges* which, when established, all children not receiving full-time education will attend for the equivalent of one day a week from age 15 (later 16) to age 16 (later to be raised to 18); *Technical Colleges* and *Colleges of Art and Commerce* (providing specialist studies); *Evening Institutes* (evening classes in vocational and other subjects); *Service of youth* (recreational and other services for youth provided in co-operation with voluntary bodies); *Adult Education* (liberal education for adults provided in co-operation with voluntary bodies); *Community Centres*, etc.

In January, 1958, 6,914,291 children were present in the primary or secondary schools maintained, aided or controlled by Local Education Authorities; there were 112,865 in all direct grant schools, 281,394 in independent schools recognized as efficient, and 233,776 in other independent schools. The number of pupils in special schools, of which 31 were new, was over 62,000. The number of senior children in all-age schools fell in 1958 from 165,329 to 139,297. A third of the new secondary schools required for the reorganization of all-age schools were in use and another third being built. The percentage of primary school children in classes of over 40 had gone down from 32.2 to 29.7. The percentage of children in over-sized senior classes remained at 62.1. In major establishments for further education, 1957-58, full-time students numbered 75,981 and part-time day-release students 434,672.

Voluntary Agencies

The school system is complicated by voluntary agencies which have assisted greatly in educational development. A number of the primary and secondary schools are still provided by voluntary

bodies, mainly religious, but have long been maintained by L.E.A.'s. Under the 1944 Act, the managers of such schools could obtain half of funds required for rebuilding to modern standards, the schools remaining under their partial control as "aided schools" and the cost of running the schools being met by the Local Education Authority. Under the Act of 1959 the building grant has been increased to 75 per cent. In respect of existing schools and of new secondary schools where these are required to accommodate pupils from existing primary schools. If the managers cannot raise money necessary for rebuilding, schools become "controlled schools" under the management of the Local Education Authority, though with provisions enabling denominational religious instruction to be given. Over 160,000 additional places in voluntary schools have been brought into use since 1945 and more than 190,000 are included in present and future building programmes. Since 1945 grants of £10,655,658 and loan advances of £3,510,313 have been made for building. In 1958 grants were made of £704,832 (C. of E.), £1,442,467 (R.C.) and £154,903 (other voluntary bodies), and also loan advances of £304,007 (C. of E.), £633,818 (R.C.) and £11,981 (others). Of the 10,569 voluntary schools (primary and secondary) 4,725 had been given controlled, 5,514 aided and 73 special agreement status.

The Direct Grant Grammar Schools (non-profit-making and with some non-local characteristics) occupy a semi-independent position, getting grants direct from the Ministry. They are run by Boards of Governors with Local Education Authority representatives and take fee-paying pupils chosen by themselves. For these pupils fees are graded according to parent's means. At least 25 per cent. of the places must be free, and Local Authorities may claim up to a further 25 per cent. of places, for which no further fees are paid by parents. In Jan., 1958, there were 173 such schools with 100,892 pupils (8,613 being boarders). In January, 1958, there were 5 Direct Grant Secondary Technical Schools with 817 pupils.

About 90 Public Boarding Schools and nearly 4,400 Private Schools remain independent of the State system, except that many Public Schools give a limited number of places to nominees of Local Education Authorities. Under the 1944 Act all schools are being inspected by the Ministry and can later be closed if found inefficient. This process was completed in 1959. Of these 4,400 schools, with about 500,000 pupils, 1,486 have been recognized as efficient and the remainder registered or provisionally registered. Only 23 were served with a notice of complaint. The total number of children in independent schools is estimated at 500,000.

In the field of Further Education many private bodies, often receiving grants of money from Local Education Authorities and from the Ministry, are associated with the public authorities.

Teachers

The number of teachers in the maintained primary and secondary schools must be further raised from 287,415, of whom 20.7 per cent. are graduates (March 31, 1958), to deal with the increasing child population. In particular there is a shortage of women teachers. Teachers are trained in a total of 176 institutions of various types. These include 23 University Departments of Education providing a one-year course for graduates. The remainder provide a three-year course for all students entering in 1960 and thereafter. 98 of the colleges are provided by Local Education Authorities. A large-scale plan of expansion has

now been initiated, providing 16,000 additional places in the training colleges. The voluntary colleges will receive from the Government 75 per cent. of the building costs involved. Teachers, other than graduates, must have satisfactorily completed a course of training. A degree or its equivalent entitles the holder to be given qualified teacher status. Payment of teachers is regulated by the *Burnham Scale* which provides £520 to £1,000 per annum and £468 to £800 per annum basic rates for men and women Assistant Teachers respectively, with, in every case, supplementary payment for degrees, specially responsible posts, etc., and for Headmasters and Headmistresses according to the size of the school. Women's salaries are being increased by seven instalments until they are, in 1961, equal to men's.

Cost of Education in England and Wales

Public expenditure on education (excluding universities) for the year 1959/60 is expected to amount to about £690,000,000.

The average cost of pupils in maintained secondary schools in 1958/59 has been estimated to be £72 10s. per head for those under 15 and £130 for those over 15. The average cost per head for primary pupils was £48 6s. 8d.

EDUCATION IN SCOTLAND

The educational system of Scotland has developed independently of that of England and presents a number of distinctive features. The Scottish Education Department is the central body and the Education Authorities are the local bodies concerned in administering the provisions of the Education (Scotland) Act, 1946. These authorities are the councils of the four cities (Aberdeen, Dundee, Edinburgh and Glasgow) and 31 county councils or joint county councils. Educational facilities of various kinds are also provided by the governing bodies of grant-aided schools, independent schools, central institutions providing advanced technical education and national voluntary organizations in the field of informal further education. The "Scottish solution" of the question of denominational schools arrived at in 1918 provided for the transfer of any denominational voluntary school to the management of the Education Authority subject to certain conditions relating to religious observances and the appointment of staff designed to preserve the denominational character of the school. Denominational schools provided by Education Authorities are subject to the same conditions.

Schools in Scotland fall into three main classes, viz. public schools, which in Scotland means schools managed by Education Authorities; grant-aided schools, conducted by voluntary managers who receive grant direct from the Department; and independent schools which receive no direct grant, but which are subject to inspection and registration. In the year ended July 31, 1958, there were 3,262 public schools, with a roll of 844,249, 31 grant-aided schools, with a roll of 15,811 and 158 independent schools, attended by 22,128 pupils.

Children between 5 and 11½ to 12½ attend primary schools. The secondary courses are junior, for pupils leaving school at 15, and senior, extending to five or six years. Some schools, called "comprehensive", offer both junior and senior secondary courses.

The Scottish Leaving Certificate is awarded by the Department and is normally taken at the end of senior secondary courses of at least five years' duration. Pupils may take as many of a wide range of subjects as they are capable of attempting

on either the lower grade, corresponding roughly to the G.C.E. Ordinary Level, or on the higher, which, because there is less specialized study in sixth forms as understood in England, is not of so high a standard as the G.C.E. Advanced. In the award of a pass on either grade the teacher's estimate is taken into account as well as performance in the written examination.

Facilities for further education are provided by 16 Central Institutions (advanced colleges administered by independent Boards of Governors) and by further education centres managed by Education Authorities. The Central Institutions provide the highest form of specialized and fully organized instruction in science and technology, agriculture, commerce, domestic science and the arts. These colleges issue their own Diplomas and Associateships which are, in certain cases, equivalent in academic status to honours degrees and ordinary degrees.

The further education centres provide less advanced courses which are mainly part-time covering vocational and non-vocational subjects. The vocational courses normally lead to Craft certificates, certificates of the City and Guilds of London Institute or National Certificates. Courses are provided in any subject for which there is a reasonable demand.

There are seven Colleges of Education in Scotland. Six of the colleges (of which two are Roman Catholic residential colleges for women) provide both one- and three-year courses and are associated with a university. The seventh is a residential college of physical education for women. All men teachers must possess a university degree (except in certain "practical" subjects) and normally take a year's professional training at a College of Education. A considerable proportion of women teachers take a degree or diploma and a year's training, but those who do not must take three years' training. The basic scales of teachers' salaries are non-graduate, graduate and honours graduate, with additional payment for posts of special responsibility.

EDUCATION IN NORTHERN IRELAND

The statutory system of education in Northern Ireland is broadly similar to the system in Great Britain. Under the 1947 Act primary education is provided in primary schools for children up to

11½ years of age or thereabouts when they are transferred to one or other of the types of secondary schools. Those who pass to secondary intermediate schools follow a practical curriculum and the remainder, most of whom have attained a qualifying standard at an examination conducted by the Ministry of Education, proceed to secondary grammar schools. A child who is successful at the qualifying test for entry to a grammar school is awarded a scholarship by the local education authority of the area in which he is normally resident. Reciprocal arrangements between local education authorities in the United Kingdom ensure that in the event of a change of residence of the parents of a pupil who has passed the necessary test either in Great Britain or Northern Ireland, the pupil's grammar school education will be continued.

In 1958, the number of schools provided, maintained and assisted by Local Education Authorities in Northern Ireland was 1,784 with 280,169 children on the rolls. The estimated cost to the Exchequer for 1959-60 is £14,358,200 and from rates £4,204,566.

THE UNIVERSITIES

There are sixteen degree-giving universities in England (Birmingham, Bristol, Cambridge, Durham, Exeter, Hull, Leeds, Leicester, Liverpool, London, Manchester, Nottingham, Oxford, Reading, Sheffield and Southampton); one in Wales (the University of Wales with Colleges at Aberystwyth, Bangor, Cardiff and Swansea); four in Scotland (Aberdeen, Edinburgh, Glasgow and St. Andrews); and one in Northern Ireland (the Queen's University of Belfast). There is also the University College of North Staffordshire which is empowered to grant its own B.A. degree. The total number of full-time students in these universities (excluding the Queen's University of Belfast) and other university institutions receiving grants from the University Grants Committee in the session 1957-58 was 95,442 of whom 23,587 were women (compared with a total of 89,866 in the previous year and just over 50,000 in 1939). 79.2 per cent. of the students were assisted in whole or in part by scholarships from public or private funds. All these institutions are self-governing. The recurrent expenditure of university institutions in Great Britain in 1957-58 amounted to £48,335,053.

Sussex University College.—Plans for the establishment of a new university college at Brighton, to open in September, 1963, with faculties of arts and science, were announced in 1959. Mr. J. S. Fulton was appointed Vice-Chancellor of the new college and Mr. A. E. Shields, M.B.E., Registrar. The University Grants Committee has allocated £1,500,000 for capital expenditure up to 1963 to provide teaching blocks, library, administration buildings and social facilities on a site on the outskirts of Brighton. It is hoped that halls of residence will eventually be built.

THE ASSOCIATION OF UNIVERSITIES OF THE BRITISH COMMONWEALTH

36 Gordon Square, W.C.1

The Association (formerly the Universities Bureau of the British Empire) holds quinquennial Congresses of the Universities of the Commonwealth, and other meetings in the intervening years, publishes the *Commonwealth Universities Yearbook*, etc., acts as a general information centre, and provides an advisory service for the filling of staff appointments overseas. It also supplies the secretariat for the Committee of Vice-Chancellors and Principals of the Universities of the United Kingdom.

Secretary, J. F. Foster, M.A., LL.D.

ADULT EDUCATION

Adult Education is carried on in the United Kingdom by universities and university colleges (pp. 501–510), local education authorities (pp. 513–526) and by a wide variety of voluntary organizations.

The Universities Council for Adult Education, consisting of two representatives from each university was constituted in 1946 for interchange of ideas and formulation of common policy on extramural education.—Hon. Secretary, W. E. Salt, O.B.E., Dept. of Extra-Mural Studies, The University, Bristol.

The National Institute of Adult Education (England and Wales), 35 Queen Anne Street, W.1 (Sec., E. M. Hutchinson, M.A.) and the Scottish Institute of Adult Education, Education Offices, Alloa, Clackmannan, exist to provide a means of consultation and cooperation between the various forces in adult education.

National Advisory Council on Education for Industry and Commerce

Established in 1948 to advise the Minister on national educational policy relating to industry and commerce.

Chairman, Sir Henry Pilkington.

Regional Advisory Councils

Set up in 1947 (i) to bring education and industry together to find out the needs of young workers and advise on the provision required, and (ii) to secure reasonable economy of provision. They also have certain responsibilities in connection with the procedure for the approval by the Ministry of Education of advanced courses, and issue handbooks, etc., giving, for the guidance of students and teachers, information about the facilities available within a region or district for various types of training (e.g. electrical engineering, textiles, building and chemistry). There are ten Regional Advisory Councils, in England and Wales:—

- REGION 1 (LONDON AND HOME COUNTIES).—Regional Advisory Council for Technological Education, Tavistock House South, Tavistock Square, W.C.1.
- 2 (SOUTHERN).—Regional Council for Further Education, 22 The Forbury, Reading.
- 3 (SOUTH-WEST).—Regional Council for Further Education, 12 Lower Castle Street, Bristol, 1.
- 4 (WEST MIDLANDS).—Advisory Council for Technical, Commercial and Art Education, Pitman Buildings, 161 Corporation Street, Birmingham, 4.
- 5 (EAST MIDLANDS).—Regional Advisory Council for the Organization of Further Education, 12 King John's Chambers, Bridlesmith Gate, Nottingham.
- 6 (EAST ANGLIA).—Regional Advisory Council for Further Education, County Education Offices, Fenchurch Road, Norwich.
- 7 (YORKSHIRE).—Council for Further Education, Basinghall Buildings, Upper Basinghall Street, Leeds, 1.
- 8 (NORTH-WEST).—Regional Advisory Council for Further Education, Africa House, 54 Whitworth Street, Manchester, 1.
- 9 (NORTHERN).—Advisory Council for Further Education, 5 Grosvenor Villas, Grosvenor Road, Newcastle-upon-Tyne, 2.

Technical Colleges

The majority of the technical colleges in England and Wales are maintained or assisted by local education authorities. There are four main types.

Colleges of Advanced Technology. These provide a broad range and substantial volume of work exclusively at advanced level (whether in full-time, sandwich or part-time courses), including post-graduate and research work. They are required to fulfil certain conditions as to the constitution of the governing body, staffing, accommodation, etc., which are prescribed by the Minister of Education. Up to the present, eight establishments have been formally designated by the Minister as colleges of advanced technology:—

- BIRMINGHAM COLLEGE OF ADVANCED TECHNOLOGY.—*Princ.*, P. F. R. Venables, ph.D.
BRADFORD INSTITUTE OF TECHNOLOGY.—*Princ.*, E. G. Edwards, ph.D.
LONDON: BATTERSEA COLLEGE OF TECHNOLOGY, Battersea Park Road, S.W.11.—*Princ.*, R. W. West, C.B.E., D.Sc.
LONDON: CHELSEA COLLEGE OF SCIENCE AND TECHNOLOGY, Manresa Road, S.W.3.—*Princ.*, N. M. H. Lightfoot.
LONDON: NORTHAMPTON COLLEGE OF ADVANCED TECHNOLOGY, St. John Street, E.C.1.—*Princ.*, J. S. Tait, ph.D.
LOUGHBOROUGH COLLEGE OF ADVANCED TECHNOLOGY.—*Princ.*, H. L. Haslegrave, ph.D.
SALFORD ROYAL TECHNICAL COLLEGE.—*Princ.*, C. Whitworth, ph.D.
CARDIFF: WELSH COLLEGE OF ADVANCED TECHNOLOGY.—*Princ.*, A. Harvey, ph.D.

Regional Colleges. These are colleges which do a substantial amount of advanced work, including in particular, full-time and sandwich courses, but in which the volume and character of the advanced work are not such as to make it realistic for the colleges to concentrate entirely on such work. There are at present 22 regional colleges:—

- ACTON: BRUNEL COLLEGE OF TECHNOLOGY.—*Princ.*, J. Topping, ph.D.
BRIGHTON TECHNICAL COLLEGE.—*Princ.*, G. E. Watts, ph.D.
BRISTOL COLLEGE OF TECHNOLOGY, Ashley Down.—*Princ.*, G. H. Moore.
HUDDERSFIELD COLLEGE OF TECHNOLOGY.—*Princ.*, W. E. Scott, M.B.E., ph.D.
KINGSTON-UPON-THAMES TECHNICAL COLLEGE.—*Princ.*, J. R. I. Hepburn, D.Sc., ph.D.
LEICESTER COLLEGE OF TECHNOLOGY AND COMMERCE.—*Princ.*, R. E. Wood.
LIVERPOOL: CITY OF LIVERPOOL COLLEGE OF TECHNOLOGY, Byrom Street.—*Princ.*, S. A. J. Parsons.
" CITY OF LIVERPOOL COLLEGE OF BUILDING, Clarence Street, Liverpool, 3.—*Princ.*, T. E. Hall.
LONDON: BOROUGH POLYTECHNIC, Borough Road, S.E.1.—*Princ.*, J. E. Garside, ph.D.
" BRIXTON L.C.C. SCHOOL OF BUILDING, Ferndale Road, S.W.4.—*Princ.*, D. A. G. Reid.
" NORTHERN POLYTECHNIC, Holloway Road, N.7.—*Princ.*, T. J. Drakeley, C.B.E., D.Sc., ph.D.
" THE POLYTECHNIC, 309 Regent Street, W.1.—*Director of Education*, J. E. Richardson, ph.D.
" SIR JOHN CASS COLLEGE, Jewry Street, E.C.3.—*Princ.*, A. M. Ward, D.Sc., ph.D.
" WOOLWICH POLYTECHNIC, Thomas Street S.E.18.—*Princ.*, H. Heywood, D.Sc., ph.D.

- NOTTINGHAM AND DISTRICT TECHNICAL COLLEGE.—*Princ.*, D. A. R. Clark.
PLYMOUTH AND DEVONPORT TECHNICAL COLLEGE.—*Princ.*, J. Graymore, ph.D.
PORTSMOUTH COLLEGE OF TECHNOLOGY.—*Princ.*, W. Taylor, D.Sc.
RUGBY COLLEGE OF TECHNOLOGY AND ARTS.—*Princ.*, W. Cooper.
STOKE-ON-TRENT: NORTH STAFFORDSHIRE TECHNICAL COLLEGE.—*Princ.*, E. R. Patrick, ph.D.
SUNDERLAND TECHNICAL COLLEGE.—*Princ.*, D. A. Wrangham.
TREForest: GLAMORGAN COLLEGE OF TECHNOLOGY.—*Princ.*, D. P. Evans, ph.D.
WEST HAM COLLEGE OF TECHNOLOGY.—*Princ.*, G. W. Bulmer, ph.D.

Area Colleges. There are about 160 of these, providing mainly part-time courses up to the level of Higher National Certificate or its equivalent.

Local Colleges, of which there are about 270, provide on the vocational side a wide range of mainly part-time courses up to Ordinary National Certificate level or its equivalent.

In addition to these four main categories of technical college, there are some 8,500 *Evening Institutes* ranging in size from those with a few classes for adults in such subjects as music and arts and crafts to those catering for thousands of students in a wide variety of vocational as well as non-vocational classes.

There are also six *National Colleges* providing advanced and post-graduate courses for the comparatively few students from certain highly specialized industries for whom it would be impracticable to provide the highest level of training on a local basis. These colleges, which are financed partly by contributions from the industries concerned but, principally by means of grant from the Minister of Education are:—

- COLLEGE OF AERONAUTICS, Cranfield, Bletchley, Bucks.
NATIONAL COLLEGE FOR HEATING, VENTILATING, REFRIGERATION AND FAN ENGINEERING, Borough Polytechnic, Borough Road, S.E.1.
NATIONAL COLLEGE OF FOOD TECHNOLOGY, St. George's Avenue, Weybridge, Surrey.—*Principal*, J. D. Mounfield, ph.D.
NATIONAL COLLEGE OF RUBBER TECHNOLOGY, Northern Polytechnic, Holloway Road, N.7.
NATIONAL FOUNDRY COLLEGE, Stafford Street, Wolverhampton.
NATIONAL LEATHERSELLERS COLLEGE, Tower Bridge Road, S.E.1.—*Principal*, J. P. Danby, ph.D., B.Sc.

SCOTLAND

Scottish Technical Education Consultative Council

The former regional advisory councils for technical education have been replaced by the Consultative Council which represents educational interests and both sides of industry. The Council's object is "to secure the widest possible measure of consultation on vocational further education between employers, employees and those responsible for its provision, and to advise, and generally to promote, the development of such education".—*Sec.*, W. A. M. Good, Scottish Education Department, St. Andrew's House, Edinburgh, 1.

Technical Colleges

Technical education is available at 93 day-course schools and colleges in Scotland, including those which specialize in a particular subject. PREPARATORY SCHOOLS

500 preparatory schools in England and Wales are members of the Incorporated Association of Preparatory Schools, recognition by the Ministry of Education as efficient being a condition of membership. The Association has a Joint Standing Committee with the Headmasters' Conference, and the Common Examination for entry to public schools is conducted by a committee of the Headmasters' Conference and I.A.P.S. *Secretary*, I.A.P.S., L. P. Dealtry, 31 Melbury Court, W.8.

Headmasters' Conference Schools

THE HEADMASTERS' CONFERENCE.—Chairman, H. D. P. Lee (Winchester College). Sec., (vacant), 29 Gordon Square, W.C.1. The annual meetings are, as a rule, held in September.

The election of a Headmaster to membership of the Conference depends on the following criteria: (1) the degree of independence enjoyed by the Governing Body and Headmaster; (2) the number of boys over 13 years of age in the school; (3) the number in proportion to this doing post-School Certificate work, and the quality and variety of that work; (4) the number of Undergraduates from the School in British Universities.

EVENTS OF THE YEAR, OCT. 1, 1958—SEPT. 30, 1959

HOME AFFAIRS

THE ROYAL HOUSE

(1958.) **Oct. 16.** The Queen and the Duke of Edinburgh left Balmoral after their holiday and travelled to Carlisle, which Her Majesty had been prevented from visiting by her illness in July. **17.** The Queen and the Duke of Edinburgh visited Leeds and, after attending an evening performance in connection with Leeds Centenary Musical Festival, stayed at Harewood. **18.** After carrying out further engagements in Leeds and attending final concert of Festival, the Queen and the Duke left in royal train for London. **19.** Restored church of St. Clement Danes was reconsecrated by Bishop of London as R.A.F. Memorial Church, in the presence of the Queen, the Duke of Edinburgh, the Queen Mother, Princess Margaret and the Duke and Duchess of Gloucester. **20.** Professor Theodor Heuss, President of German Federal Republic, arrived in London for State visit. He was met at Gatwick airport by the Duke of Gloucester and went by train to Victoria, where he was greeted by the Queen and the Duke of Edinburgh, with whom he drove in state to Buckingham Palace, where the Queen invested him with the insignia of a G.C.B. After laying wreath on tomb of Unknown Warrior in Westminster Abbey, the President visited Queen Elizabeth the Queen Mother at Clarence House and later received addresses from the Chairman of the L.C.C. and the Mayor of Westminster. In the evening, the Queen and the Duke of Edinburgh entertained him at a State banquet at Buckingham Palace. **21.** President Heuss was entertained by the City of London to luncheon at the Guildhall and in the afternoon visited St. Paul's Cathedral and the British Museum. In the evening, the President gave a dinner at German Embassy, which was attended by the Queen, the Duke of Edinburgh and other members of the royal family and was followed by a reception. **22.** President Heuss visited Oxford, where he announced that five Research Fellowships, named after himself, would be given each year for five years, to young graduates to study in Germany. On his return to London, the President attended reception in County Hall for organizations concerned with Anglo-German affairs and later, with the Queen, the Duke of Edinburgh and other members of the royal family, was present at evening reception given by Her Majesty's Government at Lancaster House. **23.** President Heuss left on conclusion of his visit. **25.** The Queen unveiled Commonwealth Land Forces memorial at Brookwood. **27.** Queen Elizabeth the Queen Mother opened new research block at Nuffield Orthopaedic Centre, Oxford. **28.** The Queen opened new session of Parliament, the ceremony being broadcast and televised for first time. After 80 minutes' delay owing to electrical fault in plane, the Duke of Edinburgh left London Airport in new B.O.A.C. Comet IV jet airliner for Canada to attend conference of English-Speaking Union, and arrived in 8 hr. 31 min., the fastest flight ever made westwards across Atlantic by commercial aircraft. Princess Margaret began two-day visit to Northern Ireland.

Nov. 1. The Duke of Edinburgh flew back from Canada to Leuchars by Comet IV. **3.** The Queen, with the Duke of Edinburgh, Queen Elizabeth the Queen Mother and Princess Margaret, attended Royal Variety Performance at the Coliseum. **6.** Princess Margaret received honorary degree of LL.D. at Cambridge and inaugurated new chemical laboratories. **7.** The Queen, the Duke of Edinburgh and Queen Elizabeth the Queen Mother

attended rededication of the Round Church of the Temple. **8.** The Queen, with the Duke of Edinburgh, Queen Elizabeth the Queen Mother and Princess Margaret, attended British Legion Festival of Remembrance at the Albert Hall. **9.** The Queen led the Two Minutes' Silence at the Cenotaph. **13.** The Duke and Duchess of Gloucester left London Airport for Addis Ababa on first stage of East African tour, after postponement of flight from previous night owing to fog. **19.** The Duke and Duchess left Ethiopia for British Somaliland, where the Duke opened new airport at Hargeisa. **21.** The Queen conferred Order of Merit on Viscount Samuel after meeting of Privy Council, which he had attended, fifty years after he had been sworn in as Privy Councillor. **24.** The Duke and Duchess of Gloucester arrived in Aden from British Somaliland. **25.** The Queen and the Duke of Edinburgh attended annual St. Cecilia celebration concert in Festival Hall. **26.** The Queen, with the Duke of Edinburgh and other members of the royal family, and with Mr. Nixon, Vice-President of the U.S.A., attended dedication by Bishop of London of American War Memorial Chapel in St. Paul's Cathedral. Later, Mr. and Mrs. Nixon lunched at Buckingham Palace and in the evening the Vice-President spoke at dinner given in Guildhall by English-Speaking Union, at which the Duke of Edinburgh took the chair. THE CENTENARIES OF 1960

The first important event in 1860 was the signing of the commercial treaty with France which will always be associated with the name of Richard Cobden. At the end of the previous year, Mr. Cobden had volunteered his services to negotiate a treaty; at the beginning of 1860 he was officially appointed a Plenipotentiary and on Jan. 23 the agreement, embodying mutual remissions and reductions of import duties, was signed, subject to the ratification of Parliament.

The treaty was duly ratified at the time of the Budget, which was introduced by Mr. Gladstone on Feb. 10. His proposal to increase the income-tax for incomes over £150 from ninepence to tenpence in the pound was approved, but his intended repeal of the paper duties, which was carried in the Commons by the narrow majority of nine votes, was defeated in the Lords. This event revived the old question of the powers of the House of Lords to intervene in money bills, the situation being complicated by the fact that the sympathies of the Prime Minister, Lord Palmerston, were with the majority in the Lords rather than with his own Chancellor of the Exchequer. A Commons committee was appointed to deal with the conflict between the two houses and the Commons ultimately passed resolutions defining the Lords' powers in money bills. Mr. Gladstone favoured stronger action, and, failing to obtain support in the Cabinet, at one time tendered his resignation, though it was later withdrawn. The paper duties, however, were not finally repealed until the following year.

Lord John Russell was no more successful with a further attempt at carrying a measure of Parliamentary reform. His Bill reducing the borough franchise to £6 and proposing a moderate distribution of seats encountered a lukewarm reception and was eventually dropped.

In Europe, the settlement of Italy continued to claim the attention of the great powers. Napoleon III secured from King Victor Emmanuel the cession to France of Savoy and Nice and this action caused sharp resentment in Britain, to the extent that great impetus was given to the Volunteer movement. No fewer than 180,000 Volunteers were enrolled and on June 23 the Queen held a great review of 21,000 men in Hyde Park, followed by a similar review at Holyrood in August. On August 2 a Parliament accepted the recommendations of the National Defence Commission to fortify the dockyards and create a central dépôt for arms and stores.

Meanwhile on May 5, Garibaldi had landed in Sicily to support the Sicilian people in their insurrection against King Francis II of Naples. Later in the month Garibaldi's troops captured Palermo, at the end of July the Neapolitans evacuated Sicily and on August 19 Garibaldi landed on the mainland, King Francis fleeing from Naples. On September 10, Cavour sent the Piedmontese army into the Papal States, where opposition was quickly subdued. In the autumn the peoples of Naples and Sicily and of the Papal States voted for incorporation into a new Kingdom of United Italy. King Victor Emmanuel and Garibaldi met and joined forces at Teano and finally defeated the Bourbon army, the King entering Naples on Nov. 7.

During the year, British troops were in action in China. The Chinese Government had refused to ratify the Treaty of Tientsin, which had ended the war of 1858, and British ships had been attacked. British representatives were sent to conduct negotiations, but were taken prisoner and treated with cruelty. A joint Anglo-French force was therefore sent to Peking to seek reparation. Satisfaction was obtained and a new convention signed on Oct. 24.

In the United States, where Abraham Lincoln was

elected President on Nov. 6, the Abolition controversy began to come to a head at the end of the year. On Dec. 20, South Carolina adopted ordinances declaring her own independence and sovereignty as a State and her secession from the Union.

The celebrated Roade murder took place on June 29, when the body of Francis Kent, a child of three, was found in his home, although it was not until nearly five years later that the confession of his half-sister, Constance Kent, led to her conviction for the crime.

On June 17 the *Great Eastern* left the Needles on her first voyage across the Atlantic. After a successful voyage of ten days and a half, she reached New York, where her arrival was greeted with much enthusiasm and she was visited by thousands of people.

In July the eighteen-year-old Prince of Wales left for a tour of Canada, travelling to Halifax, Quebec, Montreal and Ottawa. He later proceeded to the United States, visiting New York, Chicago, Philadelphia and Boston and being received by President Buchanan in Washington. On November 30, Queen Victoria's second daughter, Princess Alice, was betrothed to Prince Louis of Hesse. The Empress Eugénie paid a private visit to England and Scotland during November and December and was received by the Queen at Windsor.

During the year the first instalments of *Great Expectations* appeared in Dickens' periodical *All the Year Round*. The *Cornhill Magazine* was started with Thackeray as editor and his *Lovel the Widower* appeared in its pages, as well as Ruskin's *Unto this Last*. Charles Kingsley was appointed Professor of Modern History at Cambridge. Mrs. Browning's *Poems before Congress* and Oliver Wendell Holmes' *The Professor at the Breakfast Table* were published.

The first meeting of the National Rifle Association was held at Wimbledon in July, the Queen firing the first shot.

On April 17, the famous prize-fight took place at Farnborough between Tom Sayers and the American Heenan, the "Benicia Boy". After thirty-seven rounds, lasting altogether more than two hours, the contest came to an indecisive end.

† All figures refer to the area which is now Northern Ireland. *Italic figures for N. Ireland in 1921 and 1931 are estimates based on the Censuses held in 1926 and 1937.*

NOTE.—Before 1801 there existed no official return of the population of either England or Scotland. Estimates of the population of England at various periods, calculated from the number of baptisms, burials and marriages, are: in 1570, 4,160,221; 1600, 4,811,718; 1630, 5,600,517; 1670, 5,773,646; 1700, 6,045,008; 1750, 6,517,035.

ISLANDS.—The figures given above do not include islands of the British seas. Populations of these islands at census years since 1900 were:—

INCREASE OF THE PEOPLE

In England and Wales during the 19th Century, intercensal increases in the population ranged from 18.06 per cent. to 11.65 per cent., an average of 14 per cent. every ten years; there was an average proportion of 1,050 females to 1,000 males. Between the Censuses of 1931 and 1951 the increase was 4.65 per cent. The proportion of 1,096 females to 1,000 males in 1921 declined to 1,081 females to 1,000 males at the Census of 1951.

Estimates of the future total population of the United Kingdom, based on the mid-1957 annual estimate, have been prepared by the Government Actuary in consultation with the Registrars-General. It is assumed in their projections below that at ages under 45, death rates will decline

steadily until at the end of 25 years they are at one-half of the present rates; at ages over 45, rates of decline become progressively smaller as age advances; after 25 years death rates at all ages will remain at the levels then reached; annual births are assumed to average 835,000 during the first 15 years, 830,000 for a further 10 years and 850,000 thereafter; the ratio of male to female births is taken as 1.06 throughout and a net outward migration of 27,000 persons per year is assumed.

THE ANNUAL ESTIMATES OF POPULATION

Since 1948, estimates of the total population and of populations of counties and other local authority areas at June 30 each year have been prepared by the Registrars-General and published by Her Majesty's Stationery Office. The following table shows the estimated home population of the United Kingdom at June 30, 1958, and its distribution. Estimated populations at the same date for the counties and other administrative areas will be found on pp. 631 *et seq.*

ALIENS AND NATURALIZATION

Aliens.—Figures in the following table show the number of aliens registered in the United Kingdom on Dec. 31, 1958. These figures exclude among others children under 16, diplomatic and consular officials, certain officials of international organizations and visitors spending less than 3 months in the country.

Naturalization.—In the years 1946–1958, 86,702 certificates of naturalization were issued by the Home Department, an average of 10,621 each year in 1946–1950 and of 4,200 in 1951–1958. Numbers of persons naturalized by principal countries of origin are shown below. Figures for Russia include former nationals of Estonia, Latvia and Lithuania.

IMMIGRATION AND EMIGRATION, 1958

Immigration.—In the year 1958, a total of 55,700 persons from Commonwealth countries arrived in the United Kingdom for a stay of one year or more, 4,400 more than in 1957. Arrivals from the principal countries (with 1957 figures in brackets) were: from Canada, 12,000 (8,800); Australia, 8,600 (8,100); New Zealand, 2,800 (2,500); South Africa, 3,200 (3,400); Rhodesia and Nyasaland, 1,700 (1,300); East and West Africa, 4,300 (3,700); India, Pakistan and Ceylon, 6,100 (6,200); Malaya 5,500 (6,400); West Indies and Bermuda, 7,500 (6,100); Other Commonwealth countries, 4,000 (4,800). 9,000 persons arrived from the United

States (1957, 9,800). *Emigration.*—In the year 1958, 95,100 persons left the United Kingdom for Commonwealth countries for a stay of one year or more, 43,700 less than in 1957: to Canada, 16,800 (61,100); Australia, 37,500 (35,300); New Zealand 10,900 (10,200); South Africa, 5,400 (5,600); Rhodesia and Nyasaland, 4,200 (5,600); East and West Africa, 4,200 (4,500); India, Pakistan and Ceylon, 3,600 (3,200); Malaya, 5,000 (6,300); West Indies and Bermuda, 4,100 (3,300); Other Commonwealth countries, 3,400 (3,700). 15,600 persons emigrated to the United States (1957, 21,700).

TOURISTS IN THE UNITED KINGDOM

The number of tourists, including business visitors, to the United Kingdom in 1958 broke all previous records, the total being 1,258,000, compared with 1,180,000 in 1957 (an increase of 7 per cent.). There was a substantial rise in the number of visitors from the dollar area and in particular from the United States. The numbers coming from Europe declined slightly, France still providing the greatest number of arrivals despite the political crisis and subsequent restriction in travel allowances. Tourist arrivals from Germany continued to increase.

Tourist earnings in 1958 increased by £9,000,000 to £138,000,000; expenditure by visitors from the dollar area, £53,000,000; from other Western Hemisphere countries, £3,000,000; sterling area, £52,000,000; O.E.E.C. countries, £26,000,000; and from other non-sterling countries, £5,000,000.

Cases of Murder

The Homicide Act, 1957, in operation from March 21, 1957, removed from the category of murder homicides (a) which were previously murder only by doctrine of constructive malice; (b) under severe provocation by words alone; (c) in pursuance of a suicide pact. It provided that a person charged with murder should not be found guilty of that offence if at the time of the offence he was suffering from diminished responsibility, but instead should be found guilty of manslaughter. The death penalty should not be imposed for murders other than capital murders* except where the murderer had committed another murder on a different occasion.

In 1958, 124 cases of murder of persons aged one year or over were known to the police. In 9 cases the offence was reduced to manslaughter and in 1 case it was decided that there was no evidence that murder had been committed. *Capital murder.*—In 3 cases which appeared to be of capital murder, the murderers had not yet been detected. 16 victims were murdered by 16 known murderers or suspects. Of these, 8 victims were murdered by 7 persons who committed suicide before arrest. In proceedings taken against 9 persons for the murder of the remaining 8 victims, 2 persons were acquitted and 1 found guilty but insane; 1 death sentence was commuted to life imprisonment. Five persons were convicted, sentenced to death and executed. *Non-Capital Murder.*—In 7 cases which appeared to be of non-capital murder, the murderers were not yet detected. 88 victims were murdered by 81 known murderers or suspects. Of these, 33 victims were murdered by 29 persons who committed suicide before arrest. One victim was murdered

* Murder committed in the course of or in furtherance of theft; in resisting or avoiding arrest or escaping from legal custody; murder of police officers or prison officers or persons assisting them; and murder by shooting or causing explosions.

by one person who soon afterwards was himself killed. In proceedings taken against 50 persons for the murder of 53 victims, 1 was dealt with by the U.S. authorities and 4 were discharged. Of 45 persons committed for trial 13 persons were found insane on arraignment, 5 were found guilty but insane and 9 were acquitted. 18 persons were found guilty of non-capital murder and sentenced to life imprisonment.

Suicide

Coroners returns for 1957 and 1958 show that 5,237 persons committed suicide in 1958, compared with 5,313 in 1957 and 5,256 in 1956. 5,060 cases of attempted suicide were known to the police in

1958, compared with 5,436 in 1957 and 5,387 in 1956.

Cases of Murder.—In 1958, eighteen cases of murder were known to the police. Five of the twenty-three victims were under 10 years of age and five over 60. Of fourteen persons proceeded against, one was not called for trial. Thirteen persons were tried, of which six were found insane and unfit for trial, six were found guilty and one not guilty. Two of those found guilty were sentenced to death, but one was later reprieved; three were sentenced to life imprisonment, and one (under 18 years) was sentenced to be detained during H.M. pleasure.

Juvenile Crime.—In 1958, 18,379 juveniles were proceeded against for crimes and offences of all kinds. 649 of these were acquitted or the charge

against them was withdrawn. In 4,599 cases the charge was proved and an order made without a finding of guilt. In 12,847 cases where charges were proved with a finding of guilt, 4,714 juveniles were admonished, etc.; 184 were cautioned (with or without security); and 33 were found mentally defective. 629 juveniles were committed to approved schools, 533 to remand homes, 83 for Borstal training and 33 to the care of fit persons. 9 were placed on probation. 5,769 offenders were fined, and in 861 cases fines were imposed on the parent or guardian of the offender. 283 juveniles were discharged without trial, as insane or weak-minded persons, etc. or otherwise discharged.

PRISON POPULATIONS IN 1957 AND 1958

The average daily population of all British prisons and Borstal institutions in 1958 was 28,246, including 1,694 prisoners awaiting trial and 866 committed by civil process, mainly for failure to comply with court orders for payments of money. Figures of receptions by Prisons and Borstal institutions in 1958 were:—

National Debt Funds, 1959

The National Fund.—Established in 1927 by a gift from an anonymous donor of approximately £500,000. The audited balance sheet, as at March 31, 1959, shows the following net additions during the year:—Contributions, £4,000; net revenue, £124,729; net profit on investments realized, £702. The amount of the Fund (investments at cost) on March 31, 1959, was £2,693,438.

The Elsie Mackay Fund.—The sum of £527,808 was set aside in 1929 by Lord and Lady Inchcape in memory of their daughter, to accumulate for not more than 50 years and then to be applied to reduction of the National Debt. The fund stood on March 31, 1959, at £1,712,772.

The John Buchanan Fund.—Established in 1932 under the will of Dr. John Buchanan who died in 1930 and left the residue of his estate, subject to certain annuities, to be accumulated for fifty years beginning two years after his death and then to be applied in reduction of the National Debt. The money is paid over from time to time as it falls in. The fund stood on March 31, 1959, at £17,554.

1957-58

Loans Guaranteed by the British Government.—The Nominal Net Liability of the State in respect of loans guaranteed by the British Government was stated on March 31, 1958, to be as follows:—

Turkish Loan, £47,013; Sudan Loans, £3,648,700; Irish Land Purchase Stock, £168,591; Northern Ireland 4½% Bonds, £5,418,775; Northern Ireland 2½% Stock, £23,404,611; Northern Ireland 3% Stock, £41,435,147; Irish Free State 4½% Land Bonds, £21,141,417; Ulster Savings Certificates, £102,384; 2½ per cent. of the Austrian Guaranteed Loan, secured on the gross receipts of Austrian Customs and Tobacco monopoly, £386,831 plus other liabilities in external

WORLD COMMODITIES

The following table shows world production and main producers of some of the most important foods and raw materials, together with their domestic consumption in the United Kingdom and United States. Figures are given for 1957 and 1958 and for a pre-war year or average according to availability. In the case of rubber, natural production and consumption only are shown. World production of synthetic rubber amounted to 1,223,626 tons in 1958 compared with 1,262,666 tons in 1957; pre-war production was almost negligible. The United States produces 71 per cent. of the world's synthetic rubber and is also the largest consumer, using nearly 880,000 tons in 1958 out of its total rubber consumption of 1,364,000 tons.

LIGHTHOUSES

In 1957-58 the income of the General Lighthouse Fund was £4,128,231, made up of £3,936,474 United Kingdom Light Dues, £26,216 Bahamas Light Dues, £5,577 Sombrero Light Dues, £16,027 Basses Light Dues, £86,815 Miscellaneous Receipts and £57,122 Grant by Ministry of Transport and Civil Aviation towards expenditure in connection with the removal of wrecks. Expenditure during the year totalled £3,236,187, made up of £3,141,321 in respect of maintenance and operation of lighthouses, etc., under the control of the three General Lighthouse Authorities (Trinity House, Commissioners of Northern Lighthouses, and Commissioners of Irish Lights), £67,419 in respect of Lighthouses Abroad and £27,447 miscellaneous expenditure, including the cost of collecting dues. The surplus of £892,044 was carried to the Net Revenue Account. In September 1940, United Kingdom Light Dues were increased from 150 per cent. of the statutory rates laid down in the Merchant Shipping Act, 1894, to 200 per cent., and in March, 1942, to 300 per cent. The dues were reduced to 200 per cent. in January, 1946, but general increases in costs and expenditure on renewals and replacements necessitated increases to 300 per cent. in July, 1947, to 400 per cent. in June, 1948 and to 460 per cent. in April, 1956.

BRITISH RAILWAYS IN 1958

The *British Transport Commission* set up by the terms of the *Transport Act, 1947*, organized the Railways of Britain in six Regions under the control of the Railway Executive.

(1) The *London Midland Region*, corresponding to the system of the London, Midland and Scottish Company in England and Wales.

(2) The *Western Region*, corresponding to the system of the Great Western Railway.

(3) The *Southern Region*, corresponding to the system of the Southern Railway.

(4) The *Eastern Region*, corresponding to the Southern Area of the London and North Eastern Railway.

(5) The *North Eastern Region*, corresponding to the North Eastern Area of the London and North Eastern Railway.

(6) The *Scottish Region*, corresponding to the Scottish systems of the London, Midland and Scottish and London and North Eastern Railway.

Certain revisions in the Regional boundaries have subsequently taken place, notably in the cases of the London Midland, Southern and Western Regions.

By the terms of the *Transport Act, 1953*, the Railway Executive ceased to exist on September 30, 1953, when its functions, together with those of the other Executives excepting the London Transport Executive, were assumed by the British Transport Commission.

Under the terms of the 1953 Act, the Commission was required to submit to the Minister of Transport and Civil Aviation a scheme for the re-organization of British Railways incorporating de-centralization of management whilst reserving to the Commission general financial control and general control of charges. This scheme, providing for the introduction of Area Boards, was received by the Minister on April 15, 1954, and came into effect on Jan. 1, 1955.

Gross Receipts, 1958;

Railway Passenger and Freight Services of British Railways

Passengers.....	£137,956,000
Freight, parcel and mails....	£323,460,721
Miscellaneous.....	£10,188,556
Total.....	£471,605,277

Ships and Vessels: Passenger and Cargo Services of British Railways:

Passengers.....	£6,918,076
Freight, parcels and mails....	£8,604,358
Miscellaneous.....	£1,116,169
Total.....	£16,638,603

The gross receipts of British Railways (including Road Collection and Delivery and other Road Services) for 1958 at £471,605,277 compare with £501,429,513 for 1957. Working expenses were £519,691,806 (£528,569,699); so that net traffic receipts were £48,086,529 (deficit) (1957, £27,140,186 deficit), and the operating ratio 110 per cent. (105 per cent.).

The net traffic receipts for 1958 of the Passenger and Freight Shipping Services of British Railways were £2,344,734 (against £1,889,705 for 1957) and the operating ratio 86 per cent.

The total gross receipts of the Commission's principal carrying activities including British Railways and Ships were £674,311,967; working

expenses were £710,485,817, resulting in a deficit of £36,173,850 before taking into account interest on capital and other central charges.

Staff and Wages.—On Dec. 31, 1958, British Railways employed a total staff of 550,123 persons. Average weekly earnings at March 22, 1958 (with numbers of staff) were: Men (502,918) 24os. od.; Women (32,750), 147s. od.; Youths and Boys (30,009), 121s. od.; and Girls (2,535), 74s. od.

Working Casualties.—During the year 1957, 351 person were killed on the railways—passengers, 139; railway servants, 176; and other persons, 36. 2,141 persons were seriously injured—passengers, 307; railway servants, 1,771; and other persons, 63. 22,373 persons received minor injuries, including 8,173 passengers and 13,767 railway servants.

MODERNIZATION

The British Transport Commission announced early in 1955, the Modernization and Re-equipment Plan for British Railways at a then estimated cost of £1,240,000,000. It has since made significant progress. The complete plan, covering a period of 15 years, envisages the provision of some 2,500 main-line diesel locomotives; about 8,200 vehicles for multiple-unit trains, of which some 3,600 are for electric and the remainder for diesel powered trains; a large number of diesel shunting engines; electrification of certain main-line and suburban services; major improvements to goods marshalling yards and goods stations, and certain passenger stations; the provision of new rolling stock and carriage cleaning facilities.

Details of some of the major works and of new equipment provided under the Programme, include the following:—

Track and Signalling.—Three new tunnels between New Barnet and Potters Bar (Eastern Region) and quadrupling of the track, thus removing a bottle-neck on the London-Edinburgh main line, were completed early in 1959; a new flyover has been built at Barking in preparation for the electrification of the London (Fenchurch Street)-Southend line; quadrupling of track between Bickley and Swanley (Southern Region) has been completed. New track layout with colour light signalling is being installed at Manchester (Victoria) (London Midland Region); and colour light signalling at Birmingham (Snow Hill) (Western Region). In addition to many other improvements, extensive signalling work is in progress in connection with electrification programmes.

Electrification.—The first phase of the Southern Region electrification of the Kent Coast lines (Gillingham to Margate, Ramsgate; Faversham to Dover) was completed and brought into use in June, 1959. Between Manchester and Crewe (London Midland Region), the first stage of the electrification from London to Birmingham, Liverpool and Manchester, is nearing completion and the test section for the extension of the London-Chelmsford electrification to Ipswich and coastal branches (Eastern Region) between Colchester, Clacton and Walton is in use. These schemes were due to be completed in 1967 and 1965 respectively, but it is hoped to accelerate their completion by several years. Other electrification projects in progress (with expected dates of completion) include: Liverpool Street to Enfield, Chingford, Hertford East and Bishop's Stortford (1960); Fenchurch Street to Tilbury, Southend and Shoeburyness (1961); Glasgow Suburban lines: Airdrie-Helensburgh; Cathcart Circle; Cathcart East Junction to Kirkhill and Neilston High (1960-61).

Diesel Traction.—The first 103 of 1,200 main-line diesel locomotives which have now been ordered, were delivered last year; by the end of 1959 nearly 500 main-line diesel locomotives were expected to be in service. Over 1,200 diesel shunting engines are in use, and 2,417 diesel multiple-unit train vehicles. Main-line diesel services are in operation between Edinburgh-Glasgow, Birmingham-Swansea and London-Hastings. Five high-speed diesel-electric air-conditioned all-Pullman trains with exceptional standards of comfort are on order for use between Manchester-London (St. Pancras), Bristol-London (Paddington), and Wolverhampton, Birmingham-London (Paddington). It was hoped to introduce these trains by 1960.

Passenger Stations.—Improvements are being or have been carried out at many stations, including major schemes of reconstruction at Barrow-in-Furness, Banbury, Chichester, Weymouth and Plymouth (North Road).

Freight Yards.—New freight marshalling yards under construction include those at Ripple Lane (Barking), Port Talbot (Margam), Perth and Millerhill (Edinburgh). New yards at Alloa, Thornton in Fife and Temple Mills (Stratford) have been completed. Thornton was the first large yard to be opened under the modernization plan, and is the most modern in Europe.

ROADS

The total mileage of public roads in Great Britain is 191,146 miles, of which 163,297 are in England and Wales and 27,849 in Scotland. The cost of maintenance, improvement (widening, etc.) and new construction in 1914-15 was £18,800,000, and in 1957-58 approximately £135,469,000, which includes £23,815,000 spent on Trunk Roads but excludes sums recoverable from frontagers, public utilities, etc. In 1950-51 the amount recoverable from frontagers, etc., was £7,383,000. The roads of Great Britain are classified by the Ministry of Transport, and out of the total mileage of 191,146 there are 8,309 miles of Trunk Roads, 19,706 of Class I, 17,603 of Class II and 48,853 of Class III roads.

Highway Authorities.—The Minister of Transport and Civil Aviation became the highway authority for some 8,190 miles of road in Great Britain under the Trunk Roads Acts of 1936 and 1946. These roads, which comprise the national system of routes for through traffic, are known as trunk roads and the Minister (in Scotland from April 1, 1956, the Secretary of State) is responsible for their maintenance and improvement. Under the Local Government Act, 1929, county councils in England and Wales became (from April 1, 1930) the highway authorities for all roads in rural districts except trunk roads, and all county roads (which include Class I, Class II and Class III Roads) outside county boroughs and metropolitan boroughs. County boroughs are responsible for all roads within their boundaries with the exception of trunk roads. Borough and urban district councils are the highway authorities for roads other than trunk roads and county roads which lie within their areas. In Scotland similar provisions have been made. In England and Wales, under the Act of 1929, provision is made for borough councils and urban district councils in certain circumstances to act as highway authorities for county roads.

The total gross receipts from the taxation of road vehicles between December 1, 1957, and November 30, 1958, amounted to £100,132,928. The number of mechanically-propelled vehicles for which licences were current at Feb. 28, 1959, was 7,296,952. The average receipt in respect of a whole year licence to Nov. 30, 1958, was £12 9s. 9d. for cars; £1 14s. 10d. for motor-bicycles; £27 9s. 2d. for internal combustion and steam-driven vehicles; £15 15s. 11d. for electric goods vehicles; £67 1s. 3d. for motor hackneys, including taxi-cabs.

Grants made to Highway Authorities for the year ended March 31, 1958, amounted to £43,803,000 (an increase of £3,920,000 on previous year's figure). Payments for work carried out on trunk roads totalled £26,861,000 (as compared with £18,720,000 for the previous financial year).

Motorways.—The Government's expanded road programme includes three long-distance routes designed to carry motor traffic only. They will eventually run from London to the North and North-West *via* Birmingham, from London to South Wales, and from the Midlands to South Wales. Another important project is the 25-mile long Medway Motor Road, which will form part of an improved route between London and the Channel Ports. Construction is well advanced on the first major length of the Motorway, between London and Birmingham, which was expected to be completed in 1959. Its 73 miles of dual carriageways, starting with a 16-mile by-pass of St. Albans, finish at Dunchurch south of Rugby. The Motorway has been planned so as to eliminate all sharp bends and steep gradients and it is carried over or under existing roads. Its use will be

restricted to motor traffic which will be able to enter or leave only from the left at a restricted number of specially constructed junctions. 180 bridges of all types including viaducts and railway bridges, have been incorporated in its construction. It will be fenced along its entire length and no frontage development will be permitted—except at selected service areas for travellers. It is intended to continue this route to the north-west from Birmingham to Preston and Penrith and to the north-east to Leeds with a spur to the Doncaster By-pass on the Great North Road. Work on large viaducts and railway bridges on the 78-mile section of motorway from the south of Stafford to Preston is due to begin in 1959. The Preston By-pass (already open) and the Lancaster By-pass (due to be completed in 1960) are other sections of this route.

Plans for the motorway linking Birmingham and Bristol are being prepared. A 20-mile spur, which will eventually run from the route of this motorway to Ross-on-Wye, was started in 1958 and is due to be completed by the end of 1960. Proposals are being considered for linking the three motorways converging on Birmingham from London, from South Wales and from the north. One of these links is planned to pass on a three-mile viaduct above the railway through Smethwick and Uxbridge. Work has begun on the Maidenhead By-pass which, together with the Slough By-pass and the proposed road from Chiswick Flyover on the Great West Road to Slough, forms part of the route out of London to the West, which on completion of the Severn Bridge will be the main route to South Wales. Plans are being completed for the Severn Bridge, the building of which is to be phased with the Forth Bridge now under construction.

Shorter lengths of motorway included in the road programme are on A.20 Maidstone By-pass (10 miles) (now under construction); on A.1, Stevenage By-pass (8 miles), Doncaster By-pass (15 miles) (now under construction), Darlington By-pass (9 miles) and the Durham Motorway (21 miles); and on A.48, Port Talbot By-pass (5½ miles).

A special Road built to motorway standards was begun in April, 1957, by the Lancashire County Council. This is the Stretford-Eccles Bypass, nearly six miles long, which will run between the Swansea-Manchester Trunk Road (A.56) at Stretford and the Swinton-Leigh Road (A.572) and the Bolton-Stretford Road (A.575) at Worsley. It includes a new high level bridge over the Manchester Ship Canal at Barton, and the total cost will be £5,500,000, towards which the Ministry of Transport is contributing over £4,000,000. It is expected to be completed early in 1960.

New Thames Road Tunnel.—The driving of a new road tunnel under the Thames, from Dartford, Kent, to Purfleet, Essex, started on March 21, 1957. The project was authorized by Acts of Parliament in 1930 and 1937 and a pilot tunnel was completed in 1938, but progress was interrupted by the war. It is estimated that the scheme will take 5 years to complete and will cost about £11,000,000, of which three-quarters is to be repaid by toll revenue from 2,000,000 vehicles expected to use the tunnel each year. The tunnel and its approach roads will connect the London-Southend Road (A.13) and the London-Rochester Road (A.2), passing over or under intervening roads.

Situated in the Long Reach of the Thames, where the river is half a mile wide, the project provides for a single tunnel 4,700 feet long, carrying a roadway for two lanes of traffic. The roadway will fall from the tunnel entrances towards the river on gradients of 1 in 28 with a short section practically level underneath the river. At the lowest point in the tunnel the roadway will be 100 ft.

below the high water level. The tunnel will be iron lined to an internal diameter of 28 ft., using some 34,000 tons of cast iron and 260,000 bolts. The existing pilot tunnel of 12 ft. diameter is being dismantled as construction of the full tunnel proceeds and its lining recovered for use elsewhere. The carriageway in the tunnel, carried on a reinforced concrete structure, will be 21 ft. wide between the kerbs, with minimum vertical headroom of 16 ft. at the kerb. Pedestrians will not be admitted to the tunnel.

New Clyde Road Tunnel.—Work has been proceeding since June, 1957, on driving a new road tunnel under the River Clyde in Glasgow. This is the first part of a project authorized by Act of Parliament in 1947, providing ultimately for two tunnels to link A.814 at Whiteinch with A.8 at Linthouse at a total cost now estimated at more than £10,000,000. The first tunnel and the approaches for both tunnels will provide two 22-ft. carriageways with a nominal headroom of 16 ft. 6 ins. and will cater for cyclists and pedestrians below the main carriageways.

New Road Bridge across the Firth of Forth.—Under powers conferred on the Forth Road Bridge Joint Board by Acts of Parliament in 1947 and 1948, a suspension bridge is being built to carry A.90 across the Firth of Forth at South Queensferry. Work on the foundations of the main piers and suspension cable anchorages began in September, 1958. It is estimated that the scheme will take five years to complete and will cost about £16,000,000, of which £10,850,000 will be found by Government loan to be repaid from tolls charged for the use of the bridge. The new bridge will be about half a mile upstream from the famous railway bridge and the clear centre span of 3,300 ft. will be the longest in Europe. Dual carriageways each of 24 ft. and, outside the main cables, cycle tracks and footpaths of 9 ft. and 6 ft. respectively, will be provided.

Motoring Offences.—A total of £1,723,002 in fines was paid by motorists in 1958. The number of persons charged in respect of 698,924 offences was 551,923. In addition written warnings were sent to 287,832 persons in respect of 305,161 alleged offences. Of the 551,923 persons prosecuted, 10,619 were arrested.

Convictions numbered 673,853 (against 522,658 in 1957) and a sentence of imprisonment without the option of a fine was passed on 1,619 persons for 3,000 offences. The number of motorists fined was 525,544 for 656,836 offences. Endorsements of licences numbered 208,762, of which 21,603 involved disqualification.

INLAND WATERWAYS

There are about 2,400 miles of inland waterways in use in Great Britain. Of these about 2,000 miles are administered by British Transport Waterways (British Transport Commission), which has organized them into four divisions, exclusive of Scotland, each of which is based on a major river estuary. These divisions have headquarters at Leeds, Liverpool, Watford and Gloucester. The Commission was set up under the provisions of the Transport Act, 1947.

Scotland

Canals in Scotland are administered separately by a Board of Management. The Caledonian Canal, a chain of 6 lochs and connecting canals, with a total length of 60 miles, including Lochs Ness, Lochy and Linnhe, was first open for navigation in 1823. Length of artificial canal, 23 miles; average depth 17 feet. The Crinan Canal, completed in 1801, connects Loch Crinan off the Sound of Jura, with Ardrishaig, a distance of about 9 miles. The Forth and Clyde Canal, completed in 1790, connects Bowling on the River Clyde with Kirkintilloch, Falkirk and Grangemouth (on the Forth), a distance of about 40 miles. The Union Canal runs from the Forth and Clyde Canal near Falkirk to Edinburgh, a distance of about 32 miles.

Northern Ireland

The only inland waterways now open to traffic in Northern Ireland are the Lagan Canal (Lower Reaches), the Strabane Canal and the Lower Bann Navigation.

AERODROMES AND AIRPORTS

A list of 168 aerodromes in the United Kingdom, Isle of Man, the Channel Islands, etc., available to civil aircraft, showing the class of aerodrome and the length in feet of the longest runway, grass or beach landing strip. Civil Aircraft are not permitted to land at aerodromes in U.K. other than those listed below, except in cases of genuine emergency in flight or where special permission has been obtained from the appropriate authority.

S = Airfield owned or controlled by the Ministry of Transport and Civil Aviation; airports available for International air services are also shown in bold type (26).

J = Aerodrome licensed for joint use of Royal Air Force, Royal Navy and civil aircraft (58).

M = Municipal aerodrome, owned or controlled by the local authority (21).

Pu. = Aerodrome licensed for public use (28).

U = Unlicensed aerodrome; *available with prior permission to civil aircraft (18).

Priv. = Aerodrome licensed for private use (18).

C = Aerodrome or airport with Customs and Immigration facilities, continuously or on call.

H = Helicopter Station only.

FOREIGN WORKERS

During 1958 a total of 42,840 permits were issued for the admission of foreign workers for employment in Great Britain, a decrease of 3,152 from the total in 1957. 1,133 permits were refused.

The principal occupations for which permits were issued were: Domestic service, 20,863; Concert, stage, film, variety and other entertainment, 5,067; Industry and commerce, 3,761; Hotel and restaurant service, 4,040; Teaching, 1,134; Nursing, 2,032; Student Employees, 5,643; Miscellaneous, 300.

Special facilities are offered by the Ministry of Labour to undermanned industries and services for the bulk recruitment of Italian workers. During 1958, a total of 843 Italian men and women were brought to vacancies in Great Britain through these facilities. The largest numbers were recruited for the hotel and catering industries.

Nationalities of workers who received permits in 1957 and 1958 were as follows:—

AGRICULTURE

Agricultural Holdings

Of the total number of agricultural holdings in Great Britain in 1958, 78 per cent. were of 100 acres or less in area. In England the average size was 72 acres, compared with Scotland's 66 acres, and an average of 49 acres in Wales. In 1957, 69 per cent. of the farms in England and Wales had mains electricity supply. The National Farm Survey of England and Wales, carried out in the early years of the last war, showed that 47 per cent. of the holdings with farm houses had a piped water supply, while 45 per cent. relied on wells as the principal source of water. The number of agricultural holdings in Great Britain in 1958, excluding rough grazing and holdings consisting solely of mountain and heathland, was:—

Production Objectives and Price Guarantees

In the *Annual Review and Determination of Guarantees* presented to Parliament in March 1959, the Government announced that agricultural net output in 1958-59 was forecast at 61 per cent. above pre-war, compared with 62 per cent. for 1957-58. But for the bad weather in 1958 it is estimated that output in 1958-59 would have been slightly higher than in the preceding year. The abnormal weather conditions lowered yields of arable crops: potato and cereal yields being particularly affected. Production of milk also fell due to lower yields. The number of calves retained for beef and the sheep breeding flock increased while the pig breeding herd fell. The effect of this should be to reverse the trend of 1958-59 when production of beef and lamb fell and that of pig meat rose. There was a further substantial increase in the production of eggs.

Production policy objectives stated in the 1958 *Annual Review* remain unchanged. It is hoped that production of home grown feeds will be increased, thereby reducing feed costs particularly in the production of pig meat. More quality beef is required, and with more plentiful supplies from New Zealand and Australia costs in the production of lamb will need to be reduced to meet the competition. The government hope that rather less eggs and milk will be produced in future.

In 1958-59 there was a welcome reduction in the cost to the Exchequer of agricultural support. The estimated total of £248 million was £36 million less than in 1957-58. The cause of this fall was

twofold. Following the 1958 Review reductions were made in the guaranteed prices paid to farmers; market prices, however, rose, thereby further reducing the difference to be met by the Exchequer.

In 1959-60, given better weather conditions, milk yields will have increased and the guaranteed price has, therefore, been left unchanged. Exchequer support for eggs is still high and a reduction of 1d. per dozen has been made in the guaranteed price. Increasing herds suggest that beef production is generally profitable and that no change in the support price is needed. Further encouragement is given to increase the beef cattle population by raising the hill cow subsidy and the steer calf subsidy by 20 per cent. and 9 per cent. respectively. No change is made in the guaranteed price for fat pigs; although the rate of exchequer support is still high, the decline in the breeding herd is expected to improve the situation. Wheat is less useful for animal feeding than barley and other grain crops and, as the subsidy for wheat is still high in relation to the market price, a reduction of 6d. per cwt. was made in the guaranteed price. No change was made in the price for barley, oats and sugar beet but that for rye was reduced by 6d. per cwt. Although a new guarantee system for potatoes is in

operation, no real change in the support price was made. The changes have, on balance, resulted in a small increase in the total value of guarantees.

The Crops of 1959

The Times (September 7, 1959) published the following table showing the condition of the principal crops in Great Britain on September 1, 1959, compared with the previous five years, and with the 10-year averages. 100 is taken to represent healthy condition; full growth and freedom from injury.

CLOSE TIMES FOR WILD BIRDS AND GAME

Wild Birds.—The *Protection of Wild Birds Act, 1954*, lays down a close season for wild birds (other than Game Birds) from February 1 to August 31 inclusive, each year. Exceptions to these dates are made for—

Capercaillie and (except Scotland) *Woodcock*, Feb. 1—Sept. 30.

Snipe, Feb. 1—Aug. 11.

Wild Duck and Wild Goose (in or over water areas), Feb. 21—Aug. 31.

Birds which may be killed or taken outside the close season (except in Scotland on Sundays, on Christmas Day or in a prescribed area) are the above and coot, curlew (other than stone curlew), bar-tailed godwit, moorhen, plover (golden or grey), common red-shank, certain wild duck (common pochard, gadwall, mallard, pintail, shoveller, teal, tufted duck, wigeon) and certain wild geese (bean, Canada, pink-footed and white-footed).

Certain wild birds may be killed or taken at any time by authorized persons—cormorant, crow, gull (black-backed or herring), jackdaw, jay, magpie, rook, shag, sparrow, sparrowhawk, starling, stock-dove and wood pigeon; and, in Scotland only, goosander, red-breasted merganser and rock-dove. The sale of Wild Bird's Eggs is prohibited, except

that gulls' eggs may be sold at any time and those of the lapwing (green or black plover) from Jan. 1—April 14 inclusive.

Game Birds.—In each case the dates are inclusive:—

Black Game—Dec. 11 to Aug. 19 (Aug. 31 in Somerset, Devon, and New Forest).

**Grouse*—Dec. 11 (Dec. 10, Scotland) to Aug. 11.

**Partridge*—Feb. 2 to Aug. 31.

**Pheasant*—Feb. 2 to Sept. 30.

**Palmgren*—(Scotland only) Dec. 11 to Aug. 11.

It is also unlawful (in England and Wales) to kill the game marked * on a Sunday or Christmas Day.

Hunting and Ground Game.—There is no statutory close-time for fox-hunting or rabbit-shooting, nor for deer nor hares; but by an Act passed in 1892 the sale of hares or leversets in Great Britain is prohibited from March 1 to July 31 inclusive under a penalty of a pound. The First of November is the recognized date for the opening of the fox-hunting season, which continues till the following April. Otter-hunting lasts from mid-April to mid-September. The period for deer-hunting or stalking varies from about August 12 to October 12 for stags, and from November 10 to the end of March for hinds.

LOCAL GOVERNMENT IN THE UNITED KINGDOM

ENGLAND AND WALES

Local government is carried on by directly elected councils whose powers and duties are defined by statute, under the general supervision of various departments of the central government. Departments principally concerned are the Ministries of Housing and Local Government, Education, Health and Transport; and, in matters affecting law and order, police, fire services, care of children, civil defence preparations, etc., the Home Office. Supervision is by means of inspections and enquiries, issue of Regulations and Orders, approval of bye-laws, loan sanctions for capital expenditure, examination of accounts and the administration of government grants.

County Councils.—Constituted by the Local Government Act, 1888, they were made responsible for administrative duties which were previously performed by the justices of the peace in quarter sessions. In the main their functions relate to the more important services. In most cases the area of the administrative county is that of the geographical county, excluding county boroughs. Lincolnshire, Suffolk, Sussex and Yorkshire are exceptions, being divided into parts, each with a separate council, for administrative convenience. Councils consist of a chairman, aldermen and councillors. The chairman, who may receive an allowance, is elected annually by the council, either from among the aldermen or councillors or from persons eligible for election as aldermen or councillors. The council elects one-third of its members to hold office as aldermen for six years, half retiring every three years. Councillors are elected by local government electors for three years. Excluding London there are 61 county councils in England and Wales (see pp. 631-3; Wales, pp. 677-8).

County Borough Councils.—Boroughs with populations of 50,000 or more in 1888 and other ancient counties were constituted by the Local Government Act, 1888, as county boroughs; their councils were given the same powers and duties as county councils, but they are also governed by the general law affecting boroughs and have the same constitution. Until 1926 other boroughs reaching 50,000 population could seek county borough status, but the figure was then raised to 75,000. The Local Government Act, 1958, again raised the figure, to 100,000, and placed a 25-year prohibition on Private Bills for this purpose. (Although important, level of population is only one factor in the attainment of county borough status.) There are 83 county borough councils in England and Wales (see pp. 664-671; Wales, p. 677).

The district councils within a county are borough councils, urban district councils and rural district councils.

Borough Councils.—Constituted in their present form by the Municipal Corporations Act, 1882. Urban district councils of over 20,000 population may by royal charter be incorporated as boroughs, recent examples of this being the incorporation in 1955 of Castleford (population 1954, 42,570), Ellesmere Port (35,130), Enfield (109,200), Rhondda (108,730), Spennborough (36,760) and Uxbridge (56,840). Borough councils consist of a mayor, aldermen and councillors. The mayor, who presides at council meetings and may be paid, and the aldermen, are elected and hold office for the same terms as chairmen and aldermen of county councils (see above). Councillors are elected by the burgesses (local government electors of the borough) for a term of three years, one-third of the council retiring each year. The lists on pp. 672-674 indicate how the political parties were represented on the councils of the more important boroughs in

1959. There are 318 non-county boroughs in England and Wales (see pp. 664-671; Wales, p. 677).

Urban and Rural District Councils.—The Public Health Act, 1875, consolidated legislation on public health and conferred various powers and duties on local sanitary authorities and these bodies were reconstituted by the Local Government Act, 1894, as urban and rural district councils. They are corporate bodies and have a common seal. District councils consist of a chairman, elected annually by the council, and councillors elected for a term of three years. The chairman may receive an allowance. An important part of their responsibility is in the local administration of the Public Health Acts and Housing Acts. Urban district councils are also highway authorities. Both types of authority levy rates; they may raise loans for various purposes and make bye-laws with the sanction of the central Government. There are 564 urban district councils and 474 rural district councils in England and Wales.

Parish Councils and Parish Meetings.—Local government responsibility is for the area of the civil parish in rural areas and for purely secular matters. Parish meetings consist of all the local government electors of the parish under a chairman chosen by the meeting and must be held at least twice a year where there is no parish council. Parish councils consist of a chairman and a number of councillors which may vary from five to twenty-one, elected for three years. Parishes with a population of more than 300 must have a parish council. A parish meeting must be held annually and is presided over by the chairman of the parish council. Rates to meet the expenses of the parish council are levied by the rural district council.

London.—Local government is carried on by London County Council (see pp. 641-644), the Corporation of the City of London (pp. 635-641) and by the councils of the 28 metropolitan boroughs listed on p. 634. In November 1957 a Royal Commission was set up to review local government in Greater London.

Local Government Act, 1958.—The Act provides new machinery for the review and alteration where necessary of the organization of local government in the rest of England and Wales.

Local Government Elections

Generally speaking all British subjects or citizens of the Republic of Ireland of 21 years or over resident on the qualifying date in the area for which the election is being held are entitled to vote at local government elections. There is also a non-resident qualification (see p. 990). A register of electors is prepared and published annually by local electoral registration officers. There are 9,426,383 local government electors in county boroughs, 15,626,081 in municipal boroughs, urban districts, the City of London and the metropolitan boroughs, and 5,803,407 in rural districts. These figures exclude "Y" voters, i.e. persons having their 21st birthday between Oct. 12 and June 16, who are entitled to vote at elections held after Oct. 1 following. County council elections are held triennially, usually in April, and elections for other authorities annually or triennially in May.

Voting takes place at polling stations arranged by the local authority and under the supervision of a presiding officer specially appointed for the purpose. Candidates, who are subject to various statutory qualifications and disqualifications designed to secure that they are suitable persons to hold office, must be nominated by two electors and, except in metropolitan borough, rural district

or parish council elections, must secure the assent of eight other electors to the nomination. County council elections are based on divisions of the county regulated by the Home Secretary, each of which returns a single member; most boroughs, including county and metropolitan boroughs, are divided into wards, each electing a number of members varying between three and nine; other authorities may be so divided or may remain as single units depending upon their sizes.

Local Government Services

Local authorities must in their areas provide the services and carry out the functions required by various Acts of Parliament. They may provide additional services under general permissive legislation or under "local" Acts of Parliament which they have promoted as Private Bills. The nature of the duties imposed on local authorities and the scope of the services which they provide vary according to the type of authority. The only all-purpose council is that of the county borough. In the counties functions are divided between the county council and the borough and district councils and there is considerable delegation of functions by the county council to these other authorities, e.g. in education and planning matters. The principal subjects of local government administration are:—

Public health services (prevention of epidemics, abatement of sanitary nuisances, etc.) under the Public Health Act, 1936; local health services under the National Health Service (see pp. 972-3); Care of deprived children; Welfare services for the aged and infirm and for the handicapped, under the National Assistance Act, 1948.

Housing; Land drainage; Water supply; Sewerage; Refuse collection and disposal; Baths and washhouses; Cemeteries.

Town and country planning; Parks and recreation grounds; Smallholdings and allotments.

Roads and bridges; Road safety; Street lighting; Harbours, docks and piers; Passenger transport.

Education; Public libraries, museums and art galleries; Municipal entertainments; Civic restaurants; Information centres.

Police; Fire services; Civil defence services.

Food and drugs inspection; Weights and measures.

Local Government Committees and Staff

Detailed administration of local government services is commonly carried out by committees, matters of policy being decided by the council as a whole; the appointment of certain committees is made compulsory by Act of Parliament. Committees may be executive or advisory; they may be constituted on a permanent basis as Standing Committees or as Special Committees set up for a limited period to deal with a particular subject; their powers and duties are laid down in the Standing Orders of the Council. Where services such as water supply and sewerage are shared between two or more authorities, Joint Committees or Boards of representatives of the authorities concerned are set up to administer the service. Police forces of counties are administered in this way by the Standing Joint Committee of members drawn in equal numbers from the county council and the justices in quarter sessions.

The executive policy of the local authority is carried out by a salaried staff varying in number according to the type of authority. The chief official is, in boroughs, the Town Clerk and elsewhere the Clerk of the Council, and these appoint-

ments, together with those of the Treasurer, Medical Officer of Health, Surveyor and Sanitary Inspector, are compulsory. Appointments of staff (including professional, technical and clerical classes, and manual workers) are made to a set establishment.

Local Government Finance

Local government is financed from various sources. (1) *Rates*.—Levied by county borough, borough and district councils and in London by the City Corporation and the metropolitan boroughs. Sums required by county councils are included in the rates levied by metropolitan and non-county borough and district councils. Rates are levied by a poundage tax on the rateable value of property in the area of the rating authority. *De-rating*.—Agricultural land and buildings are exempt from rates under the Local Government Act, 1929. The same Act, as amended by the Local Government Act, 1958, provides for industrial and freight-transport hereditaments to be rated at 50 per cent. of their net annual values. The Rating and Valuation Act, 1957, effected a temporary reduction of 20 per cent. in the rateable values of shops, offices, hotels and other commercial property, for the duration of the present valuation lists. Valuation for rating, formerly the responsibility of local authorities was transferred to the Board of Inland Revenue by the Local Government Act, 1948. (2) *Government Grants*.—From 1948-49 to 1958-59, the Exchequer made annual equalization grants to counties and county boroughs whose rateable value was below the average rateable value per head of weighted population in England and Wales to bring their respective rateable values up to the average level. Equalization grants replaced the former "block" grants paid to local authorities until 1948, which included an element of compensation for loss of revenue through de-rating. Percentage grants covered an agreed proportion of expenditure on approved services such as education, health, police and fire services. Special grants were also made.

The Local Government Act, 1958, provided for a new general grant, payable from 1959-60 onwards, in replacement of the grants for education, etc., services mentioned above and the grants on certain other services. The amount of the general grant is fixed in advance for a short period of years though not necessarily at the same level for each year of the period. If it appears that expenditure which previously attracted specific grant is bound to vary materially in the later years of a period the amount to be distributed by way of general grant will be graduated accordingly. This general grant is distributed to all County and County Borough Councils by reference to objective factors (mainly of weighted population) which are readily ascertainable and afford a fair and reasonable measure of the relative needs of each authority.

The equalization grant mentioned above ceased to be payable after 1958-59, except for balances due in respect of previous years, and was replaced for 1959-60 onwards by a rate deficiency grant based on rate products instead of rateable values as hitherto. This is paid direct to County District Councils and to Counties and County Boroughs whose resources in terms of rate product per head of population are below the average.

(3) *Loans*.—Local authorities may raise loans on the security of the rates, with the sanction of the central Government department directly concerned, for capital expenditure on housing, roads, markets, municipal transport services, sewerage works, etc. On March 31, 1957, there were outstanding loans in England and Wales to the amount of

£4,614,957,000; against this total the sum of £28,617,000 stood at the credit of various sinking funds.

SCOTLAND

Scotland is divided for local government purposes into counties, burghs and districts, and local authorities are similar to those in England and Wales.

County Councils.—First constituted in 1889, they are responsible for local government of the geographical area of the county excluding the large burghs. For certain purposes the counties of Perth and Kinross, and Moray and Nairn are combined. County councils include representatives from the landward areas and from all the burghs which are within the county for any purpose, town councils electing representatives from among their own members. Councillors are elected triennially. The chairman of the county council is the Convener of the County. There are 33 county councils in Scotland (see pp. 681-2).

Town Councils.—The town councils of the counties of cities (Edinburgh, Glasgow, Aberdeen and Dundee) are all-purpose authorities similar to the county borough councils in England and Wales and are presided over by the Lord Provost.

Scottish burghs are Royal burghs (incorporated by Royal Charter, 69), Parliamentary burghs (created by the Reform Act, 1832, with the right to send members to Parliament, 14) and Police burghs (all other burghs with a population of 7,000 or more, 115). Town councils consist of a provost (chairman), bailies and councillors. The provost and bailies (the equivalent of aldermen in England) are elected by the councillors from among themselves and hold office for three years; they are the magistrates of the burgh.

Large burghs other than the counties of cities, are independent for all purposes except that for education and, in some cases, police, they are included in the county; small burghs are within the county not only for education and police but also for such purposes as classified roads, planning, etc.

There are 198 town councils in Scotland (counties of cities, 4; other large burghs, 20; small burghs, 174). (See pp. 681-6.) Bearsden was incorporated as a burgh in May, 1958.

District Councils.—Outside the burghs the county council is responsible for most local government functions. Some of its functions are delegated to district councils as agents of the county council—recreation grounds, rights of way, allotments and other minor matters. Two counties are not divided into districts. District councils consist of elected members and the county councillors for the district *ex officio*. There are 199 district councils in Scotland.

Local Government Electors.—In Scotland there are 1,284,665 electors in counties of cities, 569,630 in other large burghs, 598,458 in small burghs and 980,983 in landward areas.—Total 3,433,736.

Product of 1d. rate in Scottish Cities

The estimated product of 1d. in Glasgow in 1958-59 was £62,679; in Edinburgh, £32,858;

in Dundee, £9,333; and in Aberdeen, £10,110. Amounts of rates raised per head were: Glasgow, 38s. 5d.; Edinburgh, 28s. 7d.; Dundee, 28s. 7d.; and Aberdeen, 32s. 5d.

NORTHERN IRELAND

The structure of local government in Northern Ireland is similar to that of England and Wales. Types of local authority are: county councils, 6; county boroughs, 2; non-county boroughs or municipal councils, 9; urban district councils, 25; town commissioners, 1; and rural district councils, 31. (See p. 690.)

Electors.—The register published on Feb. 15, 1958, contained the names of 623,323 local government electors. Of this total, 195,364 related to the County Borough of Belfast and 21,627 to Londonderry County Borough. A new electoral register will be published on Feb. 15, 1961.

Local Government Debts.—The total amount of outstanding loans and capitalized annuities in Northern Ireland on March 31, 1957, was £84,614,408 (excluding Hospitals).

POLICE

The Police of England and Wales are administered by the Home Office, those of Scotland by the Scottish Home Department and those of Northern Ireland by the Ministry of Home Affairs.

LONDON FIRE BRIGADE

Headquarters: Albert Embankment, S.E.1.

The former Metropolitan Fire Brigade (founded 1867) was taken over by London County Council under the Local Government Act, 1888, and in 1904 the title "London Fire Brigade" was adopted. The Brigade was considerably augmented during the 1939-45 war, when it was part of the National Fire Service (1941-48). It was returned to the control of London County Council on April 1, 1948.

The number of calls to which the Brigade responded during the year ending December 31, 1958, totalled 21,430, the fires numbered 9,139, chimney fires 4,228, false alarms 5,035 (including 2,341 malicious false alarms), and the calls to perform special services numbered 3,008.

Under the provisions of the Civil Defence Act, 1948, an Auxiliary Fire Service was re-established. **Chief Officer.**—F. W. Deive, C.B.E. **Deputy Chief Officer.**—L. W. T. Leete, M.B.E. **Assistant Chief Officer.** J. K. H. Cunningham, M.B.E. **Administrative Officer.**—E. W. Parker.

THE KINGDOM OF ENGLAND

Position and Extent.—The Kingdom of England occupies the southern portion of the island of Great Britain and lies between $55^{\circ} 46'$ and $49^{\circ} 57' 30''$ N. latitude (from the mouth of the Tweed to the Lizard), and between $1^{\circ} 45'$ E. and $5^{\circ} 43'$ W. (from Lowestoft to Land's End). England is bounded on the north by the summit of the Cheviot Hills, which form a natural boundary with the Kingdom of Scotland; on the south by the English Channel; on the east by the Straits of Dover (Pas de Calais) and the North Sea; and on the west by the Atlantic Ocean, Wales and the Irish Sea. Area, 50,331 square miles. Population (Census of 1951), 43,758,000.

Relief.—There is a natural orographic division into the hilly districts of the north, west and south-west, and the undulating downs and low-lying plains of the east and south-east. In the extreme north the Cheviot Hills run from east to west, culminating in the Cheviot, 2,676 feet above mean sea level. Divided from the Cheviots by the Tyne Gap is the Pennine Chain, running N. by W. to S. by E., with its highest point in Cross Fell, 2,930 feet above mean sea level. West of the Pennines are the Cumbrian Mountains, which contain in Scafell Pike (3,210 feet) the highest land in England, and east of the Pennines are the Yorkshire Moors, their highest point being Urra Moor (2,486 feet). South of the Pennines are the Peak of Derbyshire (2,688 feet) and Dartmoor (High Willhays, 2,039 feet). In the western county of Shropshire are the isolated Wrekin (1,335 feet), Longmynd (1,696 feet), and Brown Clee (1,792 feet); in Herefordshire the Black Mountain (2,310 feet); in Worcestershire the Malvern Hills (1,395 feet), in Monmouthshire (now usually grouped with Wales) the Sugar Loaf (1,955 feet) and Colty (1,905 feet), and the Cotswold Hills of Gloucestershire contain Cleve Cloud (1,134 feet).

Hydrography.—The Thames is the longest and most important river of England, with a total length of 220 miles from its source in the Cotswold Hills to its outflow into the North Sea, and is navigable by ocean-going steamers to London Bridge. The Thames is tidal to Teddington (69 miles from its mouth) and forms county boundaries almost throughout its course; on its banks are situated London, the capital of the British Commonwealth; Windsor Castle, the home of the Sovereign, Eton College, the first of the public schools, and Oxford, the oldest university in the kingdom. The Severn is the longest river in Great Britain, rising in the north-eastern slopes of Plinlimmon (Wales) and entering England in Shropshire, with a total length of 220 miles from its source to its outflow into the Bristol Channel, where it receives on the left the Bristol Avon, and on the right the Wye, its other tributaries being the Vyrnwy, Tern, Stour, Teme and Upper (or Warwickshire) Avon. The Severn is tidal below Gloucester, and a high bore or tidal wave sometimes reverses the flow as high as Tewkesbury (13½ miles above Gloucester). The scenery of the greater part of the river is very picturesque and beautiful, and the Severn is a noted salmon river, some of its tributaries being famous for trout. Navigation is assisted by the Gloucester and Berkeley Ship Canal (16½ miles), which admits vessels of 350 tons to Gloucester. The Severn Tunnel, 14 miles below the Sharpness Bridge, begun in 1873 and completed in 1886 (at a cost of £2,000,000) after many difficulties from flooding, is 4 miles 624 yards in length (of which 2½ miles are under the river). The construction of a road bridge over the Severn estuary, between Haysgate, Mon., and Almondsbury, Glos.,

(which will be the largest in Europe and the third largest in the world, with a centre span of 3,300 ft.) was authorized on Aug. 1, 1947, the estimated cost being £9,000,000. Plans for the Severn Bridge were being completed in 1959. Of the remaining English rivers those flowing into the North Sea are the Tyne, Wear, Tees, Ouse and Trent from the Pennine Range, the Great Ouse (160 miles) from the Central Plain, and the Orwell and Stour from the hills of East Anglia. Flowing into the English Channel are the Sussex Ouse from the Weald, the Itchen from the Wiltshire and Hampshire Hills, and the Axe, Teign, Dart, Tamar and Exe from the Devonian Hills; and flowing into the Irish Sea are the Mersey, Ribble and Eden from the western slopes of the Pennines and the Derwent from the Cumbrian Mountains. The English Lakes are noteworthy rather for their picturesque scenery and poetic associations than for their size. These lie mainly in Cumberland, but partly in Westmorland and Lancashire, the largest being Windermere (10 miles long), Ullswater and Derwentwater.

Islands.—The Isle of Wight is separated from Hampshire by the Solent, total area 147 sq. miles, population 1951 Census, 95,594. The climate is mild and healthy, and many watering places have grown up during the last century. Capital, Newport, at the head of the estuary of the Medina, Cowes (at the mouth) being the chief port; other centres are Ryde, Sandown, Shanklin, Ventnor, Freshwater, Yarmouth, Totland Bay, Seaview and Bembridge. The Scilly Islands, 25 miles from Land's End, consist of about 40 islands, with a total area of about 4,000 acres, only St. Mary's Trece, St. Martin's, St. Agnes and Bryher being inhabited. The capital is Hugh Town, in St. Mary's. The climate is unusually mild, and vegetation luxuriant, semi-tropical plants flourishing in the open. Lundy (=Island), 11 miles N.W. of Hartland Point, Devon, is about 2 miles long and about ½ mile broad (average), with a total area of about 1,050 acres (mainly picturesque), and a population of about 20; it contains the seat of the proprietor of the island and 3 lighthouses (one disused).

Climate.—The mean annual air temperature reduced to sea-level varies from 52° F. at Penzance and the Scilly Islands to 48° F. near Berwick-on-Tweed. In January the south and west are warmer than the east, the mean temperature reduced to sea-level being less than 40° F. over the eastern half of the country. In July the warmest districts are more definitely in the south and inland, the range being from 63° F. around London to less than 50° F. in the extreme north. The decrease of mean temperature with height is about 1° F. per 300 ft. The coldest month of the year is January and the warmest July. Sea temperature reaches its maximum rather later than air temperature. The average annual rainfall decreases from west to east, owing to the preponderance of south-west winds, and also increases with altitude. Of the total area 55 per cent. has an average less than 30 in., 29 per cent. between 30 in. and 40 in. and 16 per cent. more than 40 in. In the neighbourhood of the Thames Estuary the average is only 20 in.; at Seahwaite, Cumberland, 122 in.; and at the wettest spot in the Lake District 185 in. The months of least rain are March to June and the wettest months October to January. September is on the average drier than July and August. The mean annual number of hours of bright sunshine varies from 1,750 hours along the south-east coast to less than 1,300 hours in the neighbourhood of the Pennine range. June is the sunniest month fol-

lowed by May, July, August and September in that order.

EARLY INHABITANTS

Prehistoric Man.—Palæolithic and Neolithic remains are abundantly found throughout England. The Neolithic period is held to have merged into the Bronze Age about 2000 to 1500 B.C., and a date between these years has been given to *Stonehenge* (20 miles N. of Salisbury, Wiltshire) which consists of two circles of menhirs (the largest monolith being 22½ feet in height). The village of *Avebury* and its surroundings were scheduled in 1937, and in 1943 about 1,000 acres at Avebury were purchased by the National Trust, thus preserving the Circle of megalithic monuments, the Avenue, Silbury Hill, etc., relics of Stone Age culture of 2000–1800 B.C., which make this one of the most important archaeological sites in Europe. The *Devil's Arrows*, near Boroughbridge, Yorkshire, are regarded as the finest remaining megalithic monoliths in northern Europe; the tallest arrow is 30 ft. 6 in. high and its greatest circumference is 26 ft. In the latter part of the Bronze Age the *Goidels*, a people of Celtic race, and in the Iron Age other Celtic races of *Brythons* and *Belgae*, invaded the country and brought with them Celtic civilization and dialects, place names in England bearing witness to the spread of the invasion over the whole kingdom.

The Roman Conquest.—Julius Cæsar raided Britain in 55 B.C. and 54 B.C. The Emperor Claudius, nearly 100 years later (A.D. 42), dispatched Aulus Plautius, with a well-equipped force of 40,000 all arms, and himself followed with reinforcements in the same year. The British leader from A.D. 48–51 was *Caratacus* (Caractacus), who was finally captured and sent to Rome. By A.D. 70 the conquest of South Britain was completed, a great revolt under *Boadicea*, Queen of the Iceni, being crushed in A.D. 61. In A.D. 122, the Emperor Hadrian visited Britain and built a continuous rampart, since known as *Hadrian's Wall*, from Wallsend to Bowness (Tyne to Solway). The work was entrusted by the Emperor Hadrian to Aulus Platorius Nepos, legate of Britain from 122 to 126, the work being now regarded as "the greatest and most impressive relic of the Roman frontier system in Europe." The Romans administered Britain as a Province under a Governor, with a well-defined system of local government, each Roman municipality ruling itself and the surrounding territory. Colchester, Lincoln, York, Gloucester and St. Albans stand on the sites of five Roman municipalities, while London was the centre of the road system and the seat of the financial officials of the Province of Britain. Well-preserved Roman towns have been uncovered at (or near) *Silchester* (Calleva Atrebatum), 10 miles south of Reading, *Wroxeter* (Viroconium), near Shrewsbury, and *St. Albans* (Verulamium) in Hertfordshire. Four main groups of roads radiated from London, and a fifth (the Fosse) ran obliquely from Ermine Street (at Lincoln), through Leicester, Cirencester and Bath to Exeter. Of the four groups radiating from London one ran S.E. to Canterbury and the coast of Kent, a second to Silchester and thence to parts of Western Britain and South Wales, a third (now known as *Watling Street*) ran through Verulamium to Chester, with various branches, and the fourth reached Colchester, Lincoln, York and the eastern counties. Christianity reached the Roman province of Britain from Gaul in the 3rd century (or possibly earlier), *Alban*, "the

protomartyr of Britain," being put to death as a Christian during the persecution of Diocletian (June 22, 303), at his native town Verulamium. The Bishops of Londinium, Eboracum (York), and Lindum (Lincoln) attended the Council of Arles in 314. The Roman garrison of Britain was much harassed in the 4th century by Saxon pirates, who invaded the eastern counties. A system of coast defence was organized from the Wash to Southampton Water, with forts at Brancaster, Burgh Castle (Yarmouth), Walton (Felixstowe), Bradwell, Reculver, Richborough, Dover, Stutfall, Pevensey and Porchester (Portsmouth). About A.D. 350 incursions in the north of Irish (Scotti) and Picts became most formidable, and towards the end of the 4th century many troops were removed from Britain for service in other parts of the Roman Empire. Early in the 5th century Gaul was taken from the Romans by Teutonic invaders and Britain was cut off from Rome. The last Roman garrison was withdrawn from Britain in A.D. 442 and the S.E. portion was conquered by the Saxons. The Latin-speaking Celts of England were replaced by their heathen and Teutonic conquerors, to the submergence of the Christian religion and the loss of Latin speech. According to legend, the British King *Vortigern* called in the Saxons to defend him against the Picts, the Saxon chieftains being *Hengist* and *Horsa*, who landed at Ebbsfleet, Kent, and established themselves in the Isle of Thanet. Bede, a Northumbrian monk, author of the *Ecclesiastical History* at the opening of the 8th century, described these settlers as Jutes, and there are traces of differences in Kentish customs from those of other Anglo-Saxon kingdoms.

Anglo-Saxons and Normans.—What happened in Britain during the 150 years which elapsed between the final break with Rome and the coming of St. Augustine is shrouded in the deepest mystery. The Jutes, the Saxons and the Angles (whose gods *Twi*, *Woden*, *Thunor* and *Frigg* are commemorated in "Tuesday, Wednesday, Thursday and Friday") were converted to Christianity by a mission under Augustine (dispatched by Pope Gregory in 597), which established Archbishoprics at Canterbury and York, and England appears to have been again converted by the end of the 7th century. In the 8th century *Offa*, King of Mercia, is stated to have built a wall and rampart, afterwards known as *Offa's Dike*, from the mouth of the Dee to that of the Wye, as a protection against the Welsh. The greatest of the English kingdoms was *Wessex*, with its capital at Winchester, and the greatest of the Wessex kings was *Alfred the Great* (871–901), who resisted the incursions of the Northmen (Danes) and fixed a limit to their advance by the Treaty of Wedmore (878). In the 10th century the Kings of Wessex recovered the whole of England from the Danes, but subsequent rulers were unable to resist the invaders, and England paid tribute (*Danegelt*) for many years, and was ruled by Danish Kings from 1016 to 1042, when Edward the Confessor was recalled from exile. In 1066 Harold (brother-in-law of Edward and son of Earl Godwin of Wessex) was chosen King of England, but after defeating (at Stamford Bridge, Yorkshire, Sept. 25) an invading army under Harald Hadrada, King of Norway (aided by the outlawed Earl Tostig, of Northumbria, younger son of Earl Godwin), he was himself defeated at the *Battle of Hastings* on Oct. 14, 1066, and the Norman Conquest secured the throne of England for Duke William of Normandy.

(a) Administrative Counties, excluding County Boroughs, named in the First Schedule of the Local Government Act, 1933; (b) Geographical Counties, including County Boroughs; in each case as estimated by the Registrar-General on June 30, 1958; (c) includes value of property occupied by the Crown for public purposes upon which contributions in lieu of rates are paid.

Lords Lieutenant of Counties.—The actual words used in the Letters Patent relative to these appointments are "Her Majesty's Lieutenant of and in the County of . . ." and this is the official title whether the individual appointed be a Peer or a Commoner. In documents of the highest formality the proper term is therefore "Her Majesty's Lieutenant." In less formal and informal documents and colloquially, the style "Lord Lieutenant" has been applied to H. M. Lieutenants, Peers and Commoners alike, for a great many years. The duties of the Lord Lieutenant are to advise the Lord Chancellor as to the appointment of magistrates to the county bench, to appoint Deputy Lieutenants and to raise the militia, if need be, in time of riot or invasion. The Lord Lieutenant is usually a peer or a baronet and a large landowner and is often appointed *custos rotulorum* (keeper of the records).

THE GOVERNMENT OF LONDON

LONDON, the capital of England and of the British Commonwealth of Nations, and the greatest city in the world, is situated on both banks of the River Thames, 50 miles from the North Sea.

The City of London (see pp. 635-641) represents London within its ancient boundaries.

The City of Westminster, which is bounded by the City of London on the east, by Chelsea and Kensington on the west, by Paddington, St. Marylebone and Holborn on the north, and by the Thames and Chelsea on the south, was formed into a borough by the London Government Act of 1899, and was created a city by Royal Charter of Oct. 29, 1900, the Council consisting of a Mayor, 20 Aldermen and 60 Councillors. It is notable, however, that since 1540 when a Bishopric of Westminster was established (abolished 1550) the Royal Writ of Summons to Parliament has always referred to "Our City of Westminster." Extending from the eastern end of the Strand to Kensington Gardens, and from Oxford Street to the Thames, it includes within its boundaries a large number of the finest buildings in London. The Abbey and the Roman Catholic Cathedral, the Houses of Parliament and the Law Courts, Buckingham Palace and St. James's, and the principal government offices, clubs and theatres are situated in Westminster, which also includes the fashionable districts of Mayfair and Belgravia.

Metropolitan Boroughs.—Under the London Government Act of 1899, the administrative functions

of the various vestries in the Metropolitan districts surrounding the City of London were transferred to 28 Metropolitan Boroughs, of which one became afterwards the City of Westminster. The area covered by these boroughs extends northwards to include Stoke Newington, southwards to Wandsworth and Lewisham, eastwards to Woolwich, and westwards to Hammersmith.

London County Council.—For County purposes the affairs of London are administered by the London County Council (see pp. 641-644), which was created by the Local Government Act of 1888.

Miscellaneous Authorities.—For Police purposes the administration is invested in the Corporation of London as to the City Police and in the Home Office as to the Metropolitan Police. The water authority is the Metropolitan Water Board; while the River Thames is administered as to its tidal portion by the Port of London Authority and above Teddington by the Thames Conservancy; the Port Health Committee of the Corporation is the Health Authority for the River, the lighthouse and pilotage authority being Trinity House. The bridges are maintained in the City of London by the Bridge House Estates Committee of the Corporation and in the remaining area by the London County Council. London Transport controls passenger transport in the metropolitan area (omnibuses and metropolitan above- and underground railways).

THE CITY OF LONDON represents London within its ancient boundaries and is governed by the Corporation of London, which consists of the "Mayor and Commonalty and Citizens" and acts through the Common Council, which comprises the Lord Mayor, 25 other Aldermen and Common Councilmen. The Corporation, by Acts of Common Council has decided to reduce the number of Common Councilmen from 206 to 159 as at St. Thomas's Day, 1965, casual vacancies occurring by death or resignation in the meantime not being filled so long as the representation of any Ward does not fall below the number specified in the Act.

The City of London is the financial and business centre of London and includes the head offices of the principal banks, insurance companies and mercantile houses, in addition to buildings ranging from the historic interest of the Roman Wall and the 15th century Guildhall, to the massive splendour of St. Paul's Cathedral and the architectural beauty of Wren's spires.

The city of London at the time of the revolt of the Iceni (A.D. 61) was described by Tacitus (born A.D. 55; died A.D. 120) as "a busy emporium for trade and traders." In Saxon times it was, in reality, a small independent federated State of Wards (holding *wardmotes*) with a *folkmote*, predecessor of the present Common Council, for general affairs. Its burgesses maintained their independence even after the Battle of Hastings. William the Norman only gained possession of their city by means of a treaty with them, and granted a charter, which is still preserved. The mayoralty was established on the recognition of the corporate unity of the citizens by Prince John in 1191, the first Mayor being Henry Fitz Alwyn, who filled the office for 21 years and was succeeded by Fitz Alan (1212-15). A new charter was granted by King John in 1215, directing the Mayor to be chosen annually, which has ever since been done, though in early times the same individual often held the office more than once. A familiar instance is that of "Whittington, thrice Lord Mayor of London" (in reality four times, A.D. 1397, 1398,

1406, 1419); and many modern cases have occurred. The earliest instance of the phrase "Lord Mayor" in English is in 1414. It is used more generally in the latter part of the 15th century and becomes invariable from 1535 onwards. At Michaelmas the Livery men in Common Hall choose two Aldermen who have served the office of Sheriff for presentation to the Court of Aldermen, and one is chosen to be Lord Mayor for the ensuing mayoral year. The Lord Mayor is sworn into office on November 8, and on the following day presented to the Lord Chief Justice at the Royal Courts of justice to make the final declaration of office—the pageant being popularly known as the *Lord Mayor's Show*. Legislation has however been promoted to provide for the Lord Mayor in future to be presented to the Lord Chief Justice on the second Saturday in November and for him to be sworn in on the previous day.

Aldermen are mentioned in the 11th century and their office is of Saxon origin. They were elected annually between 1377 and 1394, when a charter of Richard II. directed them to be chosen for life. The *Common Council*, elected annually on St. Thomas's Day (Dec. 21), was, at an early date, substituted for a popular assembly called the *Folkmote*. At first only two representatives were sent from each ward, but the number has since been greatly increased, some wards having at present as many as 12 members, and none fewer than four. *Sheriffs* were Saxon officers; their predecessors were the *wic-reeves* and *portreeves* of London and Middlesex. At first they were officers of the Crown, and were named by the Barons of the Exchequer; but Henry I. (in 1132) gave the citizens permission to choose their own Sheriffs, and the annual election of Sheriffs became fully operative under King John's charter of 1199. The citizens lost this privilege, as far as the election of Sheriff of Middlesex is concerned, by the Local Government Act, 1888; but the Liverymen continue, as heretofore, to choose two Sheriffs of the City of London, who are appointed on Midsummer Day, and take office at Michaelmas.

Officers.—The Recorder was first appointed in 1298. The office of Chamberlain is an ancient one, the first contemporary record of which is 1276. The Town Clerk (or Common Clerk) is mentioned in 1274 and the Common Serjeant in 1291.

Activities.—The work is assigned to Ward Committees consisting of 4 Aldermen and 29 Common Councillors, and to Committees specially appointed. These Committees present reports to the Court of Common Council. The *Ward Committees* are:—City Lands, Bridge House Estates, Coal and Corn and Finance, Rates Finance, Improvements and Town Planning, Streets, Central Markets, Cattle Markets, Billingsgate and Leadenhall Markets, Spitalfields Market, Police, Port and City of London Health, Library (Library, Records, Art Gallery and Museum), City of London Schools, Freemen's School, Music (Guildhall School of Music and Drama), General Purposes, Officers and Clerks, Civil Defence, and Housing. The *Committees specially appointed* are:—Gresham (City side), Epping Forest, West Ham Park, Special, Privileges, Labour, Special (Guildhall Reconstruction), Barbican Licensing Planning and Litter Act.

The Honourable the *Irish Society*, which manages the Corporation's Estates in Ulster, consists of a Governor and 5 other Aldermen, the Recorder, and 19 Common Councillors of whom one is elected Deputy Governor.

The *City's Estate*, in the possession of which the Corporation of London differs from all other municipalities in the Kingdom, is managed by the

City Lands Committee, the Chairmanship of which carries with it the title of "Chief Commoner."

The *Coal and Corn and Finance Committee* manages the funds derived from the City's Estate and other sources and receives accounts of the Bridge House Estates (which are employed in the provision and maintenance of London, Blackfriars, Southwark and Tower Bridges). The cost of Civil Government and other public services, including the maintenance of open spaces outside the City, are met from the City's Cash, which also provides for the expenses of Epping Forest and West Ham Park, open spaces under the management of separate Committees, and the net expense of the City of London School, the City of London School for Girls, the City of London Freemen's School, and the Guildhall School of Music and Drama.

The *Rates Finance Committee* supervises the expenditure of all moneys derived from the Rates. Expenditure chargeable to the *Poor Rate*, unlike that from funds under the management of the Coal and Corn and Finance Committee, is subject to audit by the Ministry of Housing and Local Government. The bulk of the *Poor Rate* is paid to the London County Council and the *General Rate* is charged with the public health services, including maintenance, etc. of streets, housing, part of the cost of the Police, expenditure in respect of Town Planning redevelopment of the City, the net expense of Spitalfields Market, the cost of the Library, Museum and Art Gallery, and the Central Criminal Court.

THE CITY GUILDS (LIVERY COMPANIES)

The Livery Companies of the City of London derive their name from the assumption of a distinctive dress or livery by their members in the 14th century.

The order of precedence (according to and Report of Municipal Corporations' Commissioners, 1837) and omitting extinct companies, is given in parentheses after the name of each Company. There are 81 guilds in existence. The Comb-makers, Silk-throwers, Silkmens, Pinmakers, Soap-makers, Hatbandmakers, Tobacco Pipe Makers, Long-bow Stringmakers, Woodmongers, Starch-makers and Fishermen are extinct.

About 10,000 Liverymen of the Guilds are entitled to vote at elections in Common Hall.

The liveries of the Stationers and Newspaper Makers (406), Shipwrights (500), Carmen (400), Apothecaries (379), and Horners (407), are the

most numerous, the Ironmongers (37) and Wax-chandlers (34) the smallest.

THE LONDON COUNTY COUNCIL

Offices, The County Hall, Westminster Bridge, S.E.1.

THE London County Council was constituted under the Local Government Act of 1888. London is an administrative county, covering an area of 117 square miles, with a population estimated by the Registrar-General on June 30, 1959, at 3,225,000.

The City of London is a county for non-administrative purposes, such as justices, &c., and the Metropolis outside the City is also a county for non-administrative purposes, by name the County of London. The offices of Clerk of the Council and Clerk of the Peace are not held jointly in the County.

The Council comprises 21 aldermen, and 126 councillors, together 147, or, if the chairman of the Council be also an elected member or alderman, 146. The term of office for aldermen is 6 years, and half their number retires every 3 years. The councillors are elected for 3 years, and they elect the aldermen. The position of aldermen and councillors is the same, except as to the method of election and the term of office.

Meetings of the Council are held fortnightly in session time, and the standing committees meet fortnightly, except a few which meet monthly.

The Finance Committee has important statutory powers. No costs, debt or liability exceeding £100 may be incurred by the Council except upon a resolution passed on an estimate submitted by the Finance Committee. The Council has a net debt, according to the latest returns of £296,412,800 (£237,929,900 represents debt incurred for housing). Its annual expenditure on revenue account is about £118,000,000 and on capital account about £28,000,000. Advances amounting to £10,700,000 have been made on loan under the Housing and Small Dwellings Acquisition Acts to people who wish to buy a home.

The General Purposes Committee is responsible for advising the Council on the more important general questions, allocation of duties to Committees and heads of departments, consultation with other local authorities and government departments, matters relating to legislation, senior staff appointments, the development of the South Bank and the Crystal Palace site and the management of the Royal Festival Hall, and civil defence.

The Children's Committee is charged with the care of some 9,000 deprived and neglected children.

The Education Committee comprises thirty-eight members of the Council and twelve co-opted members. Women as well as men must be included.

The Establishment Committee is responsible for the efficient and economical use of manpower and

for a general control over numbers, grading, pay and conditions of staff (except teachers). The Council employs over 65,000 staff of all grades.

The Fire Brigade Committee is responsible for carrying out the duties laid on the Council by the Fire Services Act, 1947.

The Health Committee, set up under the National Health Service Act, 1946, is responsible for health services provided under that Act and for discharging the functions of the Council under the Mental Health Acts and the Clean Air Act, 1956. Under this committee are nine Divisional Health Committees, the majority of whose members are drawn from the Corporation of the City of London and the Metropolitan Borough Councils. These divisional committees are entrusted with considerable responsibilities for the day-to-day administration of the personal health services.

The Housing Committee performs the duties placed upon the Council by the various Housing Acts, including the clearance of insanitary areas and the relief of overcrowding. The total capital expenditure incurred up to March 31, 1959, in respect of all schemes was over £275,000,000. The income (rents &c.) for 1959-60 in respect of dwellings and housing estates of the Council is estimated at over £21,000,000. The total of the Exchequer subsidy in respect of the Council's housing operations is estimated at £4,291,000.

The Supplies Committee is responsible for supplying stores, etc., arranging contracts for printing etc., sale and disposal of old or surplus materials and general oversight of transport.

The Rivers and Drainage Committee administers the Metropolitan Main Drainage system which covers about 179 square miles, including certain districts outside the county, and comprises about 420 miles of main, storm-relief, intercepting and outfall sewers, twelve pumping stations, two sewage outfalls, and three sludge vessels. The total capital outlay on main drainage is over £22,000,000, and further work is in progress. This committee is also responsible for Thames flood prevention, the upkeep of the Thames tunnels, most of the Thames bridges and Woolwich Ferry.

The Town Planning Committee deals with questions relating to town-planning, the carrying out of street improvements and construction of bridges, tunnels and ferries, the naming of streets and numbering of houses, the maintenance of historic buildings and monuments, and also regulates under statute such matters as the construction and safety of buildings, building lines, space about buildings, and means of escape in case of fire.

The *Welfare Committee* provides residential accommodation for the aged and infirm and for other people in need of care and attention, including homeless families. They are also charged with the welfare of blind and other handicapped persons.

The *Parks Committee* is responsible for the acquisition and maintenance of parks and open spaces, and the provision of facilities for sport, open-air entertainment and exhibitions in them; the *Public Control Committee* is responsible for the control of storage of explosive substances and petroleum; testing weights and measures; the granting of licences for music, dancing, boxing and wrestling; administration of the Shops Acts; licensing and inspection of employment agencies; nurse's agencies and massage establishments; licensing of premises under the Cinematograph Acts; registration of motor cars; collection of duties on motor cars, dog, game, gun and certain other local taxation licences.

The *expenditure* of the Council, including loans to other local authorities, is met by two chief sources of supply—capital money raised by external borrowing, or by the use of the Sinking Fund of the Council's debt, the Superannuation

Fund, etc., and current income raised in a county rate or by the revenue of undertakings. Substantial contributions are received from the Exchequer by way of housing subsidies, the General Grant, grants in respect of school meals and capital grants towards the cost of road improvements. All borrowings by the Council are subject to the provision of a sinking fund, under Treasury approval, sufficient to repay all expenditure generally within a period of 60 years (in a few cases the limit is 80 years). The total stock outstanding at March 31, 1959, was £136,742,590 and in addition £176,000,000 had been borrowed from the Public Works Loan Board and other sources.

The *Rating* for the year 1959-60, as shown by the statement below (which relates to rate accounts only), amounted to 8s. 11d. in the pound over the whole county, including the City, and a further rate over the county outside the City of 1d. in the pound, together 9s. 0d. The total rate for 1958-59 was the same. The *Rateable Value* of the County of London, on April 6, 1959, was estimated to be approximately £102,240,000—a 1d. rate over the whole county producing £426,000.

Public and Private Buildings in London

ADELPHI, Strand, W.C.2.—Adelphi Terrace and district commemorate the four architect brothers, James, John, Robert and William ADAM, who laid out the district (formerly Durham House) at the close of the 18th century. Four of the streets in the Adelphi were formerly called James, John, Robert and William Streets to commemorate these founders of the Adam style of architecture and internal decoration. They are now Adam Street, John Adam Street, Robert Street and Durham House Street. Extensive rebuilding took place between the two World Wars, and there are now few 18th-century houses left in the district. In the neighbourhood of the Adelphi was York House, built by the Duke of Buckingham in 1625 (the Water Gate of which still stands in Embankment Gardens), the commemorative streets being *Charles Street, Villiers Street, Duke Street, Of Lane, Buckingham Street* (Of Lane is now "York Buildings").

AUSTRALIA HOUSE, Strand, W.C.2.—A handsome and imposing building, erected 1921-14 by the Commonwealth of Australia as the offices of the High Commissioner for the Commonwealth. NEW SOUTH WALES, QUEENSLAND, VICTORIA and WESTERN AUSTRALIA have separate offices in the Strand; TASMANIA at Golden Cross House, Charing Cross and SOUTH AUSTRALIA at S.A. House, Marble Arch.

BANK OF ENGLAND, Threadneedle Street, E.C.2. (Not open to sightseers.)—The Bank of England, founded in 1694, has always been closely connected with the Government. The present building, completed in 1940 to the designs of Sir Herbert Baker, incorporates features reminiscent of the earlier architects, Sampson (1734), Sir Robert Taylor (1765) and Sir John Soane (1788). A Bank picnic is mounted every evening by the Brigade of Guards.

BRIDGES.—The bridges over the Thames (from East to West) are the *Tower Bridge* (built by the Corporation of London and opened in 1894), with its bascules, affording a fine view of the Pool and of the metropolis; *London Bridge* (opened after rebuilding in 1831, and until 1750 the only bridge over the Thames in London), with the London Monument (*q.v.*) and Fishmongers' Hall; *Southwark Bridge* (opened in 1819, and rebuilt by the Corporation of London, 1921); *Blackfriars Bridge* (opened in 1869 and widened by the Corporation of London in 1908); width, 105 ft.; *Waterloo Bridge* (Rennie), width, 42 ft. 6 ins. (opened in 1817) commanding a fine view of western London (rebuilt by L.C.C. and re-opened 1946); *Hungerford Bridge* (for pedestrians only); *Westminster Bridge* (built in 1750 and then presenting a view that inspired Wordsworth's sonnet; re-built and re-opened in 1862: width, 84 ft.) with Thornycroft's *Boadicea* at the north-eastern end; this bridge leads from Westminster Abbey and the Houses of Parliament to the County Hall (*q.v.*) and St. Thomas's Hospital; *Lambeth Bridge* (rebuilt by L.C.C. and opened in 1932) leading from Lambeth Palace to Millbank; *Vauxhall Bridge* (rebuilt in 1906) leading to Kennington Oval; *Chelsea Bridge*, leading from Chelsea Hospital to Battersea Park (reconstructed and widened 1937); and *Albert Bridge* (1873); *Battersea Bridge* (opened in 1890); *Wandsworth Bridge* (opened in 1873); *Putney Bridge* (opened in 1886 and widened in 1933) where the Oxford and Cambridge Boat Race is started for Mortlake; *Hammersmith Bridge* (rebuilt 1887); *Barnes Bridge* (for pedestrians only, 1933); *Chiswick Bridge* (opened in 1933); *King*

Edward VII. Bridge, Kew (rebuilt in 1902), leading to the Royal Botanic Gardens, Kew; *Twickenham Lock Bridge*; *Twickenham Bridge* (opened in 1933); *Richmond Bridge* (opened in 1777); *Kingston Bridge* and *Hampton Court Bridge* (rebuilt, 1933).

BUCKINGHAM PALACE, St. James's Park, S.W.1. (Not open to the public.)—Was purchased by King George III. in 1762 from the heir of the Duke of Buckingham, and was altered by Nash for King George IV. The London home of the Sovereign since Queen Victoria's accession in 1837. Re-fronted in stone (part of the Queen Victoria Memorial) by Sir Aston Webb in 1913.

The Royal Mews is open to visitors on Wednesday afternoons. Applications for tickets should be addressed in writing to the Superintendent. The following charges, the proceeds of which are devoted to charities, are payable on admission: *Adults, 2s.; Children under 16, 6d.; Children in arms, free.*

CANADA HOUSE, Trafalgar Square, S.W.1.—A conspicuous building on the Western side of the Square, in which are the Offices of the High Commissioner of the Dominion and Officials dealing with Trade, Emigration, etc. Designed by Sir Robert Smirke in 1820, it was renovated and embellished when vacated by the Union Club. Certain interior features of the original building are preserved, and the spacious, richly furnished room now occupied by the High Commissioner is much admired. Surrounded by Offices of Canadian Banks, Steamship, Railway and other Dominion Companies, the Canadian Building is one of London's landmarks. It was opened by H.M. King George V. in June, 1925.

CANONBURY TOWER, Canonbury, N.1.—Till recently a club for boys and girls from the vicinity (in the remains of the 16th-century house of the Priors of St. Bartholomew), but at the moment partly in use as headquarters of a theatre company. Contains the "Spencer" and "Compton" oak-panelled rooms. Other relics of Canonbury House can be seen nearby.

CARLYLE'S HOUSE, 24 Cheyne Row, Chelsea, S.W.3. The home of Thomas Carlyle for 47 years until his death in 1881, and containing much of his furniture, etc. Now the property of the National Trust. Open on weekdays from 10 a.m. to 6 p.m., or dusk, if earlier. Admission, 1s.; Children, 6d.

CATHOLIC CENTRAL LIBRARY, 33 Wilfred Street, S.W.1.—Founded as a private library in 1914 and administered as the Catholic Truth Society Library from 1922 until 1940, the stock being presented to the Catholic Central Library then set up. Stock of 20,000 volumes for lending and reference, on many aspects of religion (devotional, Church history, doctrine, etc.), sociology, fine arts, literature, history, travel, biography and fiction. Books are sent by post when required. Hours of opening: Mon., Tues., Sat., 10-6; Weds., Fri., 10-8. *Librarian*, Miss C. Nicholl.

CEMETERIES.—For *Bunhill Fields*, see p. 498. In *Kensal Green Cemetery*, North Kensington, W.10 (50 acres), are tombs of W. M. Thackeray, Anthony Trollope, Sydney Smith, Shirley Brooks, Wilkie Collins, Tom Hood, W. Mulready, George Cruikshank, John Leech, Leigh Hunt, Brunel ("Great Eastern"), Ross (Arctic), Charles Kemble and Charles Mathews (Actors). In *Higligate Cemetery, N.6.*, are the tombs of George Eliot, Herbert Spencer, Michael Faraday, and G. J. Holyoake. In

Abney Park Cemetery, Stoke Newington, N.16, are the tomb of General Booth, founder of the Salvation Army, and memorials to many Nonconformist Divines. In the *South Metropolitan Cemetery*, Norwood, S.E.27, are the tombs of C. H. Spurgeon, Lord Alverstone, Douglas Jerrold, John Belcher, R.A., Theodore Watts-Dunton, Dr. Moffat (Missionary), Sir H. Bessemer, Sir H. Maxim, Sir J. Barnby, Sir A. Manns, and J. Whitaker, F.S.A. (*Whitaker's Almanack*). In the churchyard of the former *Marylebone Chapel* are buried Allan Ramsay (poet), Hoyle (whist), Ferguson (astronomer), Charles Wesley (hymn writer) and his son Samuel Wesley (musician). The chapel itself was demolished in 1949. **CREMATORIA**.—*Ilford* (City of London); *Norwood*; *Hendon*; *Streatham Park*; *Finchley* (St. Marylebone) and *Golders Green* (12 acres), near Hampstead Heath, with "Garden of Rest" and memorials to famous men and women.

CENOTAPH, Whitehall, S.W.1. — (Literally "empty tomb"). Monument erected "To the Glorious Dead," as a memorial to all ranks of the Sea, Land and Air Forces who gave their lives in the service of the Empire during the First World War. Erected as a temporary memorial in 1919 and replaced by a permanent structure in 1920. Unveiled by King George V. on Armistice Day, 1920. An additional inscription was added after the 1939-45 War, to commemorate those who gave their lives in that conflict.

CHARTERHOUSE, Charterhouse Square, E.C.1 (Master, Rev. Canon J. McL. Campbell, M.C., D.D.; Registrar and Clerk to the Governors, N. Long-Brown, M.A., LL.B.), a Carthusian monastery until 1538, purchased from the Earl of Suffolk in 1611 by Thomas Sutton as a home for aged "Brothers" and a School (at Godalming since 1872). The buildings are partly 14th (but mainly 16th) century. They suffered much damage during the 1939-45 War but are now restored and can accommodate 40 "Brothers." Visitors must apply to the Master or the Registrar for permission to see the Hall, etc. Roger Williams, the founder and governor of Rhode Island, U.S.A., was on June 25, 1621, elected a scholar of Sutton's Hospital. Other famous Carthusians are John Wesley; the poets Crashaw and Lovelace; Addison and Steele; Sir William Blackstone and Thackeray, who described "Greyfriars School" (Charterhouse) in "The New-comers."

CHELSEA PHYSIC GARDEN, Royal Hospital Road, S.W.3. — A garden of general botanical research, established in latter part of 17th century by the Society of Apothecaries, occupies site presented in 1722 by Sir Hans Sloane. Transferred in 1899 to the Trustees of the London Parochial Charities. Tickets of admission for approved students obtainable from the Clerk to the Trustees, 3 Temple Gardens, E.C.4.

CHELSEA ROYAL HOSPITAL (founded by Charles II, in 1682, and built by Wren; opened in 1694), Royal Hospital Road, Chelsea, S.W.3. for old and disabled soldiers. Great Hall now used as Dining Hall for in-pensioners. Much damaged by bombs in the Second World War. The extensive grounds include the former Ranelagh Gardens. Open daily 10 to 12 and 2 to 4, and on Sunday afternoons. Governor, General Sir Cameron Nicholson, G.C.B., K.B.E., D.S.O., M.C., *Lieut.-Governor and Secretary*, Major-Gen. Sir Douglas Campbell, K.B.E., C.B., D.S.O., M.C.

COLLEGE OF ARMS OR HERALDS' COLLEGE, Queen Victoria Street, E.C.4. — The Royal Officers of Arms (Kings, Heralds and Pursuivants of Arms) were incorporated by Richard III., and granted Derby House on the site of the present College building by Queen Mary I. The building now in

use was built after the Fire of London. The Powers vested by the Crown in the Earl Marshal (The Duke of Norfolk) with regard to all State ceremonial, and the granting and use of Armorial Bearings, are exercised through this College. Enquiry may be made to the Officer on duty in the Public Office every day between 10 a.m. and 4 p.m. Saturdays, 10 to 1.

COUNTY HALL, Westminster Bridge, S.E.1. — The Headquarters of the London County Council (see pp. 641-4) built on the Pedlar's Acre, Lambeth, from the designs of Ralph Knott, with a river façade of 750 ft. Foundation stone laid by His late Majesty King George V., March 9, 1912, and the ceremonial opening of the first three sections of the building by His late Majesty, July 17, 1922. Cost about £4,000,000. In 1939 the two central sections of a new building were completed on a site to the east of the main building. The main building contains, in addition to office accommodation, the council chamber, a conference hall, committee and conference rooms; education library for teachers; county record office; and a members' library with maps, prints, drawings, books and manuscripts on London, which is open to the public for reference purposes. *Librarian*, Miss L. Darlington, M.A., F.L.A. The Council, when in session, meets in public in the council chamber fortnightly on Tuesday afternoons at 2.30 p.m. The times for public inspection of the building are, on Saturdays from 10.30 a.m. to 12 noon and from 1.30 p.m. to 3.30 p.m.; and on Easter Monday, Whit Monday and August Bank Holiday, from 10.30 a.m. to 12 noon and from 1.30 p.m. to 4.30 p.m. Admission free.

CUSTOM HOUSE, Lower Thames Street, E.C.3. — Built early in 19th century, with a wide quay on Thames. The *Long Room* is about 190 ft. long.

DICKENS HOUSE, 48 Doughty Street, W.C.1. — In this house Charles Dickens lived from 1837 to 1839, and here he completed *Pickwick Papers*. It is the headquarters of The Dickens Fellowship, and contains many relics of the novelist. It is open to the public daily, 10 to 2.30 and a to 5 (Sundays and Bank Holidays excepted); admission 1s.

DR. JOHNSON'S HOUSE, Gough Square, Fleet Street, E.C.4. — An imposing late 17th-century house, in the garret of which, with the aid of six amanuenses, Samuel Johnson compiled his Dictionary. Open daily (except Sundays and Bank Holidays) from 10.30 to 4.30 or 5 (according to season). Admission 1s.

ELY PLACE, Holborn Circus, E.C.1. — The site of the London house of former Bishops of Ely, Ely Place is a private street whose affairs are administered by Commissioners under a special Act of Parliament. The 14th-century chapel, now St. Etheldreda's (R.C.) Church, is open daily until dusk.

FULHAM PALACE, Bishop's Avenue, Fulham, S.W.6. — The courtyard is 15th century, remainder 18th century. Residence of the Bishop of London. Grounds of 37 acres, surrounded by ancient moat. Previous application to visit should be made to the Bishop's Secretary.

GEFFRYE MUSEUM, Kingsland Road, E.2. — Open on Tuesdays to Saturdays 10 to 5, Sundays 2 to 5. Closed on Christmas Day and on Mondays except Bank Holidays. Admission free.

The Museum is housed in a building erected originally as almshouses in 1715. It was eventually purchased by the London County Council and opened as a museum in 1914. The exhibits are shown in a series of period rooms dating from 1600 to the present day, each containing furniture and domestic equipment of a middle-class English home. Photographic enlargements illustrate the costume of each period. Architectural features,

mainly 18th century, an 18th century wood-worker's shop, a downhearth kitchen and a gallery of tools are also shown. Temporary exhibitions and periodic series of evening lectures and recitals are held in the Lecture Hall. There is a reference library of books on furniture, social history and art. Special arrangements for children visiting the Museum in school parties and in their leisure time. *Curator*, Mrs. M. Harrison.

GEORGE INN, Southwark.—Near London Bridge Station. Given to National Trust in 1937. Last galleried inn in London, built in 1677. Open during licensed hours.

GUILDHALL, King Street, City, E.C.2 (dating from early 15th century).—Burnt out by incendiary bombs, 1940. The main hall has been restored. The Library, Museum and Art Gallery adjoining mainly escaped damage, and are in part open to the public. Admission free. The Library (with Commercial Reference Room adjoining) contains Plan of London, 1570; Deed of Sale with Shakespeare's signature; first, second and fourth folios of Shakespeare's plays, etc. Open free on week-days, 9.30 a.m. to 5 p.m. and Sundays (May-Sept.), 2 p.m. to 5 p.m. *Keeper of the Guildhall*, F. R. Tomkins.

HONOURABLE ARTILLERY COMPANY'S HEAD-QUARTERS, City Road, E.C.1.—The H.A.C. (*Sec.*, Brig. E. Foster Hall, M.C.) received its charter of incorporation from Henry VIII. in 1537, and has occupied its present ground since 1642. The Armoury House dates from 1735. Four of its members who emigrated in the 17th century, founded in 1638 the Ancient and Honorable Artillery Company of Massachusetts. The H.A.C. is the senior regiment of the Territorial Army.

HORNIMAN MUSEUM AND LIBRARY, London Road, Forest Hill, S.E.23. Open daily except Tuesdays and Christmas Day, 10.30 to 6, Sundays 2 to 6. Admission free. The Museum was presented in 1901 to the London County Council by the founder, Mr. F. J. Horniman, M.P. The Museum has two main departments, one devoted to ethnology and the other to zoology. In the former department the very large collections include exhibits illustrating man's progress in the arts and crafts from primitive times and an outstanding collection of musical instruments. The Zoological department includes an aquarium. The reference library contains twenty thousand volumes dealing with the subjects represented in the Museum. *Curator*, O. W. Samson.

HORSE GUARDS, Whitehall, S.W.1.—Archway and offices built about 1753. The mounting of the guard (Life Guards, or Royal Horse Guards) at 11 a.m. (10 a.m. on Sundays) and the dismounting at 4 p.m. are picturesque ceremonies. Only those on the Lord Chamberlain's list may drive through the gates and archway into *Horse Guards' Parade* (230,000 sq. ft.), where the Colour is "trooped" on the Queen's Official Birthday. (Trafalgar Square is 168,850 sq. ft.; Parliament Square, 136,900 sq. ft.; Leicester Square, 100,000 sq. ft.).

HOUSES OF PARLIAMENT, Westminster, S.W.1.—The Palace of Westminster was re-built in 1840-68 from the designs of Sir Charles Barry and Augustus Welby Pugin, at a cost of over £2,000,000.—Open to visitors on Saturdays, and on Easter and Whit Mondays and Tuesdays and August Bank Holiday if neither House be sitting. Admission at the Norman Porch, House of Lords, on the above-mentioned days, from 10 a.m. to 3.30 p.m. Admission to the Stranger's Gallery of the House of Commons, during session, by member's order, or order obtained on personal

application at the Admission Order Office in St. Stephen's Hall. The present House of Commons was used for the first time on October 26, 1950, the original Chamber having been destroyed by bombs in 1941. The Victoria Tower (House of Lords) is about 330 ft. high, and when Parliament is sitting the Union Jack flies by day from its flagstaff. The Clock Tower of the House of Commons is about 320 ft. high and contains "Big Ben", the Hour Bell, named after Sir Benjamin Hall, First Commissioner of Works when the original bell was cast in 1856. This bell which weighed 16 tons 11 cwt., was found cracked in 1857. The present bell (13½ tons) is a recasting of the original and was first brought into use in July, 1859. A light is displayed from this tower at night when Parliament is sitting.

INNS OF COURT.—The *Inner and Middle Temple*, S. of Fleet Street, E.C.4, and N. of Victoria Embankment, to which the gardens extend, have occupied (since early 14th century) the site of the buildings of the Order of Knights Templars. *Inner Temple Hall* is open to the public on Monday-Friday, 10-11.30 a.m. and 2.30-4 p.m., except during Vacations. *Temple Church*, restored in 1958 after severe damage by bombing, is open on week-days 10-5 p.m. and the public are admitted to Sunday services (see p. 498). *Middle Temple Hall* (Sixteenth Century) is open to the public, Monday-Friday, 10-12 and 3-5 p.m.; Saturday, 10-4.30. Closed 1-2 p.m. and Sundays. In *Middle Temple Gardens* Shakespeare (Henry VI., Part I.) places the incident which led to the "Wars of the Roses" (1455-85). *Lincoln's Inn*, from Chancery Lane to Lincoln's Inn Fields, W.C.2, occupies the site of the palace of a former Bishop of Chichester and of a Black Friars monastery. It was founded early in the 14th century. The new Hall is modern, the Library is 15th century, and the old Hall early 16th century, the Chapel (Inigo Jones) early 17th century. *Lincoln's Inn Fields* (7 acres); the Square contains many fine old houses with handsome interiors. *Gray's Inn*, Gray's Inn Road, W.C.1, was founded in the late 14th century. The squares and roadways are open to the public during the day and the gardens from 12-2 p.m. (August and Sept., 9 a.m.-7 p.m.). The 16th-century Hall, where the "Comedy of Errors" was performed in 1594, was reduced to a shell by bombs. The Gardens were laid out (according to tradition) by Lord Chancellor Bacon (died 1626). No other "Inns" are active, but what remains of *Staple Inn* is worth visiting as a relic of Elizabethan London; though heavy damage was done by a flying-bomb, it retains a picturesque gabled front on Holborn (opposite Gray's Inn Road). *Clement's Inn* (near St. Clement Dane's Church), *Clifford's Inn*, Fleet Street, and *Thavies Inn*, Holborn Circus, are all rebuilt. *Serjeants' Inn*, Fleet Street (damaged by bombing), and another (now demolished) of the same name in Chancery Lane, were composed of Serjeants-at-Law, the last of whom died in 1922.

JEWISH MUSEUM, Woburn House, Upper Woburn Place, W.C.1.—Opened in 1932, the Museum contains a comprehensive collection of Jewish antiquities, liturgical paraphernalia and "Anglo-Judaica." Open free (Mon.-Thurs.), 2.30-5; (Fri. and Sun.), 10 a.m.-1 p.m. Closed on Saturdays and Jewish Holydays.

KEATS HOUSE AND MUSEUM, Keats Grove, Hampstead, N.W.3.—In one of two houses here, now made into one, John Keats lived at various times between 1818 and 1820. The house and the museum are open free, weekdays, 10 a.m. to 6 p.m. The special student's library in the adjoining building is open free on weekdays, 9 a.m. to 7 p.m. (Monday and Thursday to 8 p.m.)

KENSINGTON PALACE, W.8.—Enlarged by Christopher Wren for King William III. (1691), and continued as a royal residence until 1760. The birthplace of Queen Victoria in 1819. State apartments, re-opened to the public in 1956 under administrative control of the London Museum, contain pictures from the royal collections, royal costumes and furniture formerly belonging to Queen Mary. *Kensington Gardens* (q.v.) adjoin.

LAMBETH PALACE, S.E.1.—The official residence of the Archbishop of Canterbury, on south bank of Thames; the oldest part is 13th century, the house itself is early 19th century. For leave to visit the historical portions, applications should be made by letter to the Archbishop's Secretary.

LIVERY COMPANIES' HALLS.—The Principal Companies (see pp. 638-40) have magnificent halls, but admission to view them has generally to be arranged beforehand. Among the finest or more interesting may be mentioned the following: Goldsmiths' Hall, Foster Lane. The present hall was completed in 1835, and contains some magnificent rooms. Exhibitions of plate have been shown here periodically in recent years. Fishmongers' Hall, London Bridge (built 1831-3), now admirably restored after severe bomb damage, also contains fine rooms. Apothecaries' Hall, Water Lane, was rebuilt in 1670, after the Great Fire, and has library, hall and kitchen which are good examples of this period, together with a pleasant courtyard. Vintners' Hall, Upper Thames Street, was also rebuilt after the Great Fire, and its hall has very fine late 17th century panelling. The Watermen and Lightermen's Company is not, strictly speaking, a Livery Company, but its hall, in St. Mary at Hill, is a good example of a smaller 18th century building, with pilastered façade. It was completed in 1780. Stationers' Hall, in Stationers' Hall Court, behind Ludgate Hill, another post-Fire Hall, standing in its own court, has a particularly finely carved screen. Barbers' Hall, Monkwell Street, with a Hall attributed to Inigo Jones, was completely destroyed by bombing, but is to be rebuilt. The new hall is to be built some 30 ft. from the old site to enable one of the bastions and part of the wall of the Roman fort to remain exposed to view. Mercers' Hall, Cheapside, built to replace the hall destroyed by bombing, was opened in 1958.

LLOYD'S, Lime Street, E.C.3.—Housed in the Royal Exchange for 150 years and in Leadenhall Street from 1928-1957. The present building was opened by H.M. Queen Elizabeth the Queen Mother on Nov. 14, 1957. The underwriting space has an area of 44,250 sq. ft.

LORD'S CRICKET GROUND, St. John's Wood Road, N.W.8.—The headquarters (since 1814) of the Marylebone Cricket Club, the premier cricket club in England and the governing body of cricket, the scene of some of the principal matches of the season and Middlesex County headquarters. Tennis court running behind members' pavilion.

MANSON HOUSE, City, E.C.4.—(Reconstructed 1930-31.) The official residence of the Lord Mayor; the Egyptian Hall and Ballroom are the chief attractions. Admission by order from the Lord Mayor's Secretary.

MARKETS.—The London markets (administered by the Corporation of the City of London) provide foodstuffs for 8,500,000 to 9,000,000 people. The dead meat market at Smithfield is the largest in the world, the supplies marketed amounting to nearly 500,000 tons annually. *Central Meat, Fish, Fruit, Vegetable, and Poultry Markets*, Smithfield (the Poultry Market was gutted by fire in January, 1958); *Leadenhall Market* (Meat and Poultry); *Billingsgate* (Fish), Thames Street; *Spitalfields, E.1* (Vegetables, Fruit, etc.), enlarged 1928, and opened by the late

Queen Mary; *London Fruit Exchange*, Brushfield Street (built by Corporation of London 1928-29) faces Spitalfields Market. Other markets are—*Covent Garden, W.C.2* (established under a charter of Charles I. in 1662) and *Borough Market, S.E.1*, for vegetables, fruit, flowers, etc.

MARLBOROUGH HOUSE, Pall Mall, S.W.1.—The London home of Queen Mary until her death in 1953. (Not open to the public.)—Built by Wren for the great Duke of Marlborough about 1710, and purchased by the Crown in 1817. Prince Leopold lived there until 1831, and Queen Adelaide from 1837 until her death in 1849. In 1863 it became the London house of the Prince of Wales. The Queen's Chapel, Marlborough Gate, begun in 1623 from the designs of Inigo Jones for the Infanta Maria of Spain, and completed for Queen Henrietta Maria, is open to the public for services during part of the year. In 1959 Marlborough House was given by the Queen as a Commonwealth centre and a meeting place for Commonwealth Premiers.

LONDON MONUMENT, (commonly called "The Monument"), Monument Street, E.C.3.—Built from designs of Wren, 1671-77, to commemorate the Great Fire of London, which broke out in Pudding Lane, Sept. 2, 1666. The fluted Doric column is 120 ft. high (the moulded cylinder above the balcony supporting a flaming vase of gilt bronze is 42 ft. in addition), and is based on a square plinth 40 ft. high, with fine carvings on W. face (making a total height of 202 ft.). Splendid views of London from gallery at top of column (321 steps) Admission 6d., Monday to Saturday, 9 a.m. to 6 p.m. (Oct.—March to 4 p.m.). Sundays—May to Sept., 2-6 p.m. Parties of 20 or more school children in charge of an adult 3d. each.

PERCIVAL DAVID FOUNDATION OF CHINESE ART, 53 Gordon Square, W.C.1.—Set up in 1950 to promote the study and teaching of the art and culture of China and its surrounding regions, and provide all necessary material to that end. The Foundation contains the collection of Chinese ceramics formed by Sir Percival David and his important library of books on Chinese art. To these was added a gift from the Hon. Mount Stuart Elphinstone of part of his collection of Chinese monochrome porcelains. The galleries were opened to the public in 1952. The Foundation is administered on behalf of the University of London by the School of Oriental and African Studies. *Hours of opening:* Galleries, Mon. 2 to 5 p.m.; Tues. to Fri. 10.30 a.m. to 5 p.m.; Sat. 10.30 a.m. to 1 p.m.; Library, Mon. 2.30 to 4.30 p.m.; Tues. to Fri. 10.30 a.m. to 12.30 p.m.; 1.30 to 4.30 p.m.; Sat. 10.30 a.m. to 12.30 p.m. *Secretary-Librarian,* Miss B. W. D. Martin.

PORT OF LONDON.—The Port of London comprises the tidal portion of the River Thames from Teddington to the sea, a distance of 69 miles and five dock systems covering an area of 4,140 acres, of which 673 acres are water. The governing body is the Port of London Authority, whose Head Offices in Trinity Square, E.C.3, were designed by Sir Edwin Cooper. Particulars of the docks are as follows:—*London & St. Katharine Docks, E.1.*—Area 125½ acres including 45 acres water. Chief commodities handled are Wool, Ivory, Spices, Shells, Tea, Rubber, Wine, Marble, Canned Goods, Hides, Perfumes, etc., and general cargo from Continental and coastwise ports. *Surrey Commercial Docks, S.E.16.*—Area 381 acres, including 134 acres water. The chief centre of the London and Provincial Soft-wood Trade. Also handles Hardwood, Grain, Canadian Dairy Produce, etc. *West India & Millwall Docks, E.14.*—Area 466 acres including 133½ acres water. Principal commodities handled are Rum, Sugar, Grain, Hardwood, Fruit, Plywood and Wood pulp. In Millwall Dock a special feature is the Granary. *East India Dock, E.14.*—Area 49 acres including 23 acres water. *Royal Victoria & Albert & King George V. Docks, E.16.*—Area 1,102½ acres including 235 acres water—have special facilities for handling Frozen and Chilled Meat, Grain, Tobacco and Bananas. Large quantities of Wool, Fruit, Dairy Produce and general cargo are also dealt with. The *King George V. Dock*, opened in 1921, provides accommodation for vessels up to 30,000 tons. *Tilbury Docks, Essex.*—Area 725 acres, including 104 acres water. These docks are 26 miles below London Bridge and are used principally by vessels plying on the Australian, Indian and other Eastern routes. The Cargo Jetty in the River at Tilbury is available for vessels to discharge or load part cargoes. Tilbury Passenger Landing Stage provides accommodation for liners at all states of the tide and adjoins Tilbury Riverside Station, giving direct rail connection with London, the Midlands and the North.

PRINCE HENRY'S ROOM, 17 Fleet Street, E.C.4.—Early 17th century timber-framed house containing fine room on first floor with panelling and modelled

plaster ceiling. Open Mon. to Fri. 1.45 p.m. to 5 p.m.; Sat. to 4.30 p.m. Closed Christmas Day and Good Friday. Available for evening lettings to societies, etc. on application to the Architect, County Hall, S.E.1.

ROMAN LONDON.—Though visible remains are very few, almost every excavation for the foundations of new buildings in the City reveals Roman remains. Sections of the City wall, often however merely a mediæval re-build on the Roman foundations, are the most striking remains still to be seen. Fragments may be seen near the White Tower in the Tower of London, Trinity Square, No. 1 Crutched Friars, All Hallows, London Wall—its semi-circular vestry being built on the remains of a round bastion—St. Alphage, London Wall, recently restored by the Corporation of London and showing a striking succession of building and repairs from Roman till later mediæval times, St. Giles, Cripplegate and, by permission only, the great bastion beneath the pavement of the yard of the G.P.O. in Giltspur Street. Recent excavations in the Cripplegate area have revealed that a fort was built in this area and later incorporated in the town wall in this north-west corner of the City. Evidence from these excavations proves that the fort was not built until about 100–120 A.D., and the date of the town wall must therefore be considerably later. Remains of a bath building are preserved beneath the Coal Exchange in Lower Thames Street and other foundations may be seen in the Crypt of All Hallows Barking by the Tower. The governmental headquarters of the town was a great basilica, more than 400 ft. long from east to west, the massive walls of which have been encountered, extending from Leadenhall Market across Gracechurch Street as far as St. Michael's, Cornhill. Excavations during the past few years have shown that buildings over the river front were erected on huge oaken piles and a framework of timber for a considerable distance both east and west of the present London Bridge. The "Roman Bath," in Strand Lane, which is not now held by most authorities to be of Roman origin, is maintained by the L.C.C. on behalf of the National Trust, and is open to the public on weekdays from 10 a.m. to 12.30 p.m. (*Admission, 1s.*). Excavations since 1948 on a bombed site in Walbrook, on the banks of the old Wall Brook, have produced many interesting discoveries, including a Temple of Mithras, from which the splendid marble statues have been placed in Guildhall Museum, now in the Royal Exchange, where many other relics from the Roman City may be seen.

ROYAL EXCHANGE, E.C.3 (founded by Sir Thomas Gresham, 1566, opened as "The Bourse" and proclaimed "The Royal Exchange" by Queen Elizabeth I., 1571, rebuilt 1667–69 and 1842–44).—Open to the public, free. Statues of Queen Elizabeth I., Charles II., Queen Victoria, Sir Thomas Gresham, and others; mural paintings in the ambulatory by Leighton, Abbey, Brangwyn, Wyllie, and others. Part of the Guildhall Museum is now housed in the building. The carillon of the Royal Exchange (reinstated 1950) plays English, Scottish, Irish, Welsh, Canadian and Australian melodies at 9 a.m., 12 noon and 3 and 6 p.m. With the exception of the courtyard ambulatory and the shops the whole of the building is now occupied by the Royal Exchange Assurance (which has had its head office there since 1720) and is administered by the Gresham Committee (*Clerk, Mercers' Hall, Ironmonger Lane, E.C.2.*).

ROYAL GEOGRAPHICAL SOCIETY, Kensington Gore, S.W.7.—Map Room open to public, free.

ROYAL MINT, Tower Hill, E.C.3 (building erected 1811), where coins for the United Kingdom and abroad are struck. Admission by order only, application for which should be made to the Deputy Master of the Mint, about 6 weeks in advance of intended visit. Hours of admission, 9.30 a.m. to 3 p.m., Mon. to Fri., except Bank Holidays, etc., when the Mint is closed.

ROYAL UNITED SERVICE MUSEUM, WHITEHALL, S.W.1.—Open on weekdays, 10 to 5. Admission: adults: 2s., children 1s. Special arrangements for school parties. Services in uniform free. This private Museum is housed in the Banqueting House of Old Whitehall Palace, which was designed by Inigo Jones and completed in 1622. The ceiling consists of magnificent and massive paintings by Rubens. From this building King Charles I. walked to the scaffold erected near the present entrance. The exhibits are some of the greatest treasures of the Navy, Army and Air Force, and include models of Trafalgar and Waterloo, dioramas of other famous events from the landing of Julius Caesar to the invasion of Normandy, models of ships and aircraft, and many personal relics of national heroes. Other exhibits are uniforms, medals, swords, small arms, model guns and tanks. Curator, Lieut.-Col. P. S. M. Wilkinson.

ST. JAMES'S PALACE, in Pall Mall, S.W.1.—(Not open to the public.) Built by Henry VIII.; the Gatehouse and Presence Chamber remain, and part of the Chapel Royal, which in 1955 was reopened to the public for services during part of the year. A royal residence from 1697 to 1837. Representatives of Foreign Powers are still accredited "to the Court of St. James's" and (by the permission of the Crown) the Conference of the Allies (1921) and later conferences have been held here.

ST. JOHN'S GATE, Clerkenwell, E.C.1.—Now the Chancery of the Order of St. John of Jerusalem, and formerly the gate of the Priory of that Order, of which the gate house (early 16th century) and crypt of Church (12th century) alone survive. The gatehouse may be inspected on application to the Secretary at the Chancery.

SIR JOHN SOANE'S MUSEUM, 13 Lincoln's Inn Fields, W.C.2. The house and galleries, built 1812-24, are the work of the founder, Sir John Soane (1753-1837) and contain his collections, arranged as he left them, in pursuance of an Act procured by him in 1833. Exhibits include the Sarcophagus of Seti I. (1370 B.C.), classical vases and marbles, Hogarth's *Rake's Progress* and Election series, paintings by Canaletto, Reynolds, Turner, Lawrence, etc., and sculpture by Chantrey, Flaxman, etc. Soane's library of 8,000 vols. and a collection of 30,000 architectural drawings are available for study. Open Tues.-Sat. inclusive, 10 a.m. to 5 p.m. Closed Bank Holidays and throughout August. Curator: Sir John Summerston, C.B.E., F.B.A. Inspector: Miss D. Stroud, F.S.A.

SOMERSET HOUSE, Strand, W.C.2, and Victoria Embankment, W.C.2.—The beautiful river façade (600 ft. long) was built at the close of the 18th century from the designs of Sir W. Chambers; the remainder of the building is early 19th century. Somerset House was the property of Lord Protector Somerset, at whose attainder in 1552 the palace passed to the Crown, and it was a royal residence until about the close of the 17th century. The building is now occupied by the Board of Inland Revenue and by the Principal Probate Registry and the office of the Registrar-General of Births, Marriages and Deaths. In the Probate Registry (Central Hall) are the wills of (*inter alios*) Shakespeare, Milton, Newton, Van Dyck, Pitt, Dr. Johnson, Nelson, Wellington and Burke.

STOCK EXCHANGE, E.C.2.—The foundation stone of the present building was laid in 1801, but the building was almost entirely reconstructed in 1854 from the designs of Thomas Allason. The most notable alteration since that date occurred in 1885 when an east wing was added: this is surmounted by a dome, the apex of which is more than 100 feet above the floor. The area of the floor is about 25,000 square feet. The Stock Exchange provides a market for the purchase and sale of about 10,000 securities quoted in the Stock Exchange Daily Official List and valued at over £39,000,000,000 and also securities listed on other Exchanges. At present the members of the Stock Exchange, who consist of brokers (agents for clients) and jobbers (dealers in specific securities) number about 3,470. Visitors' Gallery (entrance, 8 Throgmorton Street) open between 10.30 a.m. and 3 p.m. from Monday to Friday. Admission free and without ticket. Film show.

THAMES EMBANKMENTS.—The Victoria Embankment, on the N. side (from Westminster to Blackfriars), was constructed by Sir J. W. Bazalgette for the Metropolitan Board of Works, 1864-70 (the seats, of which the supports of some are a kneeling camel, laden with spicery, and of others a winged sphinx, were presented by the Grocers' Company, and by Rt. Hon. W. H. Smith, M.P., in 1874); the Albert Embankment on the S. side (from Westminster Bridge to Vauxhall), 1866-69; the Chelsea Embankment, 1871-74. The total cost exceeded £2,000,000. Sir J. W. Bazalgette (1819-91) also inaugurated the London main drainage system, 1858-65. A medalion has been placed on a pier of the Victoria Embankment to commemorate the engineer of the Thames waterside improvements ("Flumini vincula posuit"). The County Hall of the L.C.C. includes an embankment on the Surrey side.

THAMES TUNNELS.—The *Rotherhithe Tunnel* (foot passengers and vehicles), constructed by the L.C.C. and opened in 1908, connects Commercial Road East, with Lower Road, Rotherhithe; the total length is 1 mile 332 yards, of which 474 yards are under the river. The cost of the tunnel and its approaches was £1,506,914. The *Blackwall Tunnel* (foot passengers and vehicles), constructed by the L.C.C. and opened in 1897, connects East India Dock Road, Poplar, with Blackwall Lane, East Greenwich. The total length of the tunnel is 1 mile 279 yards, of which 377 yards are under the river. The cost of the tunnel with its approaches was about £1,323,663. The *Greenwich Tunnel* (foot passengers only), constructed by the L.C.C. and opened in 1902, connects the Isle of Dogs, Poplar, with Greenwich. The length of the subway is 406 yards, and the cost was about £180,000. The *Woolwich Tunnel* (foot passengers only), constructed by the L.C.C. and opened in 1912, connects North and South Woolwich below the passenger and vehicular ferry from North Woolwich Station, E.16, to High Street, Woolwich, S.E.18. The length of the subway is 552 yards, and its cost was about £86,000. The *Thames Tunnel* (1,300 feet) was opened in 1843 to connect Wapping (N.) with Rotherhithe (S.). In 1866 it was closed to the public, and purchased by the East London Railway Company. The *Tower Subway* for foot passengers was opened in 1870, and has long been closed.

TOWER HILL, E.C.1 and E.C.3, was formerly the place of execution for condemned prisoners from the Tower, the site of the scaffold being marked in the gardens of Trinity Square. A movement, sponsored by the Council for Tower Hill Improvement, aims at creating more open space around the Tower by the demolition of encroaching buildings

and by opening Trinity Square Gardens to the public, thus restoring to Tower Hill its ancient title to be the City's pleasure, or "Board-room."

TOWER OF LONDON, E.C.3.—Admission to a general view of the Tower, the White Tower (Armouries), the Beauchamp and Bloody Towers and the Chapels Royal—*rs.* Saturdays, admission free; to Jewel House—*rs.* Half-price for children. The Tower of London is closed on Sundays during the Winter period and on the mornings of the Summer time period, Good Friday and Christmas Day. On Sundays throughout the year the public is admitted to Holy Communion, 8.15 a.m. and Morning Service, 11.15 a.m. Open on weekdays, May 1 to Sept. 30, 10 a.m. to 5.30 p.m.; Oct. 1 to mid-March, 10 a.m. to 4 p.m.; mid-March to April 30, 10 a.m. to 4.30 p.m.; Sundays, first Sunday in May to last in Sept., 2 to 5 p.m. **CONSTABLE, Field-Marshal The Lord Wilson, G.C.B., G.B.E., D.S.O., LIEUTENANT, Lieut.-General Sir Euan Miller, G.C.B., K.B.E., D.S.O., M.C.; MAJOR AND RESIDENT GOVERNOR, Brigadier L. F. E. Wieler, C.B., C.R.E.; KEEPER OF THE JEWEL HOUSE, Maj.-General H. D. W. Sitwell, C.B., M.C.; MASTER OF THE ARMOURIES, Sir James Mann, F.S.A.**

The White Tower is the oldest and central building in Her Majesty's Royal Palace and Fortress of the Tower of London. It was built at the order of William I. and constructed by Gundulph, Bishop of Rochester, in the years 1078-98. The inner Wall, with thirteen towers, was constructed by Henry III. in the 12th century. The Moat was extended and completed by Richard I. and the Wharf first mentioned in 1228. The Outer Wall was completed in the reign of Edward I. and now incorporates 6 towers and 2 bastions. The last Monarch to reside in the Tower of London was James I. The Crown Jewels came to the Tower in the reign of Henry III. All coinage used in Great Britain was minted in the Outer Ward of the Tower of London until 1810 when the Royal Mint was formed. The Tower of London has had a military garrison since 1078.

WELLINGTON MUSEUM, Apsley House, Hyde Park Corner, W.1.—Admission on weekdays and Bank Holidays, 10 to 6; Sundays, 2.30 to 6. Closed Good Friday and Christmas Day. Adults *rs.*, Children, *6d.* Apsley House was designed by Robert Adam for Lord Bathurst and built 1771-8. It was bought in 1817 by the Duke of Wellington, who in 1828-29 employed Benjamin Wyatt to enlarge it, face it with Bath stone and add the Corinthian portico. The Museum contains many fine paintings, services of porcelain and silver plate and personal relics formerly belonging to the 1st Duke of Wellington (1769-1852) and was given to the Nation by the present Duke. It was first opened to the public in 1952, under the administration of the Victoria and Albert Museum.

WESTMINSTER HALL, S.W.1 (built by William Rufus, A.D. 1087-1100 and altered by Richard II, 1377-99), adjacent to and incorporated in the Houses of Parliament.—Westminster Hall is part of the old Palace of Westminster and survived the fire, which destroyed most of the remainder of the Palace (Oct. 16, 1834). The Hall is about 240 ft. long, 68 ft. wide, and 90 ft. high. The hammer beam roof of carved oak, dating from 1399, is one of the principal attractions. King Charles I. was tried in the Hall. Extensive repairs to the Hall have recently been carried out. Admission: During sessions—Mon. to Thurs., 10 a.m. until one hour before House of Commons meets. Sat., 10 a.m.-4 p.m. During Recess—Mon. to Sat., except Good Friday and Christmas Day, 10 a.m.-4 p.m.

Collar, The Watch House, Strand Lane, W.C.2.

ENVIRONS OF LONDON

BARNET AND HADLEY GREEN.—Scene of Battle, A.D. 1471. Hadley Woods.

BURNHAM BEECHES and FLEET WOOD, Bucks.—Magnificent wooded scenery (425 acres), purchased by the Corporation of London for the benefit of the public in 1879; Fleet Wood (65 acres) presented in 1921. During summer omnibus runs daily, Sundays included, from Slough Station (Western Region), passing within 250 yards of "Gray's Elegy" Church. See "Stoke Poges."

BUSHY PARK (1,100 acres).—Adjoining Hampton Court, contains many fine trees and avenue of horse-chestnuts enclosed in a fourfold avenue of limes, planted by King William III. "Chestnut Sunday" (when the trees are in full bloom with their "candles") is usually about 25th to 25th May.

CHEQUERS, a country residence for Prime Ministers, was presented to the Nation (with an endowment to maintain the estate, etc.) by Lord and Lady Lee of Fareham, as the official country residence for the Prime Minister of the day, and the gift was approved by Parliament in the *Chequers Estate Act*, 1917. In 1921 the Chequers Estate of 700 acres was added to the gift by Lord Lee. Chequers is a mansion in Tudor style in the

Chilterns, about 3 miles from Princes Risborough. Bucks, and contains a collection of Cromwellian portraits and relics.

CHILTERN HUNDREDS (Stoke, Burnham and Desborough, in Buckinghamshire).—No duly elected member of the Commons can resign his seat; he must apply for some office of profit under the Crown, and so vacate his seat under the Act of Settlement, 1707 (6 Anne, c. 7), and the usual practice is to apply for the Stewardship of the Chiltern Hundreds, or of the Manor of Poyning, or Northstead, or the Escheatorship of Munster, whereupon the seat is declared vacant (under the Place Act of 1742, which expressly permitted acceptance of such offices to serve as an excuse for resignation) and a new writ is issued by the Speaker.

DARWIN AND DOWN HOUSE, Downe, Farnborough, Kent.—Where Charles Darwin thought and worked for 40 years and died in 1882. Maintained by the Royal College of Surgeons. Open daily (except Fridays and Christmas Day) 11 to 5. Admission, 1s.; Children, 6d.

DULWICH, S.E.21 (5 miles from London), contains Dulwich College (founded by Edward Alleyn in 1619), the Horniman Museum and Dulwich Park (72 acres). The Dulwich Picture Gallery, built by Sir John Soane to house the collection bequeathed by the artist, Sir Francis Bourgeois, was damaged by enemy action in the Second World War. The pictures, however, were saved, and the gallery has been rebuilt with the aid of a grant from the Pilgrim Trust. It was reopened by Queen Elizabeth the Queen Mother on April 27, 1953. In Dulwich Village the rural characteristics of the pre-suburban period are preserved.

ELTHAM, Kent (10 miles from London by Southern Region). Remains of 13th-15th century Eltham Palace, the birthplace of John of Eltham (1326), son of Edward II. The hall, built by Edward IV., contains fine hammer-beam roof of chestnut. In the churchyard of St. John the Baptist is the tomb of Thomas Doggett, the comedian and founder of the Thames Watermen's championship (Doggett's Coat and Badge).

EPPING FOREST (6,000 acres, originally purchased by the Corporation of London for £250,000 and thrown open to the public in 1882; the present forest is 12 miles long by 1 to 2 miles wide, about one-tenth of its original area). **LOUGHTON**, BUCKHURST HILL, CHINGFORD, HIGH BEECH (London Transport and Eastern Region). Beautiful forest scenery.

ETON COLLEGE.—22 miles from London. The most famous of English schools, founded by Henry VI. in 1440, the scholars numbering 1,160 in July, 1952. Buildings date from 1442.

GREENWICH, S.E.10.—A south-eastern metropolitan borough with a frontage of 4½ miles on the Thames. Greenwich Hospital (since 1873, the Royal Naval College) was built by Charles II., from designs by Inigo Jones, and by Queen Anne and William III., from designs by Wren, on the site of an ancient royal palace, and of the more recent *Placentia*, an enlarged edition of the palace, constructed by Humphrey, Duke of Gloucester (1391-1447), son of Henry IV. Henry VIII., Queen Mary I. and Queen Elizabeth I were born in the Royal Palace (which reverted to the Crown in 1447) and King Edward VI. died there. In the principal quadrangle is a marble statue of George II., by Rysbrack. (For National Maritime Museum, see p. 420). Painted Hall and Chapel open daily except Thursdays from 2.30 p.m. to 5 p.m. in summer months. During winter months they are also closed

on Sundays. Visitors are also admitted to Morning Service in the Chapel at 11 a.m., summer and winter, except during College vacations. Greenwich Park (185 acres) was enclosed by Humphrey, Duke of Gloucester, and laid out by Charles II., from the designs of Le Nôtre. On a hill in Greenwich Park is the old Royal Observatory (founded 1675), which is now removed to Herstmonceux Castle, Sussex (see p. 413). Part of its buildings at Greenwich have been taken over by the Maritime Museum. The parish church of Greenwich (*St. Alfege*) was rebuilt by Hawksmoor (Wren's pupil) in 1718, and contains a pulpit and other carvings attributed to Grinling Gibbons. It was much damaged in the 1939-45 War. General Wolfe (Heights of Abraham) and Tallis ("the father of Church Music") are buried in the church. Henry VIII. was christened in the former church. The Ministerial *Whitebait Dinner*, at the "Ship" Hotel, was held in 1894. *Charlton House*: built in the early 17th century (1607-1612) for Adam Newton, tutor to Prince Henry, brother to Charles I. The house is largely in the Jacobean style of architecture. *Cutty Sark*, the last of the famous tea clippers, which has been preserved as a memorial to ships and men of a past era. The ship is fully restored and rigged, with a museum of sail on board. Open to visitors: weekdays, 11 to 6, Sundays 2.30 to 6.

HAM HOUSE, Richmond.—A notable example of 17th-century domestic architecture, long the home of the Tollemache family (Earls of Dysart). Now the property of the National Trust, which has let it on a long lease to the Ministry of Works. The contents, described as "probably the finest and most varied collection of Charles II.'s reign to survive," were purchased for the Victoria and Albert Museum which now administers the house. Opened to the public in May, 1950, Ham House may be seen on Tues.-Sun. inclusive and on Bank Holidays, 2-6 p.m. Closed Mon. (except Bank Holidays) Christmas Day and Good Friday. Admission, 1s.; Children, 6d.

HAMPTON COURT.—Sixteenth-century Palace built by Cardinal Wolsey, with additions by Sir Christopher Wren for William and Mary, 15 miles from London. Fine view of river. Beautiful gardens with maze and prolific grape vine (planted in 1769). Old Royal Apartments and collection of pictures. Tennis Court, built by King Henry VIII. in 1530. The Palace is closed on Christmas Day and Good Friday. The State Apartments and Great Hall are open (May-Sept.), weekdays, 9.30-6; Sundays, 11-6; (March, April and October), weekdays, 9.30-5; Sundays, 2-5; (Nov.-Feb.), weekdays, 9.30-4. Sundays, 2-4. Admission, 1s.; children half-price. Admission to the Tudor Kitchen, Wine Cellars and Great Hall cellars, 3d. (inclusive charge), no half-price. Orangery (Mantegna Pictures) open as State Apartments, 3d., no half-price. Tennis Court open daily from 2 p.m. till time of closing of State Apartments, April to Sept. Admission 3d. The Vine, admission 2d., and the Maze, admission 3d., are open daily from 10.30 a.m. until 30 mins. before dusk. Tickets obtainable at the King's Staircase. The Banqueting House is open daily (April-Sept.) from 2 p.m. to the time of closing of the State Apartments. Admission 1s., children half-price. Refreshments can be obtained in the Tilt Yard gardens during the summer season. *Bushy Park* adjoins the Lion Gates of Hampton Court Palace.

HARROW-ON-THE-HILL.—10 miles by Metropolitan and other railways. Large public school (about 550 scholars), founded by John Lyon in 1571. The "Fourth Form Room" dates from 1608.

HUGHENDEN MANOR, High Wycombe, Bucks.—The home of Disraeli from 1847 till his death and

contains much of his furniture, books, etc. Conveyed to the National Trust in 1947. Open daily including Sundays and Monday Bank Holidays (but not other Mondays and not the day after a Monday Bank Holiday), 2-6 or till dusk. Open also Saturdays and Sundays, 10-1. Closed all January. Admission (non-members), 2s.; children, 1s.; parties of 20 or more, 1s. 6d.

JORDANS AND CHALFONT ST. GILES, near Beaconsfield, Bucks, contain the *Old Quaker Meeting House* (1688) at Jordans, in the burial ground of which lies William Penn (Pennsylvania); a barn built out of the timbers of the *Mayflower* by the 17th-century owner of Jordans (Gardener). At Chalfont St. Giles is the cottage where Milton lived during the Great Plague (1665-1666).

KEW, Surrey, a parish contained since 1892 in the borough of Richmond, was a favourite home of the early Hanoverian monarchs. Kew House, the residence of Frederick, Prince of Wales, and later of his son, George III., was pulled down in 1803, but the earlier Dutch House, now known as Kew Palace, survives. It was built in 1631 and acquired by George III. as an annexe to Kew House in 1781. The famous Kew Gardens (see p. 651) were originally laid out as a private garden for Kew House for George III.'s mother in 1759 and were much enlarged in the nineteenth century, notably by the inclusion of the grounds of the former Richmond Lodge. Kew Green, between the Gardens and Kew Bridge, is very attractive and on the Green stands the parish church, built in 1714 and several times enlarged. Princess Mary of Cambridge and the Duke of Teck, the parents of the late Queen Mary, were married here in 1866 and the Church contains many reminders of Royal connections with Kew.

KINGSTON-UPON-THAMES, Surrey (about 12 miles from London), is the ancient place of coronation of the Kings of Saxon England. The Coronation Stone (hence the name "King's Stone") is preserved within railings adjoining the Guildhall.

OSTERLEY PARK, Isleworth.—House and park of 300 acres given to the National Trust by the Earl of Jersey in 1949. Part of the Elizabethan house, built in 1577 for Sir Thomas Gresham, remains, but it was largely remodelled by Robert Adam, and the staterooms are among the best examples of Adam decoration. Open daily, except Mondays, 2-6 p.m. Closed Monday (except Bank Holidays), Christmas Day and Good Friday. Admission 1s., children 6d.

RICHMOND, Surrey, contains the red brick gateway of *Richmond Palace* (Henry VII., 1485-1509) and buildings of the Jacobean, Queen Anne, and early Georgian periods, including *White Lodge* in Richmond Park, the former home of Queen Mary's mother (the Duke of Windsor was born there, June 23, 1894). The *Star and Garter* Home for Disabled Soldiers, Sailors, and Airmen (the Women's Memorial of the Great War) was opened by Queen Mary in 1924. *Richmond Park* (2,358 acres) contains herds of fallow and red deer. From the *Terrace Gardens*, Richmond Hill, can be obtained a wonderful view of the Valley of the Thames.

RUNNIMED.—A meadow of about 100 acres, on S. bank of Thames (part of the Crown Lands), between Windsor and Staines. From June 15-23, 1215, the hostile Barons encamped on this meadow during negotiations with King John, who rode over each day from Windsor. The 48 "Articles of the Barons" were accepted by the King on June 15, and were subsequently embodied in a charter, since known as *Magna Carta*, of which several copies were sealed on June 19. About half a mile N.E. of the meadow is *Magna Carta Island*

(claimed as the actual site of the sealing), presented to the National Trust in 1930 by Lady Fairhaven and her sons.

A memorial at *Cooper's Hill*, near Runnymede, to members of the Commonwealth air forces who lost their lives in the Second World War while serving from bases in the United Kingdom and north-western Europe and have no known grave, was unveiled by the Queen on October 17, 1953.

ST. ALBANS.—A city in Hertfordshire, on the river Ver, 22 miles N.W. of London. The abbey church, built partly of materials from the old Roman city of Verulamium by Paul of Caen, was consecrated in 1125. Parts still remain of the Norman structure. The city was the scene of the overthrow of Henry VI. in 1455, and of the Earl of Warwick in 1461. On a printing press set up in the abbey the first English translation of the Bible was printed. The site of the pre-Roman city of King Tasciovanus and the remains of the ancient City of Verulamium, with well preserved theatre and many other features, excavated in recent years. St. Michael's Church, with tomb of Sir Francis Bacon.

STOKE POGES (2 miles from Slough station, Western Region) contains the 14th-century Church with the Churchyard of Gray's "Elegy" and "Ode on a Distant Prospect of Eton College." The poet was buried in the church in 1771.

SYON HOUSE, Brentford.—The town seat of the Duke of Northumberland. The house is part of the buildings of the Nunnery of Syon, erected by permission of Henry VI. in 1431. At the Dissolution of the Nunnery the Estate reverted to the Crown. In 1578 it was granted to the 9th Earl of Northumberland and in 1632 the house was repaired under superintendence of Inigo Jones. In 1766 the interior was transformed by Robert Adam, who also built the entrance gateway. The lion on the river-front was brought here in 1874 on the demolition of Northumberland House in the Strand. Open (July-Sept.) Weekdays except Monday; (May, June and October) Weds.-Sat. only, 1 p.m. to 4.30 p.m. Admission 2s. 6d.; children, 1s.

WALTHAM ABBEY (or **WALTHAM HOLY CROSS**), 13 miles from London (Eastern Region).—The Abbey ruins, Harold's Bridge (11th century), the Nave of the former cruciform Abbey Church (the oldest Norman building in England (consecrated May 3, 1066) and the traditional burial place of King Harold II. (1066), and a Lady Chapel of Edward II., with crypt below. New evidence of the position and style of several buildings, which once stood on the site of the Augustinian monastery, were revealed by the prolonged drought in the summer of 1933. At Waltham Cross, 1 mile from the Abbey, is one of the crosses (partly restored) erected by Edward I. to mark a resting place of the corpse of Queen Eleanor on its way to Westminster Abbey. (Ten crosses were erected, but only those at Geddington, Northampton and Waltham remain; "Charing" Cross originally stood on the spot now occupied by the statue of Charles I. at Whitehall.)

WINDSOR CASTLE (begun by William the Conqueror, A.D. 1066-87).—22 miles from London, by Western and Southern Regions. The Castle Precincts are open daily, free of charge, from 10 a.m. to sunset. Official Guides are in attendance from 10 to 4, Oct. to March, and from 10 to 5, April to Sept. When the Court is not in residence, the State Apartments of Windsor Castle are open to the public, during Her Majesty's pleasure, on every weekday and on certain Sunday afternoons during the summer months. When the State Apartments

are open the charges for admission are for Adults, 1s. 6d., and for Children, 6d. By the Queen's command, the net proceeds go to charities. An authorized guide book can be obtained at the office, price 1s. 3d. The hours of admission to the State Apartments are from April 1 to May 31, and Oct. 1 to 31 between 11 and 4; June 1 to Sept. 30, 11 to 5; and from Nov. 1 to March 31, between 11 and 3 and on certain Sundays during the summer between 1.30 and 5. The *Queen's Doll's House* and the *Old Master Drawings* can be seen on the same days and hours as the State Apartments, admission 6d. each person to each. The *Albert Memorial Chapel* is open on the same days and at the same hours as the State Apartments (except between 1 and 2 p.m.) but not on Sundays; the *Round Tower or Keep*

is open from April 1 to Sept. 30 (except when the Royal Standard is flying), the same days and hours as the State Apartments. Admission free. By permission of the Dean and Chapter, *St. George's Chapel* may be viewed on Mon.-Thurs., between 11 a.m. and 3.45 p.m.; Fridays, 1 p.m. to 3.45 p.m.; Sundays, 2.30 to 4 p.m. Admission 2s. per person, except at service times. The Chapel is usually closed during January. The Daily Services in the Chapel are open to the public. The *Curfew Tower* may be seen under the guidance of the Keeper, to whom application must be made at the entrance (Admission 6d.). The *Royal Mausoleum*, Frogmore Gardens, Home Park, is open only on Free Monday, from 11 a.m. to 4 p.m. Admission free.

THE PRINCIPAL ENGLISH CITIES

BIRMINGHAM

BIRMINGHAM (Warwickshire) is the second City in Britain and the chief centre of the hardware trade. It is practically equidistant from the other important trade centres in the country, being 111 miles from London, 85 miles from Manchester and 91 miles from Bristol. The municipal area is 51,147 acres (about 80 square miles), with a population (1951 census) of 1,112,340; estimated, June, 1958, 1,095,000.

It is estimated that over 1,500 distinct trades are carried on in the city, the chief industries being the manufacture of buttons, bedsteads, plastic goods, chocolate, chemicals, cycles, electroplate, guns, machine tools, railway rolling-stock, glass, motor-cars and motor-cycles, motor tyres, nuts and bolts, pens and nibs, tubes, paint and enamels, tools, toys, electrical apparatus, wire, jewellery and brass working, etc.

Water is supplied by the City Corporation, which also owns the transport undertaking, markets and Municipal Bank. The first section of Birmingham's new Queen Elizabeth Hospital, erected at Edgbaston at a cost of approximately £1,000,000, is claimed to be the finest of its type in Europe. The city has started work on the construction of an inner ring road round the centre of the city, with many improvements in the shopping centre and a

redevelopment of industrial areas. The water supply from Mid-Wales has been further improved by the damming of the Claerwen at a cost of approximately £1,700,000.

The principal buildings are the Town Hall, built in 1832–1850; the Council House and Corporation Art Gallery and Museum (1878); Victoria Law Courts (1891); the University (1909); the Central Library; the 13th century Church of St. Martin (rebuilt 1873); the Cathedral (formerly St. Philip's Church); the Roman Catholic Cathedral of St. Chad (Pugin) and the Methodist Central Hall. Birmingham was incorporated as a borough in 1838, and was created a city in 1889; it is governed by a Lord Mayor and City Council of 38 Aldermen and 114 Councillors. The generally accepted derivation of "Birmingham" is the ham or dwelling-place of the *ing* or the family of *Beorma* presumed to have been a Saxon. Between the 11th and 16th centuries the de Berminghams were Lords of the Manor.

Lord Mayor and Principal City Officers.

The Lord Mayor (1959–60), J. H. Lewis, O.B.E.

Recorder, Reginald Charles Vaughan, O.B.E., M.C., Q.C. (1954).

Stipendiary Magistrate, John Frederic Milward (1951).

Town Clerk, J. F. Gregg (1949).

Clerk of the Peace, G. M. Butts.

LIVERPOOL

LIVERPOOL (Lancashire), on the right bank of the river Mersey, 3 miles from the Irish Sea and 194 miles N.W. of London, is one of the greatest trading centres of the world and the principal port in the United Kingdom for the Atlantic trade. The municipal area is 30,702 acres (which includes 2,883 acres in the bed of the river Mersey) (about 43 square miles, excluding the bed of the river), with a population at the census of 1951 of 789,532; estimated, June 1958, 762,400. Quays on both sides of the river are about 38 miles long, and the Gladstone Dock can accommodate the largest vessels afloat. The dock authority is the Mersey Docks and Harbour Board. A system of harbour supervision radar was inaugurated on July 31, 1948. The chief import is grain, those next in importance being sugar, fruit, oil, timber, cotton and provisions.

The Corporation owns large industrial estates at Speke, Kirkby and Aintree, on which many modern factories have been built. Speke and Aintree are now almost fully developed, and at Kirkby new land is constantly being leased, bringing many new industries into the area. In 1943 a lease for 99 years was taken of the Elizabethan mansion at *Speke Hall* at a nominal rent.

The principal buildings are the Cathedral, erected from the designs of Sir Giles Gilbert Scott and consecrated in 1924; when completed this will be the largest ecclesiastical building in England; St. George's Hall, erected 1838-1854, and regarded as one of the finest modern examples of classical architecture; the Town Hall, erected 1754 from the designs of Wood; the Walker Art Gallery; the University; the Royal Infirmary; the Municipal Offices; and the Philharmonic Hall. A Roman Catholic Cathedral is in course of erection at Brownlow Hill.

The *Mersey Tunnel* (Queensway) connecting Liverpool and Birkenhead is one of the most important engineering achievements of recent years; begun in 1925, it was opened to traffic on July 18, 1934, the total cost being estimated at £7,077,800. In 1958-59, 11,233,119 vehicles passed through it.

Liverpool was incorporated as a borough early in the 13th century and was created a city in 1880. The Corporation consists of a Lord Mayor and a City Council of 40 Aldermen and 120 Councillors. The name is believed to be derived from Norse words meaning the "Pool of the Slopes."

Principal City Officers.

The Lord Mayor (1959-60), H. N. Bewdley, C.B.E. Recorder, Neville Laski, Q.C. (1956).

Stipendiary Magistrate, Arthur McFarland (1947).

Presiding Judge, Court of Passage, G. Glynn Blackledge, M.C., Q.C. (1950).

Town Clerk, T. Alker, C.B.E. (1947).

MANCHESTER

MANCHESTER (Lancashire) (the *Mancunium* of the Romans, who occupied it in A.D. 78) is 189 miles N.W. of London. The municipal area is 27,255 acres (about 43 square miles), the population at the census of 1951 being 703,175; estimated, June, 1958, 696,700.

Manchester is a commercial rather than an industrial centre, the industries being largely in the neighbouring towns. Within 25 miles radius, lives a population of 4,500,000 engaged in engineer-

ing, chemical, clothing, food processing and textile industries and in providing the packing, transport, banking, insurance and other distributive facilities for those industries. The city is connected with the sea by the Manchester Ship Canal, opened in 1894, 35½ miles long, and accommodating ships up to 15,000 tons. Tonnage of goods handled in 1956 was 16,835,510. The municipal airport has direct passenger services to America, Canada and to most European countries, and freight services to the United States, Europe and Africa.

The principal buildings are the Town Hall, erected in 1877 from the designs of Alfred Waterhouse, R.A., together with a large extension; the Royal Exchange, built in 1869 and enlarged in 1921; the Central Library (1934); the Art Gallery; Heaton Hall; the Whitworth Institute; the 17th century Chetham Library; the Rylands Library (1899), which includes the Althorp collection; the University (Owens College); the 15th century Cathedral (formerly the parish church) and the Free Trade Hall. Manchester is one of the principal centres of political, literary and scientific advancement, and the Hallé Concerts have placed the city in the forefront of musical development. The *Guardian* newspaper exercises a widespread influence throughout the English-speaking world.

The town received a charter of incorporation in 1838 and was created a city in 1853. The City Council consists of 38 Aldermen and 114 Councillors.

Principal City Officers.

The Lord Mayor (1959-60), H. Quinney.

Recorder, Sir Basil Nield, C.B.E., Q.C. (1956).

Stipendiary Magistrate, F. B. Turner (1951).

Town Clerk, P. B. Dingle, C.B.E. (1944).

SHEFFIELD

SHEFFIELD (Yorkshire, West Riding), the centre of the special steel and cutlery trades, is situated 159 miles N.N.W. of London, at the junction of the Sheaf, Porter, Rivelin and Loxley with the river Don. The city is set in a beautiful countryside, its residential suburbs penetrating the Peak District of Derbyshire.

Sheffield has an area of 39,598 acres (nearly 62 square miles), including 3,332 acres of publicly owned parks and woodland, and a population (1951 census) of 512,834; estimated, June, 1958, 498,800. Though its cutlery, silverware and plate have long been famous, Sheffield has other and now more important industries—special and alloy steels, engineering and tools in great variety. Metallic thorium and titanium are two of the city's latest products. Refractory materials, silver refining, brush making, the manufacture of confectionery, canning, type-founding, ophthalmic optical goods and the making of snuff are other contrasting industries in Sheffield. In addition to those associated with the staple industries, important institutions are concerned with research in mining, glass technology and radiotherapy.

The parish church of St. Peter and St. Paul, founded in the twelfth century, became the Cathedral Church of the Diocese of Sheffield in 1914. Parts of the present building date from about 1435. The principal modern buildings are the Town Hall (1897 and 1923), the Cutlers' Hall (1832), the University (1905 and recent extensions), City Hall (1932), Central Library and Graves Art Gallery (1934) and the City Museum (1937).

Sheffield was created a borough on Aug. 24, 1843, a county borough in 1888 and a city in 1897. It the Mayor becoming a Lord Mayor in 1897. It

was made an Assize Town in 1955. The Corporation consists of 25 Aldermen and 75 Councillors.

Principal City Officers.

The Lord Mayor (1959-60), A. V. Wolstenholme.
Recorder, G. S. Waller, O.B.E., Q.C. (1957).
Master Cutler (1959-60) (*Master of the Company of Cutlers in Hallamshire*), P. J. C. Bovill.
Town Clerk, J. Heys, C.B.E. (1942).
Clerk of the Peace, P. T. Ward.

LEEDS

LEEDS (Yorkshire, West Riding) is a junction for road, rail and canal services and an important commercial centre, situated 185 miles N.N.W. of London. It is a centre of the wholesale clothing trade. The city has large foundries; engineering works producing textile machinery, machine tools, etc.; printing works, tanneries, and chemical works producing dyestuffs and related products.

The municipal area is 40,619 acres, the population at the census of 1951 being 504,954; estimated, June, 1958, 511,600.

The principal buildings are the Civic Hall (opened by King George V. in 1933), the Town Hall (1858), the Philosophical Hall, the Municipal Buildings and Art Gallery (1884) and the University. The Parish Church (St. Peter's) was rebuilt in 1840; the 17th century St. John's Church has a fine interior with a famous Renaissance screen; the 17th century Mill Hill Chapel was rebuilt in 1848. Kirkstall Abbey (about 3 miles from the centre of the city), founded by Henry de Lacy in 1152, is one of the most complete examples of Cistercian houses now remaining. Temple Newsam, birthplace of Lord Darnley, was acquired by the Corporation in 1922. The present mansion, a stately building in red brick, was built by Sir Arthur Ingram in 1622. Adel Church, about 5 miles from the centre of the city, is a fine Norman structure.

Leeds was first incorporated by Charles I. in 1626, made a county borough in 1889, and was created a city in 1893. The Lord Mayor presides over a Council of 28 Aldermen and 84 Councillors. The earliest forms of the name are *Loids* or *Ledes*, the origin of which is obscure.

Principal City Officers.

The Lord Mayor (1959-60), Mrs. G. A. Stevenson.
Recorder, G. de P. Veale, Q.C. (1957).
Stipendiary Magistrate, Ralph Cleworth, Q.C. (1950).
Town Clerk, R. Crute (1952).
Clerk of the Peace, T. A. Whittington (1952).

BRISTOL

BRISTOL, situated on the borders of Gloucestershire and Somerset, is a City and County of itself, and is 129 miles W. of London. The present municipal area is 26,345 acres, with a population, at the census of 1951, of 442,994; estimated, June, 1958, 438,000.

Among the various industries are aircraft design and construction, paints, jams, pickles, preserves, milling, shipbuilding, rope making, chocolate, sugar and tobacco, motor and general engineering, clothing, printing, paper bag and cardboard making, glass and earthenware, soap, leather and chemical works, breweries and copper, lead and iron works. Bristol is noted for its maritime history and the docks within the Port are the City Docks, 6 miles from the entrance to the river Avon; the Royal Edward and Avonmouth Docks, at the mouth of the river; and the Portishead Docks, to the west of the river entrance. The principal imports are grain,

cereal products, feeding stuffs, bananas and other fruit, provisions, frozen meat, sugar, metals, ores, oil-seeds, paper, petroleum and petroleum spirit, timber, tobacco, wood pulp and general merchandise, and the chief exports are machinery, chemicals, strontia, unmanufactured clay, cars, tractors and prefabricated buildings. A new municipal airport was opened at Lulsgate in May, 1957, replacing that at Whitchurch.

The chief buildings, in addition to the 14th century Cathedral (with later additions), with Norman Chapter House and gateway, the 14th century Church of St. Mary, Redcliffe (described by Queen Elizabeth I. as "the fairest, goodliest, and most famous parish church in England"), and Wesley's Chapel, Broadmead, are the Merchant Venturers' Almshouses, the Council House (opened by H.M. The Queen in April, 1956), Guildhall, Exchange (erected from the designs of John Wood in 1743), Art Gallery, Central Library, Cabot Tower, the University and Clifton College, Red Lodge (Tudor), Georgian House, and Blaise Castle and Mansion with Folk Museum. The Clifton Suspension Bridge, with a span of 702 feet over the Avon, was projected by Brunel in 1836 but was not completed until 1864. The beautiful Clifton Down adjoins Durdham Down (making a total of 442 acres), with Leigh Woods and Nightingale Valley on the opposite side of the river.

Bristol was a Royal Borough before the Norman Conquest. In 1373 it received from Edward III. a charter granting it county status and in 1899 its Mayor became a Lord Mayor. The Corporation includes 28 Aldermen and 84 Councillors. The earliest forms of the name are *Brigstowe* and *Bristow*.

Principal City Officers.

The Lord Mayor (1959-60), W. G. Cozens.
Recorder, G. D. Roberts, O.B.E., Q.C. (1946).
Town Clerk, T. J. Urwin.
Clerk of the Peace, T. D. Corpe, O.B.E.

KINGSTON UPON HULL

HULL (officially "Kingston upon Hull") is situated in the East Riding of Yorkshire, at the junction of the Hull with the Humber, 22 miles from the North Sea and 181 miles N. of London. The municipal area is 14,493 acres, with a population of 299,105 at the census of 1951; estimated, June 1958, 301,100.

Hull is one of the great seaports of the United Kingdom. It has docks covering a water area of 200 acres, well equipped for the rapid handling of cargoes of every kind, and its many industries include oil-extracting, saw-milling, flour-milling, engineering and chemical industries. It also claims to be the premier fishing port.

The City, restored after very heavy air raid damage during World War II, is well laid out with fine thoroughfares. It has good office and administrative buildings; its municipal centre being the Guildhall; its educational centre the University of Hull and its religious centre the Parish Church of the Holy Trinity, 272 feet in length.

Kingston upon Hull (anciently known as *Wyke*) was so named by Edward I. who granted the first of its Charter privileges in 1299. Later privileges included the creation of the office of Mayor (1331); Charter of Incorporation—the creation of the county of the town, with the power, annually exercised, to elect a Sheriff (1440); county area extended (1447); power given to elect a High Steward (1598); City status accorded (1897) and the office of Mayor raised to the dignity of Lord Mayor (1924). The City Council consists of a Lord Mayor, 22 Aldermen and 63 Councillors, representing the 22 wards of the City.

*Principal City Officers.**The Lord Mayor* (1959-60), T. H. Wray.*Recorder*, P. S. Price, Q.C. (1958).*Sheriff*, H. J. Stieger.*Stipendiary Magistrate*, D. N. O'Sullivan (1952).*Town Clerk and Clerk of the Peace*, J. H. W. Glen.

NEWCASTLE UPON TYNE

NEWCASTLE UPON TYNE (Northumberland) a City and a County on the north bank of the Tyne estuary, 8 miles from the North Sea and 27½ miles N. of London, has an area of 11,401 acres (18 square miles) and a population of 291,723 at the census of 1951: estimated, June, 1958, 272,400.

The city is conveniently placed on the estuary, in the centre of the Northumberland and Durham coalfields. The exports of the Port of Newcastle upon Tyne (River Tyne) include coal and coke, sulphate of ammonia, oil fuel (as cargo and bunkers), machinery, iron and steel manufactures, tar and pitch, petroleum spirit and other oils, textiles, firebricks and fireclay goods, grain and animal feeding stuffs; the chief imports are iron ore, metals and minerals, iron and steel manufactures and scrap, oil fuels and other oils, petroleum spirit, timber, grain, fertilisers, cement, fish, fruit and vegetables, and provisions. The chief industries are coal mining, shipbuilding, ship repairing, iron and steel manufactories, engineering and boilermaking shops, locomotives, lead works, chemical manufactories, flour milling, etc.

The principal buildings include the (12th century) "New" Castle, of which the walls, keep and chapel are well preserved, the Cathedral (St. Nicholas), St. Andrew's Church (12th century), St. John's (12th century), St. George's, Jesmond, the Roman Catholic Cathedral of Hexham and Newcastle, Holy Trinity War Memorial, Guildhall (1658) Moot Hall (1810), Exchange (1860), Central Public Library and Laing Art Gallery and Museum, Wood Memorial Hall (1870), and the Custom House. The beauty of Jesmond Dene (gift of Lord Armstrong) is much appreciated by visitors, as well as the Town Moor, a tract of over 900 acres of open grassland. The city is connected with the south bank of the Tyne by six bridges.

The pre-Norman borough of *Monkchester* was re-named Newcastle in the 12th century when the castle was erected as a defence against the Scots. In 1400 it was made a county and in 1589 was incorporated. The City Corporation now comprises a Lord Mayor (1906), 19 Aldermen and 57 Councillors

*Principal City Officers.**The Lord Mayor* (1959-60), Mrs. C. C. Scott.*Recorder*, R. Lyons, Q.C. (1956).*Town Clerk and Clerk of the Peace*, J. Atkinson (1937).

NOTTINGHAM

NOTTINGHAM (Nottinghamshire) stands on the River Trent, 124 miles N.N.W. of London in one of the most valuable coalfields of the country with excellent railway, water (being connected by canal with the Atlantic and the North Sea), and road facilities. The municipal area is 18,364 acres and population, at the census of 1951, 306,008; estimated, June, 1958, 313,000.

The principal industries are hosiery, lace, bleaching, dyeing and spinning, tanning, engineering and cycle works, brewing, the manufacture of tobacco, chemicals, furniture, typewriters and mechanical products.

Most public services are owned by the municipality. The amenities of the city include numerous public baths, libraries and parks, an art

gallery and two museums. Approximately 30,480 houses have been built by Nottingham Corporation. The famous Nottingham Goose Fair is held in October each year.

The chief buildings are the 12th century Nottingham Castle (restored in 1878, and now the City Museum and Gallery of Art), Wollaton Hall (1580-88) owned by the Corporation and now a Natural History Museum, St. Mary's, St. Peter's, and St. Nicholas's Churches, the Roman Catholic Cathedral (Pugin, 1842-4), the Council House (1929), the Guildhall and Court House (1888), Shire Hall, Albert Hall, the University and Newstead Abbey, home of Lord Byron.

Snottengham or *Nottingeham*, "the home of the sons of Snod" (the Wise), is the Anglo-Saxon name for the Celtic *Tuigogbauc*, "Cave Homes." The city possesses a Charter of Henry II., and was created a city in 1897. The Corporation consists of 17 Aldermen and 52 Councillors (including the Lord Mayor and Sheriff).

*Principal City Officers.**The Lord Mayor* (1959-60), J. W. Kenyon.*Recorder*, C. N. Shawcross, Q.C. (1950).*Town Clerk*, T. J. Owen.*Clerk of the Peace*, G. A. Wharton, M.B.E., T.D.

BRADFORD

BRADFORD (Yorkshire, West Riding), 102 miles N.N.W. of London and 8 miles W. of Leeds, in the coal and iron district, is a centre of the woollen and worsted trade. The city is connected with the Mersey in the west and with the Humber in the east by canals, and is an important railway centre. The municipal area is 25,504 acres (about 40 square miles), with a population at the 1951 Census of 292,394; estimated June, 1958, 287,800.

The principal textile industries are worsteds, woollens, silks and cottons, and there are also important engineering and iron works and quarries of freestone.

The chief public buildings, in addition to the 15th century Cathedral (formerly the Parish Church) and Bolling Hall (14th century), are the Town Hall (1873), the tower of which contains a clock with dials, chimes and a carillon, Exchange (1867), Cartwright Memorial Hall (1904) commemorating the inventor of the power loom, the Windsor Baths and Public Halls (1905), Grammar School (Charter, 1662), St. George's Hall (Concert Hall, 1853), Technical College (1882), the Mechanics' Institute (1832), Kirkgate Market Hall, and Britannia House (1933).

The Saxon township was created a parliamentary borough in 1832, a borough in 1847, a county borough in 1889, and a city in 1897. The title of Lord Mayor was conferred on the Chief Magistrate in 1907. The Corporation consists of a Lord Mayor, 20 Aldermen and 60 Councillors.

*Principal City Officers.**The Lord Mayor* (1959-60), E. England.*Recorder*, B. B. Gillis, Q.C. (1958).*Town Clerk*, W. H. Leatham (1946).*Clerk of the Peace*, P. Denny.

OXFORD

OXFORD is a University City, an important industrial centre, and a county, assize, and market town.

It has been a City from time immemorial and a County Borough since 1889. It has an area of 8,785 acres, a population of 104,100 (Registrar-General's 1958 estimate) and a rateable value of £2,751,496. Oxford is a Parliamentary constituency returning one member and is governed by a Council of 68 members of whom 12 are, by special enactment, elected by the University.

The University (see also pp. 501-503) has 22 Colleges, 5 Private Halls, 3 New Foundations, 1 Society and 5 Societies of Women Students.

Industry, consisting of printing and bookbinding, and the making of agricultural implements and marmalade, played a minor part in Oxford until the motor industry was established in 1912. To-day this and the adjoining pressed steel works employ about 15,000.

The City has filled a notable place in the story of the nation, first entering real history in A.D. 912 when, according to the Old English Chronicle, possession of it was taken by King Edward the Elder. It had a Mayor by 1122. It was a favourite residence of the Plantagenets, who gave the City its earliest charters and who built Beaumont Palace where Richard Cœur de Lion was born in 1157. The origins of the University are obscure, but it seems clear that it was already in existence in 1187, and by 1212 had a Chancellor. Colleges began to come into existence during the thirteenth century, the earliest being University, Balliol and Merton Colleges. The University became sufficiently powerful to secure the aid of the monarchy to establish an ascendancy over the Corporation, the outward forms of which were observed until 1825.

It is for its architecture that Oxford is of most interest to the visitor, its oldest specimens being the reputed Saxon tower of St. Michael's church, the remains of the Norman castle and city walls and the Norman church at Iffley. It is chiefly famous however, for its Gothic buildings, such as the Divinity Schools, the Old Library at Merton College, William of Wykeham's New College, Magdalen College and Christ Church and many other college buildings. Later centuries are not represented by so many examples, but mention can be made of the exquisite Laudian quadrangle at St. John's College, the renaissance Sheldonian Theatre by Wren, Trinity College chapel, and All Saints Church; Hawksmoor's mock-Gothic at All Souls College, and the superb example of eighteenth century architecture afforded by Queen's College. In addition to individual buildings, High Street and Radcliffe Square, just off it, both form architectural compositions of great beauty. Most of the Colleges have gardens, those of Magdalen, New College, St. John's (designed by "Capability" Brown) and Worcester being the largest.

The visitor will always find some of the college chapels, halls and gardens open for public inspection between 10 a.m. and 5 p.m.

Principal City Officers.

Mayor (1959-60), F. M. Brewer, M.B.E.

Recorder, J. G. Foster, Q.C., M.P. (1956).

Town Clerk and Clerk of the Peace, Harry Plowman, C.B.E.

CAMBRIDGE

CAMBRIDGE, a settlement far older than its ancient University, lies on the Cam or Granta, 51 miles north of London and 65 miles south-west of Norwich. Its population in 1951, when it was raised to the dignity of a City, was 81,463; estimated, June, 1958, 92,500. Its area is 10,060 acres.

The city is a parliamentary and quarter sessions borough, county town and regional headquarters. Its industries, which include radio and electronics, flour milling, cement making and the manufacture of scientific instruments, are extensive but nowhere obtrusive. Among its open spaces are Jesus Green, Sheep's Green, Coe Fen, Parker's Piece, Christ's Pieces, the University Botanic Garden, and the Backs, or lawns and gardens through which the Cam winds behind the principal line of college

buildings. East of the Cam, King's Parade, upon which stand Great St. Mary's Church, Gibbs' Senate House and King's College Chapel with Wilkins' screen, joins Trumpington Street to form one of the most beautiful thoroughfares in Europe.

University and College buildings provide the outstanding features of Cambridge architecture but several churches (especially St. Benet's, the oldest building in the City, and St. Sepulchre's, the Round Church) also make notable contributions. The modern Guildhall (1939) stands on a site of which at least part has held municipal buildings since 1224.

The City Council consists of a Mayor, 14 Aldermen and 42 Councillors. Four of the Councillors are elected by the Colleges and Halls and two by Grace of the Senate of the University. Two of the Aldermen are elected by the Council from the University and College representatives.

Principal City Officers.

Mayor (1959-60), W. Cole.

Recorder, F. H. Lawton, Q.C.

Town Clerk, A. H. I. Swift.

Clerk of the Peace, C. H. Parker.

CANTERBURY

CANTERBURY, the Metropolitan City of the Anglican Communion, has an unbroken history going back to prehistoric times. It was the Roman Durovernum and the Saxon Cant-wara-Byrig (stronghold of the men of Kent). Here in 597 St. Augustine began the conversion of the English race to Christianity, when Ethelbert, King of Kent, was baptized. In 1170 the rivalry of Church and State culminated in the murder in Canterbury Cathedral, by Henry II.'s knights, of Archbishop Thomas Becket, whose shrine became a great centre of pilgrimage as described by Chaucer in his *Canterbury Tales*. After the Reformation pilgrimages ceased, but the prosperity of the City was strengthened by an influx of Huguenot refugees, who introduced weaving. In the first Elizabethan era Christopher Marlowe, the poetic genius and precursor of Shakespeare, was born and reared in Canterbury, and there are literary associations also with Defoe, Dickens and Barham, author of the *Ingoldsby Legends*. In the last war the City received severe damage from air attacks, particularly in the great "Baedeker" raid of June 1, 1942. Fortunately the Cathedral (apart from the modern Library) was not severely harmed. Great progress has been made in re-building, before which the opportunity has been taken to excavate archaeologically the main areas of damage. As a result part of the street plan of Roman Canterbury has been recovered and many Roman buildings, including a large theatre, identified.

The Cathedral, with its glorious architecture ranging from the eleventh to the fifteenth centuries, is world-famous. Modern pilgrims are attracted particularly to the Martyrdom, the Black Prince's Tomb and other historic monuments, the Warriors' Chapel and the many examples of mediæval stained glass.

Of the Benedictine St. Augustine's Abbey, burial place of the Jutish Kings of Kent (whose capital Canterbury was) only extensive ruins remain. St. Martin's Church, on the eastern outskirts of the City, is stated by Bede to have been the place of worship of Queen Bertha, the Christian wife of King Ethelbert, before the advent of St. Augustine.

The mediæval City Walls are built on Roman foundations and the fourteenth century West Gate is one of the finest buildings of its kind in the country.

The city is a county borough and county of itself, with an estimated population (June, 1958) of 30,000. Before the institution of the Mayorality

in 1448 it was governed by bailiffs and earlier still by prefects or provosts.

Principal City Officers.

Mayor (1959-60), T. McCallum.

Recorder, G. Lawrence, Q.C.

Sheriff (1959-60), E. E. Kingsman.

Town Clerk and Clerk of the Peace, J. Boyle.

YORK

YORK is a county borough, an archiepiscopal seat, the county town of Yorkshire and a county in its own right, its correct designation being "The City and County of the City of York", and it stands at the junction of the three Ridings. York has an area of 6,998 acres, and a population at the 1951 Census of 105,336; estimated, June, 1958 at 105,600. The city returns one member to Parliament and is governed by a Lord Mayor, who has the title of "Right Honourable," 13 Aldermen and 39 Councillors. The City Sheriff, who is the Sovereign's representative, is elected annually with the Lord Mayor.

The recorded history of York dates from A.D. 71, when the Roman Ninth Legion established a base which later became the fortress of Eboracum. Here Constantine the Great was proclaimed Emperor in A.D. 306. Under Edwin, in the 7th century, York became the capital of the Kingdom of Northumbria. Under the Danes it became a trading centre but suffered severely at the Norman Conquest. It is mentioned in the Domesday Book. By the 14th century it had become prosperous and was used as the chief base against the Scots. It became a great mercantile centre, chiefly owing to its control of the wool trade, but under the Tudors its fortunes declined, though Henry VIII. made it the headquarters of the Council of the North, so preserving its status as the Northern capital. During the Civil War it suffered heavily in the Royalist cause, but in the 18th century it became a social centre for the northern nobility and gentry.

With its development as a railway centre in the 19th century the commercial life of York expanded and it is now a flourishing modern city. Chief industries are the manufacture of cocoa, chocolate and confectionery, railway carriage and wagon repair, scientific instrument making, printing and light engineering.

The city is rich in examples of architecture of all periods, but its finest features are the Minster with its stained glass, and the ancient walls and gateways. There are many examples of domestic architecture of the Tudor and Stuart periods, but perhaps more notable are the Georgian mansions of The Mount, Micklegate and Bootham. Its museums are world-famous, and its Art Gallery is now greatly enriched by the Lycett Green collection of Old Masters recently given to the city.

Principal Officers.

Lord Mayor (1959-60), R. S. Oloman, M.B.E.

Recorder, J. R. H. T. Cumming-Bruce (1958).

Sheriff, W. Ward.

Town Clerk and Clerk of the Peace, T. C. Benfield.

WINCHESTER

WINCHESTER, the ancient capital of England, is situated on the River Itchen 65 miles S.W. of London and 12 miles north of Southampton. The City has an area of 3,883 acres and an estimated population (June, 1958) of 27,070; it is a parliamentary and quarter session borough, an assize town and the county town of Hampshire.

Occupation of the city area can be traced back to 1800 B.C. but organized settlements appeared later, as at St. Catherine's Hill which was an Iron Age settlement from the 6th to 2nd century B.C. Winchester was known as Caer Gwent to the Celts and Venta Belgarum to the Romans; to the latter it was an important centre as the five roads radiating from the city testified. Saxon history is somewhat obscure but Winchester became the capital of Wessex and in the 9th century capital of all England. Alfred the Great made Winchester a centre of education. In the Saxon Cathedral there took place the coronation of Edward the Confessor. William the Conqueror was crowned in the city and made it his capital. It remained so for many years, its decline as a capital beginning during the civil war between Stephen and Matilda; and with the loss of Normandy in 1204, and the sack of Southampton in 1338 Winchester had lost its favourable position. Further damage to the city occurred in the Civil War. In the latter half of the 18th century many of the city's historic buildings, including four of the six gates and much of the city wall, were destroyed. Winchester is rich in architecture of all types but the Cathedral takes first place. The longest Gothic cathedral in the world, it was rebuilt in 1079-1093 and exhibits splendid examples of Norman, Early English and Perpendicular styles. Winchester College, founded in 1393, is one of the most famous public schools, the original building remaining almost unaltered. The Hospital of St. Cross, founded in 1136 by Henry de Blois, is a fine mediæval almshouse. The Great Hall, completed in 1235, is a part of the ancient castle built by William the Conqueror.

It is not certain when Winchester was first designated a city but it is probable that the term was applied between 650 and 700. Winchester is one of the oldest corporations in the country; the first written record of a Mayor occurs in 1200.

Principal Officers.

Mayor (1959-60), Mrs. M. E. L. Lowden.

Recorder, J. F. E. Stevenson.

Town Clerk and Clerk of the Peace, R. H. McCall.

THE CINQUE PORTS

As their name implies the Cinque Ports were originally 5 in number, Hastings, New Romney, Hythe, Dover and Sandwich. They were in existence before the Norman Conquest and were the Anglo-Saxon successors to the Roman system of coast defence organized from the Wash to Spithead to resist Saxon onslaughts. William the Conqueror reconstituted them and granted peculiar jurisdiction, most of which was abolished in 1855. Only jurisdiction in Admiralty still survives.

At some time after the Conquest the "ancient towns" of Winchelsea and Rye were added with equal privileges. The other members of the Confederation, known as Limbs, are:—Lydd, Faversham, Folkestone, Deal, Tenterden, Margate and Ramsgate.

The Barons of the Cinque Ports have the ancient privilege of attending the Coronation Ceremony and are allotted special places in Westminster Abbey.

THE PRINCIPALITY OF WALES AND MONMOUTHSHIRE

Position and Extent.—Wales and Monmouthshire occupy the extreme west of the central southern portion of the island of Great Britain, with a total area of 8,006 sq. miles; they are bounded on the N. by the Irish Sea, on the S. by the Bristol Channel, on the E. by the English counties of Cheshire, Salop, and Hereford, and on the W. by St. George's Channel. Across the Menai Straits is the Welsh island-county of Anglesey or Môn (276 sq. miles), communication with which is facilitated by the Menai Suspension Bridge (1,000 ft. long), built by Telford in 1826 (freed from toll as from Jan. 1, 1941) and by the tubular railway bridge (1,100 ft. long) of the former L.M. & S. Railway, built by Stephenson in 1850. Holyhead harbour, on Holy Isle (N.W. of Anglesey), provides accommodation for a fast steam packet service to Kingstown and Dublin (70 miles).

Population.—The population at the *Census of 1951* was 2,599,000 (inclusive of Monmouthshire). The Registrar-General's estimate of the population of Wales and Monmouthshire at June 30, 1958, was 2,615,000.

Relief.—Wales is generally mountainous, the chief systems being those of North Wales (Snowdon 3,560 ft., Carnedd Llwyelyn 3,484 ft., Carnedd Dafydd 3,426 ft.); Berwyn (Aran-mawddwy 2,970 ft.); Powys (Plinlimmon 2,468 ft., Drygan Fawr 2,115 ft., Radnor 2,163 ft.); and the Black Mountain, Brecknock Beacons and Black Forest ranges (Carmarthen Van 2,632 ft., Brecon Beacon 2,906 ft., Pen-y-gawer fawr 2,660 ft.).

Hydrography.—The principal river of those rising in Wales is the *Severn* (see England), which flows from the slopes of Plinlimmon to the English border, dividing Montgomeryshire on its way. The *Wye* (130 miles) also rises in the slopes of Plinlimmon, and flows between Radnor and Brecon on its course to England. The *Usk* (56 miles) flows into the Bristol Channel, through Monmouthshire. The *Dee* (70 miles) rises in Bala lake and flows through the Vale of Llangollen, where an aqueduct (built by Telford in 1805) carries the Pontcysyllte branch of the Shropshire Union Canal across the valley. The estuary of the Dee is the navigable portion, 14 miles in length and about 5 miles in breadth, and the tide rushes in with dangerous speed over the "Sands of Dee." The *Towy* (68 miles), *Teifi* (50 miles), *Taff* (40 miles), *Dovey* (30 miles), *Taf* (25 miles), and *Conway* (24 miles), the last named broad and navigable, are wholly Welsh rivers.

The largest natural lake in Wales is *Bala* (Llyn Tegid) in Merionethshire, 4 miles long and about 1 mile wide; *Lake Vyrnwy* is an artificial reservoir, about the size of Bala, and forms the water supply of Liverpool, while Birmingham is supplied from a chain of reservoirs in the Eilan and Claeuwn valleys.

The Welsh Language.—Statistics published on July 6, 1955, show that just over 715,000 persons (of three years and over) in Wales and Monmouthshire were able to speak Welsh at the time of the 1951 Census, compared with 909,000 at the 1931 Census, a decline of 21 per cent. in 20 years. 48,000 persons could speak Welsh only, compared with 98,000 in 1931. The proportion of people speaking Welsh fell from 49.9 per cent. in 1901 to 28.9 per cent. in 1951; and of those speaking Welsh only from 15.1 to 1.7 per cent.

Flag.—A red dragon on a green and white field (per fess argent and vert a dragon passant gules). The flag was augmented in 1953 by a royal badge on a shield encircled with a riband bearing the words *Ddraig Goch Ddyry Cychwyn* and imperially crowned. Only the unaugmented flag is flown on

Government offices in Wales and, where appropriate, in London. Both flags continue to be used elsewhere.

EARLY HISTORY

Celts and Romans.—The earliest inhabitants of whom there is any record appear to have been subdued or exterminated by the *Goidels* (a people of Celtic race) in the Bronze Age, and a further invasion of Celtic *Brythons* and *Belgae* followed in the ensuing Iron Age. The Roman conquest of South Britain and Wales was for some time successfully opposed by *Caratacus* (Caractacus or Caradog), Chieftain of the Catuvellauni and son of *Cunobelinus* (Cymbeline) King of the Trinobantes. In A.D. 78 the conquest of Wales was completed under Julius Frontinus, and communications were opened up by the construction of military roads from Chester to Carleon-on-Usk and Caerwent, and from Chester to Conway (and thence to Carmarthen and Neath). Christianity was introduced (during the Roman occupation) in the 4th century.

The Anglo-Saxon Attacks.—The Anglo-Saxon invaders of South Britain drove the Celtic Goidels and Brythons into the mountain fastnesses of Wales, and into Strathclyde (Cumberland and S.W. Scotland) and Cornwall, giving them the name of *Waellsc*, or Welsh (=Foreign). The West Saxons' victory of Deorham (577) isolated Wales from Cornwall, while the battle of Chester (632) cut off communication with Strathclyde. In the 8th century the boundaries of the Welsh were further restricted by the annexations of Offa, King of Mercia, and counter-attacks were largely prevented by the construction of an artificial boundary from the Dee to the Wye (Offa's Dike). In the 9th century Rhodri Mawr united the country against further incursions of the Saxons by land and against the raids of Norse and Danish pirates by sea, but at his death his three provinces of *Gwynedd* (N.), *Powys* (Mid.) and *Dehenbarth* (S.) were divided among his three sons—Anarawd, Mervyn and Cadell—the son of the last named being Howel Dda, who codified the laws of the country, while Lewelyn ap Seisyllt (husband of the heiress of Gwynedd) again united the provinces and reigned as Prince from 1015–1022.

The Norman Conquest.—After the Norman conquest of England, William I. created Palatine counties along the Welsh frontier, and Robert FitzHamon, the Norman Earl of Gloucester, raided South Wales and erected fortresses from the Wye to Milford Haven. Henry I. introduced Flemish settlers into South Wales, but after his death the Welsh rose under the leadership of Griffith ap Rhys and routed the Norman-Flemish forces at the fords of the Teifi (Cardigan) in 1136. From the early years of the 13th century the house Gwynedd, in the north, gained an ascendancy over the whole of Wales, and Lewelyn ap Iorwerth was in constant strife with England for recognition as an independent sovereign; but Lewelyn ap Iorwerth was killed in 1282 during hostilities between the Welsh and English, and his brother David was captured and executed by the English in 1283. On Feb. 7, 1301, Edward of Caernarvon, son of Edward I., was created *Prince of Wales*.

The Welsh are a distinct nationality, with a language and literature of their own, and the national bardic festival (Eisteddfod), instituted by Prince Rhys ap Griffith in 1176, is annually maintained. These *Eisteddfodau* (sessions) form part of the *Gorsedd* (assembly), which is believed to date from the time of Prydian, a ruling prince in an age many centuries before the Christian era.

CARDIFF

CARDIFF (Glamorgan), at the mouth of the rivers Taff (Cae'r Taff), Rhymney and Ely, the capital of Wales and the port of the South Wales coalfields, has an area of 18,066 acres, and a population (Registrar-General's estimate, 1958) of 258,300. Within the city there is a great variety of industry including iron and steel works, rolling mills and foundries, patent fuel works, engine wagon works, flour mills, breweries, jam, vinegar and ice factories, enamel-ware and hollow-ware, paint works, furniture and bedding, clothing and foot-wear, sweets and confectionery, tobacco, electrical goods and appliances, food products and building materials.

The principal buildings are Cardiff Castle, built in the 11th century, the National Museum of Wales, Public Library, the University College of South Wales and Monmouthshire, the Registry of the University of Wales, the Welsh College of Advanced Technology, City Hall, Law Courts, Glamorgan County Hall, Offices of Government Departments, and "The Temple of Peace and Health." The city returns 3 members to Parliament.

The Lord Mayor (1959-60), Mrs. H. Evans.

Stipendiary Magistrate, P. G. D. Sixsmith (1948).

Recorder, H. V. Lloyd-Jones, Q.C. (1958).

Town Clerk and Clerk of Peace, S. Tapper-Jones.

SWANSEA

SWANSEA (in Welsh, Abertawe), a seaport of Glamorgan, is a County Borough, at the mouth of the River Tawe. It is the chief centre of the copper, tinplate and spelter industry of Wales and of the United Kingdom. The trade of the port also includes coal, patent fuel, ores, and the import and export of oil. There is also a large ship-repairing industry. The municipal airport is situated at Fairwood Common, Gower, a few miles away from the town. The municipal area is 24,249 acres, with a population at the census of 1951 of 162,388 (Registrar-General's estimate, 1958, 163,300).

The principal buildings are the Norman Castle (rebuilt in 1330), the Royal Institution of South Wales, founded in 1835 (containing Museum and Library), the University College at Singleton and the Guildhall, containing Brangwyn panels. Swansea was chartered by the Earl of Warwick, circa 1158-1184, and further charters were granted by King John, Henry III., Edward II., Edward III., and James II., 2 from Cromwell and 1 Lord Marcher. The borough returns 2 members to Parliament.

Mayor (1959-60), W. George.

Stipendiary Magistrate, H. L. Williams, Q.C. (1952).

Recorder, F. Elwyn Jones, Q.C., M.P. (1953).

Town Clerk, T. B. Bowen, C.B.E.

THE KINGDOM OF SCOTLAND

Position and Extent.—The Kingdom of Scotland occupies the northern portion of the main island of Great Britain and includes the Inner and Outer Hebrides, and the Orkney, Shetland, and many other islands. The Kingdom lies between $60^{\circ} 51' 30''$ and $54^{\circ} 38' N.$ latitude and between $1^{\circ} 45' 32''$ and $6^{\circ} 14' W.$ longitude, its southern neighbour being the Kingdom of England, with the Atlantic Ocean on the N. and W., and the North Sea on the E. The greatest length of the mainland (Cape Wrath to the Mull of Galloway) is 274 miles, and the greatest breadth (Buchan Ness to Applecross) is 154 miles. The total area of the Kingdom is 29,795 square miles (or 19,068,724 acres) exclusive of inland water, tidal water and foreshore. The population (at the census of 1951) was 5,096,415, an increase of 253,435 or 5.2 per cent. since the census of 1931. The average density of the population was 171 persons per square mile. The population was estimated at 5,168,992 by the Registrar-General in June, 1958.

Land's End to John o' Groat's.—The customary measurement of the Island of Great Britain is from the site of John o' Groat's house, near Duncansby Head, Caithness (at the N.E. extremity of the island) to Land's End, Cornwall (at the S.W. extremity), a total distance of 603 miles in a straight line and (approximately) 900 by road. But the site of the house of John de Groot (with its 8 doors and octagonal table, to solve the question of precedence between John and his 7 brothers) is about 4 miles S.W. of Duncansby Head, while Dunnet Head (also in Caithness) extends farther N. than Duncansby. John de Groot is believed to have obtained permission to settle in Caithness (from the Netherlands) in the reign of James IV. (1488-1513).

Relief.—There are three natural orographic divisions of Scotland. The *Southern Uplands* have their highest points in Merrick (2,764 feet), Rinn of Kells (2,668 feet), and Cairnsmuir of Carsphairn (2,612 feet), in Kirkcubright; Hartfell (2,651 feet) in Dumfries; and Broad Law (2,754 feet) in Peebles. The *Central Lowlands* include the valleys of the Tay, Forth and Clyde, and the cities of Edinburgh, the capital of the Kingdom, and Glasgow, its principal seaport. The heather-clad *Northern Highlands* extend almost from the extreme north of the mainland to the central lowlands, and are divided into a northern and southern system by the *Great Glen*; they contain, in the central Grampian Hills, *Ben Nevis* (4,406 feet), the highest point in the British Isles, and *Ben Muich Dhui* (4,296 feet). The *Cheviot Hills* form a natural boundary between Scotland and England, their highest point being The Cheviot (2,676 feet).

Hydrography.—The principal river of Scotland is the *Clyde* (106 miles), one of the most important rivers in the world, with the greatest commercial estuary in Scotland. The Clyde is formed by the junction of Daer and Portrail water, and flows through the city and port of Glasgow to the Firth of Clyde. During its course it passes over the picturesque *Falls of Clyde*, Bonnington Linn (30 feet), Corra Linn (84 feet), Dundaff Linn (10 feet), and Stonebyres Linn (80 feet), above and below Lanark. The *Tweed* (96 miles) has important woollen industries ("Tweeds") in its valley. The *Tay*, noted for its salmon, and the longest river in Scotland (177 miles), flows into the North Sea, with Dundee (the centre of the jute industry) on the estuary, which is spanned by the *Tay Bridge* (2 miles 73 yards), opened in 1887 to replace that destroyed by a gale (Dec. 28, 1879). The *Dee* (90 miles), a noted salmon river, flows through scenery of unequalled beauty to the North Sea at Aberdeen. The *Spey* (120 miles), the swiftest

flowing river in the British Isles, and also noted for its salmon and its scenery, flows into the Moray Firth. The *Forth* (66 miles), navigable to Stirling, is spanned by the *Forth (Railway) Bridge*, constructed 1882-9, at a cost of £3,000,000, with a length of 5,330 ft. (with approaches 8,295 ft.). The *Falls of Glomach* in Ross-shire, with a drop of 370 feet, are the highest in the British Isles; the *Grey Mare's Tail* (Dumfriesshire) is 200 feet.

The *lochs* are the principal hydrographic feature of the Kingdom, both on the mainland and in many of the Islands. The largest in the Kingdom and in Great Britain is *Loch Lomond* (24 miles long), with *Lochs Awe*, *Tay*, *Rannoch* and *Ericht* in the Grampian valleys; *Loch Ness* (24 miles long and 800 feet deep), with *Lochs Och* and *Lochy*, in the Great Glen; and *Lochs Shin* (20 miles) and *Marce* in the northern Highlands.

Climate.—The general climatic values for Scotland are given below, together with the corresponding values for England and Wales within brackets—mean air temperature reduced to sea level $47.1^{\circ} F.$ (49.7); rainfall, 50.3 inches (35.2); number of days with rain 217 (188); mean hours per day of bright sunshine, 3.36 (3.96).

Gaelic Language.—At the 1951 Census of Scotland, 95,447 persons of 3 years of age and upwards, out of a total population of 4,826,814 (of these ages), were returned as able to speak Gaelic, approximately 2 per cent. of the population. There has been a continual decline from the peak recorded figure of 254,415 Gaelic speakers at the Census of 1891. In 1951, 2,178 persons of 3 years and over were able to speak Gaelic only, compared with 6,716 in 1931 and 43,738 in 1891; 93,269 persons could speak Gaelic and English compared with 129,419 in 1931 and 210,677 in 1891.

Commerce.—The principal exports are machinery, ships and vehicles, iron and steel manufactures, non-ferrous metals, woollen and worsted yarns and products, food and drink and textile materials. Whisky continues to be the leading export to dollar countries.

THE SCOTTISH ISLANDS

There were 147 inhabited islands in the Kingdom at the time of the 1951 Census, with a total population of 141,972, the number of inhabited islands having fallen by 18 since the census of 1931. The most populous of the islands were Lewis (with Harris) (26,465), the Mainland of Zetland (14,241), the Mainland of Orkney (14,198), Bute (12,547), Skye (8,267), Arran (4,638), Islay (4,267), South Uist (2,462) and Mull (2,420).

Orkney.—About 6 miles N. of the Caithness coast, separated from the mainland by the *Pentland Firth*, is the island county of Orkney, a group of 90 islands and islets ("holms" and "skerries"), of which one-third are inhabited. The total area of the group is $375\frac{1}{2}$ square miles, with a population (1911) of 25,896. Kirkwall, in Mainland, the largest island of the group, is the capital of the county. Many of the Orkney (and Shetland) Islands contain *brochs* (Pictish towers) and other Pictish and Scandinavian remains. *Scapa Flow*, between Mainland and Hoy, was the war station of the Grand Fleet from 1914-19 and the scene of the scuttling of the surrendered German High Seas Fleet (June 21, 1919).

Zetland.—About 50 miles N. of Orkney (with the detached Fair Isle at 25 miles N.) is the island county of Zetland or Shetland, a group of about 100 islands and islets, of which 29 are inhabited. The total area of the group is 551 square miles, with a population (1911) of 27,911. Lerwick, in Mainland (the largest and principal island), is the capital

of the county. *Fair Isle*, the southernmost of the group, is famous for hand-knitted hosiery, and *Unst* for the finest of the Shetland woollen work, for which the country is famous. *Muckle Flugga*, about 1 mile N. of Unst, is the most northerly of the group and of the British Isles ($60^{\circ} 51' 30''$ N. lat.).

Western Islands.—Off the W. coast, at varying distances, and extending from Sutherland to Argyll, are over 500 islands and islets, of which 102 are inhabited. The total area of these Western Islands is 2,812 square miles, with a population of close on 80,000, but owing to the mountainous surface of the land only about 300 square miles are under cultivation. *The Hebrides*.—Until the closing years of the 13th century "The Hebrides" included other Scottish islands in the Firth of Clyde, the peninsula of Kintyre (Argyllshire), the Isle of Man, and the (Irish) Isle of Rathlin. The origin of the name is stated to be the Greek *Eboudai*, latinized as *Hebudes* by Pliny, and corrupted to its present form. The Norwegian name *Sudreyjar* (Southern Islands) was latinized as *Sodoresens*, a name that survives in the Anglican bishopric of "Sodor and Man." The *Inner Hebrides* include the island of *Skye* (843 square miles—capital, Portree, famous as the refuge of Prince Charlie after his defeat at Culloden, Inverness-shire, in 1746), which contains the *Cullins* (Sgurr Alasdair 3,399 feet), *Red Hills* (Ben Callich, 2,403 feet), and many other picturesque mountains; *Mull* (367 square miles), containing *Ben More* (3,169 feet), *Ben Bu* (2,354 feet), and *Ben Creach* (2,289 feet); *Jura* (160 square miles), with a chain of hills culminating in the *Paps of Jura* (Beinn-an-Oir, 2,571 feet and Beinn Chaolais, 2,407 feet); *Islay* (235 square miles), and many smaller islands. The *Outer Hebrides*, separated from the mainland by the *Minch*, include *Lewis with Harris* (770 square miles), celebrated for its homespun "Tweeds," *North Uist*, *South Uist*, *Barra* and other islands. Thirteen miles W. of *Stornoway* (the largest town of Lewis and of the Hebrides) are the "Druidical" remains of *Callanish*, a well-preserved series of monolithic circles, cruciform in general arrangement, but usually regarded as a heathen monument of the remote Stone Age.

EARLY HISTORY

Prehistoric Man.—The *Picts*, believed to be of non-Aryan origin, and stated to have been named *Picti* by the Romans on account of the tribal habit of painting the body, seem to have inhabited the whole of North Britain and to have spread over the north of Ireland. *Picts' Houses* are most frequent in the northern counties of Caithness and Sutherland and in the Orkney Islands. Celtic *Goidels*, *Brythons* and *Belgae* arrived from Belgic Gaul during the latter part of the Bronze Age and in the early Iron Age, and except in the extreme north of the mainland and in the islands the civilization and speech of the people were definitely Celtic at the time of the Roman invasion of Britain.

The Roman Invasion.—In A.D. 80 Julius Agricola extended the Roman conquests in Britain by advancing into *Caledonia* as far as the "Grampian" Hills, but after a victory at *Mons Graupius* (since corrupted to "Grampius") he was recalled, and no further advance was made for about 60 years, when the Roman frontier was carried to the isthmus between the Forth and Clyde and marked by the *Wall of Pius*, towards which ran military roads from the Cheviots. The Roman occupation of Southern *Caledonia* was not so effective as that of South Britain, and before the close of the second century the northern limit of Roman Britain had receded to *Hadrian's Wall*, from the Tyne to Solway Firth.

The Scots.—During the later years of the Roman occupation the garrison was continually harassed by Pictish tribes north of the Wall, aided by Scots (the Gaelic tribe then dominant in Ireland), and when the garrison was withdrawn these *Picts* and *Scots* were the principal enemies of the Celtic *Brythons*, who are believed to have called in the Saxons to protect them from the invasions of their neighbours. A relic of the struggle between Pict and Brython is still to be seen in the *Catrail*, or *Picts' Work* Dyke, of Roxburgh (from Torwoodlee, near Galashiels, to Peel Fell in the Cheviots). Christianity was introduced into Southern *Caledonia* about 380 by missionaries from Romanized Britain, who penetrated to the northern districts and islands. After the withdrawal (or absorption) of the Roman garrison of Britain there were many years of tribal warfare between the Picts and Scots, the Brythonic *Waelisc* (Welsh) of Strathclyde (South-west Scotland and Cumberland), and the Anglo-Saxons of the Lothians. The *Waelisc* were isolated from their kinsmen in Wales by the victory of the West Saxons at Chester (613), and towards the close of the 9th century the Scots under *Kenneth Macalpine* became the dominant power in *Caledonia*. In the reign of Malcolm I. (943-954) the Brythons or *Waelisc* (Welsh) of Strathclyde were brought into subjection, the lowland kingdom of the English (Lothian) being conquered by Malcolm II. (1005-1034). From the close of the 11th century until the middle of the 16th there were constant wars between Scotland and England, the outstanding figures in the struggle being *William Wallace*, who defeated the English at Stirling Bridge (1297), and *Robert Bruce*, who won the victory of Bannockburn (1314). James IV. and many of his nobles fell at the disastrous battle of *Flodden* (1513), and in 1603 James VI., the Stuart King of Scotland and the heir to the Tudor line of England (his mother, Mary "Queen of Scots," was the great-granddaughter of Henry VII.), succeeded Queen Elizabeth I. on the throne, his successors reigning as Sovereigns of Great Britain. After the abdication (by flight) of James VII. and II., the crown devolved upon William III. (grandson of Charles I.) and Mary (daughter of James VII. and II.) and, their issue failing, upon Anne (second daughter of James VII. and II.). Anne's children died young, and the throne devolved upon George I. (great-grandson of James VI. and I.) In 1689 Graham of Claverhouse "roused the Highlands" on behalf of James VII. and II., but died after a military success at Killiecrankie. In 1715, armed risings led to the indecisive battle of *Sherrifmuir*, but the movement died down until 1745, when Prince Charles Edward defeated the Royalist troops under Sir John Cope at *Prestonpans* and advanced to Derby in England (1746). From Derby, the adherents of "James VIII. and III." (the title claimed for his father by Prince Charles Edward) fell back on the defensive, and the *Jacobite* movement was finally crushed by the Royalist troops under the Duke of Cumberland at *Culloden* (April 16, 1746).

The Hebrides did not become part of the Kingdom of Scotland until 1266, when they were ceded to Alexander III. by Magnus of Norway. Orkney and Shetland fell to the Scottish Crown as a pledge for the unpaid dowry of Margaret of Denmark, wife of James III., in 1468, the Danish suzerainty being formally relinquished in 1590.

Scotland is represented in the *Imperial Parliament* by 71 members, of whom 39 represent Counties, and 32 represent Burghs. On account of the scattered nature of the constituency, the election in Orkney and Shetland is exempted from the rule that all polls must be held on the same day.

PRINCIPAL SCOTTISH CITIES

EDINBURGH

EDINBURGH, the Capital of the Kingdom, has a municipal area of 33,294 acres, and a population at the Census of 1951 of 466,943; estimated, Dec. 31, 1958, 467,410. The city is built on a group of hills and contains in Princes Street one of the most beautiful thoroughfares in the world. The principal buildings are St. Giles's Church (restored 1879-83), and St. Mary's (Scottish Episcopal) Cathedral (Sir Gilbert Scott), the Castle (which contains, in St. Margaret's Chapel, the oldest building in Edinburgh), the Scottish National War Memorial, Parliament House (the present seat of the judiciary), the National and Signet Libraries, the University, the General Register House (Robert Adam), Royal Scottish Academy, National Portrait Gallery, and the Palace of Holyroodhouse (containing parts of the royal palace of James IV. and V.). The city is governed by a town council of 71 Members, and sends 7 Members to Parliament.

Rt. Hon. Lord Provost, Sir Ian Johnson-Gilbert,

C.B.E.

Town Clerk, W. Borland.

City Chamberlain, A. L. Imrie.

GLASGOW

GLASGOW, a Royal Burgh. City and County of a City, and the principal commercial centre in Scotland, has a municipal area of 38,647 acres and a population at the 1951 Census of 1,089,555 (estimated June, 1958, 1,078,958). The city occupies the north and south banks of the Clyde, one of the chief commercial estuaries of the world. The tonnage of shipping using the harbour in 1948-59 was 15,291,056. The principal industries are iron and steel works, ship-building, chemicals, leather, woollens, muslin-weaving, distilling, tobacco, cotton-mills, and furniture. The chief buildings are the Early English Cathedral, built early in the 13th century, and incorporating part of an earlier structure, the University (Sir Gilbert Scott), the City Chambers, the Royal Infirmary and the Western and Victoria Infirmaries, the Art Galleries and the Mitchell Library. The city is governed by a town council of 113 Members, and sends 13 Members to Parliament.

Rt. Hon. Lord Provost, M. Galpern.

Town Clerk (vacant).

City Chamberlain, G. B. Esslemont. C.B.E.

ABERDEEN

ABERDEEN, a City and a Royal, Municipal and Parliamentary Burgh, 130 miles N.E. of Edinburgh, received its charter as a Royal Burgh from William the Lion in 1179. The municipal area is 11,034 acres, with a population (at the Census of 1951) of 182,729; estimated, Dec., 1958, 186,350. The chief industries are tourist traffic, quarrying and granite working, white fish, salmon and herring fisheries, engineering, chemicals, shipbuilding, paper-making, woollen and linen manufacture. From an architectural point of view, Aberdeen is truly famous for its many beautiful buildings, including Marischal College, reputed to be the most imposing white granite building in the world,

King's College (1494), St. Machar Cathedral (1378), the Auld Brig o' Balgowrie (1320) and the Municipal Buildings. There is a sea beach promenade, which stretches for fully two and a half miles along golden sands, and at Hazlehead an open public park of 800 acres of which 200 are wooded, with one of the finest public golf courses in Scotland. The climate is bracing and healthy. The city is governed by a Town Council of 37 Members, and sends 2 Members to Parliament.

The Lord Provost (May 1958-May 1961), G. Stephen.

Town Clerk, J. C. Rennie.

City Chamberlain, W. G. A. McInnes.

CHIEFS OF CLANS AND NAMES IN SCOTLAND

The following list of Chiefs comprises the persons officially recognized as such by inheritance of the ancestral arms "without brisur or mark of cadency" under the Act 1672 cap. 47, and/or relative supporters, under decree of the Court of the Lord Lyon. It does not purport to include self-styled, or Society-selected "Chiefs" but the hereditary Heads of "Honourable Families" who conform to the evidence that "clan and family mean exactly the same thing"; and the definitions of Sir George Mackenzie of Roscaugh, Lord Advocate to Charles II., that the undifferenced arms denote the "Chief for so we call the Representative of the Family . . . and in the Erse (Gaelic) with us the Chief of the Family is called the Head of the Clan."—and the unanimous opinions of the Law Lords in *Seaforth v. Allangrange*, Nov. 17, 1921, to the same effect viz. that the undifferenced shield of arms denotes the Chief of the Clan; which in this nobiliary, and hereditary familial sense of parental organization or kin, is accordingly denoted by the determination of armorial succession by decree of the Court of the Lord Lyon. These broadbased family organizations were termed "Names" in the Lowlands, where all members bore the same basic surname, and "Clans" in the Border and Highland areas where surnames were a later development and evolved from complicated genealogical descriptions, the "clan name" being normally the name of the chief's house.

THE ROYAL HOUSE: H.M. The Queen.

ARBUTHNOTT: Viscount of Arbuthnott, Fordoun, Kincardineshire.

BARCLAY: Theodore B. de Tollie Barclay, 90 Divisadero Street, San Francisco, 17.

STANDING COUNCIL OF SCOTTISH CHIEFS

The objects of the Council, which is non-political, are to consider matters affecting Scottish Chiefs (both Lowland and Highland) and to represent their views and interests to H.M. Government, to Departments of State, to Local Authorities, to Press and Public and to Associations connected with Clan and Family in Britain and Overseas; also to take such steps as may seem expedient to protect the titles, armorial bearings or other insignia of Chiefs from exploitation or misuse in trade or otherwise.

Membership of the Council is open to any holder of the absolute undifferenced Arms of any Scottish family who has hereditary supporters, and, in exceptional cases, to a duly certificated Head of a considerable House.

Covener, The Earl of Elgin and Kincardine, K.T., C.M.G., T.D.

Secretary, Ian M. Campbell, T.D., W.S., 18 Duke Street, Edinburgh, 1.

CONSTITUTION AND GOVERNMENT

Under the Government of Ireland Act, 1920, a separate Parliament and Executive Government were established for Northern Ireland. Under the Constitution certain legislative and fiscal powers are reserved to the Parliament of the United Kingdom.

The Northern Irish Parliament consists of a *House of Commons* of 52 elected members (who receive an allowance) and a *Senate* of 24 *ex-officio* Senators and 24 Senators elected by the members of the House of Commons on the proportional representation system. At the General Election of March 20, 1958 there were elected, Unionists 37, Northern Ireland Labour 4, Nationalists 7, Republican Labour 1, Independent Labour 1, Independent Nationalist 1, Independent, 1. Northern Ireland continues under the Act of 1920 to return 12 members to the House of Commons at Westminster.

The Executive power is vested in the Governor on behalf of Her Majesty the Queen; he holds office for 6 years, and is advised by 9 Ministers responsible to Parliament.

EDUCATION

On Dec. 31, 1958, there were 1,597 Primary (including Nursery and Special) Schools with 203,165 pupils, 81 Grammar Schools with 35,577 pupils, 73 Secondary Intermediate Schools with 35,968 pupils, and 33 Technical Intermediate Schools with 5,459 pupils. There were also 179 Institutions of Further Education, with 2,947 full-time and 38,309 part-time students. The Queen's University at Belfast had 50 Professors, 21 Readers, 183 Lecturers and Assistant Lecturers, 7 Staff Tutors, and 3,202 students. Magee University College, Londonderry, had 5 Professors, 17 Lecturers, and 208 students.

FINANCE

The greater part of the taxation in Northern Ireland is imposed and collected by the United Kingdom Government. After deducting the cost of collection, certain services reserved to the United Kingdom Parliament, and the Imperial Contribution, the balance is paid over to Northern Ireland's Exchequer. The Contribution so made by Northern Ireland to the cost of Imperial services, i.e. Navy, Army and Air Force, National Debt, etc., for the period from 1921 to March 31, 1958, amounted to £403,674,344. The Imperial contribution has been provisionally fixed at £9,000,000 for 1958-59 and £3,000,000 for 1959-60.

PRODUCTION

Industries.—The total value of the industrial production of Northern Ireland in 1957 was approximately £406,000,000, and employment on industrial production was given to about 222,000 persons. The linen industry, employing 43,000 persons produced goods to the value of £38,000,000, some £16,000,000 worth being sold to customers outside the United Kingdom. The other main manufacturing industries are engineering, ship-building and aircraft which employ 52,000 persons. Launchings of mercantile shipping at Belfast amounted to 100,000 tons in 1958. Clothing to the value of over £24,000,000 was manufactured in 1957, almost half of which was accounted for by shirts and collars, which are manufactured principally in Londonderry. Other industries of importance to the economy of Northern Ireland are the manufacture of tobacco and cigarettes; the processing of agricultural products; furniture; rope; wool; and hosiery manufactures.

Minerals.—About 2,430 men were employed in mining and quarrying operations in Northern Ireland in 1958, and the minerals raised were valued at some £2,292,000.

Fisheries.—The total value of sea and freshwater fish caught in 1958 was £591,000.

COMMUNICATIONS

Seaports.—The amount of shipping using the principal ports in 1958 was about 8,000,000 tons. Regular passenger and freight services are maintained from Belfast to Liverpool, Heysham, and Glasgow, from Larne to Stranraer and from Londonderry to Glasgow.

Vehicle ferry services operate between Belfast and Preston, between Larne and Preston and between Larne and Ardrossan.

Road and Rail Transport.—The Ulster Transport Authority carried 84,594,940 passengers by road and 6,897,090 by rail, 1,310,692 tons of merchandise by road and 218,327 tons by rail, and 932,814 head of livestock by road in the year ended Sept. 30, 1958.

Airways.—Passenger and freight services are in operation between Northern Ireland and airports throughout the British Isles. 269,566 passengers were carried to or from Nutt's Corner Airport, Belfast in 1958.

THE ARMS OF NORTHERN IRELAND

ARMS.—Argent, a cross gules, over all on a 6-pointed star of the field ensigned by an imperial Crown proper, a dexter hand couped at the wrist of the second.

BELFAST

BELFAST, a City, the seat of Government of Northern Ireland, situated at the mouth of the River Lagan at its entrance to Belfast Lough, has a municipal area of 15,357 acres, exclusive of tidal water (1,223) and a population (1958) of 436,200. The city received its first charter of incorporation in 1613 and has since grown, owing to its easy access by sea to Scottish coal and iron, to be a great industrial centre. The chief industries are ship-building and the manufacture of aircraft, machinery, textiles, ropes and tobacco. Belfast is an important seaport with extensive docks.

The principal buildings are of a relatively recent date and include the Parliament Buildings at Stormont, the City Hall, the Law Courts, the Public Library and the Museum and Art Gallery. The Queen's University (previously Queen's College) was chartered in 1908.

The city returns 16 members to the Parliament of Northern Ireland and 4 members to the House of Commons at Westminster. Belfast was created a city in 1888 and the title of Lord Mayor was conferred in 1897.

Lord Mayor (1959-60), R. G. C. Kinahan, E.R.D.
Town Clerk, J. Dunlop, C.B.E.

LONDONDERRY

LONDONDERRY, a City and County Borough, situated on the River Foyle, has a population (estimated, 1959) of 51,500 and was reputedly founded in 546 by St. Columba. Londonderry (formerly Derry) has important associations with the City of London. The Irish Society, under its royal charter of 1613, fortified the city and was for a long period closely associated with its administration.

Famous for the great siege of 1688-89, when for 105 days the town held out against the forces of James II. until relieved by sea, Londonderry was an important naval base throughout the Second World War. Interesting buildings are the Protestant Cathedral of St. Columba's (1633) and the Guildhall reconstructed in 1912 and containing a number of beautiful stained glass windows, many of which were presented by the livery companies of London. The famous Walls are still intact and form a circuit of almost a mile around the old city. The manufacture of shirts and collars is the staple industry. Other industries include motor and mechanical engineering and fancy box making. A large part of Ulster's agricultural export trade passes through the port.

Mayor (1959-60), J. G. Colhoun.
Town Clerk, R. H. Henderson.

THE ISLE OF MAN (MONA)

an island in the Irish Sea, in lat. $54^{\circ} 3' - 54^{\circ} 25' N.$, and long $4^{\circ} 18' - 4^{\circ} 47' W.$, nearly equidistant from England, Scotland, and Ireland. The total land area is 145,325 acres (227 sq. miles), with a population in April, 1951, of 54,499 (25,086 males, 29,413 females). In 1958 the births numbered 662 and the deaths 735. 355 persons were returned at the Census of 1951 as able to speak the Manx language, compared with 4,657 in 1901 and 529 in 1931. The cultivated area (1958) was 77,221 acres, and the live-stock included 781 horses, 26,703 cattle, 98,561 sheep and 8,507 pigs. The island's main industry is catering for holiday-makers (numbering about 500,000 in the year) from all parts of the British Isles.

The land is rich in minerals, lead, blende and slate, and exports some agricultural produce. There are forty-seven miles of railway and about 25 miles of electric tram road.

Government.—The Isle of Man is governed by a Legislature, called the Tynwald, consisting of two branches—the Legislative Council and the House of Keys. The Council consists of the Lieutenant-Governor, the Bishop of Sodor and Man, the two Deemsters, the Attorney-General, 2 members appointed by the Lieutenant-Governor, and 4 members appointed by the House of Keys. The House of Keys (possibly from the Scandinavian *keise*=chosen) is one of the most ancient legislative assemblies in the world. It consists of 24 members, elected by the adult male and female population, 13 from the six *sheadings*, 7 from Douglas, 2 from Ramsey, and 2 each from Castletown and Peel. Bills after having passed both Houses are signed by the members, and then sent for the Royal Assent. After receiving the Royal Assent, a Bill does not become law unless promulgated within the ensuing twelve months, and on the first "Tynwald Day" (July 5) following it is announced in the English and Manx languages on the Tynwald Hill. On the promulgation taking place a certificate thereof is signed by the Lieutenant-Governor and the Speaker of the House of Keys. Her Majesty the Queen visited the island in 1955, and presided over Tynwald on August 9.

Finance.—An annual contribution of 5 per cent. of the net "Common Purse" Receipts amounting to approximately £105,000 is made to the Imperial Government. In 1921 Tynwald accepted liability for the redemption of £250,000 War Stock, and in 1927 liability for a further sum of £500,000 of War Stock was accepted in final settlement of all responsibility to the Imperial Government in respect of the cost of the War (1914-18). The Isle of Man has made, in all, free gifts of £1,250,000 to the British Government and has lent £1,000,000 free of interest, £500,000 of the latter being converted into a free gift on June 15, 1948. The chief source of revenue is found in the customs duties, the only direct taxation being surtax and income tax. Income tax ranges from 2s. 3d. in the £ for taxable incomes over £250 to 4s. 6d. for taxable incomes of £750 and over. Surtax is payable on incomes of £2,500 per annum at the rate of 10d. in the £, rising to 7s. 6d. in the £ on incomes of £20,000 and over per annum. There are 31 primary, 4 secondary schools, a school of technology, arts and crafts and a domestic science college, in addition to King William's College and the Buchan School for Girls; the gross expenditure on public education in 1957-58 was £536,740.

THE CHANNEL ISLANDS

situated off the north-west coast of France (at distances of from ten to thirty miles), are the only portions of the *Dukedom of Normandy* now belonging to the Crown, to which they have been attached ever since the Conquest. They consist of Jersey (28,717 acres), Guernsey (15,654 acres), Alderney (1,962 acres), Brechou (74), Great Sark (1,035), Little Sark (239), Herm (320), Jethou (44), and Lihou (38), a total of 48,083 acres, or 75 square miles. At the 1951 census the population of Jersey was 57,296, and of Guernsey, etc. 45,474; The estimated populations in 1958 were: Jersey, 55,288; Guernsey, etc. 42,519 (Guernsey, 40,721, Alderney, 1,350; Sark, 448).

The climate is mild, and the soil exceptionally productive. The land under cultivation in 1958 was 40,252 vergées (2½ vergées=1 acre) in Jersey, and about 18,000 vergées in Guernsey, the principal product of the soil of Jersey being potatoes and tomatoes, and of Guernsey tomatoes, flowers and grapes. The famous Jersey and Guernsey breeds of cows have earned a well-deserved celebrity. The Lieutenant-Governors and Commanders-in-Chief of Jersey and Guernsey are the Personal Representatives of the Sovereign and the channel of communication between H.M. Government and the Insular Governments. The Bailiffs of Jersey and Guernsey, appointed by the Crown, are Presidents both of the Assembly of the States (the Insular Legislature) and of the Royal Court in their respective Bailiwicks.

The official language is English and a Norman-French *patois* is also in use (except in Alderney). The principal imports are coal and coke, building material and groceries and provisions, and the chief exports potatoes, tomatoes, grapes, flowers, granite and cattle. The chief town of Jersey is St. Helier, on the south coast; the principal town of Guernsey is St. Peter Port, on the east coast, and of Alderney is St. Anne's. A telephone exchange was opened on Alderney in May, 1949 and there is one in Sark. Herm is also connected to Guernsey by telephone.

The islands were in German occupation from 1940 to 1945.

PATRON SAINTS

St. George, Patron Saint of England.—St. George is believed to have been born in Cappadocia, of Christian parents, in the latter part of the 3rd century and to have served with distinction as a soldier under the Emperor Diocletian, including a visit to England on a military mission. When the persecution of Christians was ordered, St. George sought a personal interview to remonstrate with the Emperor and after a profession of faith resigned his military commission. Arrest and torture followed and he was martyred at Nicomedia on April 23, 303, a day ordered to be kept in remembrance as a national festival by the Council of Oxford in 1222, although it was not until the reign of Edward III, that he was made patron saint of England. His connection with a dragon seems to date from the close of the 6th century and to be due to the transfer of his remains from Nicomedia to Lydda, close to the scene of the legendary exploit of Perseus in rescuing Andromeda and slaying the sea monster, credit for which became attached to the Christian martyr. April 23 is not included among the Red Letter Days, the list of which was drawn up before the canonization of St. George.

St. David, Patron Saint of Wales.—St. David is believed to have been born near the beginning and to have died towards the end of the 5th century, his father being Prince Sandde and his mother Non (afterwards a Christian saint). St. David was an eloquent preacher and became Primate of South Wales while Bishop of Caerleon on Usk, but he afterwards moved the seat of the Primacy from Caerleon to Menevia, now St. David's. At

the request of Henry I, he was canonized in the early part of the 12th century and became the tutelary saint of Wales, his annual festival being observed on March 1. This date is not included among the Red Letter Days, which were settled before the canonization of St. David.

St. Andrew, Patron Saint of Scotland.—St. Andrew, one of the Christian Apostles and brother of Simon Peter was born at Bethsaida on the Lake of Galilee and lived at Capernaum. He preached the Gospel in Asia Minor and in Scythia along the shores of the Black Sea and became the patron saint of Russia. It is believed that he suffered crucifixion at Patras in Achaea, on a *crux decussata* (now known as St. Andrew's Cross) and that his relics were removed from Patras to Constantinople and thence to St. Andrews, probably in the 8th century, since which time he has been the patron saint of Scotland. The festival of St. Andrew is held on November 30, a church festival indicated in the calendar by red letters.

St. Patrick, Patron Saint of Ireland.—St. Patrick was born in England about 389 and was carried off to Ireland as a slave about sixteen years later, escaping to Gaul at the age of 22. He was ordained deacon at Auxerre and having been consecrated Bishop in 432 was despatched to Wicklow to reorganize the Christian communities in Ireland. He founded the see of Armagh and introduced Latin into Ireland as the language of the Church. He died in 461 and his festival is celebrated on March 17, which is not reckoned among Red Letter Days, the list of which was drawn up before the canonization of St. Patrick.

The British Commonwealth of Nations

INTRODUCTION

AREA AND POPULATION.—The total area of the British Commonwealth is estimated to be about 144 million square miles. Details of the areas and populations of the member states and dependencies appear in the following pages and are also tabulated on pp. 196–201. The total population of the British Commonwealth was estimated in 1959 at 629,000,000.

GOVERNMENT.—The Commonwealth is a free association of ten sovereign independent states, the United Kingdom, Canada, Australia, New Zealand, South Africa, India, Pakistan, Ceylon, Ghana and the Federation of Malaya, together with their dependencies.

The Commonwealth has no written constitution but its members are bound together by a community of ideals and interest which springs from a common historical background and a common political heritage which in spite of diversities of race and tradition has given rise to a broadly common pattern of institutions, legislative, executive and judicial. Most members of the Commonwealth have certain constitutional features in common. They are parliamentary democracies, their laws being made with the consent of a freely elected parliament after discussion in that parliament, the executive government holding office by virtue of the support of a majority in parliament. Ministers, who must be members of parliament, are collectively responsible for the actions of the executive. With the exception of New Zealand, Pakistan and Ghana, the Parliaments of the Commonwealth have two chambers, but in the case of the upper house the method of choosing members varies. Although legislation can be initiated in them, the upper houses are principally revising bodies and the lower houses, elected by secret ballot on a basis of adult suffrage, are dominant. The office of Speaker of the lower house is a feature of all Commonwealth parliaments.

At the head of each of the Parliaments of the Commonwealth (except those of India, Pakistan and the Federation of Malaya) is the Queen, in whose name the administration is carried on. In all member countries of the Commonwealth except the Republics of India and Pakistan and the Federation of Malaya, Her Majesty is represented by the Governor-General, who in all essential respects holds the same position in relation to the administration of public affairs as is held by the Sovereign in Great Britain. The Governor-General is appointed by the Queen on the recommendation of the Government of the country concerned and is wholly independent of the Government of the United Kingdom. He is in many cases a national of the country in which he holds office. Her Majesty is Queen of the United Kingdom, Canada, Australia, New Zealand, South Africa, Ceylon and Ghana, all of whom owe common allegiance to her, and is the symbol of their free association in the Commonwealth. India and Pakistan being Republics with Presidents as head of the state and the Federation of Malaya which has one of the Malay Rulers as Head of State, do not owe allegiance to the Queen, but accept her as the symbol of the free association of member nations of the Commonwealth and as such as Head of the Commonwealth.

The status of member nations was defined by the Imperial Conference of 1926 and given legal substance by the *Statute of Westminster, 1931*, in which the Commonwealth nations were described as "autonomous communities within the British Empire, equal in status, in no way subordinate one

to another, but united by a common allegiance to the Crown and freely associated as members of the British Commonwealth of Nations." Other parts of the Commonwealth, such as Colonies, while they may be described as "Commonwealth countries," are not members of the Commonwealth.

FEDERATION OF RHODESIA AND NYASALAND.—Following a conference on Central African Federation held in London in January, 1953, and a referendum held in Southern Rhodesia on April 9, the *Rhodesia and Nyasaland Federation Act* was passed by the United Kingdom Parliament on July 14, 1953, and the Federation of Rhodesia and Nyasaland, consisting of the self-governing Colony of Southern Rhodesia and the Protectorates of Northern Rhodesia and Nyasaland, established by Order in Council. Southern Rhodesia, Northern Rhodesia and Nyasaland are each proportionately represented in a Federal Assembly consisting of a Speaker and 59 members, which has control of defence, overseas trade, currency, transport, postal services and other matters of Federal concern. The Prime Minister and other Ministers are appointed by the Governor-General. For a period of ten years from the inception of the constitution there will be no change in the division of powers between the Federation and the territories except with the consent of all three territorial legislatures. (See main article under DOMINIONS, COLONIES AND PROTECTORATES.)

CONSULTATION.—Before the Second World War it was customary for an Imperial Conference, a formal gathering of delegates from the Commonwealth nations headed by their Prime Ministers, to meet every few years for discussion of a wide range of common problems. Its functions were purely advisory or consultative, and, as it had neither legislative nor executive authority, its resolutions were not binding on the participating Governments, though normally these Governments conformed to resolutions adopted unanimously. The last Imperial Conference was held in 1937. During the War informal meetings of Ministers were substituted. Imperial Conferences have now been replaced by Commonwealth Prime Ministers' Meetings. There have also been frequent Commonwealth ministerial meetings and conferences on Defence, Finance, etc.

CITIZENSHIP AND NATIONALITY.—Each member of the Commonwealth of Nations defines the citizenship and nationality of its own people and determines the status of other Commonwealth nationals within its own boundaries. The United Kingdom, Canada, Australia, New Zealand, Pakistan, Ghana and the Federation of Malaya have not only created a local citizenship but have also conferred on their citizens the common status of Commonwealth citizen or British subject.* The Union of South Africa, and Ceylon, have created only a single citizenship without making provision for the common status, though to some extent drawing a distinction between citizens of other Commonwealth countries and aliens. India, in addition to creating Indian citizenship, has recognized in India, on a reciprocal basis, the common status possessed by citizens of other Commonwealth countries. The Republic of Ireland, which in 1949 ceased to be a member of the

*In addition under the law of Southern Rhodesia citizens of Southern Rhodesia have the common status of British subject.

Commonwealth, is not regarded by the other Commonwealth nations as a foreign country or her citizens as foreigners. Although Ambassadors instead of High Commissioners are now exchanged between the Republic of Ireland and Commonwealth countries, her relations with the United Kingdom are conducted through the Commonwealth Relations Office and not through the Foreign Office.

THE JUDICATURE.—The Supreme Judicial Authority of the Colonial Empire is the Judicial Committee of the Privy Council, before which appeals may be brought (in the form of a petition to the Crown) from Consular Courts and Courts of Vice-Admiralty, and also from the Courts of certain members of the Commonwealth. Arrangements have been made under which appeals to the Head of the Federation of Malaya may be entertained by the Committee. The Committee consists of such members of the Privy Council as have held or are holding high judicial office, provision being made for the inclusion of representatives of other Commonwealth countries. The members of the Commonwealth have each a broadly similar judicial system, judges (except in India and Pakistan, where they are appointed by the President) being appointed by the Governor-General on the advice of the Government concerned. In Ghana puisne judges of the Supreme Court are appointed by the Governor-General on the advice of a Judicial Service Commission. In the Federation of Malaya they are appointed by the Head of State on the recommendation of the Judicial and Legal Service Commission. The Supreme Judicial Authority for Great Britain and Northern Ireland is the House of Lords.

DEFENCE.—Each of the independent members of the Commonwealth and also the Federation of Rhodesia and Nyasaland is completely responsible for its own defence. Although there is no central organization to co-ordinate the defence strategy and resources of the Commonwealth, there is close liaison between the responsible governments and considerable day to day practical co-operation by the Services. There are ministerial conferences, meetings between High Commissioners and the Governments to which they are accredited, constant exchange of information and correspondence and personal contacts between Service advisers and officials. During the Second World War collaboration between Commonwealth countries was comprehensive and continuous—each of the then members (except the Republic of Ireland) entered the war in 1939.

The territories for whose defence the United Kingdom is responsible play their part and make their contribution to Commonwealth defence as far as their means allow. While the United Kingdom safeguards sea and air communications, using bases in the territories and providing some garrisons, the dependencies are responsible for the forces necessary for their own security (although in some cases the United Kingdom meets the cost).

Membership of the Commonwealth imposes no formal collective security commitment, but individual members may of course assume special international obligations for the maintenance of peace and security. All are members of the United Nations. The United Kingdom and Canada belong to N.A.T.O.; the United Kingdom, Australia, New Zealand and Pakistan are members of S.E.A.T.O.; Australia and New Zealand are signatories of the Pacific Security Treaty. The United Kingdom, Australia and New Zealand co-ordinate their defence plans in South East Asia and the South West Pacific through a joint defence machinery specially devised for this purpose.

COLONIES AND PROTECTORATES.—The United Kingdom, Australia, New Zealand and the Union of South Africa have dependencies for which they are independently responsible. The United Kingdom is responsible, through the Colonial Office, for 33 administrative units which include the following colonies, protectorates, protected states, and trust territories.

Aden—colony and protectorates. The Governor of Aden is responsible for Kamaran Island.

Bahamas—colony.

Bermuda—colony.

British Guiana—colony.

British Honduras—colony.

British Virgin Islands—colony.

Falkland Islands—colony with dependencies, of which the principal are South Georgia, South Orkney, South Sandwich, South Shetland and Graham Land.

Fiji—colony. The Governor of Fiji is also Governor of the Pitcairn Islands Group and responsible for relations with the protected state of Tonga.

Gambia—colony and protectorate.

Gibraltar—colony.

Hong Kong—colony and leased territories.

Kenya—colony and protectorate.

Malta—colony.

Mauritius—colony.

North Borneo—colony.

St. Helena—colony with dependencies (Ascension Island and Tristan da Cunha are the principal).

Sarawak—colony. The governor is *ex officio* High Commissioner for Brunei, a protected state.

Seychelles—colony.

Sierra Leone—colony and protectorate.

Singapore—protected state.

Somaland Protectorate—protectorate.

Tanganyika—Trust Territory, under United Kingdom Trusteeship.

Uganda—protectorate.

Western Pacific High Commission—the British Solomon Islands Protectorate, the Gilbert and Ellice Islands Colony*, the Central and Southern Line Islands, and the New Hebrides Condominium, which share a High Commissioner.

West Indies—a federation of the colonies of Antigua, Barbados, Dominica, Grenada, Jamaica, Montserrat, St. Christopher-Nevis and Anguilla, St. Lucia, St. Vincent and Trinidad and Tobago (established, Jan. 1958).

Zanzibar—protectorate.

*Canton and Enderbury Islands, which are part of the Colony, are administered as an Anglo-American condominium under a 50-year agreement having effect from 1939.

Basutoland, Bechuanaland Protectorate and Swaziland—three protectorates in South Africa administered by the United Kingdom, through the Commonwealth Relations Office and H.M. High Commissioner in Pretoria.

The Maldives Islands, a protected state, consisting of groups of coral atolls in the Indian Ocean.

Federation of Rhodesia and Nyasaland—included in the Federation are Northern Rhodesia and Nyasaland, which are Protectorates; the Secretary of State for the Colonies retaining certain responsibilities towards them under the Federal Constitution.

Colony (or Settlement): a territory belonging by settlement, conquest or annexation to the British Crown.

Protectorate: a territory not formally annexed, but in respect of which, by treaty, grant, usage, sufferance, and other lawful means, Her Majesty has power and jurisdiction.

Protected State: a territory under a ruler which enjoys Her Majesty's protection, over whose foreign affairs she exercises control but in respect of whose internal affairs she does not exercise jurisdiction.

Trust Territory: a territory administered by the United Kingdom government under the trusteeship system of the United Nations.

Condominium: a territory over which responsibility is shared by two administering powers.

Leased Territories: this term applies only to that part of the mainland of China which was in 1893 leased to Great Britain for 99 years and is administered by the Government of Hong Kong.

Other Commonwealth Dependencies.—Australia is responsible for Papua, the trust territory of New Guinea and (jointly with U.K. and New Zealand) Nauru Island. New Zealand is responsible for the trust territory of western Samoa and South Africa for South-West Africa. In addition they administer

a number of island territories and extensive Antarctic areas.

DEVELOPMENT AND FINANCE.—Complete financial autonomy is enjoyed by all members of the Commonwealth. Customs tariffs are generally lower for merchandise of British origin than for importations from foreign countries. There is no Imperial Debt, but certain obligations of Crown Colonies and Protectorates are met in the early stages of their development by the United Kingdom Government, and grants in aid of revenue are also made at need.

Under the *Colonial Development and Welfare Act, 1940*, annual sums of £5,000,000 for Development and £500,000 for Research were made available from United Kingdom Funds for 10 years from 1941. An Act passed in 1945 extended the grant period from 1951 to 1956, making £120,000,000 available in that period subject to a maximum of £17,500,000 in any one year, of which not more than £1,000,000 may be spent on research. A further Act in 1949 increased the annual amount to £20,000,000, of which not more than £2,500,000 can be drawn in any one year for research. The *Colonial Development and Welfare Act, 1955*, extends the life of the previous Acts to March 31, 1960, and provides an additional sum of £80,000,000, which, added to unspent balances remaining, made available for expenditure nearly £120,000,000 during 1955-60.

Canada was originally discovered by Cabot in 1497, but its history dates only from 1534, when the French took possession of the country. The first permanent settlement at Port Royal (now Annapolis), Nova Scotia, was founded in 1605, and Quebec was founded in 1608. In 1759 Quebec was captured by the British forces under General Wolfe, and in 1763 the whole territory of Canada became a possession of Great Britain by the Treaty of Paris of that year. Nova Scotia was ceded in 1713 by the Treaty of Utrecht, the Provinces of New Brunswick and Prince Edward Island being subsequently formed out of it. British Columbia was formed into a Crown colony in 1858, having previously been a part of the Hudson Bay Territory, and was united to Vancouver Island in 1866. By the British North America Act, passed in 1867, the Provinces of Upper and Lower Canada (Ontario and Quebec), Nova Scotia, and New Brunswick were united under the title of THE DOMINION OF CANADA, and provision was made in the Act for the admission at any subsequent period of the other territories of British North America. Provinces admitted since 1867 are: Manitoba (1870), British Columbia (1871), Prince Edward Island (1873), Alberta, Saskatchewan (1905) and Newfoundland (1949).

Canada occupies the whole of the northern part of the North American Continent (with the exception of Alaska), from 49° North latitude to the North Pole, and from the Pacific to the Atlantic Ocean. In Eastern Canada, the southernmost point is Middle Island in Lake Erie, at 41° 41'.

Relief.—The relief of Canada is dominated by the mountain ranges running north and south on the west side of the Continent, by the Pre-Cambrian shield on the east, with, in between, the northern extension of the North American Plain. From the physiographic point of view Canada has six main divisions. These are: (1) Appalachian-Acadian Region, (2) the Canadian Shield, (3) the St. Lawrence-Great Lakes Lowland, (4) the Interior Plains, (5) the Cordilleran Region and (6) the Arctic Archipelago. The first region occupies all that part of Canada lying southeast of the St. Lawrence. In general, the relief is an alternation of highlands and lowlands, and is hilly rather than mountainous. The lowlands area seldom rises over 600 feet above sea level. The great Canadian Shield comprises more than half of the area. The interior as a whole, is an undulating, low plateau (general level 1,000 to 1,500 feet), with the more rugged relief lying along the southern border in Northern Quebec and Labrador. Throughout the whole area water or muskeg-filled depressions separate irregular hills and ridges, 150 to 200 feet in elevation. Newfoundland as an outlying portion of the shield consists of glaciated, low rolling terrain broken here and there by mountains. The flat relief of the St. Lawrence-Great Lakes lowland varies from 500 feet in the east to 1,700 feet south of Georgian Bay. The whole area in the western part slopes gently to the Great Lakes. The most striking relief is provided by the eastward facing scarp of the Niagara escarpment (elevation 250 to 300 feet). The interior plains, comprising the Prairie Provinces, slope eastward and northward a few feet per mile. The descent from west to east is made from 5,000 feet to less than 1,000 feet, in three distinct levels, with each new level being marked by an eastward facing coteau or scarp. Horizontal strata and peneplanation make for slight relief of the level to rolling type. Five fairly well-developed topographic divisions mark out the Cordilleran region of western Canada. These are: (1) coastal ranges, largely above 5,000 feet with deep fiords and glaciated valleys, (2) the interior plateau, around 3,500 feet and comparatively level, (3) the Selkirk ranges, largely above 5,000 feet, (4) the Rocky Mountains with their chain of 10,000 to 12,000-foot peaks, and (5) the Peace River or Tramontane region with its rolling diversified country. The Arctic Archipelago, with its plateau-like character has an elevation between 500 and 1,000 feet, though in Baffin Land and Ellesmere Island the mountain ranges rise to nearly 7,000 feet. Two tremendous waterway systems, the St. Lawrence and the Mackenzie, providing thousands of miles of water highway, occupy a broad area of lowland with their dominant axis following the edge of the shield.

Climate.—The climate in the eastern and central portions presents greater extremes than in corresponding latitudes in Europe, but in the south-western portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder. Spring, summer, and autumn are of about seven to eight months' duration, and the winter four to five months.

GOVERNMENT

The Constitution of Canada has its source in the British North America Act of 1867 which created the Federation of Upper and Lower Canada, to which Federation the other Provinces have subsequently adhered. Under this Act Canada came into being on July 1, 1867 (Dominion Day), and under the Statute of Westminster, which received the royal assent on Dec. 12, 1931, Canada and the Provinces were exempted (in common with other self-governing Dominions of the Commonwealth of Nations) from the operation of the Colonial Laws Validity Act, the Statute of Westminster having removed all limitations with regard to the legislative autonomy of the Dominions.

The Executive power is vested in a Governor-General appointed by the Sovereign on the advice of the Canadian Ministry, and aided by a Privy Council.

THE LEGISLATURE

Parliament consists of a Senate and a House of Commons. The Senate consists of 102 members, nominated for life by the Governor-General, distributed between the various provinces thus: 24 for Ontario, 24 for Quebec, 10 for Nova Scotia, 10 for New Brunswick, 4 for Prince Edward Island, 6 for Newfoundland, 6 for British Columbia, 6 for Manitoba, 6 for Alberta, and 6 for Saskatchewan; each Senator must be thirty years old, a resident in the province for which he is appointed, a natural-born or naturalized subject of the Queen, and the owner of a property qualification amounting to \$4,000. The Speaker of the Senate is chosen by the Government of the day. The House of Commons is elected every five years at longest.

In 1952, through an amendment to the British North America Act, it was provided that the number of Members of the House should be 265 and that the representation of the provinces should forthwith, and thereafter on the completion of each decennial census, be readjusted by such authority, in such manner and from such time as the Parliament of Canada from time to time provided, subject to certain rules. A redistribution of the Parliamentary constituencies was made when an Act to readjust the representation in the House of Commons received Royal Assent on July 4, 1952. Under the terms of this Act, the number of representatives elected for each province is now as follows: 85 for Ontario, 75 for Quebec, 12 for Nova Scotia, 10 for New Brunswick, 14 for Manitoba, 22 for British Columbia, 4 for Prince Edward Island, 17 for Saskatchewan, 17 for Alberta, 7 for Newfoundland, 1 for the Yukon Territory and 1 for MacKenzie district of the Northwest Territories. (Total 265).

Members of the House of Commons must be Canadian citizens or other British subjects, qualified voters under the Elections Act and of the full age of twenty-one years; no property qualification is necessary, members are elected upon a very wide suffrage, and at the General Election in Dec. 1921, women exercised the franchise on the same terms as men for the first time in a Federal Election. For electoral purposes each province is divided into districts, returning a member on a plurality of votes taken by ballot. The members of the House themselves elect their Speaker, and twenty, including the Speaker, form a quorum. Members of the Upper and Lower Houses receive \$8,000 per annum, with travelling expenses and expense allowances, and deductions for non-attendance.

The Houses of Parliament were destroyed by fire on Feb. 3, 1916, the new buildings being started the same year; the foundation stone was laid by H.R.H. the Duke of Connaught (Gov.-Gen.), Sept. 1, 1916, and the corner stone of the main tower by H.R.H. the Prince of Wales (King Edward VIII.), Sept. 1, 1919. The Speaker's Chair in the new House of Commons (a replica of that at Westminster) was presented in 1921 by Viscount Ullswater (ex-Speaker of the House of Commons of the United Kingdom) on behalf of the United Kingdom branch of the Empire Parliamentary Association.

THE JUDICATURE

The *Judicature*.—Justice is administered, as in England, by judges, police magistrates, and justices of the peace, of whom the first-named are appointed by the Governor-General, for life, from among the foremost men at the Bar in the several provinces. The highest court is the Supreme Court of Canada, composed of a Chief Justice and eight puisne judges, and holding three sessions in the year at Ottawa. The only other Dominion Court, viz., the Exchequer Court of Canada, is presided over by separate judges, and its sittings may be held anywhere in Canada. The Provincial Courts include the Court of Chancery, Court of Queen's Bench, Court of Error and Appeal, Superior Courts, County Courts, General Sessions, and Division Courts. The duties of coroners are generally analogous to those in force in England, as are also methods of civil and criminal procedure, while trial by jury prevails.

NATIONAL DEFENCE

All matters relating to defence are the responsibility of the Minister of National Defence. Under his direction the Chiefs of Staff for the Navy, the Army and the Air Force are responsible for the control and administration of their respective Services. The Chairman of the Defence Research Board is responsible to the Minister for defence research and related matters.

Navy.—The Royal Canadian Navy is administered by Naval Headquarters in Ottawa through principal commands at Halifax, N.S., and Esquimalt, B.C., for the Regular Force, and a third command at Hamilton, Ont., for the R.C.N. (Reserve).

On April 30, 1959, the Navy had 56 ships, excluding auxiliaries, in commission and 25 in reserve or refitting, excluding three on loan to other government departments and three on loan to the Royal Norwegian Navy. There were 134 aircraft in service or reserve. Among the ships in commission were one light fleet carrier, one light cruiser, 22 destroyer escorts, 14 frigates, one coastal escort, 10 minesweepers, 3 patrol craft and one repair ship. Two new destroyer escorts were commissioned early in 1959 and four more were under construction, three of them scheduled for commissioning before the end of the year. On April 30, 1959, there were 20,421 officers and men in the Royal Canadian Navy (Regular) and 3,206 in the Royal Canadian Navy (Reserve Force on active list).

Army.—The Canadian Army with Headquarters at Ottawa exercises command and control in Canada through 5 commands and 8 areas.

On April 30, 1959, the Canadian Army (Regular) had 380 units active in Canada and abroad. The Regular Army consists of four infantry brigade groups and a number of static units and installations for command, training, administration and supply. One of the infantry brigade groups is stationed in Europe as part of the NATO Forces and is under command of the Supreme Allied Commander in Europe (SACEUR). On the same date there were 420 units in the Canadian Army (Militia) and 29 units in the Supplementary Reserve. These reserve units, along with the Regular Reserve, the Canadian Officers Training Corps, the Cadet Services of Canada and the Reserve Militia consist of officers and men enrolled for other than continuous full-time service. On April 30, 1959, the strength of the Canadian Army (Regular) was 47,968 officers and men and the Canadian Army (Militia) 40,974 officers and men.

The Canadian Army (Regular) is responsible for the maintenance of the 1,200 mile Northwest Highway System from Dawson Creek, B.C. to the Alaska-Yukon Border.

Air Force.—The Royal Canadian Air Force is administered by Air Force Headquarters at Ottawa through seven major formations. On April 30, 1959, the R.C.A.F. had 40 squadrons in service, 29 being regular and 11 auxiliary. Twelve were in Europe under NATO and the balance were in Canada, where there were nine CF-100 all-weather

interceptor squadrons for air defence, three maritime patrol squadrons; four transport squadrons; one reconnaissance squadron and 11 auxiliary squadrons. The strength of the R.C.A.F. (Regular) was 51,494 on April 30, 1959, and at the same date the R.C.A.F. (Auxiliary) was 4,032.

The Defence Research Board.—The purpose of the Defence Research Board is to make available for the defence of Canada the scientific resources of this country and to co-ordinate Canadian scientific efforts and knowledge with developments in allied countries.

The Board consists of a full-time Chairman and Vice-Chairman, six *ex officio* members and seven other members who are appointed for a term from industry and the universities. The *ex officio* members are the three Chiefs of Staff, the Deputy Minister of National Defence, the President of the National Research Council and a representative from the Department of Defence Production.

EDUCATION

Education is under the control of the Provincial Governments, the cost of the publicly controlled schools being met by local taxation, aided by provincial grants. There were (1957-58) 28,416 publicly controlled schools with 3,431,304 pupils. In addition there were 177,025 pupils in private elementary, secondary and commercial schools. There are special schools for Indians with 33,220 pupils (1957-58). At December 1, 1958, there were 34 universities and 246 other institutions of higher education with an estimated full-time university grade enrolment of 94,400. The University of Toronto, founded in 1827, had an enrolment of 10,956; British Columbia (1907) of 9,607; Montreal (1920) of 11,488; McGill (1829) of 6,988; Manitoba (1877) of 5,256; Saskatchewan (1907) of 4,650; Laval (1852) of 9,817; Alberta (1906) of 5,743; Queen's (1841) of 2,857; Ottawa (1848) of 2,314; Dalhousie (1818) of 1,626 and Western Ontario (1878) of 3,795. Figures include enrolment at affiliated colleges.

LANGUAGE AND LITERATURE

Languages.—Canada has two official languages, English and French. At the last census about 67 per cent. of the total population gave English and about 20 per cent. gave French as their native tongue. Some 1,727,000 (or 12 per cent.) are bilingual. Owing to the spread of education the percentages of illiterates is very low: 152,775 were unable to speak English or French.

Literature.—In addition to the rich heritages of English and French literature there is a definite Canadian literature in both tongues. In both languages history and biography were at first predominant but all fields have since been covered. In 1957 there were 111 daily newspapers published

in Canada, 91 in English, 13 in French and the rest in other languages, with an aggregate circulation of over 4,000,000. In addition, there were about 731 weekly newspapers published in English and 159 in French.

FINANCE

The official Rate of Exchange of the Canadian Dollar in 1945 was \$4.45 = £1 sterling. On Sept. 19, 1949, Canada devalued the Canadian dollar by 10 per cent in relation to the U.S. dollar, and the rate for sterling became \$3.08 = £1. On Sept. 30, 1950, the Canadian Government cancelled the official rates of exchange of the Canadian dollar and did not prescribe any new fixed official rate. During 1958 the average market rate for the U.S. dollar was 97.06 cents in terms of Canadian funds.

CANADIAN LOAN TO U.K.

The United Kingdom Financial Agreement Act of 1946 authorized a loan to U.K. of \$1,250,000,000 to enable the U.K. to buy Canada's export products during the period of world reconstruction. On Feb. 20, 1951, the U.K. Government announced that no further drawings would be made under the agreement, the total loan advanced amounting to \$1,185,000,000. During the fiscal year 1957-58 a repayment of \$16,000,000 was made, reducing the principal outstanding to \$1,081,000,000. In addition, the United Kingdom Government repaid the outstanding balance of £23,000,000 of the \$700,000,000 interest free loan granted under the Act of 1942.

CANADIAN PRODUCTION

Agriculture.—About 8 per cent. of the total land area of Canada is classified as farm land and approximately half of this is under cultivation, the remainder being woodland or suitable only for grazing purposes. Three quarters of the land at present cultivated is found in the prairie region of Western Canada. In 1957 there were 174,000,000 acres under cultivation and 17.1 per cent. of the population of Canada were engaged in farming.

The total gross farm value of all field crops produced on 60,213,000 acres in 1958 was \$1,400,055,000.

Shipping.—The registered shipping on Dec. 31, 1958, including inland vessels, was 18,797 vessels with net tonnage 1,754,382.

Canals.—In 1958 the vessels passing through Canadian canals numbered 27,370 of 35,096,767 tons of freight. There are six systems under control of the Federal Government with a total waterway of 1,875 miles (of which 509 miles are constructed canals).

Civil Aviation.—The number of revenue-producing passengers carried in 1958 was 4,554,035 compared with 4,319,920 in 1957. Revenue freight was 186,567,700 lb. or a decrease of 67,258,699 lb. over 1957. Mail pounds carried increased from 31,413,054 lb. in 1957 to 33,622,221 lb. in 1958.

Motor Vehicles.—Total motor vehicle registrations numbered 4,675,560 in 1958.

Post and Telegraphs.—There were 11,768 post offices on March 31, 1958. The net postal revenue was 177,492,873 in the fiscal year 1958. On March 31, 1958, there were 5,476 rural mail delivery routes on which were situated 600,000 boxes. The length of telegraph lines operated in 1957 was 48,379 miles; number of telegrams transmitted totalled 19,163,723.

On Dec. 31, 1957, there were 4,827,135 telephones and 18,161,444 miles of telephone wire in use.

YUKON TERRITORY

The Yukon Act, 1952, as amended, provides for the administration of the Territory by a Commissioner acting under instructions from time to time given by the Governor in Council or the Minister of Northern Affairs and National Resources. Legislative powers, analogous to those of a provincial government, are exercised by the Commissioner in Council. The Council comprises five members elected from electoral districts in the Territory. The area of the Territory is 207,076 square miles with a population (1958) of 13,000, including 1,700 Indians and Eskimos. Mining is the chief industry. Values of production in 1958 were: silver \$5,091,015; gold, \$2,351,756; lead, \$2,446,084; zinc, \$1,577,675; coal, \$58,975; cadmium, \$247,313.

SEAT OF GOVERNMENT, Whitehorse. Pop. (1958) 2,570.

Commissioner, F. H. Collins.

NORTHWEST TERRITORIES.

Area 1,304,903 square miles; population (estimated, 1958) 20,000, including approximately 12,000 Indians and Eskimos.

The Northwest Territories are subdivided into the districts of Mackenzie, Keewatin and Franklin.

The Northwest Territories Act, 1952, as amended, provides for the government of the Territories by a Commissioner (who is responsible to the Government through the Minister of Northern Affairs and National Resources), and a council of nine (comprising 4 members elected in the District of Mackenzie and 5 appointed members). Legislative powers, analogous to those of a provincial government, are exercised by the Commissioner in Council.

The chief industry of the Northwest Territories is mining. The value of gold production in 1958 was \$11,392,475, crude petroleum \$475,000; silver \$63,723; pitchblende \$9,628,000; copper \$230,395; nickel \$2,994,848. Fur produced in 1957-58 was valued at \$735,491.

SEAT OF GOVERNMENT, Ottawa. The Commissioner in Council holds two sessions each year, one in Ottawa and the other in the Territories.

Commissioner, R. Gordon Robertson.

Agent-General in London, Maj.-Gen. B. M. Hofmeister, C.B., C.B.E., D.S.O., British Columbia House, 1 Regent Street, S.W.1.

Finances.—Estimated Revenue for 1959-60, \$87,775,423. Estimated Expenditure, \$300,401,394 (including \$69,493,000 capital expenditure out of income). There is no direct debt.

Production and Industry.—The principal manufacturing centres are Vancouver, Trail, Victoria,

Kitimat, New Westminster, North Vancouver, Port Alberni, and Prince Rupert. The values of production of the principal primary industries in 1958 were:—Forests \$543,000,000; Agriculture \$121,000,000; Mining \$149,000,000; Fishing \$98,000,000. There are extensive coal measures and a vast and compact area of merchantable timber. Forestry and forest-based industries form the most important economic activities. British Columbia is the leading province of Canada in the quality and value of its timber and sawmill products, contributing about half the national output. The north-eastern part of the Province is developing petroleum and natural gas and in other parts gold, silver, copper, lead, zinc, asbestos and industrial minerals are being produced. The climate is healthy and temperate. The principal exports are lumber, pulp, paper, non-ferrous metals, gold, silver, fish and fruit. The Alaska Highway runs from Dawson, Creek, B.C., to the Yukon boundary and thence via Whitehorse and Dawson to Fairbanks in Alaska.

Principal Cities.—CAPITAL, VICTORIA. Metropolitan population (1956) 125,447. Vancouver (founded in 1886), the largest city in the Province, metropolitan population (1956) 665,077, is the western terminus of the C.P.R. and the C.N.R. and the southern terminal of the P.G.E., and possesses one of the finest natural harbours in the world. Other main centres are New Westminster (31,665), Coquitlam (20,800), Chilliwack (26,350), Nanaimo (12,705), Penticton (11,894), Trail (11,395), Prince George (10,563) and Prince Rupert (10,498).

MANITOBA

Area and Population.—Manitoba, originally the Red River settlement, is the central province of Canada. The Province has a considerable area of prairie land but is also a land of wide diversity combining 400 miles of sea-coast, large lakes and rivers covering an area of 26,789 square miles and Precambrian rock which covers about three-fifths of the Province. The total area is 246,512 square miles with a population of 870,000 (1958).

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council of 10 Ministers, who are members of the Legislative Assembly of 57 members. Each member of the Legislative Assembly receives an annual sessional allowance of \$3,000.

Lieut.-Governor, His Honour John Stewart McDiarmid (1953) \$9,000

Executive.

(June 30, 1958)

Premier and President of the Council, Acting Provincial Treasurer and Minister of Dominion-Provincial Relations, Hon. Dufferin Roblin \$20,000

Finances.—The revenues of the provincial government for the year ended March 31, 1958, were \$80,123,614, and the expenditure \$80,119,247.

Agriculture and Life Stock.—The total land area in Manitoba is 135,536,000 acres, of which 8,612,000 acres were under field crops in 1958. The gross value of agricultural production in 1958 was estimated at \$319,955,000, of which field crops represented \$167,307,000. Farm animals in 1958 numbered 865,000 cattle, 455,000 pigs, 78,000 sheep, 65,000 horses and 8,016,000 poultry.

Manufactures.—The gross value of manufactured products in 1958 was estimated at \$673,875,000. Manufacturing enterprises employed about 41,750 persons and paid \$139,850,000 in salaries and wages. The chief industrial centres are Winnipeg, St. Boniface, St. James, Brandon and Selkirk. The largest manufacturing industry is the food and beverage industry, followed by iron and steel products. Petroleum has grown into one of the most important industries in Manitoba.

Principal Cities.—CAPITAL, WINNIPEG, population (1956) 256,683. Other centres are St. Boniface (28,636), St. James (26,240), Brandon (24,579), Portage La Prairie (10,374).

NEW BRUNSWICK

Area and Population.—NEW BRUNSWICK is situated between 45°-48° N. lat. and 63° 47'-69° W. long. and comprises an area of 27,985 square miles, with a population (estimated at June 1, 1958) of 577,000. It was first colonized by British subjects in 1761, and in 1783 by the inhabitants of New England, who were dispossessed of their property in consequence of their loyalty to the British Crown.

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council, and a Legislative Assembly of 52 members elected by the people. At the General Election of June 18, 1956, 37 Conservative and 15 Liberal Members were returned.

Finance.—The estimated revenue for the year ending March 31, 1960 is \$74,888,691, and the ordinary expenditure \$74,842,836.

Agriculture and Live Stock.—The total land area is 17,582,720 acres, of which 869,965 were under field crops in 1958. The live stock in 1958 included 15,700 horses, 148,000 cattle, 37,000 sheep, 54,000 hogs and 842,000 poultry. Settlement is encouraged and improved farms are obtainable at reasonable rates. The chief commercial fish are lobsters, sardines, herring, cod and salmon. The estimated value of production of the fisheries in 1958 was \$24,000,000. The cheese factories in operation produced 864,913 lb. of cheese and the creameries 8,316,238 lb. of butter in 1958.

Manufactures.—The principal manufacturing centre is Saint John. Natural gas has been found in immense quantities in Albert County, and the south-eastern section of the Province is remarkably rich in oil shales. Coal is found (output, 1958, 790,573 tons, value \$6,633,503), also silver, lead, antimony, copper, iron, manganese, and other valuable minerals in considerable quantities.

Principal Cities.—CAPITAL. Ψ FREDERICTON: population (1956), 18,303. Ψ Saint John (pop. 52,491) is one of the principal winter ports of Canada and is connected by C.P.R. and Canadian National Railways with Montreal: Moncton (38,479); Lancaster (12,371); Edmundston (11,997); Campbellton (9,967).

NEWFOUNDLAND

Area and Population.—THE ISLAND OF NEWFOUNDLAND is situated between 46° 37'–51° 37' N. latitude and 52° 44'–59° 30' W. longitude, on the north-east side of the Gulf of St. Lawrence, and is separated from the North American Continent by the Straits of Belle Isle on the N.W. and by Cabot Strait on the S.W. The island is about 317 miles long and 316 miles broad and is triangular in shape, with Cape Bauld (N.), Cape Race (S.E.) and Cape Ray (S.W.) at the angles. It comprises an area of 156,185 sq. miles (inclusive of Labrador) with a population (estimated 1958) of 438,000.

Government.—On March 31, 1949, the island, with its dependency in Labrador, became the 10th Province of the Dominion of Canada. The Government is administered by a Lieutenant-Governor, aided by an Executive Council and a Legislative Assembly of 36 members.

The Legislature.

A General Election was held on Aug. 20, 1959. The present state of parties is: Liberal, 31; Progressive Conservative, 3; United Newfoundland Party, 2.

Speaker of the House of Assembly, Hon. J. R. Courage.
Clerk of the House of Assembly, R. Sheppard.

Finance.—The revenue, on current account, in 1958–59 was \$75,893,300 and the expenditure \$63,887,000. The estimated revenue for 1959–60 is \$71,587,000 and expenditure \$67,545,000.

Production and Industry.—With the exception of Gander, Bishop's Falls, Badger, Millertown, Buchans, Hovley, Deer Lake and that portion of the West Coast between St. George's and Port aux Basques the inhabitants are chiefly located on the coast-line of the shore and bays. Six mines are in operation: two iron ore, one limestone, one lead, zinc and copper, one fluorspar and one copper. Two pulp and paper mills are in operation with a total production of 486,418 tons of newsprint and 35,474 tons of sulphite pulp.

The value, in 1958, of products of the forests was estimated at \$75,000,000; fishery products were valued at \$20,000,000 and the estimated value of agricultural products was \$10,000,000. The value in 1958 of mineral products was \$68,752,000. Lead, zinc and copper production in 1958 was 80,668 tons, valued at \$23,192,000; iron ore production was 5,586,458 tons valued at \$37,834,000 and the value of fluorspar products was \$1,483,368.

Railways.—From April 1, 1949, the rail system, formerly owned and operated by the Newfoundland Government, was taken over by the Dominion of Canada and entrusted to the Canadian National Railway for operation. The main line of the railway extends from St. John's on the east coast to Port aux Basques on the west coast—a distance of 547 miles—with branches connecting with the ports of Argentia, Carbonear, Bonavista and Lewisporte, a total mileage of 705. There are also 56 miles of private line. Communication between various points on the coast and between Port aux Basques and North Sydney, Nova Scotia, is maintained by a fleet of 7 motor vessels and 9 steam vessels, operated by the Railway.

Posts and Telegraphs.—There were 650 post offices open in 1957. The number of telegraph and telephone offices was 686.

Civil Aviation.—Trans-Canada, British Overseas and 10 other lines (2 of them for local traffic only) operate from Gander Airport.

Shipping.—On Dec. 31, 1958, ships registered in Newfoundland consisted of 61 sailing vessels of 4,406 gross tons, 16 steam vessels of 14,279 gross tons and 757 motor vessels of 54,069 gross tons.

EXTERNAL TRADE 1957

Imports..... \$42,665,000
Exports..... \$109,050,000

Principal Cities.—The Capital, Ψ ST. JOHN'S (population 1956 census, 77,991) contains two cathedrals, several banks and numerous public buildings. Other towns are Corner Brook (23,225), Wabana (7,873), Grand Falls (6,064), Carbonar (3,995), Windsor (4,500), Gander (4,929), Bonavista (4,078), Goose Bay (Labrador) (4,007), Botwood (3,894), Stephenville (3,762) and Bishop's Falls (3,393).

LABRADOR

Labrador, the most northerly district in the Province of Newfoundland, forms the most easterly part of the North American continent, and extends from Blanc Sablon, at the north-east entrance to the Straits of Belle Isle, on the south, to Cape Chidley, at the eastern entrance to Hudson's Straits on the north. The territory under the jurisdiction of Newfoundland has an area estimated at 110,000 square miles, with a population (1956) of 10,975. Labrador is noted for its cod fisheries. It also possesses valuable salmon, herring, trout and seal fisheries.

At the headwaters of the Hamilton River an investigation is being carried out in an area geologically of the same age as part of the Lake Superior iron ore. In this area some 400,000,000 long tons of iron ore have been outlined—by drilling. A railway from Seven Islands, in Quebec Province, a port on the northern shore of the St. Lawrence River, to the site of the iron ore deposits, near the headwaters of the Hamilton River, is now completed at an estimated cost of \$200,000,000. Construction of a shipping port at Seven Islands has also been completed.

Between Hamilton River and the southern boundary of Labrador there exists the largest stand of virgin timber on the North American continent. Estimates made, as a result of aerial and ground surveys, show some 40,000,000 cords of merchantable timber, with an approximate value of \$125,000,000 on the stump. The Hamilton River, flowing into Hamilton Inlet, is probably the largest undeveloped power river left in North America. It has a length of 560 miles and drains an area of 30,000 square miles. The two most important power sites on it are at Grand Falls and at Muskrat Falls. Theoretical continuous horse-power is 4,350,000.

NOVA SCOTIA

Area and Population.—NOVA SCOTIA is a peninsula between 43° 25'–49° N. lat and 59° 40'–66° 25' W. long., and is connected with New Brunswick by a low fertile isthmus about thirteen miles wide. It comprises an area (with Cape Breton Island) of 21,068 square miles (325 miles of which consists of lakes, rivers and inlets of the sea) with a total population (estimated 1958) of 710,000.

Government.—The Government is administered by a Lieutenant-Governor, aided by an Executive Council and a Legislative Assembly of 37 members.

Finance.—The estimated revenue in 1957–58 was \$66,304,820 and the expenditure \$60,725,263; the funded debt (March 31, 1957) was \$229,483,000, the net direct debt being \$135,572,955.

Agriculture and Live Stock.—According to the 1956 census Nova Scotia has a total land area of 13,275,520 acres, of which 2,775,642 acres are held as farm land. At the same census, the total number of occupied farms was listed at 21,075. Of the total area in farm land, 379,000 acres are devoted to the production of principal field crops, valued at \$17,474,000.

The Annapolis Valley section of Nova Scotia is famous for its fruit production, with an average crop of nearly 2,500,000 bushels annually, although on occasion it has produced over 6,000,000 bushels of apples.

The number of live stock is estimated (1957) as follows: horses, 16,700; cattle and calves, 177,000; sheep and lambs, 83,000; hogs, 31,000; poultry, 1,891,000.

Manufactures.—In 1955 there were 1,524 establishments employing 30,218 people. The gross value of production was \$331,129,690, foods and beverages, wood and paper, iron and steel, petroleum and coal products accounting for the larger proportion of this amount. The principal industrial centres are Halifax, Sydney, Pictou, Truro, Amherst, New Glasgow, Trenton and Yarmouth.

Fisheries.—The total landed value of the fisheries in 1957 was \$22,997,000. Landings totalled 435,477,000 lbs. About 20,000 people are employed in fishing and fish processing.

Minerals.—5,685,757 tons of coal were produced in 1957. Gypsum production totalled 3,951,556 tons; barytes 213,790 tons; salt 124,077 tons. Total value of mine products (1957) \$65,434,475.

Principal Cities.—CAPITAL, Ψ HALIFAX, population of Metropolitan area (1956) 164,200, one of the terminals of the Canadian National Railway, with a magnificent harbour, is one of the principal winter ports of Canada, and the entrepôt of a large trade with the West Indies, South America and Europe. One of the largest bridges in the British Commonwealth spans the harbour and connects the town of Dartmouth and surrounding area with the city proper. A shipyard for the building of large ocean-going steamers, with a dry dock, is one of the leading industries; other cities and towns are Sydney, Glace Bay and New Waterford (see below),

Dartmouth (21,093), Truro (12,250), New Glasgow (9,998), Amherst (10,301), Sydney Mines (8,731) and Yarmouth (8,095).

CAPE BRETON ISLAND.

Cape Breton Island, formerly a distinct Colony, was incorporated with Nova Scotia in 1819. It contains an area of 3,975 sq. miles, population (1956) 162,859. The chief city, Sydney (pop. 32,162), on the eastern coast, has valuable collieries in the neighbourhood and is the site of the third largest steel works in Canada. Glace Bay and New Waterford, also coal mining centres, have populations of 24,416 and 10,381 respectively. The Canadian National Railway provides service to the island. Construction of a large rail-highway causeway from mainland to island was completed in 1955.

ONTARIO

Area and Population.—The Province of Ontario contains a total area of 412,582 square miles, with a population (estimated 1958) of 5,803,000.

Government.—The Government is vested in a Lieutenant-Governor and a Legislative Assembly of 98 members elected for five years. The last General Election was held in June, 1955, and the state of the parties in August, 1958, was 82 Progressive Conservatives, 10 Liberals, 3 Co-operative Commonwealth Federation, 1 Liberal-Labour and 2 vacancies.

PHYSICAL FEATURES

Australia was separated from the other great land surfaces at a remote period, and exhibits therefore some very archaic types of fauna and flora. It may be regarded as the largest island or the smallest continent, being surrounded by the following waters:—*North*, the Timor and Arafura Seas and Torres Strait; *East*, Pacific Ocean; *South*, Bass Strait (which separates Tasmania from the Continent) and Southern Ocean; and *West*, Indian Ocean. The total area of the Continent is 2,948,366 English square miles, the island of Tasmania having an area of 26,215 square miles, and making a total area for the States and Territories of 2,974,581 square miles. The coast-line of Australia is approximately 12,210 miles, and the geographical position of the Continent is between $10^{\circ} 41' - 39^{\circ} 8'$ South latitude and $123^{\circ} 9' - 153^{\circ} 39'$ East longitude; the greatest length East to West is 2,400 miles, and from North to South 1,971 miles. Its nearest distance from England is about 11,000 miles.

From a physical standpoint the continent of Australia is divisible into an eastern and a western area, the former containing a regular coast-line with a good harbourage, roadsteads, rivers, and inland waterways, and a greater development of fauna and flora; the latter a broken coast-line with estuaries rather than rivers, and but little inland water communication. The whole continent is, roughly speaking, a vast, irregular, and undulating plateau, part of which is below the level of the sea, surrounded by a mountainous coast-line, with frequent intervals of low and sandy shore on the north, west and south. The Great Barrier Reef extends parallel with the East coast of Queensland for 1,200 miles, at a distance of about 60 miles from the mainland. A large part of the interior, particularly in the west, consists of sandy and stony desert, covered with spinifex, and containing numerous salt-marshes, though reaches of grass-land occur here and there. The geological formation of Australia is remarkable for its simplicity and regularity; the *strike* of the rocks is, with a single exception, coincident with the direction of the mountain-chains, from N. to S.; and the tertiary formation to be found in the N., S., and W. develops in the S.E. into a gigantic tertiary plain, watered by the Darling and the Murray Rivers. Nearly all round the coast, however, and in eastern and south-eastern Australia, stretching far inland from the coastal range, is a fertile area devoted partly to agriculture, partly to dairying, while the inland districts particularly are admirably adapted to the rearing of sheep. The most extensive mountain system takes its rise near the S.E. point, and includes a number of ranges known by different names in different places, none of them being of any great height. The highest peak, Mount Kosciusko, in New South Wales, reaches an elevation of 7,328 feet. The principal rivers are the Murray, which debouches on the south coast, after receiving the waters of its tributaries the Murrumbidgee, Lachlan, and Darling, in the S.E. part of the continent; on the east coast, the Hawkesbury, Hunter, Clarence, Richmond, Brisbane, Mary, Burnett, Fitzroy, and Burdekin; on the west, the Swan, Murchison, Gascoyne, Ashburton, Fortescue, De Grey, and Fitzroy; on the north, the Drysdale, Ord, Victoria, and Daly; and the Roper, the Flinders, and Mitchell, which debouch into the Gulf of Carpentaria. Lakes are numerous, but nearly all are salt; the scarcity of the natural water supply has been, however, mitigated by successful borings and by the construction of large dams. The work of conserving the vast quantities of water which run to waste in the wet season is being vigorously prosecuted by a system of locks and weirs on some of the rivers. Minerals comprise bauxite, coal, copper, gold, gypsum, iron, lead, limestone, mineral sand, pyrite, silver and zinc in large quantities, antimony, asbestos, barite, beryllium, chromite, dolomite, feldspar, magnesite, manganese, mica, salt, silica, talc, tantalite-columbium, tin, tungsten, &c., and there are abundant supplies of building stones, clays, &c. The potentialities of the country in regard to its supplies of metals and minerals have not yet been fully tested. Oil was discovered at Exmouth Gulf, 680 miles north of Perth, in December 1953.

Climate.—The seasons commence about March 21 (Autumn), June 21 (Winter), Sept. 22 (Spring), and Dec. 22 (Summer). The climate is extremely dry, but, except in the tropical coast-land of the north, the continent is everywhere highly beneficial to Europeans, the range of temperature being smaller than that of the countries similarly situated.

GOVERNMENT

The Commonwealth of Australia was constituted by an Act of the Imperial Parliament dated July 9, 1900, and was inaugurated Jan. 1, 1901. The Government is that of a Federal Commonwealth within the British Commonwealth of Nations, the executive power being vested in the Sovereign (through the Governor-General), assisted by a Federal Ministry of twenty-two Ministers of State. Under the Constitution the Federal Government has acquired and may acquire certain defined powers as surrendered by the States, residuary legislative power remaining with the States. Trade and customs passed under Federal control immediately on the establishment of the Commonwealth; posts, telegraphs and telephones, naval and military defence, lighthouses and quarantine on proclaimed dates. The Federal Government also controls such matters as social services, patents and copyrights, naturalization, navigation, &c. The right of a State to legislate is not abrogated except in connection with matters exclusively under Federal controls, but where a State law is inconsistent with a law of the Commonwealth the latter prevails to the extent of the inconsistency.

THE LEGISLATURE

The Parliament of the Commonwealth of Australia consists of the Queen, a Senate and a House of Representatives. An Act, assented to on May 28, 1948, provided for an increase in the number of members of the Senate from thirty-six to sixty, and for the number of members of the House of Representatives to be increased from seventy-four to as nearly as practicable twice the number of Senators. There are now 124 members in the House of Representatives, including the two members, with restricted voting powers, representing the two internal territories. Members of the Senate are normally elected for six years by universal suffrage, each of the six States returning an equal number. The House of Representatives, similarly elected for a maximum of three years, contains members proportionate to the population, with a

minimum of five members for each State. The present state of parties in the House of Representatives (excluding the two Labour members for the internal territories) is Liberal 58, Country Party 19 and Labour 45. Members of both Houses receive £A2,750 per annum, with allowances and free air and rail travel on parliamentary business.

DEFENCE

Subject to the authority of Cabinet the Minister and Department of Defence are responsible for the formulation and general application of a unified defence policy relating to the Defence Forces and their requirements. Separate Ministers and Departments of the Navy, Army and Air are responsible for the administration of their respective Services in accordance with defence policy. The Minister and Department of Supply are responsible for the supply, manufacture and overhaul of services and goods, including munitions, for the Defence Forces and for defence research and development, in accordance with approved policy.

Commonwealth Expenditure on Defence and War and Repatriation Services in the year ended June 30, 1959, was £A37,470,000 (including £A37,307,000 from Loan Fund) as compared with £A37,021,000 for the previous year.

Royal Australian Navy

Under the Naval Defence Acts, 1910-52, the naval forces of the Commonwealth are administered by a Naval Board of Administration responsible to the Minister of the Navy.

The Royal Australian Navy consists of the aircraft carrier *Melbourne*, 6 destroyers, 7 frigates, 1 boom working vessel and 28 miscellaneous craft. In addition, 3 submarines are on loan from the Royal Navy for anti-submarine training. In reserve there are the aircraft carrier *Sydney*, the light cruiser *Hobart*, 1 destroyer, 10 frigates, 13 ocean minesweepers, 4 boom working vessels and 12 miscellaneous craft.

Under the present ship construction programme, 2 anti-submarine frigates are fitting out and the building of 2 more has yet to begin.

The strength of the Royal Australian Navy on May 1, 1959, was 1,348 officers and 9,385 ratings.

Army

The Military Forces of the Commonwealth are administered by a Military Board, with the Minister for the Army as President and 7 members. There are three elements—the Australian Regular Army, the Citizen Military Forces and the Cadet Corps.

For the financial year 1958-59, the establishment for the Australian Regular Army was 26,000 soldiers and 4,800 civilians. This includes a Field Force, Regular Army cadres for duty with the Citizen Military Forces, administrative and instructional staff for National Service units, staff for schools, training installations and headquarters and maintenance units, in addition to the Pacific Islands Regiment comprising European officers and non-commissioned officers and native troops. The Women's Royal Australian Army Corps forms part of the Australian Regular Army, being employed in direct substitution for male soldiers in mainland units. The Royal Australian Army Nursing Corps is also an important element of the Regular Army.

The strength of the Australian Regular Army on April 30, 1959, was 22,033 all ranks, of whom 2,045 were serving outside Australia.

The strength of the Citizen Military Forces on April 30, 1959, was 51,776, comprising a volunteer element and National Servicemen on full-time and part-time duty. The two Women's Services are also represented in the Citizen Military Forces, the strength at April 30, 1959, being approximately 800.

The Australian Cadet Corps, composed of students at educational establishments, had a strength of 33,227 on March 31, 1959.

Air

The total strength of the R.A.A.F. on May 1, 1959, was 15,382. The total number of squadrons was 15, and of training units 21. Three squadrons were serving in Malaya as the R.A.A.F. component of the British Commonwealth Far East Strategic Reserve.

War Losses

Australian battle casualties in the 1939-45 War:—

Killed (including died of wounds, died while P.O.W., and "missing, presumed dead")	27,073
P.O.W. escaped, recovered or repatriated	22,264
Wounded and injured	23,477

Total Non-battle casualties—7,210 killed, 157,650 injured.

The *Trans-Australia* (Government) Railway, 4 ft. 8½ in. gauge, connects Kalgoorlie, W. A., with Port Pirie, S. A. (1,108 miles) and so forms a link (including Kalgoorlie-Fremantle 387 miles) between Fremantle and Brisbane, Q., a total length of 3,372 miles

The gross earnings of all Government lines in 1957-58 were £178,886,385, working expenses £186,475,294, and net deficit £7,588,909. In 1957-58 passenger journeys numbered 494,330,133 and 45,249,711 tons of goods and live stock were carried. Sydney and Melbourne suburban systems are electrified.

Tramways.—There are 345 miles of tramways in Australia, all of which are of electric traction. The several Governments control 279 miles and municipal authorities 66 miles.

Shipping.—The entrances and clearances (one entrance and one clearance per voyage, irrespective of the number of ports visited) of vessels engaged in overseas trade at the various Australian ports in 1957-58 were: entered 2,656 (12,383,847 tons); cleared 2,598 (12,131,393 tons). Of the vessels entered 1,485 of 6,571,862 tons were under the British flag and 1,171 of 5,811,985 tons under foreign flags.

The total including local shipping entering the ports of the capital cities during 1957-58 was: Sydney 4,433 vessels of 11,317,768 tons, Melbourne 2,583 (9,148,203), Brisbane 1,217 (3,754,908), Adelaide 1,165 (4,192,001), Fremantle 1,121 (5,962,393) and Hobart 471 (1,036,534). At December 31, 1958, there were 1,701 vessels of a total net tonnage of 373,002 on the shipping registers of the several States.

Posts and Telegraphs.—In the year ended June 30, 1958, there were 8,179 post offices dealing with 1,538,509,000 letters, 323,684,000 packets and newspapers, 15,566,000 registered articles and 17,726,000 parcels, 20,107,000 telegrams were despatched and 2,777,000 cablegrams received and despatched. At June 30, 1958, there were 7,326 telephone exchanges with 1,361,924 lines and 1,936,960 instruments.

Broadcasting.—On June 30, 1958, the National Broadcasting Service operated 65 stations, including 9 short-wave stations. Privately owned commercial broadcasting stations totalled 208. On June 30, 1958, there were in force in Australia 2,137,865 listeners' licences. Television transmissions com-

menced in September, 1956. In 1959, 6 television stations were in operation (Melbourne, 3; Sydney, 3). Television licences in force at June 30, 1958, numbered 291,186.

Motor Vehicles.—At June 30, 1958, there were 2,526,692 motor vehicles registered in the several States. These comprised 1,675,638 cars, 115,883 motor cycles, and 735,171 commercial vehicles; revenue derived from motor registration fees and motor tax, &c., in 1957-58 was £38,534,140. Motor omnibus services are extensively operating in urban areas.

Civil Aviation.—At June 30, 1958, there were 479 recognized landing grounds, including 311 licensed public aerodromes, in the various States and Territories. Aircraft on the Australian Register at June 30, 1958, numbered 1,180. Mileage flown on regular internal air services in 1957-58 was 40,532,600 and on overseas services owned or partly-owned by Australia, 15,266,900.

CAPITAL

CANBERRA, the Capital of the Australian Commonwealth, is 203 miles by rail from Sydney, N.S.W. and was acquired in 1911 from the State of N.S.W. for the Australian Capital. The original area was 911 sq. miles, increased in 1917 by the acquisition of 28 sq. miles at Jervis Bay. Canberra contains the Australian (1914-18 and 1939-45) War Memorial, Parliament House, Commonwealth Offices, University College, and the Australian National University, and is connected with the N.S.W. railway system by a line (5 miles) to Queanbeyan and by good roads to Melbourne and Sydney. Frequent air services also link it with the State capitals. The estimated population of Canberra city area at June 30, 1959, was 43,909. The population of the rural area of the Australian Capital Territory (including Jervis Bay) was estimated (June 30, 1959) at 2,101. Total population (est. June 30, 1959) 46,010.

THE NORTHERN TERRITORY

The Northern Territory has a total area of 523,620 square miles, and lies between 129°-138° East longitude and 12°-26° South latitude. The administration was taken over by the Commonwealth on January 1, 1911, from the government of the State of South Australia. The headquarters of the Administrator are at Darwin. The legislative authority in the Territory is a Legislative Council consisting of a President, who is the Administrator, seven appointed members, who are senior officers of Commonwealth Departments, and six members elected from districts into which the territory is sub-divided, approximately on a population basis. All ordinances passed by the Council must be presented finally to the Governor-General, who may disallow an ordinance to which the Administrator has assented or refuse his assent (when sought) to them.

The population of the Northern Territory (excluding full-blooded aborigines) at June 30, 1958, was estimated to be:—males 11,028, females 8,561, total 19,579. The number of full-blooded aborigines was estimated (June 30, 1958) at 15,500.

Beef cattle raising is the chief pastoral activity, and the staple industry of the Territory. On June 30, 1958, there were 1,252,014 cattle, 39,808 horses and 27,212 sheep in the Territory. Imports of livestock for the year ending June 30, 1958, were: bulls 1,068, horses 163, sheep 4,854, 229,276 cattle were exported during the same period. The Territory is capable under proper conditions of carrying successfully and profitably a great expansion of the beef cattle industry. Hides and skins exported from the Northern Territory

during the year ended June 30, 1958, were as follows:—buffalo 110, cattle 3,109, sheep 2,801 and crocodile 1,005. The number of buffalo hides exported has continued to drop owing to the low price for them, and there are now very few shooters engaged in the industry.

Agriculture in the Northern Territory hitherto has been confined to small farm settlements in the Darwin, Katherine, Daly River, Alice Springs, Adelaide River and Pine Creek areas. Principal crops grown are peanuts, grain sorghum, vegetables and fruit (pineapples, paw-paws, bananas and citrus). However, extensive experiments are being carried out particularly in the area between Darwin and Katherine to determine what crops can be successfully grown in the Northern Territory on a commercial scale. Experimental work on pastures is also being undertaken. In recent years a great deal of interest has been shown in the possibility of large scale rice production on the sub-coastal plains areas of the Territory. Experiments are continuing with very encouraging results and it is expected that an expanding area will be planted to rice within the next few years.

Out of a total of 335,116,800 acres, the Northern Territory has 112,356,113 acres unoccupied or unreserved. Aboriginal and other reserves total 47,986,271 acres; there are 174,398,954 acres leased or held under licence, and 376,562 acres are alienated in fee simple.

The mineral industry has always contributed largely to the income of the Northern Territory and the value of mineral production exceeds that of the beef cattle industry. The search for uranium still holds the interest of many prospectors and companies. The other principal minerals produced are copper, gold, manganese, mica and wolfram. For the year ended June 30, 1958, the total value of all minerals produced (excluding uranium) was £4,030,492. In addition, building materials valued at £268,241 were quarried.

The chief rivers of the Territory are Victoria, Adelaide, Daly, Roper, South Alligator, McArthur, Liverpool, and Goyder. The first six are navigable, from 40 to 100 miles from their entrance, for boats drawing 4 feet. Mother-of-pearl fishing is carried on round the coast, the shell being of good quality.

The railway extends from Darwin to Larrimah (316 miles) and Alice Springs is connected by rail with Adelaide. A good bitumen road links Darwin with Alice Springs (954 miles). The Commonwealth Government recently approved a five-year plan to maintain and improve this highway and the Barkly highway to the Queensland border.

ψ Darwin occupies an elevated site 97 feet above sea level, overlooking Port Darwin. Alice Springs is situated in the MacDonnell Ranges. Climate of the Northern Territory ranges from dry in the south to wet-monsoonal in the north.

Administrator of the Northern Territory (Darwin), His Honour J. C. Archer, O.B.E. £4,000
Assistant Administrator, R. Marsh. £3,150
Judge, Supreme Court, M. C. Kriewaldt. £3,750

TERRITORY OF PAPUA AND NEW GUINEA

The *Papua and New Guinea Act, 1949*, which came into force on July 1, 1949, approved the placing of the Territory of New Guinea under the International Trusteeship system and provides for the Government of the Territory of Papua and the Territory of New Guinea in an Administrative Union.

Provision is made for an Executive Council of not less than nine members, and a Legislative

Council consisting of twenty-nine members, namely:—

(a) the Administrator; (b) sixteen officers of the Territory (who shall be known as official members); (c) three non-official members possessing such qualifications as are provided by Ordinance and elected, as provided by Ordinance, by electors of the Territory; (d) three non-official members representing the interests of the Christian missions in the Territory; (e) three non-official native members; and (f) three other non-official members.

PAPUA

The Territory of Papua, which was placed under the authority of the Commonwealth of Australia in 1906, comprises the south eastern portion of the island of New Guinea, together with the Trobriand, Woodlark, D'Entrecasteaux and Louisiade groups of islands and is separated from Australia by Torres Straits. The Territory lies wholly within the Tropics, between the 141st and the 155th meridians of east longitude and the 5th and 12th parallels of south latitude. The total area is 90,540 sq. miles, of which 87,540 are on the mainland. The non-indigenous population (June 30, 1957) was 8,122. The official estimate of the native population is 459,396. Owing to heavy rainfall Papua is well watered in most parts and possesses a large number of streams. The best-known rivers are the Fly (650 miles long and navigable by steam launch for over 500 miles), the Strickland and the Purari. The climate is favourable to the cultivation of tropical products. Copra exports for 1956-57 totalled 13,219 tons and rubber exports 3,966 tons.

(b) Includes £A4,146,911 Australian Commonwealth grant.

NEW GUINEA

The German possessions on the mainland of New Guinea and certain adjacent islands were occupied by Australian forces on Sept. 12, 1914, and on Dec. 17, 1920, a mandate of the Supreme Council of the Allies entrusted the administration to the Australian Government which established its administration on May 9, 1921.

The Trust Territory includes (1) *North-Eastern New Guinea*, the northern section of east New Guinea between 2° 35'–8° S. lat., and 141°–148° E. long., with a total area of 69,700 sq. miles. This includes adjacent islands (Manam, Karkar, Long, Bagabag, Schouten and D'Urville or Kairiru Island). The chief centres are Lae, Bulolo, Finschhafen, Wau, Madang, Wewak, Goroka and Mount Hagen. (2) *Bismarck Archipelago* (19,200 sq. miles), including New Britain, New Ireland, and islands adjacent to both, and (3) *Admiralty Islands* (chief town, Lorengau, in Manus Island); and (4) the two northernmost *Solomon Islands* (4,100 sq. miles) (Bougainville and Buka with adjacent islands). The total estimated area is thus 93,000 square miles. The non-indigenous population, as at June 30, 1957, was 14,436. The native population was enumerated (June 30, 1957) at 1,177,074 plus an estimated total of 120,100, giving a grand total of 1,311,610.

The principal river in N.E. New Guinea is the Sepik, which is navigable for 300 miles.

A road to the coast over rugged country now serves the goldmining areas of the Lower Watut,

Sunshine, Bulolo, Wau and Edie Creek, and a small farming district at Wau, and another road system is being extended from Lae to Goroka, a growing farming centre in the Eastern Highlands District.

Qantas Empire Airways, Ltd., operates a regular air service from Australia to Lae and Rabaul, and to Port Moresby, Papua, in addition to a monthly service from Lae to Hollandia, Netherlands New Guinea. There is also a flying boat service from Port Moresby to Rabaul and Bougainville. Commercial aircraft operators located on the New Guinea mainland maintain passenger and freight carrying services to many parts of the Territory.

Overseas vessels call at various ports and a regular service is maintained with Australia.

The climate is hot and moist along the coast, with a steady drop as the higher altitudes are reached. It is suitable to the growth of all tropical products. The copra export for 1956-57 was 83,222 tons, 2,088 tons of cocoa beans were exported in 1956-57. There are indications of mineral wealth, but difficulties of transport have prevented developments. Gold mining is carried on extensively in the Morobe District and to a lesser degree in other parts of the Territory.

Trusteeship.—The Commonwealth Government has placed the Territory of New Guinea under the Trusteeship system established under the United Nations Charter and the agreement under which Australia became the sole administering authority was approved by the General Assembly of the United Nations on Dec. 13, 1946.

SEAT OF ADMINISTRATION.—Administrative Headquarters of the combined territories of Papua and New Guinea is Port Moresby, the principal port and town of Papua. Port Moresby (in New Britain), is the largest port in the combined territories and second town, while Lae (in Morobe District) is the third port and town of the combined territories, being the outlet for the Morobe Goldfields and the Highlands Districts, and the principal air centre in the territories. Madang (Madang District), Samarai (Milne Bay District), Kavieng (New Ireland District), Wewak (Sepik District), and Lorengau (Manus District) are the administrative centres and principal ports in their Districts. Sohano is the administrative centre for the Bougainville District (included in which are the islands of Bougainville and Buka) and Goroka and Mount Hagen the administrative centres of the Eastern and Western Highlands Districts respectively.

Administrator of the Government of Papua and New Guinea, Brigadier D. M. Cleland, C.B.E.

Port Moresby is distant from Sydney, N.S.W., 1,800 miles; transit by sea from Sydney 5 to 6 days; by air 10 hours.

NORFOLK ISLAND

This island is about 930 miles from Sydney and 400 miles from New Zealand. It is about five miles in length by three in breadth, and was discovered by Capt. Cook in 1774. Its area is 8,528 acres and circumference 20 miles. The climate is mild, with a mean temperature of 68° and an annual rainfall of 53 inches. The descendants of the mutineers of the *Bounty* were brought here from

Pitcairn Island in 1856. The estimated population on June 30, 1958, was 1,036. Seat of Government and Administration Offices, Kingston.

The construction of an airfield was completed in 1943, and fortnightly air services are now in operation from Australia and New Zealand.

Administrator, R. S. Leydin, O.B.E.

President, Advisory Council, W. M. Randall.

NAURU ISLAND

This island, situated in 166° 55' East longitude and 32 miles south of the Equator, was discovered by Capt. Fearn, R.N., in 1798, and was annexed by Germany in 1888. It surrendered to H.M.A.S. *Melbourne* in November, 1924, and is now administered by Britain, Australia and New Zealand. Under an international trusteeship agreement approved by the General Assembly of U.N. on Nov. 1, 1947, this agreement supercedes the League of Nations' Mandate, but Australia continues to be responsible for the administration of the island on behalf of the grantor Governments. The island has an area of approximately 8 square miles, with a population (June 30, 1958) of 4,360, of whom 2,235 were Nauruans, 1,133 other Pacific Islanders, 643 Chinese, and 349 Europeans. Administrative and legislative powers of government are vested in the Administrator. The Judiciary consists of a District Court, a Central Court and an Appeal Court. Expenses of the Administration so far as they exceed revenue are met by the British Phosphate Commissioners under an agreement made between the three administering Governments. There are valuable deposits of phosphates on the island, which were purchased from the Pacific Phosphate Company in 1919 by the Governments of Great Britain, Australia and New Zealand for £3,500,000, and vested in the British Phosphate Commissioners.

Nauru was occupied by the Japanese from Aug. 25, 1942, to Sept. 13, 1945. Since re-occupation the buildings and plant of the Administration and the British Phosphate Commissioners have been restored. Services provided by the Administration for the Nauruan people include medical and dental services, hospitalization, maternity and infant welfare, and education services up to fourth year secondary school standard, beyond which overseas scholarships and public service cadships are available. Exports of phosphates for the 12 months ended June 30, 1958, totalled 1,167,180 tons.

Administrator, J. P. White.

COCOS (KEELING) ISLANDS

The Cocos (Keeling) Islands were declared a British possession in 1857, and in 1878 were placed under the control of the Governor of Ceylon and were later annexed to the Straits Settlements and incorporated with the Settlement (now the Colony) of Singapore. On Nov. 23, 1955, their administration was transferred to the Commonwealth of Australia. They are two separate atolls comprising some 27 small coral islands with a total area of about five square miles, situated in the Indian Ocean in latitude 12° 5' South and longitude 96° 53' East. The main islands are West Island (the largest, about 6 miles from north to south) on which is the aerodrome and the administrative centre, and most of the European community; Home Island, the headquarters of the Clunies Ross Estate; Direction Island, on which is situated the Cable and Wireless Station, the Admiralty Wireless Station, and the Department of Civil Aviation's marine base; and Horsburgh. North Keeling Island, which forms part of the Territory, lies about 15 miles to the north of the group and has no inhabitants. The

climate is equable and pleasant, being usually under the influence of the south-east trade winds for about three-quarters of the year. The population (estimated, June 30, 1958) is 573 persons.

CHRISTMAS ISLAND

Until the end of 1957 a part of the Colony of Singapore, Christmas Island was administered as a separate colony until October 1, 1958, when it became Australian territory by Order in Council. It is situated in the Indian Ocean about 190 miles S. of Java Head and 529 miles E. of the Cocos (Keeling) Islds. Area, 64 sq. miles. Population (1955), 2,201. The Island is densely wooded and contains extensive deposits of phosphate of lime.

THE ANTARCTIC CONTINENT

The area of the Antarctic Continent is estimated at approximately 5 million square miles. The greater part of the coastline has been charted with varying degrees of accuracy, but considerable portions of the interior have not been visited, or at best have been seen only from the air.

The question of territorial rights is complicated and there is no general international agreement thereon. Argentina has 3 Antarctic bases in the zone claimed as "Argentine Territory," one being on Deception Island in the South Shetlands, which is part of the British Falkland Islands; another in Scotia Bay, and a third on Gamma Island, in the Melchior Archipelago.

The Australian Antarctic Territory was established by an Order in Council, dated February 7, 1933, and the Australian Antarctic Territory Acceptance Act of June 13, 1933, which placed under the government of the Commonwealth of Australia all the islands and territories, other than Adélie Land, which are situated south of the latitude 60° S. and lying between the 160th and 45th meridians of East longitude.

The exception of Adélie Land from the Order in Council is due to French claims based on rights of discovery and occupation.

The area administered by the Commonwealth of Australia is estimated at 2,472,000 square miles. It adjoins that belonging to New Zealand. There is an Australian research station on Macquarie Island (north of the Antarctic Convergence and sub-Antarctic), which is about 1,000 miles south-east of Hobart and has been a dependency of Tasmania since the nineteenth century.

Heard Island, about 2,500 miles south-west of Fremantle, was transferred from United Kingdom to Australian control on December 26, 1947.

In February, 1954, a base known as Mawson, was established on the coast of the Antarctic continent at lat. 67° 36' S. and long. 62° 53' E. Meteorological and other research is being conducted at this station. A second base, named Davis, was established in Jan. 1957 at 68° 35' S., 77° 59' E. and in February, 1959, Australia took over the United States base at Wilkes (lat. 66° 15' S., long. 110° 33' E.).

Other British dependencies in the Antarctic are:—

(1) The *Ross Dependency*, placed under the jurisdiction of New Zealand by Order in Council dated July 30, 1923, and defined as all the islands and territories between the 160th meridian of east longitude and the 150th meridian of west longitude which are situated south of the 60th parallel of south latitude. The Ross Dependency includes Edward VII Land and portions of Victoria Land. There are no permanent inhabitants of the territory, but whaling is carried on extensively.

(a) The *Falkland Islands Dependencies*:—

(a) *South Georgia*, with *South Orkney* and *South Sandwich Islands*.

(b) *South Shetland Island* and *Graham's Land*.

(c) *Coats Land* and territory adjacent to the South Pole.

South Georgia is permanently inhabited and is an important seat of the whaling industry.

So far as is known the total areas of these Dependencies have not been officially estimated.

States of the Commonwealth of Australia

NEW SOUTH WALES

The State of New South Wales is situated almost entirely between the 29th and 36th parallels of S. lat. and 141st and 154th meridians of E. long., and comprises an area of 309,433 square miles (exclusive of 939 square miles of Australian Commonwealth Territory which lies within its borders).

POPULATION.—The population at December 31, 1958, was: Males, 1,865,917; Females, 1,859,769. Total, 3,725,686.

Births, Deaths and Marriages.

1956	75,714	34,064	27,313
1957	79,456	33,317	28,767
1958	80,045	32,350	28,554

Vital Statistics.—Annual rate per 1,000 of mean population in 1958:—Births, 21.67; Deaths, 8.76; Marriages, 7.73. Deaths under 1 year per 1,000 live births, 21.29.

Religions.

The members of the Church of England in New South Wales, according to the Census of 1954, number 1,466,571, Roman Catholic 844,453, Presbyterian 302,984, Methodist 275,188, Congregational 21,280, Baptist 40,283, Greek Orthodox 29,133, Lutheran 17,033, Salvation Army 12,825, and Hebrew 19,583. The religion of 301,203 persons was not stated in the census schedules.

PHYSIOGRAPHY.

Natural features divide the State into four strips of territory extending from north to south, viz., the Coastal Divisions; the Tablelands, which form the Great Dividing Range between the coastal districts and the plains; the Western Slopes of the Dividing Range; and the Western Plains. The highest points are Mount Kosciusko, 7,328 feet, and Townsend, 7,266 feet. The coastal district is well watered by numerous rivers flowing from the ranges into fertile flats which form their lower basins. The western portion of the country is watered by the rivers of the Murray-Darling system and immense reservoirs have been constructed for irrigation purposes, and there are many artesian bores. The Darling, 1,702 miles, and the Murrumbidgee, 981 miles, are both tributaries of the Murray, part of which forms the boundary between the States of New South Wales and Victoria. Other inland rivers are: Lachlan, Bogan, Macquarie, Castlereagh, Namoi and Gwydir.

Climate.—New South Wales is situated entirely in the Temperate Zone. The climate is equable and very healthy. At the capital (Sydney) the average mean shade temperature is 63.7°. The mean temperature in the shade for the north coast is 66° to 69°, south coast 60° to 63°, northern tableland 56° to 60°, southern tableland 44° to 57°; in the north-western slope, the mean annual temperature ranges from 62° to 68°; in the central western slope 57° to 64°, south western slope 60° to 62°, and in the Western Plains and Riverina Division from 61° to 69°.

GOVERNMENT.

New South Wales was first colonized as a British possession in 1788, and after progressive settlement a partly elective legislature was established in 1843. In 1855 Responsible Government was granted, the present Constitution being founded on the Constitution Act of 1902. New South Wales federated with the other States of Australia in 1901. The executive authority of the State is vested in a Governor (appointed by the Crown), assisted by a Council of Ministers.

THE LEGISLATURE.

Parliament consists of two Houses, the Legislative Council and the Legislative Assembly. The Legislative Council consists of 60 members, elected jointly by both houses of Parliament. Member-

ship is for 12 years, 15 members retiring in rotation triennially. Members receive an annual allowance of £500 and three guineas a day attendance allowance for members living outside the metropolitan area. The Legislative Assembly consists of 94 members. Each member of the Legislative Assembly receives £1,975 per annum, plus an electoral allowance (£500-£800, according to location of electorate). The Women's Legal Status Act, 1918, removed disqualification regarding the election of women to be members of the Legislative Assembly. A provident fund for members of the Legislative Assembly was established in 1946; a pension is payable to those who on ceasing to be members have served for at least fifteen years or in three parliaments. Natural-born or naturalized persons 21 years of age, who have resided 6 months in the Commonwealth, 3 months in the State and 1 month in the electoral district, are entitled to the franchise. Voting is compulsory. At the State General Elections in March 1959, there were 1,010,096 men and 1,065,172 women electors, making a total of 2,075,268 enrolled; in contested electorates 94 per cent. of the eligible electors voted.

EDUCATION.

Education.—Education is compulsory between the ages of 6 and 15 years. It is non-sectarian and free at all state schools. The average weekly enrolment in 1957 in 2,639 State schools was 532,813 and the average daily attendance during the year was 478,717. In addition to the State schools there were, in 1957, 788 private colleges and schools, with an average weekly enrolment of 172,720 scholars, 668 being Roman Catholic schools with 147,702 scholars. The three universities had an enrolment of 9,341 students in 1959; 7,004 at Sydney (incorporated 1850), 5,246 at the University of New South Wales (1948) and 558 at New England (1954). The State expenditure on Education was £49,609,000 in the year 1957-58. Students attending the State Agricultural Colleges and Farm schools numbered 1,329 in 1958.

* Excluding the self-balancing Road Transport and Traffic Fund.

The Public Debt of New South Wales at June 30, 1958, was £787,461,433, of which an amount of £107,955,909 was repayable in London (interest £3,993,863), £12,035,960 was repayable in New York (interest £476,664) and £667,469,564 was held in Australia, with an annual interest bill of £26,335,805.

Banking, &c.—There were (Dec. 1958) 12 trading banks with deposits of £660,778,000. Savings bank deposits amounted to £465,668,000, representing £126 per head of the population. The amount assured in New South Wales in Life Assurance Societies in 1957 was £836,746,000 ordinary and £121,488,000 industrial. The membership of Friendly Societies was 149,652, and the funds at June 30, 1957, were £8,487,875. Members of Trade Unions at Dec. 31, 1956, numbered 685,440, the funds of 237 Unions being £1,930,000.

Shipping.—Excluding coastal trade, 3,313 vessels entered ports of N.S.W. during the year ended June 30, 1958, the net tonnage being 12,031,000. The shipping entries at Sydney, including coastal, were 4,192 vessels of 9,788,000 net tonnage.

Motor Vehicles.—At March 31, 1958, there were 867,453 registered motor vehicles (cars, 582,842).

Railways.—The railways and tramways of New South Wales are controlled by the State, which also operates omnibus services. At June 30, 1958, the mileage of the State railways open for traffic was 6,103, earnings in the year 1957-58 being £74,433,000.

Aviation.—The principal overseas routes from Sydney are to the United Kingdom, New Zealand and U.S.A. Regular domestic air services with terminal in N.S.W. carried 1,275,743 paying passengers in 1957-58.

Roads and Bridges.—There are 127,000 miles of roads and streets in New South Wales, including 41,000 miles of natural surface and cleared only. The total expenditure by the Government and the local councils on roads, bridges, &c., in 1956-57 was £37,096,000. The construction of an arch bridge over Sydney Harbour was completed and the bridge opened for traffic in March, 1932. This bridge carries eight lanes of roadway with a total width of 84 ft., two footways each 10 ft. wide, and

two lines of railway. At mean high water there is a headway of 172½ ft.

Posts, Telegraphs and Telephones.—The postal telegraphic, telephonic and radio services are administered by the Commonwealth Government. At June 30, 1958, there were 2,563 post offices in New South Wales. The postal matter carried during 1957-58 included 550,104,000 letters and registered articles and 121,232,000 newspapers and parcels posted for delivery in Australia. The overseas mails consisted of 19,764,000 letters and 10,542,000 newspapers and parcels despatched, 46,476,000 letters and 30,528,000 newspapers and parcels received. During the year 7,495,000 telegrams were despatched to places within Australia and 632,000 cablegrams were despatched and 676,000 received. The telephone line connections numbered 514,683. In June, 1958, there were 18 National Broadcasting Stations in New South Wales and 38 commercial stations operating under licence. The number of broadcast listeners' licences was 784,897. Regular transmission of television programmes in New South Wales began in September, 1956. At April 30, 1959, there were 3 television stations (one National, two commercial) in operation and the number of viewers' licences was 276,647. Seaborne mail reaches United Kingdom from Sydney in from 4 to 6 weeks, airborne mail in 4 to 6 days.

OVERSEAS TRADE.

1957.....	314,382,772	292,432,476
1958.....	352,652,561	230,531,811

The chief exports in 1957-58 were foodstuffs, wool, hides and skins, minerals, metals and machinery. Chief imports were tea, tobacco, yarns, textiles and apparel, petrol, metals, motor vehicles, machinery, timber, paper, rubber, drugs and chemicals.

PRODUCTION AND INDUSTRY.

Agriculture is one of the principal industries of New South Wales; 4,915,676 acres were under cultivation during the year ended March 31, 1958.

The total area under wheat was 2,547,673 acres, of which 2,257,398 acres were harvested for grain, and 209,198 acres for hay. The production of wheat was 10,603,000 bushels of grain and 143,161 tons of hay. Other important crops in 1957-58 were 2,236,752 bushels of maize, 3,944,079 bushels of oats, 5,658,133 bushels of rice, besides other kinds of grain, 66,689 tons of potatoes, and 11,029 cwt. of dried leaf tobacco. Sugar-cane to the extent of 303,086 tons was crushed; while 2,871,406 bushels of bananas were obtained; almost every kind of fruit and vegetable is grown. There were 16,984 acres of vineyards, of which 16,243 acres were bearing.

Land Alienation.—The total extent of land alienated and in process of alienation from the Crown on June 30, 1958, was 65,754,834 acres, while the area of land under lease, &c., from the Crown was 116,490,967 acres, and the balance 15,791,319 acres, consisted of reserve and other lands neither alienated nor leased; the total area of the State, exclusive of the Australian Capital Territory, is 198,037,120 acres.

Livestock.—The country is admirably adapted for sheep-farming, the principal breed of sheep being the celebrated merino, which was introduced

in 1797. On Mar. 31, 1958, there were 220,684 horses, 3,736,300 cattle, 65,410,000 sheep and lambs, 397,011 pigs. In 1957-58, 557,287,000 lb. (stated as in the grease) of wool were produced, 70,322,520 lb. of butter, 9,054,181 lb. of cheese, and 25,614,691 lb. of bacon and ham.

Values of Industries.—In 1957-58 the net value of production of the primary and manufacturing industries was £1,101,573,000—primary £343,711,000 and manufacturing £757,862,000. The values of the principal primary industries were: pastoral £157,679,000, agricultural £44,728,000 and farmyard £55,337,000.

Forests.—The estimated forest area is 22,682,000 acres, of which State forests cover 6,349,000 acres and 1,417,000 have been set aside as timber reserves.

Mining Industry.—The principal minerals are coal, gold, silver, lead, zinc, tin, zircon and rutile. The total value of minerals won in 1958 was £72,360,000; the value of output of the coal-mining industry was £40,750,000, and of the silver-lead-zinc industry, £19,100,000. The mining industry gave employment to 27,508 miners during 1957. In 1958, 15,833,000 tons of coal were produced.

Factories.—In 1957-58 there were 22,270 factories. The average number of persons employed during the year was 445,802. The value of production, i.e. value added to raw materials, was £757,862,000. Large iron and steel works with subsidiary factories are in operation at Newcastle and Port Kembla in proximity to the coalfields. The products include iron and steel of various grades, pipes, boilers, steel wire and wire netting, copper wire, copper and brass cables, and spun cast-iron pipes. The production (1957-58) of pig-iron was 2,029,000 tons, and of ingot steel 3,041,000 tons.

TOWNS.

ΨSYDNEY, the chief city and capital, stands on the shores of Port Jackson, with a water frontage of 152 miles; the depth of water at the Heads is not less than 80 feet, and at the wharves up to 40 ft. There are extensive facilities for handling cargo, and for storing and loading grain in bulk or bags; also for replenishing coal and oil bunkers. For 20 miles Sydney Harbour extends inland, the finest harbour in the world, and is surrounded by scenery of surpassing beauty. The principal wharves are situated in close proximity to the business centre of the city. The total area of water in the harbour is 13,600 acres, or about 21 square miles, of which approximately one-half has a depth of not less than 30 ft.: the rise and fall of the tide is from 3 to 6 ft. The city and suburbs contain approximately 671 square miles, with a population of 2,016,620 (estimated, June 30, 1958).

The parks in or adjacent to the metropolitan area include the National Park which measures 34,392 acres, Kuring-gai Chase 38,263 acres, Kurnell 248 acres, Centennial Park 474 acres, and Parramatta Park 252 acres.

Other cities and towns over 12,000 are ΨNewcastle 192,940; Wollongong (Greater) 112,390; Broken Hill 33,720; Blue Mountains 23,640; Maitland 23,030; Goulburn 20,870; Wagga Wagga 20,900; Penrith 22,020; Lismore 19,110; Lithgow 14,850; Albury 18,400; Orange 19,030; Cessnock (Greater) 40,230; Tamworth 17,930; Grafton 15,340; Bathurst 16,990; Dubbo 13,240; and Campbelltown 12,440.

QUEENSLAND

This State, situated in lat. 10° 40'-29° S. and long. 138°-153° 30' E., comprises the whole north-eastern portion of the Australian continent.

Queensland possesses an area of 667,000 square miles (i.e., equal to more than 5½ times the area of the British Isles).

POPULATION.—At June 30, 1958, the population numbered 1,417,404 persons (725,573 males and 691,831 females).

The total number of aborigines (estimated June 30, 1957) was 9,957 full blood and 7,133 half-caste, exclusive of Torres Strait Islanders.

Increase of the People.

Year	Births	Deaths	Marriages
1956	32,409	12,186	9,934
1957	33,763	11,679	10,271
1958	33,872	11,455	10,255

Infantile mortality rate (1958) 19.4 per 1,000 live births.

Religion.

At the Census of 1954 there were 454,095 Church of England, 316,962 Roman Catholics, 151,586 Presbyterians, 146,456 Methodists, 28,612 Lutherans, 20,113 Baptists, 9,086 Congregationalists, 56,775 other Christians, and 1,340 Hebrews.

PHYSIOGRAPHY.

The Great Dividing Range on the eastern coast of the continent produces a similar formation to that of New South Wales, the eastern side having a narrow slope to the coast and the western a long and gradual slope to the central plains, where the Selwyn and Kirby Ranges divide the land into a northern and southern watershed. The Brisbane, Burnett, Fitzroy, and Burdekin rise in the eastern ranges and flow into the Pacific, the Flinders, Mitchell, and Leichhardt into the Gulf of Carpentaria, and the Barcoo and Warrego rise in the central ranges and flow southwards.

Climate.—At Brisbane the mean temperature for 1958 was 69.9°, the maximum and minimum shade temperatures being 105.3° and 39.4°; mean barometer, 29.98 inches. The coastal regions are warm and moist, but the rainfall decreases away from the coast and is scanty in the far west. The rainfall in Brisbane during 1958 was 46.6 inches, compared with average rainfall of 40.1 inches.

GOVERNMENT.

Queensland was constituted a separate colony with Responsible Government in 1859, having previously formed part of New South Wales. The executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council of 11 members.

EDUCATION.

Primary Education compulsory, secular and free. At the end of 1957 there were 1,559 State schools, including 30 provisional and 36 high schools in operation, with 7,637 teachers and a net enrolment of 214,626 children and 288 private and 8 grammar schools, with a net enrolment of 63,510. The State-aided University had 5,615 students in 1957. The Department of External Studies had 2,038 students in 1957. State expenditure on education in 1956-57 was £13,296,940.

FINANCE.

Receipts and Expenditure of the Consolidated Revenue Fund and Debt of Queensland for four years ended June 30:—

Year	Revenue	Expenditure	Debt (Gross)
	£A	£A	£A
1955...	73,819,723	73,602,000	236,474,488

1957...	85,158,100	85,142,870	269,319,683
1958...	87,955,575	89,469,883	285,947,364

Banking.—Advances made by Trading Banks (including the Commonwealth Trading Bank of Australia) at June 30, 1958, totalled £145,804,000. The deposits at the same date amounted to £214,093,000. Depositors' balances in Queensland savings banks at June 30, 1958, £153,244,000, averaged £109 for each inhabitant. There were 1,014,000 operative accounts.

PRODUCTION AND INDUSTRY.

The gross value of primary production in 1956-57 was £86,379,000 (agriculture £81,014,000, dairying £32,592,000, pastoral £127,570,000, poultry and bee-keeping £2,853,000, mining £30,930,000, forestry, £9,450,000, fisheries £1,777,000, hunting and trapping £193,000), and net value of manufacturing £138,399,000.

Agriculture and Live Stock.—Of the total area of 426,880,000 acres the Government has parted with the fee simple of 25,289,056 acres, and 2,477,882 acres more are in process of alienation.

The total area under crop in 1957-58 was 2,594,613 acres. The most important crop was sugar-cane, under which there were 485,355 acres, producing 1,256,271 tons of raw sugar, 460,639 acres were under wheat (yielding 6,657,168 bushels), 122,245 under maize (3,160,626 bushels), and 172,644 under barley (2,955,996 bushels). English and sweet potatoes are cultivated, as also are sorghum, tomatoes, pea-nuts, cotton, tobacco, linseed, sunflower seed, arrowroot, various citrus fruits, pineapples, bananas, grapes, mangoes, custard apples, papaws, apples, peaches, plums, and other English fruits. The live stock on March 31, 1958, included 7,187,195 cattle, 1,269,969 being dairy cattle, 22,273,711 sheep, 243,294 horses, and 422,713 pigs.

Forestry.—There are about 17,920,000 acres of commercial timberland in Queensland, of which there have been reserved for forestry purposes 8,127,000 acres. An area of 837,394 acres has been reserved for National Parks.

Minerals.—There are rich deposits of copper, lead, silver and zinc, and deposits of gold, tin, limestone, ironstone, wolfram, uranium, bauxite and mineral sands. Coal is mined in the Ipswich (near Brisbane) and some northern districts, and there is extensive production by open-cut method in Central Queensland. The output in 1957 included gold, £1,014,000; coal, £7,263,000; copper, £10,230,000; tin, £623,000; silver, £1,738,000; lead, £6,141,000; zinc, £1,985,000.

Communications.—The State is served by 6,456 miles of railways, practically all 3 ft. 6 in. in gauge. During 1957-58, 33,691,000 passengers and 7,827,000 tons of goods and live stock were carried. At June 30, 1957, there were 58,748 miles of formed roads and 62,000 miles of unconstructed roads in the State, and 345,084 motor vehicles were on the register.

The chief overseas exports are wool, sugar, meat, minerals and butter.

TOWNS.

CAPITAL, Ψ BRISBANE, population 555,000 (June 30, 1958), is situated on the Brisbane River, which is navigable by large vessels to the city, over 20 miles from Moreton Bay. The City Hall is a notable building, and there are fine Government and private buildings. The Greater Brisbane area (385 square miles) is controlled by a City Council presided over by a Lord Mayor.

Ψ The main ports in their order along the coast are Brisbane, Maryborough (18,900), Bundaberg (22,200), Gladstone (7,320), Rockhampton (43,400), Mackay (15,100), Bowen (3,660), Townsville (43,800), Cairns (23,400), Lucinda Point, Mourilyan, and Thursday Island.

Other towns are Ipswich (42,300), Gold Coast (23,700), Redcliffe (16,730), Gympie (10,500), Nambour (5,300) and Kingaroy (4,700) in the south-east; Toowoomba (46,600), Warwick (9,850) and Dalby (6,900) on the Darling Downs; Roma (4,450) and Charleville (4,900) in the south-west; Mt. Morgan (4,150), in Central Queensland; Ayr (7,700), Innisfail (7,200), Charters Towers (6,780) and Ingham (4,200) in the north-east; and Mount Isa (8,600) in the north-west.

Thursday Island, the smallest of the Prince of Wales group, in long. 142° E. and lat. 11° S., has an area of 900 acres. It lies in Torres Strait, about 30 miles N.W. of Cape York and some 1,400 miles by sea from Brisbane. The island had a population of 1,570 (June 30, 1958) and is the headquarters of the pearlshell and trochus-shell fisheries.

Transmission of mails from London to Brisbane, by air, 5 days; by sea (approximate), 32 days.

SOUTH AUSTRALIA

The State of South Australia is situated between 26° and 38° S. lat. and 129° and 141° E. long., the total area being 380,070 sq. miles.

POPULATION.—In 1958 the population numbered 907,922 (459,522 males and 448,470 females). The number of full-blooded aboriginals is estimated at less than 3,000.

Increase of the People.

Year	Births	Deaths	Marriages
1955	18,494	7,536	6,226
1956	18,964	7,593	6,277
1957	19,536	7,576	6,581
1958	20,047	7,743	6,505

Religion.

Religion is free and receives no State aid. At the Census, 1954, the persons belonging to the principal religious denominations were as follows: Church of England, 223,319; Methodists, 193,234; Congregationalists, 15,651; Baptists, 18,797; Lutherans, 42,056; Roman Catholics, 125,770; Presbyterians, 30,778; and Churches of Christ, 19,162.

PHYSIOGRAPHY.

The most important physical features of South Australia are broad plains, divided longitudinally by four great secondary features, which form barriers to east-west movement, and which have thus largely determined the direction of roads and railways, the sites of towns and villages and the manner of distribution of the population. These four barriers are Spencer Gulf, St. Vincent Gulf, the Mt. Lofty-Flinders Ranges and the River Murray. The long, deeply-indented coastline, which provides a few major, and a multitude of lesser

harbours, trends generally south-eastwards, and largely determines the pleasant weather conditions and good rainfall near the coast.

The north-western portion of the State is mostly desert, while north of latitude 32° S. the country is unpromising by comparison with the fertile land which surrounds the hill country of the east. The Murray, which flows for some 400 miles through the south-eastern corner, is the only river of importance.

The lack of rivers and fresh-water lakes in the settled areas has necessitated the building of a number of reservoirs, which have been supplemented in the past 15 years by the construction of pipelines from the River Murray.

Climate.—The mean annual temperature at Adelaide is 63° , the winter temperature (July-August) averaging 53° , and the summer (November-March) 72° . During the summer months the maximum temperature at times exceeds 100° , but owing to the purity and dryness of the atmosphere the inconvenience is comparatively slight. The average annual rainfall at Adelaide, derived from over 100 years' record is 21 inches. This total is rather higher than the approximate average annual rainfall over the whole of the agricultural areas. In the Mount Lofty Ranges the mean yearly rainfall in places exceeds 40 inches, while in Adelaide the precipitation has fallen as low as 11.4 inches.

GOVERNMENT.

South Australia was proclaimed a British Province in 1836, and in 1851 a partially elective legislature was established. The present Constitution rests upon a Law of Oct. 24, 1856, the executive authority being vested in a Governor appointed by the Crown, aided by a Council of 8 Ministers, and the Lieutenant-Governor.

GOVERNOR.

Governor of South Australia, His Excellency Air Vice-Marshal Sir Robert George, K.C.M.G., K.C.V.O., K.B.E., C.B., M.C., appointed 1952, term extended for 2 years from Feb. 23, 1958. £A5,000 Private Secretary, Maj.-Gen. THE LEGISLATURE.

Parliament consists of a Legislative Council of 20 members elected for 6 years, one-half retiring every 3 years; and a House of Assembly of 39

members, elected for a maximum duration of 3 years. Election is by ballot, with universal adult suffrage for the House of Assembly for all British subjects, male and female; there are certain property and war service qualifications for electors to the Legislative Council, who numbered 176,527 in 1956, those for the Assembly numbering 479,188.

The triennial elections to the House of Assembly in March, 1959, returned 20 Liberals (Government party), 17 Labour (Opposition) and 2 Independents.

President of the Legislative Council, Hon. Sir Walter Duncan..... £2,800
Speaker of the House of Assembly, Hon. B. H. Teusner..... 2,800

THE JUDICATURE.

Law and Justice.—The Supreme Court is presided over by the Chief Justice and five Puisne Judges; there are Courts of Vice-Admiralty and Insolvency, as well as Local Civil Courts, with stipendiary magistrates, and the usual Police Courts.

Chief Justice and Judge of Vice-Admiralty, Hon. Sir (John) Mellis Napier, K.C.M.G. £4,750

EDUCATION.

Public Education (Primary, Secondary and Technical) is provided by the State, and controlled by a responsible Minister; it is secular, compulsory, and free. In 1957 there were 693 State schools, with 164,403 scholars; State expenditure in 1957-58 was £10,737,610, including grants to University, Libraries, &c. The Government grants Exhibitions and Scholarships, carrying the holders to higher schools and the University. Private schools number 171 with 36,591 scholars. There is an endowed University at Adelaide, founded in 1874, with 2,944 full-time students in 1959; all classes are open to women. A State School of Mines and Industries has also been established, and there are technical schools at 19 country centres and also special trade schools for apprentices and domestic art centres. The public library museum, art gallery and local institutes are supported or assisted by the State.

STATE FINANCE.

(For years ended June 30)

Year	Revenue	Expenditure	Debt
	£A	£A	£A
1955	51,884,000	54,118,000	236,462,000

1958	70,642,000	71,042,000	296,814,000

Banking.—There are 9 trading banks in Adelaide, including the Commonwealth Government Bank and the State Bank of South Australia, with about 570 branches and agencies, having total average deposits of £129,536,000 in December quarter, 1958. The two savings banks, with about 1,300 branches and agencies, had deposits amounting to £150,643,000 on December 31, 1958.

PRODUCTION AND INDUSTRY.

The gross value of production in 1957-58 was: crops £45,044,000, pastoral £55,514,000, dairying £13,192,000, fisheries, game and poultry, and forestry £9,426,000.

Land Tenure.—Of the total area of the State (243,000,000 acres), 14,900,000 acres have been

sold or are in the process of alienation by the Crown under systems of deferred payment; 117,000,000 acres are held under pastoral leases and 23,000,000 under other miscellaneous leases.

Agriculture.—The total area cultivated is 9,008,000 acres—under wheat, 1957-58, 1,331,000 acres, hay 201,000, oats 427,000, barley 1,212,000. Wheat harvest 1957-58, 14,914,000 bushels; barley, 17,552,000 bushels. Oranges, lemons, apples, apricots, peaches, and all stone fruits and olives are successfully grown, and fruit drying is profitable. In 1957-58, there were 57,000 acres of vines with a production of 26,400,000 gallons of wine, 96,000 cwt. of dried currants and 227,000 cwt. of sultanas and raisins. Considerable quantities of fruits (fresh and dried), wine and brandy, are annually sent to overseas countries, principally the United Kingdom, and to other Australian States. Some areas of the State, particularly near Adelaide, are also very suitable for growing all kinds of root crops and vegetables.

Live Stock (March 31, 1958).—There were 15,237,000 sheep, 597,000 cattle, 36,000 horses, 108,000 pigs. Wool production (1957-58), 185,843,000 lb.

Minerals.—Iron, pyrite, gypsum, salt, coal, limestone, clay, &c., are found. The total mineral output was valued at £A23,176,000 in 1957, but of this total the value of iron ore, £15,202,000, was subject to revision.

Manufactures.—In 1958 there were 4,168 factories, employing 92,472 hands, the gross value of the output being £332,008,000. Plant machinery, land and buildings were valued at £140,363,000.

Transport and Communications.—There were (1958) 3,891 miles of railway in South Australia, 141 miles of tram and bus routes and 55,000 miles of roads. The railway mileage includes the South Australian part of the Transcontinental Railway from Port Pirie (South Australia) to Kalgoorlie (Western Australia) which forms a link in the system from Brisbane to Fremantle; and also part of the Commonwealth line from Port Augusta to the Northern Territory. There are a number of excellent harbours, of which Port Adelaide is the most important. In 1957-58, 1,684 vessels with net tonnage of 6,568,769 entered South Australian ports direct from overseas or interstate. Nationality of these vessels was—Australian 778, United Kingdom, 461, other British 145 and foreign 300. There are 902 post offices in the State.

Civil Aviation.—There are 27 Government or licensed aerodromes, and 336,386 passengers and 10,109 tons of freight were carried in 1957-58.

Motor Vehicles.—The registrations in December, 1958, were 266,563, equal to 1 per 3.4 persons.

Wireless (1958).—Broadcasting stations 15. Listeners' licences 244,622.

Transit.—Transmission of mails from London to Adelaide, approximate, 29 days by sea and 4 days by air.

TASMANIA

Tasmania is an island in the South Pacific Ocean off the southern extremity of Australia, from which it is separated by Bass Strait, about 140 miles wide, in which are situated the Furneaux Group and King Island, included within the State. It lies between $40^{\circ} 33' - 43^{\circ} 39'$ S. lat. and $144^{\circ} 39' - 148^{\circ} 23'$ E. long., and contains an area of 26,215 square miles.

POPULATION.—On June 30, 1958, the estimated population numbered 335,418 (173,663 males and 161,755 females).

Year	Births	Deaths	Marriages
1939	5,004	2,426	2,264
1956	8,104	2,513	2,601
1957	8,435	2,670	2,507
1958	8,568	2,708	2,475

The birth rate in 1958 was 25.37, death rate 8.02, marriage rate 7.33 per 1,000. Infant mortality (1958) 19.49 per 1,000 births.

Religion.

In 1954 there were 147,407 members of the Church of England, 27,069 Roman Catholics, 38,236 Methodists, 15,607 Presbyterians, 4,425 Congregationalists and Independents, and 6,293 Baptists.

PHYSIOGRAPHY.

The surface of the country is generally hilly and timbered, with mountains from 1,500 to 5,000 ft. in height, and expanses of level, open plains. There are numerous streams, the Derwent and the Tamar being the largest. The climate is fine and salubrious, and well suited to European constitutions; the hot winds of Australia do not reach the island. At Hobart the mean annual temperature averages 54.4° , the mean temperature for Dec., Jan., and Feb. being 60.9° , and that of June, July and Aug. 47.4° . The western side of the island is very wet, the eastern side having a rainfall similar to that of eastern England; the average rainfall varies from 20 inches to 100 inches in different parts.

GOVERNMENT.

The island was first settled by the British in 1803 as an appendage to New South Wales, from which it was separated in 1825. In 1851 a partly elective legislature was inaugurated, and in 1856 Responsible Government was established. In 1901 Tasmania became a State of the Australian Commonwealth. The State executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council of Ministers responsible to the Legislature.

AGENT-GENERAL IN LONDON.

Agent-General for Tasmania, Hon. A. J. White.
Address, 457 Strand, Charing Cross, W.C.2.

THE LEGISLATURE.

Parliament consists of two Houses, a *Legislative Council* of 19 members, elected for six years (3 retiring annually, in rotation, except in every sixth year, when four retire) and a *House of Assembly* of 35 members, elected by proportional representation for five years, the electors for the latter being all adult Tasmanians who have resided continuously in the State for 6 months; the electorate for the Council is smaller, having a property or educational qualification for both sexes, but war service is a qualification for enrolment. The General Election for the House of Assembly in May, 1959, resulted in the return of 17 Labour, 16 Liberal and 2 Independent members.

President of the Legislative Council, Hon. H. S. Baker, C.M.G., D.S.O.

Clerk of the Council, E. Briggs.

Speaker of the House of Assembly, Hon. C. B. Aylett.

Clerk of the House, C. K. Murphy, C.B.E.

THE JUDICATURE.

The Supreme Court of Tasmania, with civil, criminal, ecclesiastical, admiralty and matrimonial jurisdiction, was established by Royal Charter on October 13, 1823.

Chief Justice, Hon. Sir Stanley Burbury, K.B.E.

Puisne Judges, Hon. Sir Kenneth Green, K.B.E.; Hon. M. G. Gibson; Hon. M. P. Crisp; Hon. G. H. Crawford.

Registrar of the Supreme Court, W. A. F. Mackey (acting).

Local Courts established under the Local Courts Acts, 1896, are held before Commissioners who are legal practitioners, with a jurisdiction up to £250. Courts of General Sessions, constituted by a chairman who is a Justice of the Peace and at least one other Justice, are established in the municipalities for the recovery of debts and demands not exceeding £50. Courts of Petty Sessions are established under the Justices Procedure Act, 1919, constituted by Police Magistrates sitting alone, or any two or more justices.

EDUCATION.

Primary education is compulsory, secular and free, there being 278 State schools divided into Primary, Area, High and Technical High Schools, with a net enrolment of 60,814 scholars in 1957. There were 58 private schools with an enrolment of 11,333. The University of Tasmania at Hobart, established 1890, had 675 full-time students in 1959; there are technical schools at Hobart, Launceston, Burnie, Devonport, Queenstown, Rosebery, Ulverstone, Smithton and Zeehan.

1957	60,464	24,131	20,239
1958	61,269	23,625	20,649

Vital Statistics.—Annual rate per 1,000 of population in 1958:—Births, 22.36; Deaths, 8.62; Marriages, 7.54. Deaths under 1 year per 1,000 births, 19.23.

Religion.

There has been no State aid to religion since 1875. Members of the Church of England at the date of the census in 1954 numbered 832,473, Roman Catholics 564,654, Presbyterians 326,422, Methodists 252,802, Baptists 34,326, Church of Christ 33,608 and Hebrew 24,016. The number of persons who did not state their religion was 243,555.

PHYSIOGRAPHY.

The *Australian Alps* and the *Great Dividing Range* pass through the centre of the State, and divide it into a northern and southern watershed, the latter sloping down to the ocean and containing, especially in the south-east, well-wooded valleys. The length of the Murray River, which forms part of the northern boundary of Victoria, is about 1,200 miles along the Victorian bank. Melbourne, the capital city, stands upon the Yarra-Yarra, which rises in the southern slopes of the Dividing Range.

Climate.—The climate of Victoria is characterized by warm summers, rather cold winters, and rain in all months with a maximum in winter or spring. Prevailing winds are southerly from November to February inclusive, with a moderate percentage of northerlies often associated with high temperatures. Northerly or westerly winds predominate from March to October inclusive. Rain on an average falls 156 days per year, the annual average being 25.89 inches.

GOVERNMENT.

Victoria was originally known as the Port Phillip District of New South Wales, and was created into a separate colony in 1851, with a partially elective legislature. In 1855 Responsible Government was conferred. The executive authority is vested in a Governor, appointed by the Crown, aided by an Executive Council of Ministers.

Governor of the State of Victoria, His Excellency General Sir Dallas Brooks, K.C.B., K.C.M.G., K.C.V.O., D.S.O., born Aug. 22, 1896, appointed 1949, term extended for 3 years from Oct. 19, 1954 and for further 5 years from Oct. 1957. . . . £7,500

EDUCATION.

Primary Education is compulsory, secular and free between the ages of 6 and 14. At December 31, 1957, there were 1,909 Primary Schools (including one Correspondence School) attended by 278,218 pupils; 223 Secondary Schools (including one Correspondence School) with an enrolment of 90,735; and 50 Technical Schools (44 of which possess a junior section with 28,310 pupils in attendance) with a roll call of 58,306 senior students.

During 1957, 141,886 pupils attended 532 independent schools, most of which are Roman Catholic, as the Roman Catholic Church in the State maintains an independent scholastic organization.

There is a State-aided University at Melbourne with five affiliated colleges—Trinity, Ormond, Queen's, Newman (which have connections with the Anglican, Presbyterian, Methodist and Roman Catholic Churches respectively), and the University Women's College. The University had 6,170 full-time students in 1959.

FINANCE.

The revenue and expenditure and State Debt for four years are given as follows:—

Year	Revenue	Expenditure	Debt
	£A	£A	£A
1938-39	23,354,711	29,141,953	179,698,118

1957-58	153,391,287	156,603,943	518,212,671

Banking, &c.—The state savings bank deposits at June 30, 1958, amounted to £272,807,000; in addition, deposits in the Commonwealth savings bank (in the State of Victoria) amounted to £117,805,000, and in other savings banks, £43,019,000.

Life Assurance.—There were 20 companies transacting life assurance business in Victoria during 1957. There were 943,380 policies in force with sums assured amounting to £747,620,326 in the Ordinary Department and 1,131,825 policies for £98,743,819 in the Industrial Department.

Insurance (other than Life).—There were 176 companies or other bodies transacting business in Victoria during the year 1957-58. Total revenue amounted to £52,162,875, made up of premium income £50,763,919 and other income £1,398,956. Expenditure totalled £44,006,378, comprising losses £28,602,837, commission and agents' charges £5,373,517 and other expenditure £10,030,024.

PRODUCTION AND INDUSTRY

The gross value of production in 1957-58 was £916,444,000—agricultural £88,198,000, pastoral £137,854,000, dairying £65,431,000, poultry and bee keeping £23,266,000, trapping £3,588,000, forestry £14,109,000, mining and quarries £14,022,000, fisheries £1,294,000, manufactures £568,649,000.

Agriculture.—Of the 5,696,000 acres under cultivation in 1957-58, 1,835,000 were wheat crops and 622,000 oats and 871,000 acres were cut for hay. In 1957-58, 2,582,000 gallons of wine were produced.

Live Stock.—There were in March, 1958, 27,090,000 sheep, 1,724,000 dairy cattle, 1,026,000 beef cattle, 278,000 pigs, and 98,000 horses. The quantity of wool produced in 1957-58 was 296,490,000 lb., valued at £76,255,000.

Minerals.—Production of gold in 1958 was 42,713 fine ozs. Other minerals raised consisted principally of coal (black and brown), limestone, kaolin, tin, gypsum, antimony concentrates and bauxite. Production of brown coal in 1958 amounted to 11,644,000 tons.

Motor Vehicle Registrations.—The number of vehicles on the register at Dec. 31, 1958, was: private cars, 576,644; commercial, 98,385; hire 5,214; primary producers, 62,232; omnibuses, 880 and motor cycles, 24,146.

Victoria State Railways.—At June 30, 1958, there were 4,401 miles of railway open for traffic. The revenue and expenditure for the year ended June 30, 1958, were £35,966,360 and £38,174,019 respectively, and interest charges, exchange, etc., amounted to £3,592,174. Total traffic mileage was 18,353,000 and passenger journeys numbered 167,661,724. The tonnage of goods and live stock carried was 8,891,959.

Shipping.—During the year ended June 30, 1958, 3,075 vessels with net tonnage 11,282,816 entered Victorian ports and 3,049 vessels with total net tonnage of 11,184,171 cleared.

Trade and Industry.—Wool, wheat, flour, butter, live stocks, fruits, milk and cream, meats and poultry are the staple productions of the State; but secondary industry (16,426 factories, &c., employing 357,101 hands in 1957-58) has expanded greatly in recent years. The net value of factory production has risen from £65,996,000 in 1938-39 to £568,649,000 in 1957-58. The export trade (excluding inter-state trade) consists largely of agricultural and pastoral products. The principal over-sea imports of the State are apparel, textiles, manufactured fibres, machines and machinery, metals and metal manufactures, rubber and rubber manufactures, tobacco, crude petroleum, paper, stationery, &c., and drugs and chemicals.

CITIES AND TOWNS

Ψ MELBOURNE, the capital city, which is an episcopal see, was originally laid out in the year 1837 with wisdom and foresight; its wide streets, park lands, public gardens, university, public library, museum and large churches are the principal features of the city. Melbourne and suburbs cover an area of 445,746 acres and contained on June 30, 1958, a population of 1,726,100. Other cities and towns are Ψ Geelong, 85,190; Ballarat, 52,450; Bendigo, 40,310; Ψ Warrnambool, 13,910; Mildura, 12,020; Hamilton, 9,280; Shepparton, 12,470; Maryborough, 7,300; Colac, 8,940; Horsham, 8,690; Castlemaine, 7,020; Ararat, 7,880; Wangaratta, 12,210; Stawell, 5,810; Echuca, 6,130; Sale, 7,330; Swan Hill, 5,930; Benalla, 7,220 and Moe, 13,560.

WESTERN AUSTRALIA

Includes all that portion of the continent west of 129° E. long., the most westerly point being in 112° 52' E. long., and from 13° 30' to 35° 8' S. lat. Its extreme length is 1,500 miles, and 1,000 miles from east to west; total area 975,920 sq. miles.

POPULATION.—At December 31, 1958, the population was 713,583 (366,356 males and 347,227 females).

The estimated number of full-blood aboriginals on June 30, 1958, was 13,000.

Year	Births	Deaths	Marriages
1955	16,623	5,379	5,145
1956	16,916	5,572	5,080
1957	16,924	5,295	4,899
1958	16,731	5,554	5,038

Religions.—Census of 1954—268,135 Church of England, 143,489 Roman Catholics, 68,489 Methodists, and 37,659 Presbyterians.

Physical Features.—Large areas of the State, for some hundreds of miles inland, are hilly and even mountainous, although the altitude, so far as ascertained, rises nowhere above that of Mount Bruce (4,024 ft.) in the north-west division or that of Bluff Knoll (3,640 ft.) in the Stirling Range in the south-west. The coastal regions are undulating, with an interior slope to the unsettled central portion of Australia. The Darling and Hamersley ranges of the west have a seaward slope to the Indian Ocean, into which flow many streams, notably the Preston, Collic, Murray, Swan, Murchison, Gascoyne, Ashburton, Fortescue, and De Grey. In the north the Fitzroy flows from the King Leopold ranges into the Indian Ocean, and the Drysdale and Ord into the Timor Sea. The greater portion of the State may be described as an immense tableland, with an altitude of from 1,000 to 2,000 ft. above sea-level, the surface of which varies from stretches of clayey soils to the sand dunes of the far interior. The climate is one of the most temperate in the world. The total rainfall at Perth during 1958 was 32.08 inches, the average for the past 82 years 35.05. Of the total area two-thirds is suitable for pastoral purposes.

GOVERNMENT.

Western Australia was first settled by the British in 1829, and in 1870 it was granted a partially elective legislature. In 1890 responsible government was granted, and the Administration vested in a Governor, a Legislative Council, and a Legislative Assembly. The present constitution rests upon an Amending Act of 1899, further amended by the Constitution Acts Amendment Acts of 1911, 1934 and 1955; the Executive is vested in a Governor appointed by the Crown and aided by a Council of responsible Ministers.

The Legislative Assembly (elected March, 1959) is composed of Labour Party 23, Liberal and Country League 17, Country Party 8, Independent 2.

EDUCATION

Education.—Education is compulsory and free. In 1958 there were 478 Primary Schools and 25 High Schools under the control of the Minister for Education representing a total of 104,166 pupils. In addition the Government has established two Teachers' Training Colleges, Technical Schools and Schools of Mines and subsidises a University. There were also 300 private schools with an average attendance of 32,289. The total amount expended on education (from Revenue) during the year ended June 30, 1958, was £8,857,213, including grants of £614,958 to the University of Western Australia.

PRODUCTION AND INDUSTRY

The gross value of primary production in 1957-58 was: agricultural £43,638,801; pastoral and trapping £47,146,667; dairying, poultry keeping and bee-farming £11,734,954; forestry £5,520,754; fisheries £3,264,846; mining £22,924,495.

Crops and Live Stock.—Of the total area under crop (5,510,862 acres), 2,957,206 acres were under wheat for grain, the 1957-58 crop being estimated at 33,100,000 bushels. On March 31, 1958, the livestock included 997,173 cattle, 15,723,963 sheep, 150,783 pigs and 43,930 horses. In 1957-58 there were 9,023 acres of vineyards and 21,743 acres of orchards. The wool clip in 1957-58 was 149,125,000 lb. in the grease.

Manufacturing Industries.—There were on June 30, 1958, a total of 3,941 industrial establishments in the State employing either machinery or at least four hands. The total number of persons employed in them was 48,462.

Forestry.—The forests contain some of the very finest hardwoods in the world. The total quantity of timber sawn and hewn during 1957-58 was 233,173,000 super feet.

Minerals.—The mines of the Coolgardie and adjacent goldfields, which cover a vast portion of the interior and extend to the 125th meridian, and of the northern fields, are being constantly worked. The production of gold in the State for 1958 was 867,188 fine oz. (£A14,178,328). The total amount produced from 1886 to Dec. 31, 1958, is 59,912,903 fine oz. (£A418,590,584). Magnetic iron, lead, copper, tin and manganese ores and coal, asbestos, bauxite, gypsum and ilmenite exist in large quantities.

Communications.—On June 30, 1958, there were 4,117 miles of State government railway (though operations on 820 miles have been suspended); 277 miles of private lines open for general and passenger traffic; and 450 miles of the Commonwealth line (Kalgoorlie-Port Pirie Junction). On Dec. 31, 1958, there were on the State register 380 vessels, of 19,177 tons, of which 168 were steam or motor vessels (15,602 tons) and 212 sailing vessels (3,575 tons).

PHYSIOGRAPHY

New Zealand consists of a number of islands of varying size in the South Pacific Ocean, and has also administrative responsibility for a large uninhabited tract in the Antarctic Ocean. The two largest and most important islands, the North and South Islands of New Zealand, are separated by only a relatively narrow strait. The remaining islands are very much smaller and, in general, are widely dispersed over a considerable expanse of ocean. The boundaries, inclusive of the most outlying islands and dependencies, range from 8° South latitude to South of 60° South latitude, and from 160° East longitude to 150° West longitude.

Geographical features.—The two principal islands have a total length of 1,040 miles, and a combined area of 182,374 square miles. A large portion of the surface is mountainous in character. The principal range is that of the Southern Alps, extending over the entire length of the South Island and having its culminating point in Mount Cook (12,349 ft.). The North Island mountains include several volcanoes, two of which are active, others being dormant or extinct. Mt. Ruapehu (9,175 ft.) and Mt. Ngauruhoe (7,515 ft.) are the most important. Of the numerous glaciers in the South Island, the Tasman (18 miles long by 1½ wide), the Franz Josef and the Fox are the best known. The North Island in particular is noted for its hot springs and geysers. For the most part the rivers are too short and rapid for considerable use in navigation. The more important include the Waikato (270 miles in length); Wanganui (180), and Clutha (120). Lakes (Taupo, 238 sq. miles in area; Wakatipu, 112; and Te Anau, 132) are abundant, many of them of great beauty.

Climate.—New Zealand has a moist-temperate marine climate, but with abundant sunshine. A very important feature is the small annual range of temperature which permits of some growth of vegetation, including pasture, all the year round. Very little snow falls on the low levels even in the South Island. The mean temperature ranges from 59° F. in the North to about 49° F. in the South. Rainfall over the more settled areas in the North Island ranges from 35 to 70 inches and in the South Island from 25 to 45 inches. The total range is from approximately 13 to over 250 inches. The number of rainy days is generally in the neighbourhood of 160 to 180 in the North Island and between 110 and 140 in the South, except in the southern portion of the west coast. The amount of sunshine is generally over 2,000 hours per annum and ranges between 1,600 and 2,500 hours.

GOVERNMENT

The west coast of the South Island of New Zealand was discovered by Abel Janszoon Tasman, the navigator (voyaging under the direction of the Netherlands' East India Company), on December 13, 1642. The islands were visited, and charted, in 1769 by Captain Cook, who returned to them in 1773, 1774, and 1777. From 1792 onwards sealers and whalers settled along the coasts, and trade in timber and flax followed. Christianity was introduced in 1814, and in 1832 a British Resident was appointed. In 1840 British sovereignty was proclaimed, and on May 3, 1841, New Zealand was, by letters patent, created a separate colony distinct from New South Wales. Organized colonization on a large scale commenced in 1840 with the New Zealand Company's settlement at Wellington. On Sept. 26, 1907, the designation was changed to *The Dominion of New Zealand*. The Constitution rests upon the Imperial Act of 1852, and on the New Zealand Constitution (Amendment) Act of Dec. 10, 1947. The Statute of Westminster was formally adopted by New Zealand in 1947. The executive authority is entrusted to a Governor-General appointed by the Crown and aided by an Executive Council, within a Legislature consisting of one chamber, the House of Representatives.

POLICE

On March 31, 1959, the strength of the Police
Force was 2,437 of all ranks, equivalent to 1 for
every 954 of the population. The total cost of
police protection in 1958-59 was £3,031,000.

PASSPORTS

With certain exceptions, no person over 16 years
of age is permitted to land unless in possession of a
passport or some other document satisfactorily
establishing his or her nationality and identity.

DEFENCE

Navy.

The Royal New Zealand Navy was greatly
expanded during the Second World War and a
number of small vessels were built in New Zealand.
New Zealand naval personnel totalled 10,000, of
whom 4,000 were with the Royal Navy. Over
1,000 New Zealanders served with the Fleet Air
Arm. The naval forces include the Women's
Royal New Zealand Naval Service, and Volunteer
Reserve forces in four divisions. The strength is
1 cruiser, 3 frigates, 1 survey ship, 1 Antarctic
support ship and 12 other vessels in commission; 1
cruiser, 3 frigates, 4 ocean minesweepers, 1 other
minesweeper and 5 other vessels in reserve. Active
naval personnel numbers 314 officers and 2,696
ratings. A cruiser and a frigate are normally
attached to the Far East Station.

Naval expenditure in 1958-59 amounted to
£7,433,880.

Army.

The New Zealand Army consists of the Regular
Force, the Territorial Force, the Army Reserve
and the Cadet Corps. The establishment of the
Regular Force is 8,119 and recruiting is in progress
to raise the strength of the Army to this figure.

During the war of 1939-1945 New Zealand sent
a division (the 2nd) to the Middle East theatre,
which took part in the campaigns in Greece, Crete,
North Africa and Italy. Another division (the 3rd)
saw service in the South Pacific and took part in a
number of actions in that area.

In 1958 compulsory military training was
abolished, and the Army is being organized on the
basis of a Regular Brigade Group backed by a
Volunteer Territorial Force. One battalion of the
Regular Brigade Group is stationed as part of the
Commonwealth Far East Strategic Reserve in
Malaya.

Army expenditure for the year 1958-59 was
£7,377,624.

Air.

The Royal New Zealand Air Force was constituted as a separate defence service in 1937. The force was mobilized in September, 1939, and its organization was linked with the Empire Training Scheme. A number of New Zealand squadrons operated with the R.A.F., and additional squadrons, with supporting forces, operated in the Pacific area. The Air Force now consists of the Regular Air Force, the Air Force Reserve, the Women's Royal New Zealand Air Force and the Air Training Corps. The strength of the Regular Force at March 31, 1959, was 4,565.

Air Force Expenditure in 1958-59 was £9,987,000.

FINANCE

Figures of the Consolidated Fund shown in this table are quoted on a gross basis, i.e. credits have not been deducted from departmental expenditure, but have been included as receipts. Expenditure in the years 1956-57 and 1959 includes transfers to the Social Security Fund. There was no transfer in 1958. The expenditure of the Social Security Fund for 1958-59 was £59,463,000 as compared with an expenditure of £78,901,000 in 1957-58.

Year ended March 31	Revenue	Expenditure
	£(N.Z.)	£(N.Z.)
1939	43,699,000	42,880,000
1956	197,433,000	193,282,000
1957	206,276,000	202,951,000
1958	193,580,000	193,736,000
1959	241,310,000	240,888,000*

* Includes £8,844,000 for debt redemption and £17,933,000 for defence.

Revenue from taxation in 1958-59 amounted to £306,176,300, of which £205,574,000 was receipts of the Consolidated Fund, £80,615,000 receipts of the Social Security Fund and £19,798,000 receipts into the National Roads Fund.

DEBT.

The gross Public Debt amounted on March 31, 1959, to £816,552,000, of which £118,277,000 was domiciled in London. The amount domiciled in London excludes £26,191,000 in respect of which interest payments have been suspended since 1931 by agreement with the Imperial Government.

BANKING.

There are five trading banks (with numerous branches) doing business, two of which are predominantly New Zealand banks. Of these the Bank of New Zealand is owned by the State. At March 25, 1959, total assets of all trading banks in New Zealand amounted to £291,922,000; liabilities, £292,210,000; and the value of notes in circulation amounted to £64,089,000. The Reserve Bank of New Zealand commenced business on August 1, 1934. The note-issuing powers of other banks have since been withdrawn and the Reserve Bank notes are legal tender. Net overseas assets of banks (on account of New Zealand business only) at March 25, 1959, amounted to £74,866,000, of which £62,748,000 and £12,618,000 represented the Reserve Bank's holdings of sterling exchange and sterling investments respectively. Trading banks' advances, including discounts, at the end of March, 1959, totalled £177,056,000, compared with £183,771,000 in the previous year. Deposits with trading banks at the end of March, 1959, amounted to £277,530,000. At the corresponding date in 1958 they were £287,768,000.

Post-office and trustee savings banks had, at the close of the year 1958-59, 2,202,000 depositors having £322,406,000 to their credit. This amount does not include National Savings Accounts in which depositors had £61,102,000 to their credit at March 31, 1959.

As from Aug. 30, 1948, New Zealand restored her currency to parity with sterling, in place of the depreciated rate of £N.Z.125=£100 adopted in 1933.

EDUCATION

The State system of education is free, secular, and compulsory. The school-leaving age was raised to 15 years as from Feb. 1, 1944. There were (Dec. 1958) 1,998 public primary schools, with 364,181 scholars; there were also 324 registered private primary schools with 51,063 scholars, and 157 Maori village schools with 14,135 scholars, of whom 12,043 were Maoris. There were also 26,404 Maori children attending public primary schools. The higher education of boys and girls in the cities and large towns is carried on in 96 secondary and combined schools, and in 34 technical high and technical day schools. In addition there are 111 secondary departments of district high schools, 104 private secondary schools and 11 Maori secondary schools. The total number of pupils receiving full-time secondary education at the end of 1958 was 94,156 and in addition there were 44,555 part-time students attending technical classes, 1,503 receiving part-time tuition from the Correspondence School and 3,580 receiving instruction from the Technical Correspondence School. The University of New Zealand, with power to confer degrees, consists of the University of Auckland, Victoria University of Wellington, the University of Canterbury and the University of Otago. Two Agricultural Colleges (Massey and Canterbury) are associated with the University. The 6 Colleges had a total of 12,565 students in 1959.

The total expenditure on Education out of public funds in 1958-59 was £35,928,536.

THE ISLANDS OF NEW ZEALAND

In addition to North, South, Stewart and Chatham Islands:—

The Three Kings (discovered by Tasman on the

East of the Epiphany), in 34° 6' S. lat. and 172° 8' 8" E. long. (uninhabited). *Auckland Islands*, about 290 miles south of Bluff Harbour, in 50° 32' S. lat. and 166° 13' E. long. The islands contain several good harbours, but are uninhabited. *Campbell Island* (population 7 at April 17, 1956). *Antipodes Group* (40° 41' 15" S. lat. and 178° 43' E. long.) uninhabited. *Bounty Islands* (47° 43' S. lat., 170° 0' 30" E. long.). *Snares Islands* and *Solander* (uninhabited).

The Kermadec Group (population 11 at 1956 Census), between 29° 10' to 31° 30' S. lat., and 177° 45' to 179° W. long., includes Raoui or Sunday, Macaulay, Curtis Islands, L'Esperance, and some islets.

Cook and other Islands, included in the boundaries of New Zealand since June, 1901, consist of the islands of Rarotonga (7,576), Aitutaki (2,731), Mangaia (2,123), Atiu (1,391), Mauke (872), Mitiaro (297), Manuae (53), Takutea (uninhabited), Palmerston (88), Penrhyn or Tongareva (666), Manihiki (718), Rakahanga (365), Pukapuka or Danger (690), Suvarrow (uninhabited), Nassau (84), Niue (4,719). The population figures are as at Dec. 31, 1958, the total for the Group being 22,371. The chief exports are citrus fruits, tomatoes, pineapples, copra, pearl shell and manufactured apparel. The trade is chiefly with New Zealand and the U.S.A. The exports (1957) were valued at £N.Z.540,925, imports at £N.Z.788,048 for Cook Islands, and at £N.Z.58,667 and £N.Z.153,598 for Niue Island. Rarotonga is the chief island of the Cook Group, with a total population of 7,576. Local administration is carried out by Resident Commissioners at Rarotonga and Niue, and Resident Agents on the other inhabited islands, the latter being answerable to the Resident Commissioner at Rarotonga. In their administration, commissioners and agents are assisted by the Legislative Assembly of the Cook Islands, which has an elected majority of Maori members, though ordinances may be disallowed by the Governor-General of New Zealand.

The revenue of the Cook Islands in 1958-59, exclusive of a subsidy from the New Zealand Government of £365,425, was £432,261, and expenditure, £836,232. Revenue of Niue, exclusive of subsidy £150,000, was £139,747, and expenditure £297,831.

Ross Dependency (1923), see p. 721.

Tokelau (or Union) Islands.—A group of atolls (Fakaofu, Nukunono and Atafu) (population 1,749 at Dec. 31, 1958), proclaimed part of New Zealand as from Jan. 1, 1948.

The Trust Territories are:—

Western Samoa, consisting of the islands of Savai'i (703 square miles) and of Upolu, which with its small adjacent islands, is 430 square miles. The population at Dec. 31, 1958, was 102,860, of whom 96,974 were Samoans. All the islands are mountainous. Upolu, the most fertile, contains the harbours of Ψ Apia and Ψ Saluafata, of which the former is the capital. The islanders are Christians of different denominations. Coconuts (copra), cocoa and bananas are the chief products of the islands. The revenue for 1958 was £1,305,000. Expenditure £1,037,000. The exports were valued in 1958 at £2,947,628 and the imports, 1958, £2,220,976.

There are now a Legislative Assembly with a large majority of Samoan members and an Executive Council with Samoan representatives in the majority.

PHYSIOGRAPHY

Boundaries.—The provinces of the Union extend from the southernmost point of the African Continent to the courses of the Limpopo, Malopo and Orange Rivers, i.e., from 34° 50'–22° South latitude, and include all territories within those limits, with the exception of Basutoland, Swaziland, Bechuanaland and a part of Mozambique.

Relief.—The southernmost province contains many parallel ranges, which rise in steps towards the interior. The south-western peninsula contains the famous *Table Mountain* (3,582 feet), while the *Great Swartberg* and *Langberg* run in parallel lines from west to east of the Cape province. Between these two ranges and the *Roggeveld* and *Nuweveld* ranges to the north is the Great Karroo Plateau, which is bounded on the east by the *Sneeuberg*, containing the highest summit in the province (Kompasberg, 7,800 feet). In the east are ranges which join the *Drakensberg* (11,000 feet) between Natal and the Orange Free State.

The Orange Free State presents a succession of undulating grassy plains with good pasture-land, at a general elevation of some 3,800 feet, with occasional hills or kopjes. The Transvaal is also mainly an elevated plateau with parallel ridges in the *Magaliesberg* and *Waterberg* ranges of no great height. The veld or plains of this northernmost province is divisible into the High Veld of the south, the Banker Veld of the centre, and the Low Veld of the north and east, the first and second forming the grazing and agricultural region of the Transvaal and the last a fertile sub-tropical area. The eastern province of Natal has pastoral lowlands and rich agricultural land between the slopes of the *Drakensberg* and the coast, the interior rising in terraces as in the southern provinces.

Rivers.—The *Orange*, with its tributary the *Vaal*, is the principal river of the south, rising in the *Drakensberg* and flowing into the Atlantic between the Territory of South-West Africa and the Cape Province. The *Limpopo*, or *Crocodile River*, in the north, rises in the Transvaal and flows into the Indian Ocean through Portuguese East Africa. Most of the remaining rivers are furious torrents after rain, with partially dry beds at other seasons.

GOVERNMENT

The Union of South Africa is constituted under the South Africa Act, 1909 (9 Edw. VII., cap. 9), passed by the Parliament of the United Kingdom on September 20, 1909. In terms of that Act the self-governing Colonies of the Cape of Good Hope, Natal, the Transvaal and the Orange River Colony became united on May 31, 1910, in a legislative Union under one Government under the name of the Union of South Africa, those Colonies becoming original Provinces of the Union under the names of the Cape of Good Hope, Natal, the Transvaal and the Orange Free State respectively. The Union Government is seised of all State property, and the Railways, Ports and Harbours are administered by Commissioners.

The seat of the Government is Pretoria; the seat of the Legislature is Cape Town.

The Executive is vested in a Governor-General appointed by the Sovereign, and aided by an Executive Council, with a Legislature of two Houses.

Under the *Citizenship Act*, 1949, five years' residence in the Union is necessary for the acquisition of South African citizenship.

THE LEGISLATURE

The Senate, as reconstituted by Act No. 53 of 1955, now consists of 90 members appointed or elected for a term of five years. Nineteen are nominated by the Governor-General in Council (16 for the Union, 3 for the Cape Province in terms of the Separate Representation of Voters Act, 1951, and 2 for South West Africa). Sixty-seven are elected (27 for the Transvaal; 22 Cape; 8 Natal; 8 Orange Free State and 2 for South West Africa). In addition, four members are elected under the provisions of the Representation of Natives Act No. 12 of 1936.

The House of Assembly consists of 163 elected members, 52 of whom represent the Cape of Good Hope, 16 Natal, 68 Transvaal, 14 the Orange Free State, and 6 South-West Africa, with 3 Native members, Cape native voters being entitled to elect three members of the House of Assembly, who hold their seats for 5 years notwithstanding any dissolution of the House. There are also 4 members elected under the Separate Representation of Voters Act, 1951, to represent the electoral divisions for the coloured voters in the Cape Province. Members of both Houses must be South African citizens of white descent. White female franchise was introduced under the provision of Act No. 18 of 1930.

In April, 1958, the party representation in the House of Assembly was as follows: Nationalist Party, 103; United Party, 53; Native Representatives, 3; Representatives of Coloured Voters, 4. Total, 163.

DEFENCE

The South Africa Defence Act, 1912, became law on June 14, 1912. This Act, as amended in 1922, 1932, 1947, 1949, 1951 and 1952 provides that every citizen between the ages of 17 and 65 is liable to render personal service in time of war, and those between 17 and 25 are liable to undergo a prescribed course of peace training with the Active Citizen Force spread over a period of four consecutive years. The Act states, however, that not more than 50 per cent. of the total number liable to peace training shall actually undergo that training unless Parliament makes financial provision for the training of a greater number.

EDUCATION

The Provinces have been relieved of all vocational education (technical and industrial), and the Department of Education, Arts and Science under the Minister is concerned with 9 Universities, 12 technical colleges, schools of industries, reformatories and State technical, housecraft and commercial high schools, State-aided vocational schools and State and State-aided special schools for the physically handicapped.

The number of full-time students at the universities in June, 1959, was 23,708. The State expenditure on higher education, including administration and expenditure connected with the above-mentioned institutions, for the financial year 1956-57 was £2,870,450.

Primary Education and Education other than Higher Education.—The central direction of public education (other than higher education) is exercised by the Provincial Education Department in each of the four Provinces of the Union. Each Department is controlled by a Director. The majority of schools for whites in all the Provinces are state schools. In all Provinces primary education in schools for all races is free. Secondary education in all the Provinces is also free, with an age limit of 19 years in the Cape Province. In 1958, State expenditure on primary and secondary education for whites amounted to £33,657,670 and for non-whites £8,351,420.

COMMUNICATIONS

Railways.—The total open mileage of Government-owned lines at the end of March, 1958, was 13,435 miles, of which 12,642 miles were 3 ft. 6 in. gauge and 793 miles 2 ft. gauge. The capital expenditure on Government railways up to March 31, 1958, amounted to £538,599,834. Working expenditure (excluding depreciation) amounted to £93,728,346.

Posts and Telegraphs.—On March 31, 1957, there were 3,395 post and 3,470 telegraph offices open in the Union.

Airways.—Internal air services are operated between all the major centres in the Union and South-West Africa. Regional air services are operated between Johannesburg and Bulawayo and Johannesburg and Lourenco Marques.

The "Springbok Service" is operated jointly by South African Airways and the British Overseas Airways Corporation, using modern pressurised aircraft and providing a regular service between Johannesburg and London.

Shipping.—In 1958, South African ports handled about 18,394,476 tons of goods, excluding mail, passengers' baggage and stores, in the overseas trade and 821,562 tons in coastwise trade. The total harbour revenue for 1957-58 was approximately £8,702,965, the expenditure £3,532,200. The principal ports are Cape Town, Port Elizabeth, and East London (Cape Province); Durban (Natal); Walvis Bay and Luderitz Bay (S.-W. Africa).

South-West Africa.

(Suidwes-Afrika.)

Administrator, D. T. du P. Viljoen.

Secretary, C. F. Marais.

SOUTH-WEST AFRICA lies between S. lat. 17° 23' and the Orange River, with a narrow strip between 17° 30'–18° 20' S. lat. extending from 21° to 25° E. long., known as the Caprivi Zipfel, and gives access to the Zambesi. Off the coast are a number of guano islands (Hollandsbird, Mercury, Ichaboe, Seal, Penguin, Halifax, Long, Possession, Abatross, Pomona, Plumpudding, Sinclair and Roastbeef Islands).

The estimated area of the country is 318,261 square miles, and the population (1951 Census) is 434,081, of whom 49,930 are whites. The native population in the Police Zone is 139,058 and that beyond the Police Zone is estimated to be 227,827, of whom 190,585 are estimated to be in Ovamboland.

South-West Africa was occupied by Germany in 1884, but at the conclusion of the War of 1914-1918 the territory was mandated to the Union in accordance with the Treaty of Versailles and South-West

Africa has since that time been administered by the Union.

Under the Union Act No. 49 of 1919, the exercise of the mandate was vested in a Governor-General, who delegated his powers to an Administrator appointed by the Union Government. A limited measure of self-government was conferred upon the inhabitants by the Union Act No. 42 of 1925. Fundamental and far-reaching changes in the constitutional position of the Territory were introduced by the passing of the South-West Africa Affairs Amendment Act, 1949 (No. 23 of 1949). The Advisory Council was abolished and all 48 members of the Legislative Assembly are now chosen by the registered voters of the Territory.

The Territory is represented in the Union House of Assembly by six members duly elected by the registered voters of the Territory and in the Senate by four Senators, of which two are elected and two nominated by the Governor-General.

Generally speaking, only the Parliament of the Union has the power to legislate on those matters in respect of which the Legislative Assembly is not competent to legislate, and the Legislative Assembly in respect of other matters. In an emergency, however, the Governor-General, may, by proclamation, make laws about any matter on which the Legislative Assembly is not competent to make ordinances.

On July 11, 1950, the International Court of Justice at The Hague delivered an opinion that South-West Africa was still under international mandate; that international obligations resulting from the mandate were still incumbent on the Union, including obligation to submit reports on its administration; and that South Africa was not competent to modify its international status without consent of the United Nations.

The Capital of the Territory is Windhoek, which lies practically in the centre of the country at 5,500 ft. above sea-level. The ports are Ψ Walvis Bay and Ψ Luderitz.

Provinces of the Union of South Africa

CAPE OF GOOD HOPE

The Province of the Cape of Good Hope extends in S. lat. from 26° to 34° 50', and in E. long. from 16° 25' to 30°. The extent of the country is, N.E. to S.W., 750 miles, and from N.W. to S.E. 800 miles, with a coast-line of nearly 1,300 miles.

Education.—The province is divided into 114 school districts, each under the control of a School Board. A portion of the members of the School Boards is elected by the ratepayers and a portion partly nominated by the Provincial Administration and partly by the Local Authorities. Aided schools, which are mostly Non-white church schools, are controlled by local committees or by managers appointed by the churches concerned. Education is compulsory for children of white parentage and, provided certain conditions are fulfilled, also for coloured children. The necessary grants are provided from Provincial Council revenues, education up to the age of 19 being free.

Finance.—Revenue 1957-58 (including Union subsidy), £40,127,000; total expenditure, £38,892,000.

Administration.—The Province is administered by an Administrator, appointed for five years by the Governor-General, aided by a Provincial Council of 56 members (elected for five years). There is an Executive Committee of four members in addition to the Administrator, who is Chairman of the Committee.

Administrator, Dr. Hon. J. H. O. du Plessis. £3,250

Executive Committee, J. N. Malan; J. N. Henshilwood; J. Terblanche; G. S. Eden.
Provincial Sec., W. J. B. Slater.

Ψ CAPE TOWN. Total estimated population (June 1959), metropolitan area, 752,200.

Cape Town is 5,979 miles from Southampton; transit by mail steamship 14 days, and by air mail two days. There is a modern and well-equipped aerodrome, seventeen miles by road from the centre of the city. Cape Town's harbour and docking facilities, existing and projected, are in keeping with its status as a world port of commercial and strategic importance.

OTHER TOWNS WITH POPULATION, 1951.

Ψ Port Elizabeth, 169,360; Ψ East London, 90,630; Kimberley, 58,771; Uitenhage, 38,748; Paarl, 30,036; Grahamstown, 23,789; Queens-town, 25,880; Worcester, 25,397.

NATAL

The Province of Natal comprises an area of 33,578 square miles (including Zululand, 10,362 square miles), as reserved on September 4, 1952. The seaboard is 360 miles.

Finance.—Revenue 1957-58 (including Union Government subsidy), £16,346,000; expenditure £16,926,000.

Administration.—The Provincial Government is administered by a Provincial Council of 25 members (elected for 5 years). There is an Executive Committee of 4 members.

Administrator, Hon. A. E. Trollop. £3,250
Executive Committee, E. C. Wilks; E. J. V. Grant-
 ham; J. L. Smith; P. W. J. Groenewald.
Provincial Secretary, I. G. Horak.

PIETERMARITZBURG, the capital and seat of the Provincial Government, is situated about 54 miles inland from Durban. Estimated population (1959), 92,700.

ψ Durban (est. population, 1959, 656,000) possesses the principal harbour on the south-east coast.

Durban is 6,797 miles by sea from Southampton, transit by sea to Cape Town, thence by rail, 16 days; by air, 24 hours.

ZULULAND.

Zululand, annexed in 1897, comprises about two-thirds of the country formerly under Zulu kings, and is bounded on the south and south-west by the Tugela River; on the south-east by the Indian Ocean; on the north by the Portuguese possessions; and on the west by the districts of Babanango, Vryheid and Ngotshe and by Swaziland. In 1951, the appointment was confirmed of Cyprian Bekuzulu, grandson of Dinizulu and great-grandson of Cetewayo, as Paramount Chief of the Zulus in Natal.

THE TRANSVAAL

The Province of the Transvaal has a total area of 110,450 square miles, about 20,000 square miles lying within the tropics.

Finance.—Revenue 1957-58 (including Union Government subsidy), £40,871,000; expenditure £42,785,000. The Transvaal is the principal gold producing Province of the Union, the output (1958) being 13,334,669 fine oz., valued at £165,516,581.

Administration.—The government is administered by an Administrator, aided by a Provincial

Council of 68 members (elected for 5 years). There is an Executive Committee of 4 members.

Administrator, The Hon. F. H. Odendaal. . . £3,250
Executive Committee, S. G. J. van Niekerk; T. T. Bielski; P. Z. J. van Vuuren.

Provincial Secretary, J. M. Rothman.

BLOEMFONTEIN, the Capital and seat of the Provincial Government, has an estimated population (1959) of 152,100.

India and Pakistan

THE *Indian Independence Act, 1947*, which received the Royal Assent on July 18, 1947, brought to an end the whole structure of British Government in India and the handing over of power was completed by August 15, 1947. The Indian Empire, which extended over a territory larger than the Continent of Europe without Russia, is now represented by the *Republic of India*, the *Republic of Pakistan*, and Territories of Indian Rulers formerly under the suzerainty of the King-Emperor. Certain tracts of Tribal Territory on the North West and North East Frontiers are under the political influence, though not under the administrative rule, of the Government of Pakistan.

GEOGRAPHICAL INDIA

Physical Features.—The country may be broadly divided into three sections, viz. the Himalayan region, the northern river-plains, and the southern tableland.

The *Himalayas*.—The Himalayas (which lie partly beyond the frontier), with their southern offshoots, form the natural northern boundary of India. The Himalayan range runs for 1,500 miles from N.W. to S.E., with a varying breadth of 150 to 200 miles, and attains a general height of 20,000 feet above the plain, culminating in the loftiest peaks yet measured on the globe—Mount Everest, 29,002 feet, Kunchinjunga, 28,146 feet, and Dhaulagiri, 26,826 feet, near the centre of the range; and K. 2, 28,250 feet, near its junction with the Hindu Kush. The line of perpetual snow is at about 16,000 feet. The Himalayas collect and store up water for the plains below. The slopes give a representation of the tropical zone (especially on the southern slopes to the E.), the temperate zone (particularly to the S.W. of the range), and the arctic zone as the upward journey is taken from the plains. In the Himalayas are several sanatoria, including Murree, Simla, Mussoorie, Naini Tal, and Darjiling. Himalayan vegetation includes such varied species as the tree-fern, ilex, pine, oak, fir, deodar (cedar), rhododendron, barley, oats, millet, and many domestic vegetables. The fauna are as varied as the flora, and include the bison, musk-deer, yak, wild sheep and goat, bear, elephant, monkey, and tiger, with eagles, partridges, and pheasants.

The *Great Plain*.—The northern river-plains, lying at the foot of the Himalayas, comprise the rich alluvial plains watered by the Indus, the Ganges, the Lower Brahmaputra, and their tributaries. At no great distance from one another, four rivers take their rise in the Himalayas. The sources of two are on the north side—the Indus, which flows westward for 1,800 miles, and the Tsan-po or Brahmaputra, which flows eastward for nearly 1,500 miles. The other two, on the southern slope, are the Sutlej, which, after flowing W. and S.W. for 900 miles and collecting various other streams, joins the Indus; and the Ganges, which, during a journey S.E. and E. of about 1,550 miles, drains almost all the Bengal plain. The Brahmaputra, after flowing along the northern side as far as the eastern extremity of the Himalayas, turns sharply to the S., then to the W., and finally joins the Ganges, 75 miles from where their combined streams enter the Bay

of Bengal. Thus the Himalayas supply India with the water gathered on both slopes. The Indus and Ganges, with their tributaries, are the source of an extensive system of irrigation by canals. The richest, most populous, and most historically famous part of India lies in the basins of these great rivers. Formerly the Ganges was the only great highway of Bengal; it is still the fertiliser and the water-carrier. But a close network of railways is increasingly used for transport. In Northern India there are two harvests, *rabi* (spring) crops being reaped in March and April, *kharif* (autumn) crops in October to December. In the north we find wheat, pulse, maize, millet, barley, and tea; while in the south, indigo, cotton, sugar-cane, jute, oilseeds, tobacco, opium, and spices are produced. Among the fauna are monkeys, panthers, tigers, leopards, hyenas, jackals, squirrels, elephants, deer, crocodiles, and snakes. Salt, mica, and coal are the chief minerals. The Ganges delta yields rice, bamboos, and a large variety of palms. The Aravalli range, the primeval chain of India, divides Rajputana from the Central India States. To the N.W. of the peninsula lies the mountainous, barren, and thinly populated region of Baluchistan.

The Deccan.—Just as the Himalayas on the N. and the Hindu Kush and Suleiman Mountains on the N.W. form natural barriers of defence for Hindustan, so do the Vindhya Mountains, running almost due E. from the head of the Gulf of Cambay, north of the Nerbudda River, form a firm southern boundary to the river-plains of Northern India. Southern India, or the Deccan, is a plateau of triangular shape and very old geological formation, bounded on two sides by the Malabar and Coromandel coasts, which converge at Cape Comorin, and on the third by the Vindhyas. The Eastern and Western Ghats all but complete this envioning triangle of mountain ranges. In the extreme N.W., south of the Vindhyas, and parallel to them, but north of the Western Ghats, we find the Nerbudda and the Tapti flowing westwards, their basins being sharply defined by the Satpura Mountains, which lie midway between them. As the Western Ghats lie close to the coast, and afford no exit for rivers, there are no streams on the Malabar coast south of the Tapti; all the rivers flow eastwards, through defiles in the Eastern Ghats, into the Bay of Bengal. The four chief rivers are the Mahanuddy, in the extreme N.E. (520 m.), the Godavary (900 m.), the Kistna (800 m.), and the Cauvery (472 m.), at intervals further to the south. The physical geography of Southern India has shaped its history: the S.W. coast, shut in by mountains, is very primitive and moves slowly; the S.E., open and easy of access by sea and towards the interior, has made great progress. The mountain slopes of this region, especially those of the Western Ghats, which rise to 8,000 feet in the Nilgiris, are still covered with the splendid vegetation of primeval forests. Teak, ebony, satinwood, sandalwood, palm, and bamboo abound. The jungles in the E. are very deadly. The tiger, bison, leopard, deer, and various small game afford sport. Snakes are found everywhere. In the valleys and on the higher plains many valuable crops are raised, chiefly rice, millet, cotton, oilseeds, coffee, tea, indigo, tobacco, and chinchona. The southern tableland has furnished considerable supplies of minerals. At present the minerals principally worked are coal, manganese ore, mica, monazite, and gold.

Climate.—About half of India is within the tropics, but the greatest extremes of heat and cold are in the N.W. In the Himalayas the climate is moist and cold. In Northern India it is dry, and the winters are rather cold. In tropical Southern India the climate is more equable. Calcutta, Bombay, and Madras all have an equable climate, owing to proximity to the sea. India depends for its fertility upon the monsoon rains. The S.W. monsoon brings moisture from the ocean south of the Equator, and reaches the west coast early in June and the northern provinces late in June. The mountains arrest these currents and precipitate rainfall, which averages 60 inches in the sub-Himalayan region, 39 inches in the Indo-Gangetic plain, and 30 inches in the Deccan, but is small in Sind and Rajputana. Madras benefits by the N.E. monsoon in the autumn.

CONSTITUTION

The Constitution of India came into force on January 26, 1950. The territory of the Indian Union comprises 14 States and six Union Territories. The Constitution provides for a single and uniform citizenship for the whole of India, with the right of vote for every adult citizen.

EXECUTIVE

The executive of the Indian Union consists of the President (Rashtapati), the Vice-President and the Council of Ministers. The President is elected for five years by an electoral college consisting of all elected members of Parliament and of the various State Legislative Assemblies. The Vice-President is also elected for five years by members of the two Houses of Parliament. As head of the State the President exercises his functions with the aid and advice of the Council of Ministers headed by the Prime Minister. The Council is collectively responsible to the House of the People.

LEGISLATURE

The Legislature of the Union is called Parliament. It consists of two Houses known as the Council of States (Rajya Sabha) and the House of the People (Lok Sabha). The Council of States consists of not more than 250 members, of whom 12 are nominated by the President and the rest are indirectly elected by the Legislative Assemblies of the various States. The Council is not subject to dissolution, one-third of its members retiring every two years. The House of the People consists of not more than 500 members directly elected from territorial constituencies in the States and on the basis of adult franchise and not more than 20 members to represent the Union Territories, chosen in such manner as Parliament provides. The House, unless dissolved sooner, has a maximum duration of five years.

Subject to the provisions of the Constitution the Union Parliament can make laws for the whole of India and the State legislatures for their respective units. The distribution of legislative powers is governed by a system of three lists—the Union, the State and the Concurrent—under which all legislative activity has been mapped out. The Union Parliament has exclusive powers to legislate on 97 subjects of all-India importance, such as defence, foreign affairs, communications, railways, currency and banking, insurance, customs duties, etc. The State List contains 66 headings, e.g., public order and police, justice, education, public health, local government, agriculture, etc. The Concurrent List contains 47 subjects of common interest to the Union as well as the States.

OFFICIAL LANGUAGE

The Constitution (Art. 343) provides that the official language of the Union shall be Hindi in the Devanagari script and the form of numerals for official purposes shall be the international form of Indian numerals. English will, however, continue to be the official language for a period of not more than 15 years from the commencement of the Constitution (January 1950).

THE JUDICATURE

The Supreme Court of India, consisting of a Chief Justice and ten associate judges, is the highest court in respect of constitutional matters. It is also the final Court of Appeal in the country.

Chief Justice, Sudhi Ranjan Das. Rs. 66,000.
Judges, N. H. Bhagwati; B. P. Sinha; J. Imam;
 S. K. Das; J. L. Kapur; P. B. Gajendragadkar;

BANKS AND BANKING

The number of scheduled banks was 93 and the number of offices of scheduled banks was 3,570 in Oct. 1958. For the Indian Union as a whole there was an average of one scheduled banking office to 101,163 people. Advances by banks totalled Rs. 8,235 mill. at Feb. 28, 1959.

COMMUNICATIONS

Civil Aviation.—India occupies an important place in civil aviation among the nations of the world. All air lines were nationalized in 1953 and two corporations formed, Indian Airlines Corporation and Air India International, whose aircraft flew over 25,000,000 miles on scheduled services

within and outside India during 1957-58. In 1958, 683,000 passengers, 98,494,000 lbs of freight and 13,180,000 lbs of mails were carried on scheduled services, and 117,000 passengers and 82,526,000 lbs of cargo and mail on non-scheduled services. At the end of 1958, 84 aerodromes were maintained by the Civil Aviation Department of the Government.

Railways.—The railways are grouped into eight administrative zones, Southern, Central, Western, Northern, North-Eastern, North-East Frontier, Eastern and South-Eastern.

In 1957-58, passengers "originating" were 1,431,059,000, passenger mileage 43,332,802,000, goods traffic freight-ton miles 44,897,436,000.

Gross Traffic Receipts (1957-58) Rs. 3,798 million. Working expenses, Rs. 3,220 million. Net railway revenues, Rs. 578 million.

Roads.—At the end of 1956-57, there were 127,000 miles of surfaced roads and 210,000 miles of unsurfaced roads. The national highway system is about 13,900 miles.

Ports.—The chief seaports are Ψ Bombay, Calcutta, Madras, Cochin, Vishakapatnam and Kandla (Kutch). There are over 150 minor working ports with varying capacity.

Shipping.—The total Indian owned registered tonnage of merchant ships over 150 gross tons was approximately 639,708 in November, 1958.

Postal.—In 1957-58 there were 61,886 post offices, 10,723 telegraph offices, and 335,000 telephones.

DEFENCE

The supreme command of the armed forces is vested in the President. Administrative and operational control resides in the Army, Navy and Air Headquarters under the supervision of the Ministry of Defence.

The Army has 3 Commands, Southern, Eastern and Western, with headquarters at Poona, Ranchi and Delhi respectively. A Territorial Force was

inaugurated in Oct. 1949. It is intended to act as a second line of defence. A National Cadet Corps, with senior, junior, and girls' division, has also been raised.

The *Indian Navy* consists of two cruisers and a number of destroyers, frigates, minesweepers and auxiliary vessels. A Naval aviation wing and a hydrographic office have also been set up. The Navy's air station is at Cochin.

The *Indian Air Force* is organised in three formations, the Operational Command at Palam, the Training Command at Bangalore and the Maintenance Command at Kanpur. It also has five Auxiliary Squadrons.

EDUCATION

In 1956-57, there were 773 pre-primary schools, 287,318 primary schools, 35,828 secondary schools, 3,283 vocational schools, 49,127 special educational schools, 771 arts and science colleges, 404 professional colleges, 127 special education colleges, 41 research institutions and 34 universities (37 in 1958). 51 per cent. of children between the ages of 6 and 11 were at school in 1955-56, 18.2 per cent. between 11 and 14 and 8.4 per cent. between 14 and 17.

STATES AND ADMINISTRATIONS OF THE REPUBLIC OF INDIA

MADRAS

Madras (area, 50,111 sq. miles; est. pop. 29,975,357) was not only the oldest, but the most important of the three original Presidencies before Clive's conquest of Bengal, though it was small in extent until the annexation of the Carnatic in 1801. The state has no good natural harbour, but an artificial harbour has been constructed at Madras at great expense. The state is not naturally fertile, though irrigation systems in the river deltas have enormously increased the produce of the soil, and have yielded a large profit to the State. Rice, millet, and other food grains, oilseeds, cotton, indigo, spices, tobacco, tea, etc., are cultivated. Madras is served by the Southern Railway. About 87 per cent. of the people are Hindus. There are 1,432,761 Christians, mainly Roman Catholics. The languages principally spoken are Tamil, Telugu, Malayalam and Kannada. Madurai (361,781) and Tiruchinopoly (218,921), famous for their Hindu temples, are the chief cities after the capital.

BOMBAY

The Island of Bombay was part of the dowry of the Infanta of Portugal (1662), and was made over by Charles II. to the East India Company in 1668. The greater part of the present territory was obtained by annexations from the Maharattas and by the lapse of the Satara State. The State of Bombay stretches along the Arabian Sea coast of India from Rajasthan in the north to the States of Madras and Mysore in the south, and in the east it is bounded by the States of Rajasthan, Madhya Pradesh, Hyderabad and Madras.

Enlarged in 1956 by mergers of Kutch and Saurashtra and parts of Hyderabad, the state contains 190,668 square miles, with an estimated population (1956) of 48,265,221. About 88 per cent. of the people of the State are Hindus, and 9 per cent. Muslims. The Parsis (97,573), who are very prominent in trade, are mainly found in Bombay. Marathi, Gujarati and Kannada are the principal languages. 61.5 per cent. of the population are dependent on agriculture; cotton is largely produced for export and for manufacture in the constantly extending cotton-mills of Bombay and Ahmedabad. The chief railway systems are the Western Railway running from Bombay to the north, the Central Railway to the north-east and south-east and the Southern Railway running from Poona to the south. Ahmedabad (788,333), Poona (480,982), Sholapur (266,050), Surat (223,182), Baroda (211,407), Kolhapur (136,835) and Hubli (129,609) are the most important cities.

CHIEF CITY, Ψ Bombay. Population, 2,839,270. A "Greater Bombay" plan was promulgated in April, 1950, extending the City boundaries to 91 sq. miles.

WEST BENGAL

West Bengal has an area of 33,815 sq. miles and a population (1951 Census) of 26,306,602. The old Bengal Presidency included practically all Northern and Central India, but subsequently Bengal

Province consisted of part of Bengal proper with Bihar, Orissa and Chota Nagpur. This Province of Bengal ceased to exist in 1947 when it was divided, West Bengal forming part of India and East Bengal part of Pakistan. The state of Cooch Behar was merged with West Bengal on Jan. 1, 1950, and the French settlement of Chandernagore, which came under Indian administration on May 1, 1950, was merged with West Bengal on Oct. 2, 1954. On Nov. 1, 1956, certain territories of Bihar were transferred to West Bengal in accordance with the provisions of the States Re-organisation Act.

The chief products are rice, oilseeds, sugar cane, sugar, tobacco, jute, silk, tea and coal. West Bengal is now served by three State Railways, the Eastern Railway, the South-Eastern Railway and the North-Eastern Railway. The Eastern Railway is the great artery of the Ganges Valley.

Howrah (pop. District, 1,611,373; Town, 433,630), the great jute manufacturing centre, adjoins Calcutta.

Uttar Pradesh, called the United Provinces until 1949 (formerly the United Provinces of Agra and Oudh) (area, 213,409 sq. miles; est. pop. (1951) 63,215,742), forms the upper part of the great Ganga plain to the W. of Bengal, lying between the Himalayas and the hilly border of the central plateau. The Province is now a State in which the former three princely States, Rampur (pop. 543,324), Tehri-Garhwal (pop. 412,047) and Benares (pop. 451,428) have been merged and certain areas of the Vindhya Pradesh and Rajasthan States have also been absorbed. Agriculture employs 79 per cent. of the population, the chief products being wheat, rice, barley, pulse, tobacco, millet, cotton, sugar, and oilseeds. About 85 per cent. of the population are Hindus and 14.3 per cent. Muslims. Hindi is the chief language. The State is served by the Northern Railway and the North-Eastern Railway. Among the important cities may be named the ancient city of Agra (375,665), containing the Taj Mahal and other great works of architecture, the sacred Hindu city of Varanasi (Benares) (355,777), the great manufacturing centre, Kanpur (Cawnpore) (705,383), Lucknow (496,861) the capital, Bareilly (208,083), and Allahabad (332,295).

ASSAM

Assam, which has an area of 80,736 sq. miles; pop. 8,994,789 (1951 census) (after the exclusion of Sylhet and Naga Hills), first became a British territory in 1826 and was constituted a separate administration in 1874. It was combined in 1905 with part of Bengal to form a new province, Eastern Bengal and Assam, but again became a separate administration in 1912. By the terms of the Indian Independence Act, 1947, the district of Sylhet was detached from Assam and amalgamated with East Bengal (Pakistan). A range of mountains divides Assam into the Surma and Brahmaputra valleys, of which the chief towns are Silchar and Gauhati respectively. The people are mainly Hindus, Muslims and Tribals, and the chief languages are Assamese (4,971,229 persons) and Bengali (1,717,381 persons). The North-East Frontier railway serves the state. Tea, petroleum, coal, timber, jute and rice are the principal products, Assam contains 1,066,022 persons who were born outside the state and 274,122 displaced persons, mostly from East Bengal.

HIMACHAL PRADESH

The centrally administered territory of Himachal Pradesh, formed in April, 1948 (area 10,904 sq. miles, population, 1951 Census, 1,209,466), consists of 22 former Punjab Hill States and their 9 tributaries. The transfer of these territories to the Republic has consolidated into a sizeable administrative unit a large number of small states inherently incapable of surviving as separate "viable" units. Bilaspur was merged into this administration on July 1, 1954. The territory is divided into five

administrative districts, Mahasu, Sirmur, Mandi, Chamba and Bilaspur. Capital, Simla.

Lieut.-Governor, Shri Bajrang Bahadur Singh.

DELHI

The State (now the Union Territory) of Delhi (area 578 sq. miles; pop. (census 1951) 1,744,072) was constituted on October 1, 1952, out of the Delhi division of Punjab, in pursuance of the policy announced at the Delhi Durbar in December, 1911, to move the capital of India and its seat of Government from Calcutta to Delhi. On April 1, 1955, certain other territory, previously included in the United Provinces of Agra and Oudh, was added to the State.

CHIEF CITY, Delhi. Population (Delhi City, Red Fort and Civil Lines), 1,008,085.

Chief Commissioner.—A. D. Pandit.

ANDAMANS AND NICOBARS

The Andamans and Nicobars (area 3,215 sq. miles; pop. in 1951, 30,971) form a chain of islands in the eastern part of the Bay of Bengal. Five large islands closely grouped together form the *Great Andamans*, and to the south is the island of *Little Andaman*. Port Blair, in South Andaman, was used as an Indian penal settlement from 1858 to 1942. The group, densely wooded, contains many valuable trees, both hardwood and softwood. Coconut, coffee and rubber are other sources of income.

The islands possess a number of harbours and safe anchorages, notably Port Blair, Elphinstone, Mayabundar, Port Cornwallis and Nancowrie.

The Andaman Islands are administered by the President acting through a Chief Commissioner and an Advisory Council of 5 Members.

The *Nicobar Islands*, almost due south of the Andamans, were first occupied by the British in 1869. They comprise 19 islands, 7 uninhabited (area 635 sq. miles). The principal product is coconuts.

CHIEF CITY, Port Blair. Population, 8,014.

Chief Commissioner.—T. G. N. Ayyar.

ANDHRA PRADESH

The State of Andhra Pradesh, consisting of the Telugu-speaking areas of the old Madras State, with Kurnool as capital, was inaugurated on Oct. 1, 1953. The Telangana area of Hyderabad State was added in 1956, when the enlarged State assumed the name of Andhra Pradesh.

Andhra Pradesh has an area of 105,598 square miles with a population of 31,260,000.

The Legislature consists of one chamber, i.e. the Legislative Assembly.

CHIEF CITY, Hyderabad. Population 1,166,860.

Governor, Bhimsen Sachar.

KERALA

The State of Kerala, constituted in 1956, consists of most part of the territories of Travancore-Cochin and the Malabar district of Madras. Bounded by Madras and Mysore, the State brings together the majority of the Malayalam speaking peoples. The North Western part of Kerala is rich in plantations, producing rubber, tea and copper. Area, 15,035 sq. miles. Population, 13,550,000.

CAPITAL, Trivandrum.

MYSORE

The Mysore State, formed in 1956, consists of territories of the former State of Mysore and of Coorg, parts of the Belgaum district of Bombay

and of Hyderabad and of Coimbatore. The State brings together the Kannadi speaking people, previously distributed in five States. Its area is provisionally estimated at 74,326 sq. miles and population about 19,000,000. The State consists largely of an elevated table land and has a outlet to the sea. It is rich in hydro-electric power, particularly in and around the Shimoga district.

CAPITAL, Bangalore.

RAJASTHAN

The State of Rajasthan, formed in 1949, includes the former princely States of Jaipur, Bikaner, Jaisalmer and Jodhpur. Ajmer was added in 1956, when the whole of the former princely State of Sirohi was also included. The State has an area of 131,943 sq. miles and a population of 159,700,000. Governor, Gurumukh Nihal Singh.

CAPITAL, Jaipur. Population (est. 1959), 443,000.

Pakistan

The Republic of Pakistan consists of two geographical units of West Pakistan and East Pakistan situated respectively to the north-west and north-east of the Republic of India and separated by about 1,100 miles of the Indian territory.

AREA AND POPULATION

Province	Area (English sq. miles)	Population (000's)	
		Total	Per sq. mile
West Pakistan.....	309,424	32,653	106
East Pakistan.....	54,501	42,063	777*
Federal Capital Area (Karachi).....	812	1,126	1,387
Total†.....	364,737	75,842	208

* The density of East Pakistan has been calculated excluding the larger river areas amounting to 360 sq. miles.

† Excluding Jammu and Kashmir, Gilgit and Baltistan, Junagadh and Manavadar.

AREA AND POPULATION.—The total population of Pakistan (1951 Census) is 75,842,000, of which 85.9 per cent. are Muslims. Its area is approximately 364,737 square miles.

FLAG.—The National Flag of Pakistan is dark green, with white vertical part at the mast, the green portion bearing a white crescent in the centre and a five-pointed heraldic star.

GOVERNMENT

Pakistan was constituted as a Dominion under the Indian Independence Act, 1947, which received the Royal Assent on July 18, 1947.

In terms of the Act the Dominion of Pakistan consists of former territories of British India, as shown in the above table. The Punjab States of Bahawalpur and Khairpur, with a Muslim population of almost 80 per cent. and with Muslim rulers, acceded to Pakistan in October, 1947. Boundaries of the Provinces of East Bengal and of Punjab (West Punjab) have been defined by a Boundary Commission presided over by Sir Cyril Radcliffe, K.B.E., Q.C. (now Lord Radcliffe). The following States have also acceded to Pakistan: the Baluchistan States of Kalat, Mekran, Las Bela and Kharan, and the North-West Frontier States of Amb, Chitral, Dir and Swat. The States of Junagadh and Manavadar which had acceded to Pakistan, were occupied by India on November 8, 1947.

The Constitution of Pakistan was passed on February 29, 1956. Pakistan became a Republic on March 23, 1956, when the provisions of the Constitution came into force. On October 7, 1958, however, this Constitution was abrogated and Pakistan came under martial law. General Mohammad Ayub Khan, Commander-in-Chief of the Pakistan Army, was appointed the Chief Martial Law Administrator. On October 28, 1958, General Mohammad Ayub Khan also became President of Pakistan and an 11-man Presidential Cabinet was appointed to administer the country until the re-establishment of democratic institutions.

THE JUDICATURE

There is a Supreme Court of Pakistan. In addition the High Court of West Pakistan sits at Lahore, Karachi and Peshawar, and the High Court of East Pakistan at Dacca.

DEFENCE

Army—8 Infantry Regiments, 6 Armoured Corps units, 8½ Artillery Regiments and 34 Engineer units. Most infantry regiments of the Indian Army with a Moslem majority were allotted to Pakistan. In March, 1950, it was announced that the Government had decided to introduce legislation to establish a Territorial Force.

Navy—The Navy consists of 2 sloops, 2 frigates, 4 minesweepers, 2 trawlers, 2 motor minesweepers and 4 harbour defence launches. A modern British destroyer, the *Onslow*, was transferred to the Pakistan Navy in 1949, and it was announced that her sister ship, the *Offa*, would be transferred later.

EDUCATION

The latest census (1951) shows that 18.9 per cent. of the total population of Pakistan (i.e. 13,958,000 persons) is literate. On Dec. 13, 1958, the President announced the formation of a National Commission on Education, charged with a thorough scrutiny of the educational system.

Apart from the three Universities of Dacca, Punjab and Sind, which were inherited at the time of partition, three more, at Peshawar, Karachi and Rajshahi (in East Pakistan), have been established.

The Punjab University, founded in 1882, is mainly an affiliating University, but also provides for post-graduate teaching and research in a few subjects.

The University of Dacca, East Pakistan, was established in 1921 as an unitary residential university, but had to assume, on partition, the addi-

tional functions of an affiliating University for colleges in East Bengal.

The University of Sind, created in 1947 and removed from Karachi to Hyderabad, in May 1952, is an affiliating and examining University. Peshawar University was founded in 1950. It is a teaching, residential and affiliating University. The Federal University of Karachi was established in 1951. It is intended to develop it into an unitary residential university with all the colleges in Karachi as its constituent members and a number of halls of residence under its control and supervision. The Rajshahi University was established in East Pakistan in 1953, and is a teaching and affiliating University.

The number of educational institutions in Pakistan in 1958 was: Primary Schools, 43,497; Secondary Schools, 5,840; Teachers' Training Schools and Colleges, 100; Professional Colleges, 38; Colleges of Arts and Science, 172; Special Schools, 349; other schools, 3,570.

LANGUAGE

Urdu and Bengali are the two main languages of Pakistan. English is the official language.

IRRIGATION

Pakistan has one of the longest irrigation systems in the world. The total area irrigated is about 23,000,000 acres.

PRODUCTION

The estimated acreage (000's omitted) of principal crops in 1958-59 was: rice 22,491, wheat 12,168, bazzra 1,971, jowar 1,106, sugar cane 1,158, rape and mustard 1,825, cotton 3,385, jute 1,528, maize 1,140, gram 3,140 and barley 542 acres.

FOREIGN TRADE

Year	Exports Imports Balance		
	Mill. Rupees		
1957.....	1,603.4	1,006.5	-493.1
1958.....	1,887.8	1,416.9	-470.9

COMMERCE

The chief exports of the country are raw jute, cotton, hides and skins, oil-seeds and tea. Industrial machinery and mill work, metals and ores, chemicals and drugs, mineral oils and hardware, instruments and spare parts are the principal imports.

During 1958, total exports of raw jute were 891,000 tons valued at Rs.839,500,000. Raw cotton exports were 537,000 bales valued at Rs.240,400,000. Other substantial exports during the period included raw wool, raw hides, raw skin, tea, cotton twist and yarn and cotton piece-goods.

FINANCE

The Pakistan rupee was revalued on Aug. 1, 1955. New exchange rates are Rs.100 = £7.5 sterling or U.S. \$21.

The State Bank, established July 1, 1948, has a capital of Rs.30,000,000, 51 per cent. of which is held by the State. Deposits at all banks in the country in March, 1959, amounted to Rs. 2,593,800,000. There are 86 insurance companies operating in the country, of which 22 are Pakistani businesses. Total life insurance in force in Pakistan at the end of 1957 was Rs.688,400,000. New life insurance business during the year amounted to Rs.219,900,000.

Revenue and Expenditure from 1956-57 to 1958-59 were as follows:—

Revenue: (1956-57) Rs.1,298.3 million; (1957-58) Rs.1,467.7 million; (1958-59) Rs.1,975.8 million; (Est. 1959-60) Rs.1,584.5 million.

The chief items of revenue for 1959-60 are: Customs Rs.441.2 million; Central Excise Duties Rs.239.3 million; Income Tax and Corporation

Tax Rs.263.8 million; Sales Tax Rs.150.3 million and Railways Rs.108.4 million.

Expenditure: (1956-57) Rs.1,294.1 million; (1957-58) Rs.1,437.6 million; (1958-59) Rs.1,973.9 million; (Est. 1959-60) 1,514.5 million.

The chief items of expenditure for 1959-60 will be: Defence Rs.858.5 million; Civil Administration Rs.338.1 million; Debt Services Rs.147.9 million; Civil Works and Central Road Fund Rs.21.9 million.

COMMUNICATIONS

There are 7,044 miles of railway line in the country. Of this total mileage, West Pakistan has 5,335 miles of railway line and East Pakistan has 1,709 miles. The Pakistan railways comprise two independent railway systems—the North Western Railways in West Pakistan and the Eastern Bengal

Railway in East Pakistan—managed and owned by the State.

The total road mileage is 68,391, of which over 17 per cent. is high type.

The principal sea ports are Karachi and Chittagong in West and East Pakistan respectively. These two ports handled in 1958-59 over 3,850,000 tons and 2,120,000 tons of traffic respectively. The anchorage of Chalna, established in Dec. 1950, on the river Pussur in East Bengal to relieve congestion of traffic at Chittagong, now has nine moorings.

Karachi is the main air port, and being situated on the trunk air routes of the world, holds an important position. Pakistan International Airlines is the chief air transport company in Pakistan.

Post and telegraph facilities are available to every country in the world.

PROVINCES OF PAKISTAN

PROVINCES OF THE ISLAMIC REPUBLIC OF PAKISTAN

1. WEST PAKISTAN

The Establishment of West Pakistan Act, 1955, came into force on October 3, 1955, and incorporated: (1) the former Governors' Provinces of the Punjab, North-West Frontier and Sind; (2) the former Chief Commissioners' Provinces of Baluchistan and Karachi; (3) the States of Bahawalpur and Khairpur and the Baluchistan States Union; (4) the Tribal Areas of Baluchistan, the Punjab and the North-West Frontier and the States of Amb, Chitral, Dir and Swat, into the Province of *West Pakistan* with effect from October 14, 1955.

West Pakistan (including the Federal Capital), with an area of 310,236 square miles, has a population of 33,779,000 (of whom 97.1 per cent are Muslim; 0.5 per cent. Caste Hindu; 1.1 per cent. Scheduled Caste Hindu and 1.3 per cent Christian). Running through West Pakistan are five great rivers, the Indus, and its tributaries, Jhelum, Chenab, Ravi and Sutlej. The upper reaches of these rivers are in Kashmir and their sources are in the lofty Himalayas.

West Pakistan is one of the richest wheat-producing areas populated by a hardy peasantry with great martial traditions. Of the other crops grown, cotton, rice, gram, jowar and oil-seeds are the most important. There are large deposits

of rock salt, which with cotton forms the principal exports. The Province is served by the North-Western Railway.

Chief City and Headquarters of West Pakistan: Lahore (population 1954, 849,476).

Governor, Akhtar Hussain.

2. EAST PAKISTAN

The Province of East Pakistan: area 54,501 sq. miles, estimated pop. 42,063,000 (of whom 76.8 per cent. are Muslim; 10 per cent. Caste Hindu; 12 per cent. Scheduled Caste Hindu; 0.3 per cent. Christian and 0.9 per cent. others), comprises the Eastern territories of the partitioned province of Bengal and Sylhet, formerly a district of Assam (excluding certain thanas in the Karimganj sub-division), and the Chittagong Hill tracts.

CHIEF CITY (and Headquarters of East Pakistan): Dacca. Population 411,000 (1951 Census).

Governor, Zakir Husain.

CAPITAL OF PAKISTAN

The Capital and Seat of Government of Pakistan is Karachi. Karachi is situated at the extreme western end of the delta of the Indus, 754 miles by rail from Lahore. It is the maritime terminus of the North Western Railway, the main gateway for the trade of West Pakistan. The population of Karachi at the Census of 1951 was 1,126,417, but is now estimated to be nearly 2,000,000.

Ceylon

AREA AND POPULATION

Ceylon is an island in the Indian Ocean, off the southern tip of the peninsula of India and separated from it by a narrow strip of shallow water, the Palk Strait. Situated between 5° 55'–9° 50' N. latitude and 79° 42'–81° 52' E. longitude, it has an area of 25,332 square miles, including 296 square miles of inland water. Its greatest length is from north to south, 270 miles; and its greatest width 140 miles, no point in Ceylon being more than 80 miles from the sea.

At the Census of 1953, the population was 8,103,648, an increase of 21.7 per cent over the last Census in 1946. The following table shows a striking increase in the population of Ceylon since the first Census was taken in 1871.

Increase of the People

Census Year	Population	Natural Increase	Immigration Increase	Total Intercensal Increase
1871.....	2,400,380	—	—	—
1881.....	2,759,738	119,792	239,566	359,358
1891.....	3,007,789	144,260	103,791	248,051

1946.....	6,657,339	1,280,916	69,552	1,350,468
1953.....	8,132,569	2,362,329	78,969	1,475,230

Races and Religions

The races of Ceylon are low-country Sinhalese, Kandyan Sinhalese, Ceylon Tamils, Indian Tamils, Ceylon Moors, Indian Moors, Burghers and Eurasians, Malays and Veddahs. Generally Sinhalese who trace their descent to a low-country district are classified as low-country Sinhalese, others as Kandyan Sinhalese. The Western and Southern Provinces, the Chilaw District and the Western part of Puttalam District are low-country areas; the Central and North Central Provinces, Uva, Sabaragamuwa, Kurunegala and the Sinhalese divisions of the districts of Batticaloa, Trincomalee and Vavuniya are regarded as Kandyan districts. At the 1953 Census 42.8 per cent of the population were low-country Sinhalese, 26.6 per cent. Kandyan Sinhalese. The religion of the great majority of Ceylonese is Buddhism, introduced from India, according to ancient Sinhalese chronicles, in 300 B.C. Next to Buddhism, Hinduism has a large following.

PHYSIOGRAPHY

Ceylon is a compact area, except for the Island of Mannar and an almost detached portion in the north, the Jaffna Peninsula and its satellite islands of Delft, Kayts, etc. The relief of the island includes a mountainous area in the south-central region of 3,000 to 7,000 feet above sea level, surrounded by an upland belt of about 1,000 to 3,000 feet and a narrow coastal plain broadening out to a vast tract in the north. The coastal plain continues for a distance out to sea as a continental shelf and a coral reef, for the most part submerged, lies close to the coast. On the Central Ridge of the hill country are some of the highest peaks in Ceylon, Pidurutalagala (8,291 ft.), Kirigalpotta (7,856 ft.) and Totapola (7,741 ft.) and the high plains Nuwara Eliya (over 6,000 ft.), Elk Plains (6,000 ft.) and Horton Plains (over 7,000 ft.). The other principal peaks are Adam's Peak (7,360 ft.), Namunukula (6,679 ft.), Knuckles (6,112 ft.) and Haycock (2,167 ft.). The Peninsula of Jaffna and the Island of Mannar are featureless level stretches.

The Mahaveli-ganga, 206 miles long, is the largest river of Ceylon. Rising on the western side of the central hilly ridge, it flows north and east to empty into the Koddidiyar Bay on the east coast. Other rivers are the Kelaniganga (90 miles), Aruvi-arū (104), Kala-oya (97), Yam-oya (94) and Deduru-oya (87). Waterfalls girdle the central mountainous massif and offer some of the best scenic features in the island; Dambinda (Badulla), Diyalauma (Koslanda), Elgin (Haton Plateau) and Perawela are among the outstanding falls. Forests, jungle and scrub cover the greater part of the island, often being intermingled. The forests, of varying species, extend from fairly near the coast right into the hill country. In areas over 2,000 feet above sea level grasslands (*patanas* or *talawas*) are found. Their total area is some 250 square miles, principally in the Province of Uva.

Climate.—The climate of Ceylon is warm throughout the year, with a high relative humidity. Temperatures average 80° F. during the year and few areas record less than 60° F. Humidity is over 75 per cent. Temperature ranges vary little between wet and dry seasons. In hilly areas, frost, mist and hail occur occasionally, but snow is completely absent. Rainfall is generally heavy, with marked regional variations; fall on the south-west slopes of the hill country (200–250 inches) being heaviest. Some cyclonic activity of the tropical variety experienced in the Bay of Bengal occurs, generally during the north-east monsoon period.

GOVERNMENT

Early in the sixteenth century the Portuguese landed in Ceylon and founded settlements, eventually conquering much of the country. Portuguese rule in Ceylon lasted 150 years during which the Roman Catholic religion was established among the Sinhalese inhabitants and to some extent Portuguese modes of living adopted. In 1658, following a twenty-year period of decline, Portuguese rule gave place to that of the Dutch East India Company which was to exploit Ceylon with varying fortunes until 1796.

The Maritime Provinces of Ceylon were ceded by the Dutch to the British on February 16, 1798, becoming a British Crown Colony in 1802 under the terms of the Treaty of Amiens. With the annexation of the Kingdom of Kandy in 1815 all Ceylon came under British rule.

A commission headed by Lord Soulbury visited the island and in October, 1945, recommended a series of changes which gave Ceylon a large measure of control over her internal affairs. The Soulbury Constitution was, however, short-lived and on February 4, 1948, Ceylon became a self-governing Dominion of the British Commonwealth of Nations under the *Ceylon Independence Act, 1947*. On February 10, 1948, H.R.H. the Duke of Gloucester opened the new Parliament. The Parliament of Ceylon consists of (a) The Queen (represented by the Governor-General) and (b) two houses, namely, the Senate and the House of Representatives. The Executive consists of the Prime Minister and his Cabinet chosen from the party which has the majority in the House of Representatives.

LOCAL GOVERNMENT

The local government of Ceylon, under the general supervision of the Ministry of Local Government, is in the hands of 7 Municipal Councils (Colombo, Kandy, Galle, Jaffna, Kurunegala, Nuwara Eliya and Negombo), 36 Urban Councils, 38 Town Councils and 403 Village Committees, all members of which are elected. For

local government purposes the island is divided into 12 administrative regions, each of which has an Assistant Commissioner of Local Government.

EDUCATION

Education in the island underwent a far-reaching change with the introduction on October 1, 1945, of a scheme of Free Education from the Kindergarten to the University. In 1957, there were 7,374 Government and Assisted schools. The total cost of education was Rs.183,675,556 for 1956-57. The University of Ceylon was established on July 1, 1942, by the incorporation of the Ceylon Medical College (founded 1870) and the Ceylon University College (founded 1921) into the University. The Ceylon Technical College provides a series of full-time and part-time courses in science, engineering, commerce, arts, etc. The National Museums of Ceylon at Colombo (founded 1877), Kandy, Ratnapura and Jaffna contain valuable collections relating to the natural history and culture of Ceylon. The Colombo Museum Library containing over 60,000 volumes and 3,500 palm leaf MSS. is open to approved research students.

COMMUNICATIONS

There are about 9,745 miles of motorable road in Ceylon, of which 6,978 miles are bitumen surfaced. On Dec. 31, 1957, there were 104,001 motor vehicles on the register (63,603 private cars and cabs, 5,270 omnibuses, 18,933 lorries, vans, etc., 1,099 tractors, 1,247 trailers, 1,197 land vehicles and 12,652 motor cycles).

In 1957, 4,304 ocean-going merchant vessels of a total net register tonnage of 11,995,344 entered the port of Colombo.

There are 1,208 money-order offices and 746 telegraph offices with 12,718 miles of telegraph wire and 21,800 telephones. A commercial wireless telegraph station has a range of 500 miles by day and about 1,000 to 1,500 miles by night and handles ship-to-shore traffic.

Air Ceylon and K.L.M. Royal Dutch Airlines jointly operate an international air service from Amsterdam — London — Rome — Karachi — Colombo and Singapore-Colombo. Air Ceylon also operates regional services from Colombo to Jaffna, Madras and Tiruchirappalli. Other services are Air India (Colombo-Karachi), B.O.A.C. and Qantas (U.K.—Colombo and Singapore-Colombo) and T.W.A.

Ghana

Ghana (formerly the British Colony of the Gold Coast) is situated on the Gulf of Guinea, between 3° 15' W. long. and 1° 12' E. long., and is bounded on the west by the French Ivory Coast, on the east by French Togoland, and on the south by the sea. It extends about 334 miles along the coast-line and inland to an average distance of 440 miles or to 11° N. lat. Divided into six regions it has a total area of 91,483 sq. miles. Although a tropical country Ghana is cooler than many countries within similar latitudes. With improved medical facilities and sanitation a healthy life can now be enjoyed.

AREA AND POPULATION—The areas of the various regions of Ghana are:—

Region	Area (English sq. miles)
Southern Ghana.....	23,937
Ashanti.....	24,379
Northern.....	30,487
Trans-Volta Togoland.....	13,040
Total.....	91,843

The estimated population at mid-1958 was as follows:—Eastern and Western Regions with Togoland, 2,658,000; Ashanti, 1,005,000; Northern Region, 1,173,000. The population of Ghana in 1958 was estimated at 4,836,000.

GOVERNMENT

The Gold Coast region of West Africa was first visited by European traders in the fifteenth century. The Gold Coast Colony, Ashanti, the Northern Territories and Transvolta-Togoland, the constituent parts of the new State, came under British administration at various times, the original Gold Coast Colony, the coastal and Southern areas, being first constituted in 1874; Ashanti in 1901; and the Northern Territories Protectorate in 1902. The territory of Transvolta-Togoland, part of Togo, a former German colony, was mandated to Britain by the League of Nations after the First World War, and remained under British administration as a United Nations Trusteeship after the Second World War. The result of a plebiscite in May, 1956, under the auspices of the United Nations, was in favour of integration with the Gold Coast Colony.

The former Gold Coast Colony and associated territories became the independent state of Ghana and a member of the British Commonwealth on March 6, 1957, under the *Ghana Independence Act, 1957*. The Queen is represented in the new state by a Governor-General whose functions are exercised in accordance with the constitutional conventions applicable in the United Kingdom.

LEGISLATURE

The Gold Coast Legislative Assembly was prorogued at midnight on March 5, 1957, and re-assembled on March 6 as the first National Assembly of Ghana. The Constitution provides for an Assembly consisting of a Speaker and 104 members, with a maximum term of 5 years, at least one session to be held each year. Electoral constituencies remained as for the Legislative Assembly and voting is on a basis of adult suffrage.

Speaker of the National Assembly, A. M. Akiwumi.

Regional Assemblies

The Constitution provides for the establishment of Regional Assemblies with functions and powers (to be defined by Act of Parliament) relating to local government, agriculture, education, public works, housing, etc.; maximum term of a Regional Assembly to be 5 years.

Houses of Chiefs

The Constitution guarantees the office of Chief in Ghana as existing by customary law and usage and provides for the establishment of Houses of Chiefs for each Region by Act of Parliament, and for a Head for each Region; the Asantehene to be Head of Ashanti, and for each of the other Regions a head to be chosen by the House of Chiefs. Houses of Chiefs have power under the Constitution to consider any matters referred to them by a Minister or by the Regional Assembly and may at any time offer advice to any Minister.

LEGAL SYSTEM

The Supreme Court of Ghana comprises the High Court of Justice and the Court of Appeal. The members of the High Court, who usually sit alone, are the Chief Justice and nine Puisne Judges. The members of the Court of Appeal, which is only constituted when not less than three members sit of whom one is the Chief Justice or a Justice of Appeal, are the Chief Justice, two Justices of Appeal and the Puisne Judges. Divisional Courts of the High Court with original and appellate jurisdiction in civil and criminal matters are held in different parts of the country and there is also a Lands Division of the High Court which exercises original and appellate jurisdiction in land cases. There are a large number of inferior courts with limited criminal and civil jurisdiction presided over by stipendiary District Magistrates and lay Local Magistrates, and appeals therefrom, in the case of District Magistrates' Courts. Appeals from the Divisional Courts and the Lands Division of the High Court lie to the Court of Appeal and thence to the Judicial Committee of the Privy Council.

COMMUNICATIONS

There are four aerodromes in Ghana, situated at Accra, Takoradi, Kumasi and Tamale. Accra Airport is an international airport and is the terminus for services from the United Kingdom, the Northern Region, Ashanti and the Western Province. There is a National Meteorological Service, providing forecasting, climatological and agro-meteorological services.

The total number of railway miles open to traffic on June 30, 1957, was 603, of 3 ft. 6 ins. gauge. The railways carry nearly 5,000,000 passengers annually and nearly 2,000,000 tons of freight.

The total mileage of trunk and secondary motorable roads is 8,000 miles, of which approximately 1,544 miles are bitumen surfaced. There are also some 5,000 miles of local roads of unspecified standard.

Takoradi harbour, comprising 220 acres of water enclosed within two breakwaters and having accommodation for 16 ocean-going vessels, is equipped with modern facilities and deep-water berths. Extensions to the harbour, which provided for three additional quay berths and improved facilities for handling timber traffic, were completed in 1955. A new harbour for ocean-going ships is under construction at Tema and four berths will be provided initially. The gross earnings from Takoradi harbour for the year 1956-57 were £1,122,390 and the working expenditure was £68,116, the total capital expenditure being £8,475,001.

CAPITAL.—Ψ ACCRA, population (1958) 133,192. Other towns are Sekondi-Takoradi, Cape Coast, Koforidua, Tarkwa and Winneba.

Accra is sea distant from Liverpool, 3,920 miles; transit 12 to 30 days. A 24 hours air service operates to and from the U.K. four times a week.

ASHANTI

Ashanti is now administered by a Regional Commissioner, appointed by the Government of Ghana, and Administrative Officers. Local Government is in the hands of a number of District, Municipal, Local and Urban Councils.

In January, 1935, the *Confederation of Ashanti*, which was broken up and had remained inoperative for 35 years, was re-established with Otumfuo Sir Osei Agyeman Prempeh II, K.B.E. (a nephew of the late Nana Prempeh) at its head. The Confederacy has now been renamed the *Asanteman Council*.

The area is 24,379 square miles, with a population (Census of 1948) of 823,672 (including 1,187 non-Africans). 4,440 miles of motor roads afford access to all parts of the country. Agriculture is the staple industry; 134,259 tons (middle and main crops) of cocoa were exported in the crop year 1956-57. Approximately 18,500,000 cu. feet of logs were extracted from the forests of the southern part of Ashanti in 1956; gold output (1956-57), 317,178 oz.; average number employed in mining industry, 229 non-Africans, 6,424 Africans. The Mampong Scarp divides Ashanti into two natural divisions; the southern part being tropical rainfall forest, rich in mahogany, cedar, and trees yielding fruits, oil, rubber and gum copal, the eastern side being heavily planted with cocoa and the western side expanding its cocoa planting rapidly. The northern part of Ashanti is orchard savannah, the main products being maize, yams, cocoyams, bananas, plantains, and ground-nuts.

CHIEF TOWN, Kumasi, pop. (1948), 78,483.

NORTHERN REGION

The Northern Region is administered by a Regional Commissioner, appointed by the Government of Ghana, and Administrative Officers. Local district and urban district councils with elected majorities throughout the Region replace the former native authorities whose membership was entirely traditional. Universal adult suffrage was introduced in 1954, and the Region returns 26 members to the National Assembly. The country is mainly orchard savannah and the principal occupations of the people are agriculture and animal husbandry. Maize, millet and guinea-corn are grown, mainly for local consumption, and with yams and rice form the staple food of the people. Yams, groundnuts, shea butter and rice are exported to the south. The live-stock industry is the principal source of wealth.

CHIEF TOWN, Tamale, population, 16,164 (1948).

Malaya

THE FEDERATION OF MALAYA

The Federation of Malaya is situated at the southern end of the Kra Peninsula between latitudes 1° and 7° North and longitudes 100° and 105° East. The country is bounded by Thailand on the north, the Johore Straits and the island of Singapore on the South, the China Sea on the East and the Straits of Malacca on the West. The total area is just over 50,000 square miles of which about 70 per cent. is still under forest and undeveloped. The climate is tropical, characterized by high humidity. Average temperatures at the lower altitudes vary between approximately 70° and 90°. The annual rainfall is about 90 inches, distributed fairly evenly throughout the year.

Racial distribution: Malaysians, 3,126,706; Chinese, 2,332,936; Indians and Pakistanis, 695,985; Other races 123,136.

FEDERAL CAPITAL.—Kuala Lumpur, capital of Selangor (population, 316,230).

LANGUAGE.—Malay is the national language, with English permitted for official use for a minimum of 10 years after Independence Day. RELIGION.—Islam is the religion of the Federation, each Ruler being the head of the religion in his State; the Supreme Head of the Federation is the head of the religion in Malacca and Penang. The Federation is, however, a secular State.

GOVERNMENT

The Federation of Malaya became an independent country within the Commonwealth on August 31, 1957, as a result of an agreement between H.M. the Queen and the Rulers of the Malay States, whereby Her Majesty relinquished all powers and jurisdiction over the Malay States and over the Settlements of Penang and Malacca which then became States of the Federation.

The Constitution, which came into force on Independence Day, is designed to ensure the existence of a strong Federal Government and also a measure of autonomy for the eleven State Governments. It provides for a constitutional Supreme Head of the Federation (His Majesty the *Yang di-Pertuan Agong*) to be elected for a term of 5 years by the Malay Rulers from among their number, and for a Deputy Supreme Head (His Highness the *Timbalan Yang di-Pertuan Agong*) to be similarly elected. Save in certain instances provided in the Constitution, the Supreme Head acts in accordance with the advice of a Cabinet appointed by him from among the members of Parliament on the advice of the Prime Minister. The Supreme Head appoints as Prime Minister the person who in his judgment is likely to command the confidence of the majority of the members of the House of Representatives.

There is a Conference of Rulers consisting of the Rulers of the nine States and the Governors of Malacca and Penang, presided over by the Supreme Head of the Federation. The Conference is empowered to elect the Supreme Head and Deputy Supreme Head and has certain other powers, notably in matters of religion; it has authority to deliberate on any subject.

LEGISLATURE

The Federal Parliament consists of two houses, the Senate and the House of Representatives. The Senate (*Dewan Negara*) consists of 38 members, under a President (*Yang di-Pertua Dewan Negara*), 22 elected by the Legislative Assemblies of the States (2 from each) and 16 appointed by the *Yang di-*

Pertuan Agong from persons who have achieved distinction in major fields of activity or are representative of racial minorities, including the Aborigines. The first House of Representatives (*Dewan Ra'ayat*), consisting of 104 members elected on the principle of universal adult suffrage with a common electoral roll, was elected on Aug. 19, 1959, and met on Sept. 11.

Speaker (*Yang di-Pertua Dewan Ra'ayat*) Dato Haji Abdul Malek Bin Yusof.

The Constitution provides that each State shall have a simplified version of the Federal Constitution, with the Ruler or Governor acting on the advice of an Executive Council appointed on the advice of the *Mentri Besar* or Chief Minister and a single-chamber Legislative Assembly. The Legislative Assemblies are fully elected on the same basis as the Federal Parliament, but the Constitution allows for a minority of appointed members for a transitional period. The present State Constitutions provide generally for the Chief Minister and Executive Council to be appointed by the Ruler at his discretion, but new provisions will be incorporated.

Legislative powers are divided into a Federal List, a State List and a Concurrent List, with residual powers vested in the State Legislatures. The Federal List comprises broadly, external affairs, defence, civil and criminal law and justice, the machinery of government, finance, commerce and industry, communications and transport, power, education, medicine and labour and social security. The State List includes land, agriculture and forestry, local government and services and the machinery of state government. In the Concurrent List are, *inter alia*, social welfare, wild-life, animal husbandry, town and country planning, public health and drainage and irrigation.

There is provision for formal consultation between the Federal Government and the States in a National Finance Council and a National Land Council.

JUDICATURE

The Judicial System includes a Supreme Court, composed of a High Court and a Court of Appeal, Sessions Courts, Magistrates' Courts and Local Courts, called *Penghulus* Courts. The Supreme Court consists of a Chief Justice and up to 15 Puisne Judges.

Chief Justice, Sir James Thompson.

LOCAL GOVERNMENT

There are five main types of local government authorities operating under the State Governments: the fully elected City Council of George Town (Penang); second, the two financially autonomous municipalities of Kuala Lumpur and Malacca with elected Councils empowered to raise revenue from rates, fees and licences and responsible for public health, roads, fire fighting, etc.; 27 of the larger towns in the Federation have elected Town Councils. Twelve of these are already financially autonomous. Most of the smaller towns still have nominated Town Boards but these are being gradually replaced by elected Councils. The functions of Town Councils and Town Boards are similar to those of the Municipalities, though on a smaller scale. Elected Local Councils with financial powers are being developed rapidly in the rural areas. Over 286 are already functioning, including over 200 in the New Villages created by resettlement of the rural population from areas menaced by the Communist terrorists.

DEFENCE

The Armed Forces of the Federation consist of the Army, Navy and Air Force, together with

volunteer and auxiliary forces for each arm. The responsibility for command, discipline and administration, under the general authority of the Supreme Head of the Federation, rests with the Armed Forces Council under the Chairmanship of the Minister of Defence. The Council is not responsible for the operational use of the Forces. The General Officer Commanding, Federation Army, is also Chief of Staff, Federation Armed Forces.

An agreement exists between the Government of the United Kingdom and the Government of the Federation of Malaya on external defence and mutual assistance under which the United Kingdom has the right to maintain in the Federation such military forces, including a Commonwealth Strategic Reserve, as are agreed to be necessary for the fulfilment of Commonwealth and international obligations. The United Kingdom Government, on the other hand, has agreed to provide personnel, facilities, advice and assistance in the development of the Federal Armed Forces in addition to the financial assistance already being granted towards the capital cost of their expansion.

Contribution to Development Fund included in Budget expenditure amounted to \$26,200,000 in 1957 and \$22,300,000 in 1958.

PRODUCTION AND TRADE

The Federation of Malaya is primarily a producer of raw materials, the chief of which are rubber and tin (of which it is the world's biggest individual supplier), iron ore, palm oil and kernels, coconut oil and copra and other agricultural products. These constitute nearly four-fifths of the total export trade, the other one-fifth being *entrepôt* trade consisting of re-export of raw materials and produce of neighbouring countries and manufactured and industrial goods of foreign countries. Imports consist mainly of foodstuffs, beverages and tobacco, mineral fuels and lubricants, chemicals, textiles, manufactured and capital goods and raw products of neighbouring countries. The chief suppliers are the United Kingdom, Australia, the United States of America, Netherlands, W. Germany, Hong Kong, India, Japan, China, Thailand and Indonesia. Domestic rice production totalled 495,450 tons in the 1957-58 season. The balance was imported mainly from Thailand and Burma. From January 1955, when the remaining price control of rice was lifted, the import trade in all commodities was returned to commercial hands and for the first time since the end of the war, no price control at consumer level was enforced. Domestic industry includes manufacture of rubber goods, tobacco, cigarettes, pottery, cement, matches, pewter-ware, furniture, timber, bricks, ties, soap, biscuits and aerated waters.

ADEN

(Aden Colony and Protectorate)

The area of Aden Colony is 75 sq. miles and of the Protectorate about 112,000 sq. miles. The population of the Colony (1955 Census) is 138,441. The estimated population of the Protectorate is about 650,000.

The peninsula of Aden, situated on the southern coast of Arabia and lying on the Red Sea trade-route between Europe and the East, was first occupied by the British in 1839. Aden was always an important centre. Its trade decayed after the Portuguese discovery of the Cape route, but with the opening of the Suez Canal it regained more than its old importance and is now a great oil bunkering and coaling station and port of call, and an emporium for the trade of the adjacent African and Arabian coasts. Aden is a free port. The chief industries are fishing, salt, soap and cigarette manufacture, aluminium pressing of domestic utensils and dyeing and printing of cloth. The traffic in arms and ammunition is subject to special regulations. The British Government has treaty engagements with, and subsidises, the neighbouring Arab tribes, both inland and along the coast, from the Straits of Bab-al-Mandeb to Muscat territory at Ras Darbhat 'Ali.

Perim.—A small unfortified island with an area of 5 square miles was occupied in 1857 and is administratively attached to Aden. The port has been closed since November, 1936, on the withdrawal of the Perim Coal Company from the island. Population, 360.

Kamaran.—The island of Kamaran in the Red Sea about 200 miles north of Perim was taken by the British from the Turks in 1915, and is administered under the control of the Governor of Aden. It has an area of 88 square miles and a population of about 2,200. *Commissioner, Kamaran*, Col. R. G. W. E. Alban, O.B.E.

The Aden Protectorate to the West of approximate longitude 46° is bounded on the East by the Qara country, which is part of the dominions of the Sultan of Muscat and Oman, and on the North and West by the Great Desert and the Kingdom of Yemen, whose Southern boundary was temporarily fixed by Article III of the Treaty of San'a (February, 1934) by which His Majesty's Government and the Yemen Government agreed to maintain the *status quo* frontier as it was on the date of the signing of the treaty. The coastline of the Aden Protectorate, which is about 750 miles long, starts in the West from Husn Murad, opposite the island of Perim, and it runs eastward to Ras Dharbat 'Ali, where it meets the Sultanate of Muscat and Oman.

The Aden Protectorate is divided into two parts, the Western Aden Protectorate and the Eastern Aden Protectorate. The former consists of 18 Sultanates, the chiefs of which are all in protective treaty relations with Her Majesty's Government.

On February 21, 1959, "The Federation of Arab Amirates of the South" was inaugurated in the West Aden Protectorate, composed of the Sultanates of Audhali, Lower Yafal, and Fadhihi, the Amirates of Baihan and Dhala, and the Sheikdom of Upper Aulaqi. It is expected that the Federation, which is governed by a constitution providing for a Supreme Council and a Federal Council, will be open later to other States in the Western Protectorate. The objects of the Federation include

concerted resistance to repeated incursions from the Yemen and the promotion of economic development programmes. The flag adopted by the Federation consists of an Islamic crescent moon with a central star and five horizontal stripes (black, yellow, green, yellow, blue).

The Eastern Aden Protectorate comprises the Hadhramaut (consisting of the Quaiti State of Shihr and Mukalla and the Kathiri State of Selyun), the Mahri Sultanate of Qishn and Socotra, the Wahidi Sultanates of Bir Ali and Balhaf, and the Sheikdoms of Irqa and Haura, all of which are in protective treaty relations with Her Majesty's Government. His Highness the Sultan of Shihr and Mukalla is the premier chief of the Eastern Aden Protectorate, and the Hadhramaut is the most important and best organised of these areas. It is bounded on the West by the Wahidi Sultanates and on the East by the Mahri Sultanate.

The Mahri Sultanate of Qishn and Socotra is the most easterly area in the Aden Protectorate, for it is bounded on the East by the Sultanate of Muscat and Oman. The Sultan of Qishn and Socotra resides on the island of Socotra (area 1,400 square miles) which lies 150 miles from Cape Guardafui. The island was occupied by the East India Company in 1834 and it came under British protection in 1886 when the treaty with the Mahri Sultan was concluded. It contains about 12,000 inhabitants principally engaged in livestock husbandry.

GOVERNMENT

Aden was for many years administered by the Government of India, and in 1932 it was separated from the Bombay Presidency and formed into a Province under a Chief Commissioner under the direct control of the Government of India. It ceased to be a part of British India on April 1, 1937, and is now a Crown Colony. The Governor has an Executive Council and a Legislative Council was established in 1947. In July 1955, the Legislative Council was enlarged and for the first time an elected element was introduced. At the end of 1958 the constitution was again modified to give the Council an elected majority, the elections for which were held in January 1959. The Legislative Council as it is now constituted consists of 23 members presided over by an impartial Speaker who has no vote. Twelve of the members are elected, 6 nominated, and 5 are *ex officio*, including the Chief Secretary, the Attorney-General, the Financial Secretary, the Assistant Chief Secretary (Colony) and a representative of the Commander, British Forces. Four elected members of the Legislative Council and one locally nominated member have been appointed members-in-charge of certain departments of Government, with full administrative and

legislative responsibilities. The 5 members-in-charge and the 5 *ex officio* members of the Legislative Council are also members of the 10-member Executive Council presided over by the Governor. There is a Court of unlimited civil and criminal jurisdiction called the Supreme Court from which appeals lie to the East African Court of Appeal.

THE BAHAMAS

The Bahamas (or Lucayos) are an archipelago near the British West Indies, lying between 20° 56'—27° 22' N. lat. and 72° 40'—79° 20'; W. long., and extending from the coast of Florida on the north-west to Haiti on the south-east. The group consists of twenty-two inhabited islands, and an immense number of islets and rocks, comprising an area of about 4,403 square miles, and a population estimated (1957) at 130,698, the most part being descendants of liberated Africans. The principal islands are: New Providence (containing the capital, Nassau), Cat Island, Abaco, Grand Bahama, Long Island, Eleuthera, Exuma, Harbour Island, Inagua, Andros Island, San Salvador (at one time known as Watling's Island), Rum Cay, Long Cay, Ragged Island and Bimini. Watling's Island was the first landfall in the New World made (October 12, 1492) by Christopher Columbus, who gave it the name of San Salvador, which has been restored by an Act of the Bahamas Legislature. Originally settled by Englishmen, the Bahamas were, in 1782, surprised by the Spanish, but at the Peace of Versailles were restored to the English. The climate is salubrious, and in the winter Nassau, which is outside the tropics, is frequented by many visitors from all parts of the world.

Industries.—Tomatoes and okra are cultivated in

large quantities for shipment to Canada and the United States. Lumbering, salt raking and crawling are the chief national industries.

Education.—Primary education is compulsory. There are 145 state-maintained schools with a total roll of 16,824; there are also 45 denominational schools with a total roll of 6,244. There are one Government and 3 denominational secondary schools and 1 private school.

Civil Aviation.—Facilities for external traffic are provided by Pan-American Airways, B.O.A.C., Trans-Canada Air Lines, British West Indian Airways and Mackey Air Lines, while Bahamas Airways and Skyways, Ltd. provide internal schedule and charter flights to the outlying islands. There are several daily air services between Nassau, Miami, Palm Beach, Fort Lauderdale, Tampa and St. Petersburg (Florida), and a regular service between Nassau and Montego Bay, Jamaica, besides regular trunk communication with London, New York, Toronto, Montreal, Bermuda and Kingston.

Communications.—There are 107 Post Offices which handle 8,600,000 items a year. Wireless and telephone services are in operation to all parts of the world. There are 62 radio stations among the islands.

The High Commissioner in the Union of South Africa for Her Majesty's Government in the United Kingdom holds office concurrently as Her Majesty's High Commissioner for Basutoland, the Bechuanaland Protectorate and Swaziland.

BASUTOLAND

(The Territory of Basutoland)

Basutoland is bounded north and west by the Orange Free State, east by Natal and East Griqualand, and south by the Cape Province, with an area of 11,726 square miles. The land is held in trust for Basuto by the Paramount Chief and is not made available for settlement. Sites are granted, however, for missions, schools, trading and commercial enterprises. The figures of the April, 1956 Census showed a population of 641,674 (638,857 Africans, 1,926 Europeans, 247 Asiatics and 644 persons of mixed race).

The economy of the Territory is predominantly agrarian.

The biennial livestock census for 1957 gave the following figures:—

Cattle, 381,770; horses, 81,661; mules, 3,599; donkeys, 48,616; sheep, 1,220,769; goats, 535,286. During 1957, 7,058,636 lb. of wool were exported to the value of £1,204,050 at the coast. The total quantity of mohair exported during 1957 was 1,956,066 lb. valued at £348,149 at the coast.

Education.—In 1957 there were 976 primary schools and 17 schools with secondary classes. The total enrolment of all schools was 116,800.

Communications.—There are no railways in Basutoland with the exception of 1 mile of the South African Railways which enters Basutoland at Maseru from the Orange Free State. A main road runs from Butha Buthe in Northern Basutoland to Mokane's Hoek in the South. It connects all the Government Stations with the exception of Qacha's Nek and Mokhotlong. Qacha's Nek is accessible by road from Matatiele in East Griqualand and a jeep service up the Sani Pass to Mokhotlong has recently come into operation. There are airstrips in the Territory at Maseru, Mokhotlong, Sehonghong and Semongkong, and a number of other strips used principally by traders for transporting

merchandise to and from their stores, and for the disposal of mail for the mountain areas.

FINANCE

The principal sources of revenue to the Territory are Basuto tax, customs, income tax, and wool export duty. The following table shows the revenue and expenditure for the years 1956–58:

	1956–57	1957–58
Revenue.....	£1,389,828	£1,549,433

Exports to U.K.....	1,255,684	1,011,313

* Basutoland, Bechuanaland Protectorate and Swaziland.

The chief articles of export are wool, mohair, wheat, cattle, hides and sorghum, the imports being chiefly blankets, ploughs, clothing, groceries, hardware and maize.

GOVERNMENT

The Territory is governed by a Resident Commissioner under the direction of the High Commissioner for Basutoland, the Bechuanaland Protectorate and Swaziland. For fiscal and other purposes the country is divided into nine districts. There is an annual session of the Basutoland Council which consists of 99 members, all Africans, 52 being elected by chiefs, four each from nine District Councils, one each from the Basuto Traders' Association, Agricultural Association, Teachers' Association, Ex-Servicemen's Association, Progressive Association and Leper Settlement and five nominated by the Government. The Resident Commissioner is President of this Council. At the end of 1958, agreement was reached in London for the grant of legislative powers to a reconstituted Basutoland Council and for the establishment of an Executive Council. The Basutoland courts of law consist of (a) The Court of Appeal, (b) The High Court, (c) The Subordinate Courts, including the Courts of Judicial Commissioners and (d) Basuto Courts. Appeals lie to the Privy Council by leave of the Chief Justice of the High Commission Territories who is also President of the Court of Appeal, and has jurisdiction in all cases, both civil and criminal, which arise in the Territory.

BECHUANALAND PROTECTORATE

The Bechuanaland Protectorate is bounded on the south and east by the Cape and Transvaal Provinces of the Union, on the north and northeast by Southern Rhodesia, the Zambesi and Chobe (Linyanti) Rivers, and on the west by South-West Africa. It is about 500 miles long and 550 miles broad, with a total area of about 275,000 square miles; the *Caprivi Zipfel* was attached to the Protectorate for administrative purposes by Proclamation (1922), but was retransferred to S.-W. Africa, Sept. 1, 1929, and is now administered by the Union government. The population at the census of May, 1946, was 293,964, of whom 2,325 were whites and the remainder natives with a few Indians and coloured.

The climate is healthy during part of the year. Malarial fever is prevalent in some districts during February, March, and April, but with ordinary precautions is not seriously detrimental to health. The country is essentially pastoral, although sorghum, maize, beans, pumpkins and melons are sown. Cattle thrive, and numbered 1,314,238 on Dec. 31, 1958. The population is almost entirely a native one, the principal tribes being those of Linchwe (Bakgatla), of Kgari Sechele, O.B.E. (Bakwena), of Bathoen, C.B.E. (Bangwaketse), of Mokgosi (Bamalete), of Elizabeth Pulane Moremi, Regent during the minority of Letsholathebe Moremi (Batawana), of Kgosi Matlala (Batiokwa) and of Kebaepile (Barolong). The chieftainship of the largest tribe, the Bamangwato, is at present in abeyance.

Schemes for improvements in agriculture, medical services, education and communications, and schemes for combating soil erosion, investigating mineral resources, improving water supplies, irrigation dams, tribal granaries and roads and for improving living conditions are being carried out.

On Dec. 31, 1958, there were 9 European and 181 African schools with enrolments of 595 and 29,924. Estimated expenditure on education in the calendar year 1958 was £261,408.

The railway from Kimberley to Vryburg and Mafeking traverses the Protectorate on its way to the Rhodesias. There is a telegraph line from Cape Province through from Mafeking, *via* Gaberones and Francistown to Bulawayo and Salisbury. The chief European centres are Lobatsi, Gaberones, Francistown, and Serowe.

SWAZILAND

(The Swaziland Protectorate)

Swaziland (called by the natives *Ka Ngwane*) lies between the Drakensberg and Lubombo Mountains in South Africa. The Transvaal Province forms a boundary on the south, west and north, the eastern boundary being Tongaland (Province of Natal) and Portuguese East Africa. The total area is 6,705 square miles, and the population (census figures, 1956) 237,041, of whom 229,744 are Bantu, 5,919 Europeans and 1,378 Eurafrians. Swaziland is divisible into three longitudinal regions: the mountainous regions of the west, with an approximate altitude exceeding 4,000 feet; the Middle Veld, about 2,000 feet lower; and the Low Veld, bounded on the east by the Lubombo Mountains, with an average altitude not exceeding 1,000 feet. The country is well watered and healthy, the annual rainfall averaging 45 inches, the mean temperature being 64° Fahr. (50°-78°). The soil is generally fertile, particularly so in the Low and Middle Veld. The whole of the Territory forms excellent grazing for cattle, and cattle-ranching is carried on by several companies. There were about 463,019 head of cattle in the Territory at the end of 1957.

The agricultural products are maize (the staple product), cotton, tobacco, millet, citrus, sugar, tung-nuts, avocado pears, beans, pumpkins, bananas, rice and sweet potatoes. An important forest industry is being developed. Citrus fruits do well, and are being extensively grown. The country possesses considerable mineral wealth, including gold, tin, coal, iron, copper and asbestos; asbestos is being produced at the Havelock mine in large quantities and there are prospects of iron ore being mined on a large scale. The chief exports in 1957 in order of value were asbestos, cattle, patulite (hardboard), rice, seed cotton, pineapples and butter.

In 1957 there were 9 European schools (8 maintained by the Government) with 1,087 pupils. African education is still largely in the hands of various church missions, many of which receive support from the Government. Apart from 222 schools falling under the direct superintendence of the Missions, there are 3 National schools financed by the Swazi National Treasury, 19 Government-controlled central schools and a num-

ber of small tribal schools, the total enrolment during 1957 being 26,626. Eurafican children have 4 Mission schools (418 pupils).

There is a daily South African Railway motor omnibus service between Breyten and Mbabane (89 miles); Mbabane and Bremersdorp (27 miles); Bremersdorp and Stegi (43 miles); Bremersdorp and Balegane (42 miles); Bremersdorp and Piet Retief (72 miles); Piet Retief and Hlatikulu (57 miles); Goedegegun and Hluti (33 miles) and Hluti and Gollie (26 miles). There are post offices and telegraph and telephone offices at all the chief centres.

BERMUDA

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (about 20 only of which are inhabited) situated in the west of the Atlantic Ocean, in 32° 15' N. lat. and 64° 51' W. long., the nearest point of the mainland being Cape Hatteras in North Carolina, about 570 miles distant. The total area is now approximately 20.59 sq. miles which includes 2.3 sq. miles leased to, or reclaimed by, the U.S. authorities between 1941 and 1957 under the terms of the 99 year lease. The estimated civil population (1958) was 43,480 (16,037 white and 27,443 coloured). The colony derives its name from Juan Bermudez, a Spaniard, who sighted it before 1515, but no settlement was made until 1609 when Sir George Somers, who was shipwrecked here on his way to Virginia, colonized the islands.

Vegetation is prolific, the principal trees being the Bermuda cedar (juniper), formerly of great importance for shipbuilding, but since 1943 almost entirely destroyed by blight. At one time the islands enjoyed a flourishing export in onions, potatoes, and green vegetables, but the imposition of tariffs in U.S.A. made further growing for export

unprofitable. The lily bud trade with Canada and U.S.A. and locally manufactured concentrates and pharmaceuticals are now the Colony's leading exports. Little food is produced except vegetables and fish, other foodstuffs being imported.

The Colony's economic structure is based on its importance as a tourist resort and as an air and naval base and from these sources most of its revenue is derived. It is now within three hours' air travel from New York, and in 1958 4,060 planes landed a total of 385,963 passengers. The island landing ground is used by B.O.A.C., Pan-American Airways, Trans-Canada, Eastern and 7 other scheduled air lines, including Bermuda's own Eagle Airways.

Education cost £493,203 in 1958. Free elementary education was introduced in May, 1949. In secondary schools, fees may reach £60 per annum, excluding books and stationery.

There is a broadcasting service, and overseas telephone and telegraph services are maintained. The use of motor cars was banned in the island from 1908 until 1946.

BRITISH BORNEO

Borneo is a large island in the Eastern Archipelago, extending from lat. $7^{\circ} 4' N.$ to $4^{\circ} 20' S.$ and from long. $108^{\circ} 50'$ to $119^{\circ} 20' E.$ It is about 850 miles in length and 600 in breadth, and contains an area of 284,000 square miles, divided by the equatorial line into two nearly equal portions. The population is probably about 2,750,000. It is thought that the island was discovered by the Portuguese in 1521. About 202,000 sq. miles are included within Indonesia. Of the remainder of the island (the North Coast) approximately 50,000 sq. miles form the Colony of Sarawak and 30,000 sq. miles the Colony of North Borneo (including Labuan), all British.

NORTH BORNEO

The former State of North Borneo was governed by the British North Borneo (Chartered) Company, the last Chartered Company to administer an area of the British Empire, from 1882 to 1942, and became part of the new Crown Colony of North Borneo on July 15, 1946.

The Colony of North Borneo occupies the northern part of the island of Borneo, and has an area of 29,388 square miles with a coast-line of approximately 900 miles. The interior is mountainous. Mt. Kinabalu, sacred to the Dusuns, is the highest mountain in the East Indies, rising to 13,455 feet. Most of the Colony is densely timbered. On the west coast there is a narrow coastal plain which supports the main agricultural and rubber production of the Colony.

The census of the population was completed in June, 1951. The Census Report shows that since 1931, the year in which the last census was held, the total population of the Colony has increased by 20.4 per cent. from 277,476 to 334,141 and the native population by 18.4 per cent. from 205,218 to 243,009. The Chinese population has increased by 48.6 per cent. from 50,056 to 74,374. The number of Europeans, including Eurasians, has increased from 647 to 1,213. The native population comprises Dusuns (mainly agricultural), Bajaus and Brunels (fishing and agricultural), Muruts and Suluks and several smaller tribes. Labuan has a population of 8,784 (mainly Malays and Chinese).

The main towns of the Colony are situated on the coast. These are Jesselton (the capital) (11,704), Kudat (1,895), Sandakan (12,499) and Tawau (4,282) on the mainland and Victoria (2,526) on the island of Labuan.

Climate.—North Borneo is favoured by a relatively cool climate for a place situated so near the Equator. The average mean temperature varies between a maximum of 88° and a minimum of $66^{\circ} F.$ The annual rainfall varies from 60 to 180 inches according to locality.

Communications.—The only railway is a metre gauge line running from Jesselton on the coast through Beaufort (57 miles) to Melalap in the interior, a distance of 96 miles, with a branch line from Beaufort to Weston (20 miles). There are 213 miles of metalled road with sealed surface, 77 miles of other metalled roads and 486 miles of earth roads. There is an airstrip suitable for Sky-master aircraft at Labuan, and Dakota strips at Jesselton and Sandakan. The construction of additional landing grounds for the operation of an internal air service has been completed, and the service is now in operation. There is a daily service to and from Singapore and a weekly service *via* Labuan to and from Hong Kong and Kuching in Sarawak.

Production.—The main industries of the Colony are timber extraction and the cultivation of rubber

(estimated at 148,952 acres), rice (75,422 acres), coconuts and coconut products (48,000 acres), tobacco (1,700 acres) and hemp (4,052 acres). Fishing gives employment to a large number of local natives and Chinese. About four-fifths of the territory is still heavily timbered with many valuable species of hardwoods and soft hardwoods, of which the more important are seraya (Borneo cedar) and camphor.

Trade.—The main imports in 1958 were provisions, machinery, rice, cigarettes and tobacco, and metals. Timber is the greatest export (valued in 1958 at \$36,400,000); other exports are rubber, copra, hemp, tobacco and cutch.

Brunei is a British Protected State on the north-west coast of the island of Borneo, total area about 2,226 sq. miles, population (1947 census figure) 40,657, of whom 31,161 were of Malay or Bornean race. The chief town, Brunei, has a population of about 15,000. The supreme authority in the State is vested in the Sultan-in-Council. By virtue of a Royal Commission published on May 1, 1948, the Officer for the time being administering the Government of the Colony of Sarawak is High Commissioner for Brunei. The general functions of Administration are carried out by a British Resident whose advice, in accordance with the Treaty of 1906, must be asked and acted upon in all questions other than those affecting the Moslem religion. The climate is of the humid tropical type.

BRITISH GUIANA

Area and Population.—British Guiana, which includes the Counties of Demerara, Essequibo, and Berbice, is situated on the north-east coast of South America and has a total area of 83,000 square miles with a seaboard of more than 500 miles. The population at December 31, 1958, was estimated at 539,940. There are about 21,500 aboriginal Indians. The colony is bounded on the south by Brazil, on the east by Surinam, on the west by Venezuela, and on the north and N.E. by the Atlantic. The coastland is very like the Netherlands, below the level of the sea, and intersected with canals constructed by its former Dutch owners. At the junction of the British Guiana-Venezuela-Brazil boundaries is Mt. Roraima, a flat topped mountain 9,000 feet above sea-level. There are many beautiful waterfalls in British Guiana: on the Potaro River (a tributary of the Essequibo) is the *Kaieteur Fall*, with a clear drop of 741 feet and a total fall of 822 feet, and on the Essequibo, the *Horse Shoe Falls* (discovered in 1934); a fall, with a drop of some 500 feet, discovered in 1934 on the Ipobe River, a tributary of the Kuribrong, has been named the *Marina Fall*, and other falls were discovered in 1938 on the Karanang River, 80 miles north-east of Mt. Roraima. The seasons are divided into dry and wet, the two dry seasons lasting from the middle of February to the end of April, and from the middle of August to the end of November. The climate on the coast, for the greater part of the year, is pleasant and healthy. In the Aug.-Oct. period it is hot. The mean temperature is 80.3°, its extremes during 86 years ranging between 68° and 96°, but these are very rare, the usual extremes being 70° and 90°. In the interior the mean temperature is higher—82.6°, its extremes ranging from 66° to 103°. The yearly rainfall is subject to marked variation, its mean on the coast lands averaging about 90 inches with an average of 58 inches on the savannahs. The daily average sunshine is a little over 6 hours and, except when rain is falling, dull and cloudy weather is rarely experienced.

Production, etc.—Much of the country is forest. The cultivated portion (about 271,000 acres, of which 81,900 are under sugar-cane and 139,500 in rice) is confined to the sea coast and to a short distance from the rivers. There are extensive deposits of gold, diamonds, manganese, bauxite and mica.

Communications.—There were 5,178 telephones in use in 1958; 189 sub-exchanges, call offices and private branch exchanges are in operation. 36 land-line telegraph stations are maintained at coastal post offices and 6 wireless telegraph stations in the interior, providing communications with the coast. In Georgetown, a central radio station provides radio-telephone communication with 8 branch offices, 9 stations operated by other Government departments, 36 by private concerns, and 9 coastal ships and launches. Overseas radio and telephone services are provided by Cable and Wireless (W.L.) Ltd., in association with the Post Office telephone system. There are 135 post offices and postal agencies. There are two broadcasting stations, which are operated on a commercial basis by private enterprise. There are 95 miles of railway, and the British Guiana Airways (a government company) provides internal air-services.

Defence.—Facilities for the establishment of a base on the Demerara River, 25 miles from the sea and within 50 miles of Georgetown, were granted to the Government of the United States of America by the *Anglo-American Agreement*, Sept. 2, 1940, but in August, 1949, this base was taken over by the British Guiana Government for use as a commercial airfield.

Education.—There are 316 primary schools in the colony, with an enrolment of 121,746, 2 Government-owned and 8 Government-aided private secondary schools with an enrolment of 4,580, 5 nursery schools, a vocational school and a technical institute with a combined enrolment of 1,535, and 30 other private secondary schools with an approximate enrolment of 3,000.

GOVERNMENT

The new Constitution, effected by the Order of the Queen in Council dated April 1, 1953, was proclaimed in British Guiana on April 8, 1953.

On October 9, 1953, it was announced that Her Majesty's Government had decided that the Constitution of British Guiana must be suspended to prevent Communist subversion of the Government and a dangerous crisis both in public order and in economic affairs. Armed forces were landed to prevent public disorder.

The British Guiana (Constitution) (Temporary Provisions) Order in Council, 1953, provided for a wholly nominated Legislative Council, consisting of 27 members, including the three officials, under a Speaker, with an Executive Council of 10 members, all of whom were members of the Legislative Council. This interim Government was dissolved in 1957 and elections under a new constitution were held in August, 1957. The Legislative Council under the new constitution consists of the Speaker, 3 officials, 14 elected members and 6 nominated

members. The Executive Council, presided over by the Governor, consists of the three official members and five elected members of the majority party in the Legislative Council.

BRITISH HONDURAS

British Honduras, in Central America, lies within 18° 29' 5" to 19° 53' 55" N. latitude and 89° 9' 22" to 88° 10' W. longitude. Its extreme length and breadth are approximately 174 m. and 68 m. respectively; it is bounded on the north and north-west by Mexico (Quintana Roo Province, formerly Yucatan); on the west and south by Guatemala; and on the east by the Caribbean Sea. The total area is about 8,867 sq. miles, with a population (Census 1946) of 59,220—28,722 males and 30,498 females—estimated, Dec. 31, 1958 at 88,156. The climate generally is damp and hot, but not unhealthy. The temperature ranges from 59° to 92° F. The average lies between 75° and 80°, but this is considerably tempered by the prevailing sea-breezes. In September, 1955, a hurricane all but destroyed the entire northern part of the colony. Damage was estimated at over \$4,000,000. Sixteen lives were lost in the town of Corozal, which was completely destroyed.

The greater part of the country is covered by

forest, of which 72 per cent. is high rain forest, 15.5 pine forest and dry savannah, 5.5 wet savannah and mangrove forest, the remaining 7 per cent. being existing or recently abandoned cultivation. The wire grass and sedges of the dry savannahs make very poor pasturage for cattle. The north of the Colony and the southern coastal plain (10 to 12 miles wide) is nearly flat, and near the sea is low and swampy. The central mountain mass has a general altitude of 2,000 to 3,000 feet and 57 per cent. of the area of the Colony is over 1,000 feet in elevation above mean sea-level.

The staple products are obtained from the forests, and include mahogany, cedar, and *ditche* (the basis of chewing-gum). Agricultural crops that grow readily include sugar cane, coconuts, citrus fruit, plantains, pineapples, mangoes, maize, rice, varieties of beans and peas. Bananas also grow well in certain localities but are subject to Panama Disease. All varieties of citrus fruits flourish, and in particular grape-fruit, of which a very high grade is exported.

In 1958 there were 2 Government, 108 grant-aided and 32 private elementary schools in the Colony, the total enrolment being 18,991. There are also 9 secondary schools with a total enrolment of 1,239 students.

There are 34 post offices, dealing in 1958 with 1,528,400, articles of mail. There is a radio-telegraph station for external communications at Belize. Air services are scheduled twice weekly to and from Tegucigalpa, Spanish Honduras, *via* San Pedro Sula, and thrice weekly to Chetumal. A weekly service exists from and to Kingston, Jamaica, direct. There is a twice weekly service from and to New Orleans and another to San Salvador and Guatemala, direct, and a weekly service from and to Miami and Tegucigalpa. A local scheduled air service linking the principal districts was inaugurated in August, 1952. In 1956 there were 2,882 extra-territorial aircraft movements and 4,782 departing and 4,572 arriving air passengers.

The Constitution published in March, 1954, provides for a Legislative Assembly of 9 elected, 3 nominated and 3 official members, presided over by a Speaker nominated by the Governor. The normal life of the Assembly is three years, but the Governor has power to prorogue or dissolve it by proclamation. Certain other powers are reserved to the Governor. A quasi-ministerial system has been introduced by which certain elected members are allotted portfolios and handle Government business in the Legislative Assembly.

THE BRITISH VIRGIN ISLANDS

The Virgin Islands are a group of islands at the eastern extremity of the Greater Antilles, divided between Great Britain and the U.S.A. Those of the group which are British number about 42, of which 11 are inhabited, and have a total area of about 59 square miles. The principal are Tortola (the largest, situate in 18° 27' N. lat. and 64° 40' W. long.), Virgin Gorda, Anegada and Jost Van Dyke. The population is approximately 7,600 (1958). Communication is by daily launch service to St. Thomas; also an external telephone service linking Tortola with St. Thomas and Puerto Rico by which messages may be sent to all parts of the world. An airfield on Beef Island is under construction and is used by small planes. The principal exports are livestock, fish, charcoal, vegetables and fruit, for which the principal market is St. Thomas. Rum is distilled on a small scale.

CYPRUS

Area and Population.—Cyprus is a large island in the Mediterranean Sea, between N. lat. 34° 33' and 35° 41', and E. long. 30° 21' and 30° 35'. It is about 40 miles distant from the nearest point of Asia Minor, and 60 miles from Latakia, on the Syrian coast. The distance to Port Said, at the entrance of the Suez Canal, is 238 miles. The larger part of the island is an irregular parallelogram, 100 miles long and 60 to 30 broad, from which a narrow peninsula, 5 or 6 miles wide, runs out for 40 miles towards the north-east. The area is 3,572 square miles. In 1957 the estimated population was 544,000. There are two major communities, Greek Cypriots (78.8 per cent.) and Turkish Cypriots (17.5 per cent.); and minorities of Armenians, Maronites and others. In summer it is hot and dry on the plains and humid on the seashore, but the climate of the hills inland is equable and bracing. The winter is mild and invigorating and, except in the mountains, the temperature rarely falls below freezing point. Owing to the eradication of malaria, the intensive efforts to improve rural sanitation, and the establishment of an increasing number of infant welfare clinics, the death rate of the island has been reduced to one of the lowest in the world.

Production and Industries.—Agriculture is the industry which provides the greatest employment in Cyprus, the chief agricultural products being:—Cereals, carobs (locust beans), vine products, potatoes, onions, cheese, almonds, citrus and other fresh and dried fruit, tobacco and legumes. Various kinds of livestock are raised, donkeys and mules being the principal exports. The annual value of agricultural and livestock exports is approximately £6,000,000. By value of product the main industry of Cyprus is mining. The chief mineral extracted is pyrites. Some is exported in the raw state as cupreous pyrites, but most of it is treated. Copper concentrates and copper precipitates are extracted for export as such and the residue is exported as iron pyrites. Other minerals are asbestos, chrome ore and concentrates, gypsum and earth colours. Annual value of minerals exported, £11,000,000. In addition to the major industries of agriculture and mining there are many light manufacturing industries, including the following:—beer, aerated and other soft drinks, buttons, artificial teeth, cotton yarn, textiles, shirts, underwear, footwear, cigarettes, leather and leather goods, metal bottle stoppers, soap, gypsum and plasterboard, asbestos, cement tiles, bricks, roofing tiles, macaroni, Turkish delight, caramels, sugared almonds, jams and marmalades, canned fruit and vegetables, carob gum, olive and olive kernel oil, cotton-seed oils, essential oils, furniture, nails, grape juice, animal fodder, perfumery, polishes, pottery and earthenware, baskets, metal containers, motor bodies, ice, brooms, cement and flour. Plants for tyre retreading are also operating in the island.

During 1956 a cement factory started production and there were important developments in the flour milling industry.

Education.—Each religious denomination has its own elementary schools under the general control of the Government. During the school year 1956-57 there were 748 schools (Greek 500; Turkish 244; Armenian 4; Maronite 5; others including private schools, 15) with a total enrolment of 79,133. Secondary education is for the most part on a similar

denominational basis with a total enrolment of 21,751.

Language and Literature.—Modern Greek and Turkish are the languages of the principal communities, English and French being spoken by the educated classes. The knowledge of English is increasing. In 1957 there were 10 daily and 12 other newspapers (3 English, 15 Greek and 3 Turkish) in addition to government publications.

Communications.—Ψ Famagusta is the main seaport. There were (December, 1957) 34,555 road motor vehicles on the register, including 16,157 private cars and 7,633 motor cycles. In 1957 1,660 steamships (tonnage 2,757,206) and 232 sailing vessels (tonnage 15,147) engaged in the foreign trade.

Air traffic in Cyprus was affected by the local emergency and the Suez crisis at the close of the year. Air passenger traffic in, out and through Nicosia in 1957 dropped by 1 per cent. (against 1956 figures) to 102,223, while freight dropped by 41 per cent. to 1,597 metric tons. Six airlines maintain frequent scheduled services to Adana, Ankara, Istanbul, Athens, Rhodes, Beirut, Tel Aviv, Kuwait, Bahrain, London, Malta, Milan, Rome, Munich and Paris. Nicosia Flight Information Centre (opened 1958) controls and safeguards movements of all civil aircraft through the Eastern Mediterranean.

The chief exports were minerals (£10,400,000); citrus fruit (£1,700,000); locust bean products (£900,000); potatoes (£600,000); wheat (£600,000); vine products; wool; tobacco; canned fruits and juices; hides and skins; cheese; confectionery.

The Roman supply of copper was chiefly drawn from Cyprus and was known as *aes cyprium* (Cyprus brass) which was shortened to *cyprium*, whence is derived the English word copper.

GOVERNMENT

On June 4, 1878, the Sultan of Turkey "assigned the island of Cyprus to be occupied and administered by England." The island was formally annexed to Great Britain on Nov. 5, 1914, on the outbreak of war with Turkey. From March, 1925, when it became a Crown Colony, until Nov.

1931, the Government was administered by a Governor, aided by an Executive and a Legislative Council, the latter containing 9 official and 15 elected members, but after the disturbances of 1931, the clauses in the Letters Patent of March, 1925, dealing with the constitution of the Legislative Council were revoked, and the island was administered by a Governor, assisted by an Executive Council.

In 1948 a Consultative Assembly drawn from representative elements in the island was called together to consider the framing of proposals for constitutional reform, including the re-establishment of a central Legislature. The efforts of the Consultative Assembly were not successful.

A state of emergency was declared in November, 1955, and Archbishop Makarios was deported. Further proposals for a workable constitution made in 1956 and a seven-year-plan for the government of Cyprus in association with Greece and Turkey were rejected by the Greek Government and Greek Cypriots. Archbishop Makarios was released in March, 1957, but was not allowed to return immediately to Cyprus.

Following a meeting at Zürich between the Prime Ministers of Greece and Turkey at which substantial agreement was reached on the problems of Cyprus, a conference was held in London and an agreement was signed on February 19, 1959, between the United Kingdom, Greece and Turkey which it was hoped would lead to a final settlement. The state of emergency in Cyprus came to an end on February 23 when the principal emergency regulations were revoked and an amnesty for members of *Eoka* (the terrorist organization), including a safe-conduct to Greece for Col. Grivas, was announced on February 27. A large number of arms was handed in to the police during March and Grivas left Cyprus for Athens on March 17.

During the course of the emergency the following casualties were recorded: British servicemen killed, 104; wounded, 601; Police (British, Greek and Turkish) killed, 49; wounded, 185; civilians killed, 238; wounded, 288. Casualties in inter-racial riots totalled 115 killed and 184 injured.

The London agreement provided that Cyprus would be a Republic with a Greek Cypriot President and a Turkish Cypriot Vice-President who would have executive powers and would be elected for a five-year term by the Greek and Turkish communities respectively. A Council of Ministers (7 Greek, 3 Turkish) will be designated by the President and Vice-President, and a House of Representatives elected for five years by universal suffrage of each community separately, 70 per cent. by the Greek community and 30 per cent. by the Turkish. The number of representatives will be fixed by agreement between the communities. The President and the Vice-President will have the right of final veto on the decisions of the Council of Ministers and on any law or decision of the House of Representatives concerning foreign affairs, except participation in international organizations and alliances in which Greece and Turkey both take part. A Communal Chamber will be set up for each community with the right to levy taxes on its own community and with authority in matters of religion, education, culture and matters of purely communal character. Separate municipalities will be created in five towns by the Turkish inhabitants for a trial period.

Total or partial union of Cyprus with any other state or partition of Cyprus is excluded. It was agreed that a treaty guaranteeing the independence and constitution of the new state will be concluded between Cyprus, Greece and the United Kingdom. The treaty will guarantee the integrity of two areas

retained by U.K. as military bases—Akrotiri-Episkopi-Prarmali and Dhekelia-Pergamos-Aylos Nikalaos-Xylophagou—and British use of roads and other facilities. It was hoped that the constitution would be brought into effect not later than February 19, 1960, and committees were set up in Cyprus (a) to draft the constitution on the basis agreed at Zürich, and (b) to draw up plans for the machinery of government. A joint committee composed of a representative each of Greece, Turkey and the United Kingdom and the Greek and Turkish Cypriot communities met for the first time in London on March 23, 1959, to prepare the final treaty.

EAST AND WEST AFRICAN HIGH COMMISSIONS, ETC.

EAST AFRICA HIGH COMMISSION

The East Africa High Commission, consisting of the Governors of Kenya, Tanganyika and Uganda, was constituted by the East Africa (High Commission) Order in Council, 1947, and came into operation on January 1, 1948. The Governor of Kenya is the Chairman of the High Commission, and in his absence the High Commission appoints one of its members to be Chairman.

The High Commission administers certain inter-territorial services such as: The East African

Directorate of Civil Aviation, the East African Income Tax Department, the East African Posts and Telecommunications Administration, the East African Railways and Harbours Administration, the East African Customs and Excise Department, the East African Meteorological Department, the East African Statistical Department, the East African Literature Bureau, the Royal East African Navy, the East African Department of Economic Co-ordination, the East African Office in London and various research organisations. Responsibility for the administration of these services rests with the Administrator, the Financial Secretary and the Postmaster General.

The East Africa Central Legislative Assembly was established by Order in Council in 1947, and by further Orders in Council has had its life extended until December 31, 1959. It is presided over by a Speaker and consists of seven *ex officio* members who are officers in the High Commission's service, six nominated members and twenty unofficial members. Of the nominated members, two each are appointed by the Governors of Kenya, Tanganyika and Uganda. Of the unofficial members, six are appointed from each of the three territories, three of these being appointed by the Governor and the other three elected by the Legislative Council; the remaining two unofficial members are Arabs, and are appointed by the High Commission.

The High Commission has power to legislate, with the advice and consent of the Assembly, in respect of certain matters of common interest to the three territories, such as civil aviation, customs and excise, defence, income tax, inter-territorial research, Makerere College, posts and telegraphs, meteorological services, statistics, railways, harbours and inland water transport. It has also power to legislate with the advice and consent of the Legislative Councils of the three Territories on any matter concerned with the peace, order and good government of those territories.

FALKLAND ISLANDS

These, the only considerable group in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 52° 15'-53° S. lat. and 57° 40'-62° W. long. They consist of East Falkland (area 2,580 sq. miles), West Falkland (2,038 sq. miles) and upwards of 100 small islands in the aggregate, the total estimated population in 1958 being 2,238. Mount Adam, the loftiest peak, rises 2,315 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. A settlement was made by France in 1764; this was subsequently sold to Spain, but the latter country recognized Great Britain's title to a part at least of the group in 1771. The settlement was destroyed by the Americans in 1831. In 1833 occupation was resumed by the British for the protection of the seal-fisheries, and the islands were permanently colonized as the most southerly organized colony of the British Empire. The climate is cold, the thermometer ranging in winter from 20° to 50°, and in summer from 46° Fahrenheit; it is notably windy. The islands are chiefly moorland. The population is mainly British, and is principally engaged in sheep-farming, to which practically all the land in the colony is devoted, 611,421 sheep being carried in 1958. The chief exports are wool, tallow, hides and sheepskins. The only important settlement is Stanley, on the coast of East Falkland.
